Food Safety Testing Equipment Market

Global Forecast 2026-2032

MRR-1A1A064C0462 | October 2026

Great Place To Work. Certified FEB 2026-FEB 2027 INDIA

Table of Contents

1. Preface 7
   1.1. Objectives of the Study 7
   1.2. Market Definition 7
   1.3. Market Segmentation & Coverage 8
   1.4. Years Considered for the Study 23
   1.5. Currency Considered for the Study 24
   1.6. Language Considered for the Study 24
   1.7. Key Stakeholders 24
2. Research Methodology 26
   2.1. Introduction 26
   2.2. Research Design 26
      2.2.1. Primary Research 27
      2.2.2. Secondary Research 27
   2.3. Research Framework 27
      2.3.1. Qualitative Analysis 28
      2.3.2. Quantitative Analysis 28
   2.4. Market Size Estimation 29
      2.4.1. Top-Down Approach 29
      2.4.2. Bottom-Up Approach 29
   2.5. Data Triangulation 29
   2.6. Research Outcomes 30
   2.7. Research Assumptions 30
   2.8. Research Limitations 31
3. Executive Summary 32
   3.1. Introduction 32
   3.2. CXO Perspective 32
   3.3. New Revenue Opportunities 33
   3.4. Next-Generation Business Models 34
   3.5. Industry Roadmap 35
4. Market Overview 37
   4.1. Introduction 37
   4.2. Key Growth Contribution 41
   4.3. Industry Ecosystem & Value Chain Analysis 65
      4.3.1. Supply-Side Analysis 66
      4.3.2. Demand-Side Analysis 67
      4.3.3. Stakeholder Analysis 68
   4.4. Market Dynamics 69
      4.4.1. Key Drivers 69
         4.4.1.1. Documented verification requirements create application-specific purchasing triggers 69

4.4.1.2. Customer assurance requirements connect safety documentation to supply-chain access 70
4.4.1.3. Connected instruments extend the purchasing case to records management 70
4.4.1.4. Public surveillance sustains specialist laboratory purchasing requirements 71
4.4.2. Key Restraints 71
4.4.2.1. Risk-based obligations do not establish mandatory equipment ownership 71
4.4.2.2. External and temporary fulfillment can displace permanent acquisitions 71
4.4.2.3. Recognition and accreditation constrain the commercially usable choice set 72
4.4.3. Key Opportunities 72
4.4.3.1. Selective renewal of a documented laboratory equipment gap 72
4.4.3.2. Accountable monitoring records across food-business sites 73
4.4.3.3. Authorized local supply and handover for a defined territory 73
4.4.3.4. Complete reader packages aligned with a bounded acceptance record 73
4.4.4. Key Challenges 74
4.4.4.1. Equipment fulfillment must cover the buyer's full lifecycle package 74
4.4.4.2. Connected equipment does not automatically deliver accepted reporting 74
4.4.4.3. Local channel accountability must be established contract by contract 74
4.5. Porter's Five Forces Analysis 75
4.6. PESTLE Analysis 76
4.7. Market Outlook 77
4.7.1. Near-Term Market Outlook (0-2 Years) 78
4.7.2. Medium-Term Market Outlook (3-5 Years) 79
4.7.3. Long-Term Market Outlook (5-10 Years) 80
4.8. Go-to-Market Strategy 80
5. Market Insights 83
5.1. Consumer Insights & End-User Perspective 83
5.2. Consumer Experience Benchmarking 83
5.3. Opportunity Mapping 84
5.4. Distribution Channel Analysis 87
5.5. Pricing Trend Analysis 88
5.6. Regulatory Compliance & Standards Framework 89
5.7. ESG & Sustainability Analysis 90
5.8. Disruption & Risk Scenarios 91
5.9. Return on Investment & Cost-Benefit Analysis 92
6. Cumulative Impact of Artificial Intelligence 2026 94
7. Food Safety Testing Equipment Market, by Equipment Type 96
7.1. Analytical Instruments & Test Readers 106
7.2. Product Safety Inspection Systems 115
7.3. Safety-Condition Measurement & Monitoring Equipment 125
7.4. Sample Preparation & Handling Equipment 136
7.5. Test Incubation & Culture-Handling Equipment 145
7.6. Sampling Equipment 156
8. Food Safety Testing Equipment Market, by Technology Platform 165
8.1. Mass Spectrometry 177
8.2. X-Ray Imaging 186

8.3. Physical Property Metrology 195
8.4. Metal Detection 205
8.5. Mechanical & Fluidic Sample Handling 215
8.6. Chromatography & Electrophoresis 225
8.7. Thermal Sample Conditioning 234
8.8. Optical Imaging & Machine Vision 243
8.9. Nucleic Acid Amplification & Sequencing 253
8.9.1. PCR Platforms 264
8.9.2. Isothermal Amplification Platforms 275
8.9.3. DNA Sequencing Platforms 284
8.10. Electrochemical Analysis 293
8.11. Spectroscopy & Photometry 302
8.12. Culture-Based Microbiology 311
8.13. Affinity & Biochemical Assay Platforms 321
8.14. Bioluminescence & Chemiluminescence 331
8.15. Flow Cytometry 341
8.16. Radiometric Analysis 351

9. Food Safety Testing Equipment Market, by Testing Objective 360
9.1. Physical Contaminant Inspection 368
9.2. Chemical Contaminant and Residue Testing 377
9.3. Microbiological Safety Testing 387
9.4. Preventive Safety-Condition Monitoring 397
9.5. Food Allergen Testing 406
9.6. Hygiene Verification 415
9.7. Radiological Contamination Testing 425

10. Food Safety Testing Equipment Market, by End User 435
10.1. Food and Beverage Manufacturers and Packers 446
10.2. Independent Testing Laboratories 456
10.3. Foodservice Operators 466
10.4. Government Food-Control Organizations 476
10.5. Food Retailers 485
10.6. Primary Food Producers 495
10.7. Academic and Research Institutions 504
10.8. Food-Contact Material Manufacturers 514
10.9. Food Distribution and Logistics Businesses 524

11. Food Safety Testing Equipment Market, by Deployment Configuration 534
11.1. Stationary Standalone Equipment 542
11.2. Production-Line-Integrated Equipment 552
11.3. Portable Equipment 562

12. Food Safety Testing Equipment Market, by Sales Channel 573
12.1. Direct Sales 581
12.2. Distributor and Reseller Sales 591
12.3. Agent- and Broker-Mediated Sales 601

13. Food Safety Testing Equipment Market, by Tested Matrix....611
13.1. Food and Beverage Products and Ingredients....619
13.1.1. Meat and Poultry Products....634
13.1.2. Cereals and Bakery Products....642
13.1.3. Dairy Products and Alternatives....651
13.1.4. Fruits, Vegetables, Nuts, and Seeds....661
13.1.5. Non-Dairy Beverages and Packaged Drinking Water....669
13.1.6. Fish and Seafood Products....678
13.1.7. Salt, Spices, Soups, Sauces, Salads, and Protein Products....688
13.1.8. Confectionery and Sweeteners....696
13.1.9. Prepared Meals and Composite Dishes....705
13.1.10. Special Dietary Foods and Supplements....714
13.1.11. Ready-to-Eat Savory Snacks....724
13.1.12. Food Additives and Processing Aids....733
13.1.13. Fats, Oils, and Fat Emulsions....742
13.1.14. Eggs and Egg Products....751
13.1.15. Edible Ices....761
13.2. Food-Chain Environments....769
13.3. Agricultural, Ingredient, and Process Water....779
13.4. Food-Contact Materials and Articles....789
14. Food Safety Testing Equipment Market, by Region....799
14.1. North America....807
14.2. Asia-Pacific....837
14.3. Europe....868
14.4. Latin America....901
14.5. Middle East....931
14.6. Africa....961
15. Food Safety Testing Equipment Market, by Group....991
15.1. NATO....998
15.2. G7....1031
15.3. European Union....1062
15.4. BRICS....1094
15.5. ASEAN....1124
15.6. GCC....1154
16. Food Safety Testing Equipment Market, by Country....1184
16.1. United States....1195
16.2. China....1223
16.3. Japan....1252
16.4. Germany....1282
16.5. France....1311
16.6. Canada....1340
16.7. United Kingdom....1370
16.8. Italy....1399
16.9. Brazil....1428

16.10. Spain....1458
16.11. India....1487
16.12. South Korea....1516
16.13. Russia....1545
16.14. Australia....1574
16.15. Mexico....1603
17. Competitive Landscape....1633
17.1. Market Share Analysis, 2025....1633
17.2. Market Concentration Analysis, 2025....1643
17.3. Recent Developments & Impact Analysis, 2025....1647
17.4. Product Portfolio Analysis, 2025....1648
17.5. Benchmarking Analysis, 2025....1656
18. Company Profiles....1664
18.1. bioMérieux....1664
18.2. Neogen Corporation....1664
18.3. Hygiena....1665
18.4. Agilent Technologies, Inc.....1666
18.5. Bruker Corporation....1667
18.6. R-Biopharm AG....1668
18.7. FOSS....1669
18.8. Sartorius....1669
18.9. METTLER TOLEDO....1670
18.10. Interscience....1671
18.11. Clear Labs....1672
18.12. Hanna Instruments....1672
18.13. LCTech GmbH....1673
18.14. BIOLAN....1674
18.15. Testo....1675
18.16. Novasina....1676
18.17. DKSH....1677
19. Companies Covered....1679
20. Key Experts....1705

1. Preface

1.1. Objectives of the Study

- Which documented Food Safety Testing Equipment offerings serve the accepted equipment functions, testing objectives, and tested matrices, and how can their participation be distinguished from broader laboratory, industrial, or service portfolios?
- What purchasing, qualification, recognition, and acceptance conditions apply to the relevant end users, and which conditions must a supplier satisfy before an offering becomes a credible purchasing alternative?
- Which ownership, licensing, authorization, and territorial rights support an offering's commercial access, and what must be established before extending a conclusion from one jurisdiction to another?
- What commercial responsibilities are documented for Direct Sales, Distributor and Reseller Sales, and Agent- and Broker-Mediated Sales, including customer access, contracting, support, and continuity of supply?
- How do compatibility, integration, training, service coverage, and switching obligations affect buyer choices among Portable Equipment, Stationary Standalone Equipment, and Production-Line-Integrated Equipment?
- Which supplier capabilities and commercial relationships can be substantiated, and how do they change the set of credible competitors without treating a broad portfolio or technology label as proof of competitive advantage?
- How does the choice between internal equipment ownership and independent testing services affect buyer responsibilities and qualitative ownership economics while keeping laboratory-service activity outside the equipment boundary?
- Which comparability conditions are necessary to interpret mixed portfolios, equipment packages, and intermediary relationships consistently across the historical, base, estimated, and forecast periods?

1.2. Market Definition

Food Safety Testing Equipment covers equipment for food-safety sampling, sample preparation and handling, test incubation and culture handling, analytical measurement and reading, product safety inspection, hygiene verification, and preventive safety-condition monitoring. The study includes portable, stationary standalone, and production-line-integrated configurations; it is not confined to laboratory analyzers or direct testing of finished foods.

The included application contexts encompass food and beverage products and ingredients; agricultural, ingredient, and process water; food-contact materials and articles; and food-chain environments. Buyers extend across primary production, food and beverage manufacturing and packing, food-contact material manufacturing, distribution and logistics, retail,

foodservice, independent testing laboratories, government food-control organizations, and academic and research institutions.

The commercial boundary follows the included equipment offering rather than every business activity of a participating supplier. Upstream materials and separately supplied non-equipment reagents, software, and testing services provide value-chain context rather than independent equipment categories. Associated licensing, distribution, integration, and service relationships are relevant where they affect procurement, access, switching, or support for the included equipment.

The geographic boundary is Global within Food & Beverage. Jurisdiction-specific evidence informs interpretation within that worldwide scope rather than replacing it with a selected-country market. Participation in an adjacent business does not by itself establish an in-scope equipment capability.

1.3. Market Segmentation & Coverage

Equipment Type separates offerings by commercial function: Sampling Equipment; Sample Preparation & Handling Equipment; Test Incubation & Culture-Handling Equipment; Analytical Instruments & Test Readers; Product Safety Inspection Systems; and Safety-Condition Measurement & Monitoring Equipment. This axis retains supporting equipment, laboratory instruments, inspection systems, and preventive monitoring within the study while distinguishing their purchasing roles.

Technology Platform covers Chromatography & Electrophoresis; Mass Spectrometry; Spectroscopy & Photometry; Nucleic Acid Amplification & Sequencing, including PCR Platforms, Isothermal Amplification Platforms, and DNA Sequencing Platforms; Affinity & Biochemical Assay Platforms; Bioluminescence & Chemiluminescence; Culture-Based Microbiology; Flow Cytometry; Electrochemical Analysis; Radiometric Analysis; Optical Imaging & Machine Vision; X-Ray Imaging; Metal Detection; Physical Property Metrology; Mechanical & Fluidic Sample Handling; and Thermal Sample Conditioning. These categories describe the accepted platform identities for commercial comparison, not evidence that every platform serves every application.

Testing Objective covers Microbiological Safety Testing; Food Allergen Testing; Chemical Contaminant and Residue Testing; Radiological Contamination Testing; Physical Contaminant Inspection; Hygiene Verification; and Preventive Safety-Condition Monitoring. This axis distinguishes the buyer's safety purpose, including direct testing, inspection, verification, and prevention, without presuming that offerings addressing different purposes are substitutes.

End User covers Primary Food Producers; Food and Beverage Manufacturers and Packers; Food-Contact Material Manufacturers; Food Distribution and Logistics Businesses; Food Retailers; Foodservice Operators; Independent Testing Laboratories; Government Food-Control Organizations; and Academic and Research Institutions. The purchasing organization identifies whose qualification requirements, procurement authority, and support expectations need to be understood.

Deployment Configuration covers Portable Equipment; Stationary Standalone Equipment; and Production-Line-Integrated Equipment. This axis relates the offering to mobility, installation, and integration commitments, keeping the deployment decision distinct from the underlying analytical platform.

Sales Channel covers Direct Sales; Distributor and Reseller Sales; and Agent- and Broker-Mediated Sales. It identifies the commercial route to the buyer and the relationship through which contracting, customer access, and support responsibilities must be established.

Tested Matrix covers Food and Beverage Products and Ingredients, comprising Dairy Products and Alternatives; Fats, Oils, and Fat Emulsions; Edible Ices; Fruits, Vegetables, Nuts, and Seeds; Confectionery and Sweeteners; Cereals and Bakery Products; Meat and Poultry Products; Fish and Seafood Products; Eggs and Egg Products; Salt, Spices, Soups, Sauces, Salads, and Protein Products; Special Dietary Foods and Supplements; Non-Dairy Beverages and Packaged Drinking Water; Ready-to-Eat Savory Snacks; Prepared Meals and Composite Dishes; and Food Additives and Processing Aids. It also covers Agricultural, Ingredient, and Process Water; Food-Contact Materials and Articles; and Food-Chain Environments. This axis preserves the distinct commercial application contexts of food products, water, contact materials, and environments without expanding the study to unrelated industrial testing.

Table 1. Global Food Safety Testing Equipment Market Segmentation & Coverage

Segmentation	Coverage
Deployment Configuration	• Stationary Standalone Equipment • Production-Line-Integrated Equipment • Portable Equipment
End User	• Food and Beverage Manufacturers and Packers • Independent Testing Laboratories • Foodservice Operators • Government Food-Control Organizations • Food Retailers • Primary Food Producers • Academic and Research Institutions • Food-Contact Material Manufacturers • Food Distribution and Logistics Businesses
Equipment Type	• Analytical Instruments & Test Readers • Product Safety Inspection Systems • Safety-Condition Measurement & Monitoring Equipment • Sample Preparation & Handling Equipment • Test Incubation & Culture-Handling Equipment • Sampling Equipment
Sales Channel	• Direct Sales • Distributor and Reseller Sales • Agent- and Broker-Mediated Sales

Table 1 - continued

Segmentation	Coverage

Technology Platform	• Mass Spectrometry
	• X-Ray Imaging
	• Physical Property Metrology
	• Metal Detection
	• Mechanical & Fluidic Sample Handling
	• Chromatography & Electrophoresis
	• Thermal Sample Conditioning
	• Optical Imaging & Machine Vision
	• Nucleic Acid Amplification & Sequencing
	  o PCR Platforms
	  o Isothermal Amplification Platforms
	  o DNA Sequencing Platforms
	• Electrochemical Analysis
	• Spectroscopy & Photometry
	• Culture-Based Microbiology
	• Affinity & Biochemical Assay Platforms
	• Bioluminescence & Chemiluminescence
	• Flow Cytometry
	• Radiometric Analysis

Tested Matrix	• Food and Beverage Products and Ingredients
	  o Meat and Poultry Products
	  o Cereals and Bakery Products
	  o Dairy Products and Alternatives
	  o Fruits, Vegetables, Nuts, and Seeds
	  o Non-Dairy Beverages and Packaged Drinking Water
	  o Fish and Seafood Products
	  o Salt, Spices, Soups, Sauces, Salads, and Protein Products
	  o Confectionery and Sweeteners
	  o Prepared Meals and Composite Dishes
	  o Special Dietary Foods and Supplements
	  o Ready-to-Eat Savory Snacks
	  o Food Additives and Processing Aids
	  o Fats, Oils, and Fat Emulsions
	  o Eggs and Egg Products
	  o Edible Ices
	• Food-Chain Environments
	• Agricultural, Ingredient, and Process Water
	• Food-Contact Materials and Articles

Testing Objective	• Physical Contaminant Inspection • Chemical Contaminant and Residue Testing • Microbiological Safety Testing • Preventive Safety-Condition Monitoring • Food Allergen Testing • Hygiene Verification • Radiological Contamination Testing

Sources & Evidence

1. Technical Specifications for Equipment Used in Chemical Analysis of Food - FSSAI

   · Taxonomy evidence: The official catalog distinguishes primary analytical instruments from auxiliary equipment and covers food safety and quality together; it is not an equipment-market partition. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))

   · Taxonomy evidence: Its contents separately name chromatographs and agarose and vertical electrophoresis systems. Electrophoresis appears among auxiliary equipment, so safety-specific purchasing and purchased function are not established. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))

   · Taxonomy evidence: The catalog separately identifies PCR equipment, spectrometers, chromatographs, and an ELISA reader, supporting recognition of analytical hardware rather than consumable kits. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))

   · Taxonomy evidence: The auxiliary-equipment headings recognize homogenizers, centrifuges, sample-extraction hardware, and dispensing equipment. Inclusion in this market still requires food-safety attribution. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))

   · Taxonomy evidence: An ELISA-reader heading supports the immunoassay-reader subset, not the entire non-immunological biochemical family. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))

2. ISO 24914:2026 - Microbiology of the Food Chain - Loop-Mediated Isothermal Amplification (LAMP) for the Detection of Microorganisms and Associated Genetic Markers - General Requirements and Definitions

   · Taxonomy evidence: ISO xx.xx:2026 was published on January xx.xx 2026 and recognizes LAMP platforms in food-chain analysis, including human-food and food-production environmental contexts. This establishes current category recognition, not 2025 sales. ([iso.org](https://www.iso.org/standard/xx.xx.html))

   · Taxonomy evidence: The public scope distinguishes LAMP from PCR and supports retention of a separately named isothermal branch within the molecular-platform parent. ([iso.org](https://www.iso.org/standard/xx.xx.html))

3. Rapid In-Field Diagnostics: Horizon Scanning and Technology Readiness Level Study With a Technology Pilot Study - FSA Research and Evidence

   · Taxonomy evidence: The FSA-published study documents portable PCR and isothermal instrument settings in on-site food-safety work, supporting designed portability independently of buyer identity. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

   · Taxonomy evidence: The study recognizes instrument-based LAMP platforms in food-safety applications, adding independent deployment context without establishing routine global adoption. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

   · Taxonomy evidence: The publication identifies food-industry ATP luminometers and luminometer readout associated with chemiluminescence products; it does not isolate equipment-sale consideration. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

   · Taxonomy evidence: It distinguishes nonspecific ATP cleanliness measurements from identification of a particular microorganism, supporting the objective boundary without treating all hygiene-related tests as equivalent. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

   · Taxonomy evidence: Grower and agronomist interviews identify possible direct investment or service-based access, not completed farm equipment purchases. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

   · Taxonomy evidence: The documented irrigation-water setting establishes food-chain input-water relevance rather than packaged drinking-water testing. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

4. Food Code 2026 - FDA

   · Taxonomy evidence: FDA's 2026 Food Code identifies retail and foodservice as distinct food-safety operating settings. It is a model offered for jurisdictional adoption, not a uniform global purchasing requirement. ([fda.gov](https://www.fda.gov/food/fda-food-code/food-code-2026))

   · Taxonomy evidence: The 2026 model explicitly addresses retail food stores, supporting continued recognition of retail operating users without establishing instrument purchases. ([fda.gov](https://www.fda.gov/food/fda-food-code/food-code-2026))

   · Taxonomy evidence: Foodservice is separately identified in the 2026 model's scope. Current model status does not retroactively establish 2025 requirements or equipment revenue. ([fda.gov](https://www.fda.gov/food/fda-food-code/food-code-2026))

5. Food Categories - Codex GSFA
   - Taxonomy evidence: The Codex hierarchy provides recognized food descriptors, not equipment-spending segments. Adapting its categories therefore requires explicit product crosswalks. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
   - Taxonomy evidence: The classification supplies commodity descriptors for foods and ingredients. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
   - Taxonomy evidence: The hierarchy places soybean beverages under cereal/soybean products, while separately identifying bakery products. This prevents treating the retained combined node as a literal import of all underlying codes. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
   - Taxonomy evidence: Bakery products are category xx.xx. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
   - Taxonomy evidence: Soybean beverages and the main beverage category appear in different parts of the hierarchy. Assigning all non-dairy beverage-form products to one retained node is an analytical adaptation, not an official equivalence. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
   - Taxonomy evidence: Foodstuffs are arranged in a hierarchical category system. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
   - Taxonomy evidence: Confectionery is category xx.xx. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
   - Taxonomy evidence: Category xx.xx covers seasonings, soups, sauces, salads, yeast, and protein products. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
   - Taxonomy evidence: Category xx.xx separately includes infant, medical, dietetic, and supplement products. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
   - Taxonomy evidence: Category xx.xx includes starch-based, processed-nut, and fish snacks. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))
6. Dairy Products and Analogues, Excluding Products of Category 02.0 (01.0) - Codex
   - Taxonomy evidence: The official dairy descriptor recognizes dairy products and a defined analog subset involving replacement of milk fat. It does not establish that every commercially described dairy alternative belongs to this official category. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=b272ded6-249a-f111-b8dc-70a8a5613865))
   - Taxonomy evidence: Food category xx.xx recognizes dairy products and defined analogs while excluding category xx.xx fat products. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=b272ded6-249a-f111-b8dc-70a8a5613865))
7. Beverages, Excluding Dairy Products (14.0) - Codex
   - Taxonomy evidence: The official beverage descriptor recognizes alcoholic and nonalcoholic beverages and places dairy-based beverages in the dairy category. This supports a beverage-versus-dairy distinction but not a complete equipment-market allocation. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=a073ded6-249a-f111-b8dc-70a8a5613865))
   - Taxonomy evidence: Food category xx.xx distinguishes alcoholic and nonalcoholic beverages from dairy-based beverages, which remain in category xx.xx. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=a073ded6-249a-f111-b8dc-70a8a5613865))

8. Frequently Asked Questions - Wholesale - U.S. Census Bureau
   - Taxonomy evidence: Census distinguishes manufacturer-affiliated selling, own-account merchandise resale, agency transactions, and electronic intermediation. Ordering medium alone therefore does not establish the economic channel. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
   - Taxonomy evidence: Manufacturer sales branches or offices are defined by ownership or corporate affiliation, supporting treatment of controlled selling organizations as direct rather than independent resale. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
   - Taxonomy evidence: Manufacturer sales branches or offices are defined through ownership or corporate affiliation with the manufacturer, supporting their treatment as owned selling rather than independent distribution. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
   - Taxonomy evidence: Merchant distributors purchase merchandise from unrelated manufacturers and sell it to customers, supporting an own-account resale distinction. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
   - Taxonomy evidence: Merchant wholesalers buy merchandise on their own account, while distributors and importers are distinguished by their commercial activity rather than ordering medium. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
   - Taxonomy evidence: Agency roles and fee-based electronic markets are recognized separately from own-account dealing. These general roles do not establish exact-market participation or channel shares. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
9. Legislation - Food-Contact Materials - European Commission
   - Taxonomy evidence: The Commission identifies migration assessment and compliance documentation within food-contact-material safety. This supports a material-safety matrix distinct from surface contamination. ([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en))
   - Taxonomy evidence: Manufacturer responsibilities and supporting compliance documentation are established, but the page does not establish manufacturers' ownership of testing instruments rather than outsourced laboratory use. ([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en))
   - Taxonomy evidence: Food-contact chemical migration is a recognized safety-compliance subject, supporting its inclusion within chemical-safety testing rather than packaging-production activity. ([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en))

10. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods - Food Standards Agency

- Taxonomy evidence: The commissioned review's commercial cost section separately identifies plate readers, PCR instruments, LC-MS instruments, consumables, and service-related costs, supporting hardware-only accounting. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Taxonomy evidence: Quote-based hardware discussion identifies plate readers, real-time PCR instruments, and LC-MS instruments separately from common support equipment. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Taxonomy evidence: Different analytical platforms are treated as distinct hardware investments. Their differing costs do not establish comparable market-wide price/quality tiers. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Taxonomy evidence: The FSA-commissioned review distinguishes ELISA, PCR, and LC-MS food-allergen technologies and separates associated hardware from consumables and testing fees. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Taxonomy evidence: The commercial comparison identifies PCR instrumentation independently of plate-reader and LC-MS hardware. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Taxonomy evidence: The food-allergen hardware comparison includes real-time PCR instruments. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Taxonomy evidence: LC-MS equipment is identified as a separate hardware investment; this supports platform recognition, not a global revenue allocation. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Taxonomy evidence: Identifies LC-MS hardware as distinct from immunoassay-reader and PCR equipment. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Taxonomy evidence: The cost assessment concerns an established testing-service laboratory, providing an external laboratory acquisition setting without measuring its food-safety-only capital spending. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Taxonomy evidence: Documents ELISA and lateral-flow food-allergen testing, with plate-reader hardware identified for ELISA. This does not establish the non-immunological biochemical portion. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))

11. ISO 19036:2019 - Microbiology of the Food Chain - Estimation of Measurement Uncertainty for Quantitative Determinations

- Taxonomy evidence: The current public scope separately recognizes colony-count and MPN approaches within food-chain quantitative microbiology, supporting the culture-based category without defining equipment sales. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))
- Taxonomy evidence: Recognizes colony-count and MPN approaches, supporting a separate culture-based enumeration family. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))
- Taxonomy evidence: Flow cytometry is explicitly recognized as a food-chain instrumental approach, supporting category recognition but not food-safety-attributable purchasing volumes. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))
- Taxonomy evidence: Explicitly recognizes flow cytometry among food-chain microbiology instrumental approaches. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))
- Taxonomy evidence: ATP measurement remains recognized in the public food-chain scope; this supports the ATP-linked subset rather than every chemiluminescence platform. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))
- Taxonomy evidence: Explicitly recognizes ATP measurement in food-chain analysis. This supports the ATP-linked portion, not every chemiluminescence platform. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))
- Taxonomy evidence: The scope distinguishes colony-count/MPN, impediometry, ATP, flow cytometry, and qPCR approaches in food-chain analysis, without defining an exhaustive equipment market. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))

12. Environmental Sampling - FDA

- Taxonomy evidence: FDA distinguishes environmental contamination on food-contact and non-food-contact surfaces from product sampling. This directly supports the surface-contamination subset, not every airborne or condition-monitoring use.
([fda.gov](https://www.fda.gov/food/sampling-protect-food-supply/environmental-sampling))

- Taxonomy evidence: FDA distinguishes food-production environmental samples from product samples and recognizes both food-contact and non-food-contact surfaces. This directly supports the surface-contamination portion of the environmental matrix, not every proposed environmental-monitoring use.
([fda.gov](https://www.fda.gov/food/sampling-protect-food-supply/environmental-sampling))

- Taxonomy evidence: Environmental samples may be assessed for named microbial hazards. Their environmental location does not make the testing objective nonspecific hygiene verification.
([fda.gov](https://www.fda.gov/food/sampling-protect-food-supply/environmental-sampling))

13. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory

- Taxonomy evidence: Annexure I distinguishes chemical-analysis, microbiology, and supporting equipment. Its Indian food-laboratory scope includes safety and quality; it is not a global market partition or blanket inclusion rule.
([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

- Taxonomy evidence: Lists chromatographs, ICP-MS, spectrophotometers, an ELISA reader, and a digital colony counter as food-laboratory instruments.
([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

- Taxonomy evidence: Lists homogenizers, grinding mills, centrifuges, pipettes, evaporators, and microwave digestion systems among supporting equipment.
([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

- Taxonomy evidence: Names gas, high-performance liquid, and ion chromatographs; it does not establish the electrophoresis portion.
([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

- Taxonomy evidence: Includes inductively coupled plasma mass-spectrometric equipment.
([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

- Taxonomy evidence: Names atomic-absorption, FT-IR, fluorescence, and UV-visible instruments.
([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

- Taxonomy evidence: Lists pH, conductivity/TDS, and Karl Fischer coulometric instruments.
([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

- Taxonomy evidence: Lists analytical balances, thermohygrometers, and water-activity meters.
([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

- Taxonomy evidence: Includes digital colony-counting equipment within its microbiology instrument list.
([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

14. ISO 7218:2024 - Microbiology of the Food Chain - General Requirements and Guidance for Microbiological Examinations, Public Preview

    · Taxonomy evidence: Equipment headings distinguish incubators and controlled heating equipment from inoculation hardware, including spiral platers. ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))

    · Taxonomy evidence: Separately recognizes pipettors, diluters, homogenizers, centrifuges, and filtration/separation equipment. ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))

    · Taxonomy evidence: Its equipment classification recognizes mechanical homogenization, dispensing, centrifugal separation, and filtration hardware. ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))

    · Taxonomy evidence: Recognizes incubators, controlled baths, and heating blocks as temperature-controlled equipment categories. ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))

    · Taxonomy evidence: Distinguishes temperature-monitoring devices and balances/gravimetric diluters in its equipment headings. ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))

15. ISO 22174:2024 - Microbiology of the Food Chain - Polymerase Chain Reaction (PCR) for the Detection and Quantification of Microorganisms - General Requirements and Definitions

    · Taxonomy evidence: Public scope establishes PCR as a named food-chain analytical platform applicable to human food and food-production environmental samples. ([iso.org](https://www.iso.org/standard/xx.xx.html))

    · Taxonomy evidence: Provides independent food-chain recognition for the PCR amplification portion of the molecular-platform parent. ([iso.org](https://www.iso.org/standard/xx.xx.html))

16. ISO 24914 - Microbiology of the Food Chain - Loop-Mediated Isothermal Amplification (LAMP) for the Detection of Microorganisms - Public Scope

    · Taxonomy evidence: The public scope recognizes LAMP as a food-chain detection platform and distinguishes its general requirements from those for PCR. No operating guidance is reproduced. ([iso.org](https://www.iso.org/obp/ui?_escaped_fragment_=iso%3Astd%3Aiso%3A24914%3Aed-xx.xx%3Av1%3Aen))

    · Taxonomy evidence: Supports inclusion of a separately named isothermal-amplification branch within the molecular-platform parent, without establishing current product sales or authorization. ([iso.org](https://www.iso.org/obp/ui?_escaped_fragment_=iso%3Astd%3Aiso%3A24914%3Aed-xx.xx%3Av1%3Aen))

17. TechTalk Podcast Episode 2: Whole Genome Sequencing in the New Era of Smarter Food Safety

    · Taxonomy evidence: Describes whole-genome sequencing in food-safety surveillance and facility investigations, establishing a food-safety use category rather than universal industry adoption. ([fda.gov](https://www.fda.gov/food/new-era-smarter-food-safety-techtalk-podcast/techtalk-podcast-episode-xx.xx-whole-genome-sequencing-new-era-smarter-food-safety))

    · Taxonomy evidence: Supports sequencing as a distinct analytical-platform branch alongside amplification within the molecular parent. ([fda.gov](https://www.fda.gov/food/new-era-smarter-food-safety-techtalk-podcast/techtalk-podcast-episode-xx.xx-whole-genome-sequencing-new-era-smarter-food-safety))

18. BRCGS Global Standard Food Safety, Issue 9
    - Taxonomy evidence: Section xx.xx recognizes food foreign-body detection equipment, including metal-detection, X-ray, and optical systems. Its broader removal-equipment coverage is not imported into this taxonomy. ([nifcc.co.uk](https://www.nifcc.co.uk/site/wp-content/uploads/2023/xx.xx/BRCGS_Food_Safety_Standard_Issue_9.pdf))
    - Taxonomy evidence: Recognizes optical sorting equipment for final-product testing; only identifiable in-scope sensing/inspection hardware is allocated here, not an entire processing installation. ([nifcc.co.uk](https://www.nifcc.co.uk/site/wp-content/uploads/2023/xx.xx/BRCGS_Food_Safety_Standard_Issue_9.pdf))
    - Taxonomy evidence: Explicitly identifies X-ray inspection equipment as a food foreign-body detection category. ([nifcc.co.uk](https://www.nifcc.co.uk/site/wp-content/uploads/2023/xx.xx/BRCGS_Food_Safety_Standard_Issue_9.pdf))
    - Taxonomy evidence: Identifies metal detectors separately from X-ray equipment and passive magnets. ([nifcc.co.uk](https://www.nifcc.co.uk/site/wp-content/uploads/2023/xx.xx/BRCGS_Food_Safety_Standard_Issue_9.pdf))
19. HACCP Principles & Application Guidelines
    - Taxonomy evidence: Distinguishes hazard testing from monitoring temperature, time, pH, and moisture, supporting a separate safety-condition measurement role. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))
    - Taxonomy evidence: Identifies physical measurements, including temperature, time, and moisture, as food-safety monitoring activities. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))
    - Taxonomy evidence: The guidance distinguishes biological, chemical and physical hazards and addresses monitoring and verification, providing a high-level foundation for an objective-based partition. The proposed taxonomy is an analytical adaptation, not an official FDA segmentation. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))
    - Taxonomy evidence: Physical hazards include foreign materials such as stones, glass and metal, and the guidance identifies metal detectors among product-safety devices. This supports foreign-body inspection as a distinct safety purpose. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))
    - Taxonomy evidence: The guidance recognizes monitoring of time, temperature, pH and moisture, and identifies water activity as a safety-relevant intrinsic food characteristic. These are control-condition measurements rather than direct hazard assays. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))
    - Taxonomy evidence: Its chemical-hazard examples include aflatoxin and antibiotic or pesticide residues, supporting classification of toxin and residue measurement by the chemical target rather than its origin. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))
20. Dairy Plant - Milk Sample Collector Evaluation Record
    - Taxonomy evidence: The historical dairy-plant record recognizes sample-transfer instruments and in-line samplers, establishing a durable sampling-hardware role rather than current model availability. ([fda.gov](https://www.fda.gov/files/about%20fda/published/Dairy-Plant---Milk-Sample-Collector-Evaluation-Record-%28PDF%xx.xx.pdf))
21. Total Diet Study Report: Fiscal Years 2018-2020 Radionuclides Data
    - Taxonomy evidence: Reports food-sample analysis using high-purity germanium gamma spectrometry and gas-flow proportional counting, supporting radiometric analysis rather than irradiation-processing equipment. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

22. Water Activity (aw) in Foods

- Taxonomy evidence: The historical equipment discussion identifies hygrometric instruments for assessing food water activity; it does not establish current models or installations. ([fda.gov](https://www.fda.gov/inspections-compliance-enforcement-and-criminal-investigations/inspection-technical-guides/water-activity-aw-foods))
- Taxonomy evidence: Provides a food-safety-linked measurement role for water-activity equipment, distinct from the machinery used to process or preserve food. ([fda.gov](https://www.fda.gov/inspections-compliance-enforcement-and-criminal-investigations/inspection-technical-guides/water-activity-aw-foods))

23. Laboratory development | FAO

- Taxonomy evidence: FAO distinguishes preventive process controls from sampling and testing used to verify food-safety controls, supporting separation of direct testing and verification objectives without treating them as identical activities. ([fao.org](https://www.fao.org/food-safety/food-control-systems/laboratory-development/en))
- Taxonomy evidence: FAO describes national authorities, private-sector engagement, laboratory management, universities and research centers within food-control laboratory development. These are operating and institutional roles, not an exhaustive equipment-buyer classification. ([fao.org](https://www.fao.org/food-safety/food-control-systems/laboratory-development/en))

24. Compendium of Microbiological Criteria for Food | Food Standards Australia New Zealand

- Taxonomy evidence: The compendium recognizes pathogens and indicator organisms as food-safety testing targets and covers food-production environmental monitoring. ([foodstandards.gov.au](https://www.foodstandards.gov.au/sites/default/files/publications/Documents/Compendium_revised%20Dec%xx.xx.pdf))
- Taxonomy evidence: It distinguishes rapid ATP and protein cleanliness checks from tests determining whether target microorganisms are present. ([foodstandards.gov.au](https://www.foodstandards.gov.au/sites/default/files/publications/Documents/Compendium_revised%20Dec%xx.xx.pdf))
- Taxonomy evidence: The dairy chapter recognizes in-house laboratories alongside external commercial laboratories, establishing a captive testing setting within food processing. ([foodstandards.gov.au](https://www.foodstandards.gov.au/sites/default/files/publications/Documents/Compendium_revised%20Dec%xx.xx.pdf))
- Taxonomy evidence: External accredited commercial laboratories are separately recognized as providers of food-industry testing. ([foodstandards.gov.au](https://www.foodstandards.gov.au/sites/default/files/publications/Documents/Compendium_revised%20Dec%xx.xx.pdf))

25. Food Allergies | FDA

- Taxonomy evidence: FDA treats undeclared allergens and allergen cross-contact as food-safety concerns and describes food-allergen testing using several analytical platforms. This supports a distinct allergen objective independent of technology. ([fda.gov](https://www.fda.gov/food/nutrition-food-labeling-and-critical-foods/food-allergies))
- Taxonomy evidence: The page addresses allergen controls during food manufacturing and packaging, establishing these facilities as distinct operating settings for allergen-safety programs without quantifying their equipment purchases. ([fda.gov](https://www.fda.gov/food/nutrition-food-labeling-and-critical-foods/food-allergies))

26. Chemical Contaminants & Pesticides | FDA

- Taxonomy evidence: FDA describes food testing for chemical contaminants and pesticide residues and distinguishes environmental contaminants, process contaminants and natural toxins. Its environmental examples include toxic elements and industrial chemicals; radionuclides are also listed administratively but are separated in the proposed taxonomy. ([fda.gov](https://www.fda.gov/food/chemical-contaminants-pesticides))

27. FDA Response to the Fukushima Daiichi Nuclear Power Facility Incident | FDA

· Taxonomy evidence: FDA describes routine radionuclide surveillance, laboratory measurement of radioactive contamination in food and public food-testing network capabilities. It also identifies radiation-detection equipment used for food-import screening. These establish the testing category, not equipment-market revenue.
([fda.gov](https://www.fda.gov/news-events/public-health-focus/fda-response-fukushima-daiichi-nuclear-power-facility-incident))

28. Legislation - Food Safety - European Commission

· Taxonomy evidence: The Commission identifies chemical migration testing as part of food-contact-material safety compliance, establishing an application connected to human-food chemical safety rather than packaging production.
([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en?prefLang=es))

· Taxonomy evidence: Food-contact compliance documentation and declarations are linked to manufacturers' responsibilities. This supports a distinct manufacturer compliance setting, but does not establish whether manufacturers own testing equipment or outsource the work.
([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en?prefLang=es))

29. UNSD - Classification Detail: ISIC Rev. 4, Code 10

· Taxonomy evidence: ISIC Rev. xx.xx Division xx.xx distinguishes transformation of agricultural and fishery products into food from minimal handling classified as wholesale or retail. The proposed human-food boundary excludes the classification's animal-feed activities.
([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

30. UNSD - Classification Detail: ISIC Rev. 4, Code 11

· Taxonomy evidence: ISIC Rev. xx.xx Division xx.xx separately recognizes beverage manufacturing, including nonalcoholic beverages and mineral water, supporting inclusion of beverage producers alongside food manufacturers. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

31. FSMA Final Rule on Sanitary Transportation of Human and Animal Food | FDA

· Taxonomy evidence: FDA's sanitary-transportation framework distinguishes shippers, loaders, carriers and receivers and addresses contamination prevention and temperature control. Responsibility can depend on agreements, so a transportation role alone does not identify the equipment purchaser or operator.
([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-sanitary-transportation-human-and-animal-food))

32. UNSD - Classification Detail: ISIC Rev. 4, Code 4630

· Taxonomy evidence: ISIC Rev. xx.xx Code xx.xx recognizes food and beverage wholesale as a commercial activity distinct from manufacturing and retail. Only its human-food and beverage activities fit the proposed market boundary. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

33. FDA Food Code | FDA

· Taxonomy evidence: FDA identifies grocery stores within the retail segment addressed by its Food Code, establishing a professional retail food-safety operating setting. The Food Code is a model, not a uniform worldwide requirement. ([fda.gov](https://www.fda.gov/food/retail-food-protection/fda-food-code))

· Taxonomy evidence: The same model addresses restaurants and institutional foodservice, including institutions such as nursing homes, supporting a foodservice category separate from retail.
([fda.gov](https://www.fda.gov/food/retail-food-protection/fda-food-code))

34. 2022 FDA Food Code - Print Version

- Taxonomy evidence: The model includes provision of food-temperature measuring devices, supporting a professional equipment-use setting relevant to covered retail establishments rather than only laboratory testing. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

- Taxonomy evidence: Its equipment provisions establish temperature-measurement and sanitation-verification needs relevant to foodservice operations, without establishing actual purchasing volumes. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

- Taxonomy evidence: Food-temperature measuring devices are recognized as monitoring equipment for food-safety conditions. Only separately attributable in-scope hardware qualifies under the working equipment boundary. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

- Taxonomy evidence: The model recognizes devices for checking sanitation conditions. This supports the verification objective, not inclusion of disposable test supplies or cleaning machinery. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

35. UNSD - Classification Detail: ISIC Rev. 4, Code 7120

- Taxonomy evidence: ISIC Rev. xx.xx Code xx.xx recognizes technical testing and analysis, including food-hygiene testing. It provides an economic-activity basis for distinguishing external testing businesses from captive food-industry laboratories; it does not measure their equipment spending. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

36. 4. Elements of a National Food Control System | FAO

- Taxonomy evidence: FAO describes food-control laboratories under national and subnational authorities, central reference-laboratory functions and investment in analytical facilities and instruments. This establishes government food-control organizations as equipment-operating institutions, not merely funders. ([fao.org](https://www.fao.org/xx.xx/y8705e/y8705e04.htm))

37. Equipment Grants Program | NIFA

- Taxonomy evidence: The equipment-grant program identifies higher-education and cooperative research institutions as recipients able to acquire shared special-purpose instruments for food and agricultural science. This establishes an institutional acquisition route, not a food-safety-only expenditure allocation. ([nifa.usda.gov](https://www.nifa.usda.gov/grants/funding-opportunities/equipment-grants-program))

38. Activities: Projects : LMD

- Taxonomy evidence: The public project listing identifies a university equipment-acquisition project expressly linking an analytical instrument with food-safety research. The listing establishes an acquisition-project setting, not current deployment or wholly food-safety-attributable instrument revenue. ([training-portal.nifa.usda.gov](https://training-portal.nifa.usda.gov/lmdr/projects?agency=NIFA&page=xx.xx&sort=title&source=creems_priv&state=&type=O))

39. FSMA Final Rule on Produce Safety | FDA

- Taxonomy evidence: FDA's produce-safety framework addresses food-safety testing and environmental controls at covered farm and sprout operations. It establishes primary-production testing relevance, but does not demonstrate that farms purchase durable instruments rather than use external laboratories. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-produce-safety))

40. Request for Proposal for Setting Up of Mobile Food Testing Laboratory (MFTL) - FSSAI

- Taxonomy evidence: The April 2017 mobile food-testing laboratory procurement includes handheld measurement equipment, establishing a public procurement context for portable instruments. The complete vehicle package is not equipment-only market revenue. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/RFP_Mobile_Food_Testing_Lab_21_04_2017.pdf))

- Taxonomy evidence: The procurement distinguishes manufacturer bidders and OEM dealers, providing food-laboratory-specific evidence of different supplier roles without establishing channel shares or transaction-level ownership. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/RFP_Mobile_Food_Testing_Lab_21_04_2017.pdf))

41. Guidance Document for Setting Up of a Basic Functional Food Analysis Laboratory - FSSAI

- Taxonomy evidence: The 2021 food-analysis laboratory guidance identifies benchtop instruments and fixed laboratory installations. It supports stationary equipment configurations, not blanket inclusion of every listed laboratory asset. ([fssai.gov.in](https://fssai.gov.in/upload/uploadfiles/files/Book_Food_Testing_22_12_2021.pdf))

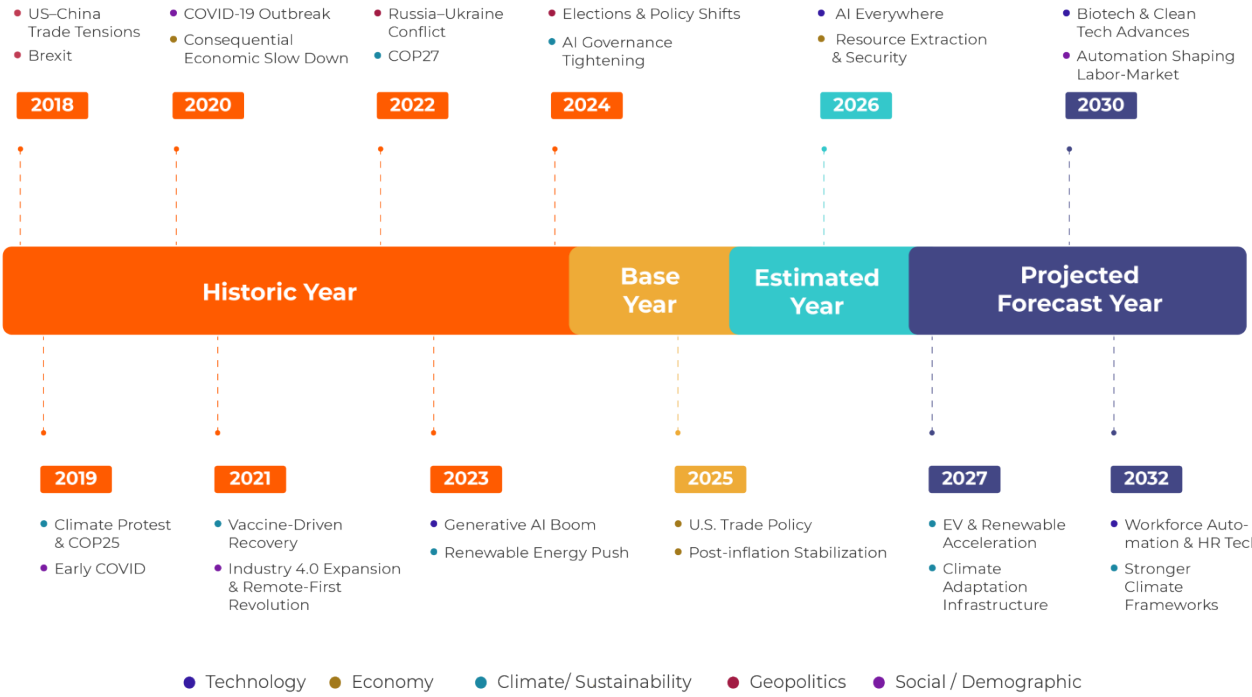
42. Food inspection technology - Food Science and Technology
    - Taxonomy evidence: The professional article describes food inspection systems installed on production lines for real-time assessment, including physical-contamination inspection. This independently supports an integrated deployment distinction.
    ([academic.oup.com](https://academic.oup.com/fst/article/xx.xx/xx.xx/xx.xx/xx.xx))
    - Taxonomy evidence: Production-line installation is a documented physical deployment distinction, separate from the underlying inspection technology.
    ([academic.oup.com](https://academic.oup.com/fst/article/xx.xx/xx.xx/xx.xx/xx.xx))
43. ISIC, Rev. 4 - Code 46: Wholesale trade, except of motor vehicles and motorcycles - UNSD
    - Taxonomy evidence: ISIC Revision xx.xx distinguishes own-account wholesale trade, manufacturer-maintained sales organizations, and commission-based intermediation. These are international commercial-role anchors, not food-safety-equipment market-share estimates.
    ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Structure/Detail/en/xx.xx/xx.xx))
    - Taxonomy evidence: The classification identifies merchant wholesalers, including industrial distributors, as businesses taking title to the goods sold.
    ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Structure/Detail/en/xx.xx/xx.xx))
    - Taxonomy evidence: The classification separately recognizes agents, brokers, and commission trade. This establishes a commercial role but not its exact-market prevalence.
    ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Structure/Detail/en/xx.xx/xx.xx))
44. 2022 NAICS Definition: 425120 Wholesale Trade Agents and Brokers - U.S. Census Bureau
    - Taxonomy evidence: Agents and brokers arrange goods transactions without taking title and receive commissions or fees; the definition also covers electronic intermediation. It does not establish food-safety-equipment sales volumes.
    ([census.gov](https://www.census.gov/naics/?details=xx.xx&input=xx.xx&year=2022))
45. Fats and oils, and fat emulsions (02.0) - Codex
    - Taxonomy evidence: Food category xx.xx encompasses fat-based products from vegetable, animal, marine, or mixed sources.
    ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=d872ded6-249a-f111-b8dc-70a8a5613865))
46. Edible ices, including sherbet and sorbet (03.0) - Codex
    - Taxonomy evidence: Food category xx.xx covers water-based frozen desserts and confections and distinguishes them from primarily dairy frozen desserts.
    ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=e472ded6-249a-f111-b8dc-70a8a5613865))
47. Fruits and vegetables, seaweeds, and nuts and seeds (04.0) - Codex
    - Taxonomy evidence: Food category xx.xx recognizes fresh and processed produce and includes fungi, roots, legumes, seaweeds, nuts, and seeds.
    ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=e572ded6-249a-f111-b8dc-70a8a5613865))
48. Sweeteners, including honey (11.0) - Codex
    - Taxonomy evidence: Food category xx.xx recognizes sugars, sweetener products, and honey, supporting the sweetener portion of the combined commodity group.
    ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=6e73ded6-249a-f111-b8dc-70a8a5613865))
49. Cereals and cereal products, excluding bakery wares (06.0) - Codex
    - Taxonomy evidence: Food category xx.xx includes unprocessed and processed cereal products and distinguishes bakery category xx.xx; the proposed node combines these two explicit groups.
    ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=1773ded6-249a-f111-b8dc-70a8a5613865))
50. Meat and meat products, including poultry and game (08.0) - Codex
    - Taxonomy evidence: Food category xx.xx covers fresh and processed meat, poultry, and game products.
    ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=4073ded6-249a-f111-b8dc-70a8a5613865))

51. Fish and fish products, including mollusks, crustaceans, and echinoderms (09.0) - Codex
    - Taxonomy evidence: Food category xx.xx recognizes fresh and processed aquatic food products, including mollusks and crustaceans. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=5373ded6-249a-f111-b8dc-70a8a5613865))
52. Eggs and egg products (10.0) - Codex
    - Taxonomy evidence: Food category xx.xx separately recognizes fresh eggs and egg products. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=6673ded6-249a-f111-b8dc-70a8a5613865))
53. Prepared foods (16.0) - Codex
    - Taxonomy evidence: The prepared-food descriptor recognizes multi-component foods requiring limited consumer preparation. The proposed category uses that positive product definition rather than a generic unmatched-food remainder. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories/food-category-details?categoryId=c673ded6-249a-f111-b8dc-70a8a5613865))
54. Joint FAO/WHO Expert Committee on Food Additives (JECFA) - FAO
    - Taxonomy evidence: JECFA's public mandate includes safety assessment of food additives, flavoring agents, and processing aids, and development of food-additive specifications. This supports material identity and safety relevance, not equipment spending. ([fao.org](https://www.fao.org/food-safety/scientific-advice/jecfa/))
55. Safe water saves water - FAO
    - Taxonomy evidence: FAO describes food-safety considerations for water used throughout food production and processing and distinguishes suitability by intended use. This supports a food-chain input-water matrix distinct from beverage products. ([fao.org](https://www.fao.org/newsroom/story/Safe-water-saves-water/))
56. Food Packaging & Other Substances that Come in Contact with Food - Information for Consumers - FDA
    - Taxonomy evidence: FDA explains that food-contact substance safety review considers testing data on migration into food and consumer exposure. This establishes contact materials as a distinct safety-assessment subject. ([fda.gov](https://www.fda.gov/food/food-ingredients-packaging/food-packaging-other-substances-come-contact-food-information-consumers))

1.4. Years Considered for the Study

The historical year is 2024, the base year is 2025, the estimated year is 2026, and the forecast year is 2032. These roles distinguish historical and base-year evidence from estimated and forward-looking interpretation.

Figure 1. Global Food Safety Testing Equipment Market, Years Considered for the Study



1.5. Currency Considered for the Study

The reporting currency is United States dollars (USD). Monetary reporting uses absolute USD amounts.

1.6. Language Considered for the Study

The publication language is American English.

1.7. Key Stakeholders

- Equipment manufacturers and platform owners: Decisions about offering scope, documented application coverage, licensing, commercialization, integration commitments, and the support needed to qualify for buyer consideration.
- Distributors, resellers, agents, and brokers: Decisions about territorial rights, customer access, contracting responsibilities, service obligations, and the commercial distinction between representation and control of an equipment offering.
- Primary Food Producers; Food and Beverage Manufacturers and Packers; Food-Contact Material Manufacturers: Decisions about relevant equipment, supplier qualification, deployment fit, integration, switching exposure, and internal ownership versus external testing.
- Food Distribution and Logistics Businesses; Food Retailers; Foodservice Operators: Decisions about equipment suited to their safety responsibilities, operating locations, service requirements, and procurement authority.

- Independent Testing Laboratories: Decisions about equipment portfolios, application coverage, customer acceptance requirements, supplier support, and differentiation of equipment investment from the testing services sold to clients.
- Government Food-Control Organizations and relevant recognition bodies: Decisions concerning equipment procurement, the scope of applicable recognition or authorization, and the distinction between formal status and commercial adoption.
- Academic and Research Institutions: Decisions about food-safety equipment relevance, procurement suitability, application breadth, and continuing supplier support without extending the study to unrelated research equipment.
- Investors and strategic acquirers: Decisions about evidenced commercial participation, control of offerings and channels, buyer access conditions, portfolio comparability, and obligations that could constrain an investment thesis.

2. Research Methodology

2.1. Introduction

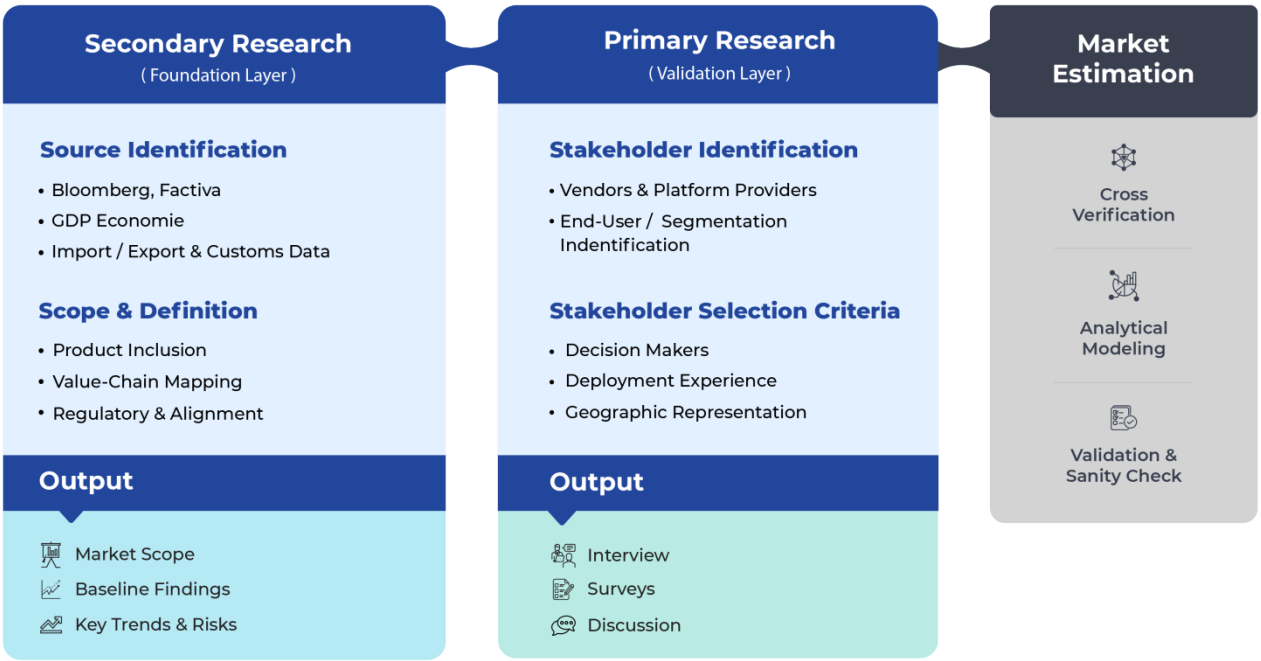
The study approaches Food Safety Testing Equipment as an equipment-purchasing and market-access question within the Global scope. Its purpose is to relate documented offerings and commercial relationships to buyer requirements while separating observed business conditions from economic interpretation and conditional expectations. Analyst-led primary research provides a qualitative challenge layer alongside claim-specific secondary evidence.

2.2. Research Design

Comparisons concern an included equipment offering in a defined food-safety application and commercial setting, rather than a supplier's entire portfolio. Meaningful comparison requires alignment across equipment function, technology, testing objective, tested matrix, buyer, deployment, sales channel, geography, and period. This alignment prevents a broad capability claim from becoming an unsupported conclusion about commercial access or competitiveness.

Buyer qualification, recognition, licensing, distribution, and support are separate questions. Establishing a product identity does not settle these other conditions; a proposed commercial option remains conditional where its relevant access or delivery requirements have not been established.

Figure 2. Global Food Safety Testing Equipment Market, Research Design



2.2.1. Primary Research

The analyst team conducted primary research as a qualitative challenge layer for market definition, segmentation, demand conditions, adoption barriers, and competitive interpretation. This work tested analytical assumptions and sharpened explanations of market mechanisms without serving as standalone support for numerical estimates.

The qualitative challenge layer is evaluated alongside secondary evidence within the accepted market scope. It informs conditional market explanations and hypotheses for subsequent quantitative analysis. Numerical estimates require their own supporting evidence, and a forecast derived from a qualitative assumption does not independently validate that assumption. Final interpretation must reconcile the qualitative findings with the completed quantitative results.

2.2.2. Secondary Research

Source roles are claim-specific. Official company portfolios can establish advertised offerings; company filings can establish disclosed business facts within their reporting boundaries; regulatory and recognition records can establish the status they expressly confer within their stated scope. Licensing, distribution, and purchasing records can support the respective commercial relationship or requirement. These records answer different questions and are not interchangeable proof of availability, buyer acceptance, or adoption.

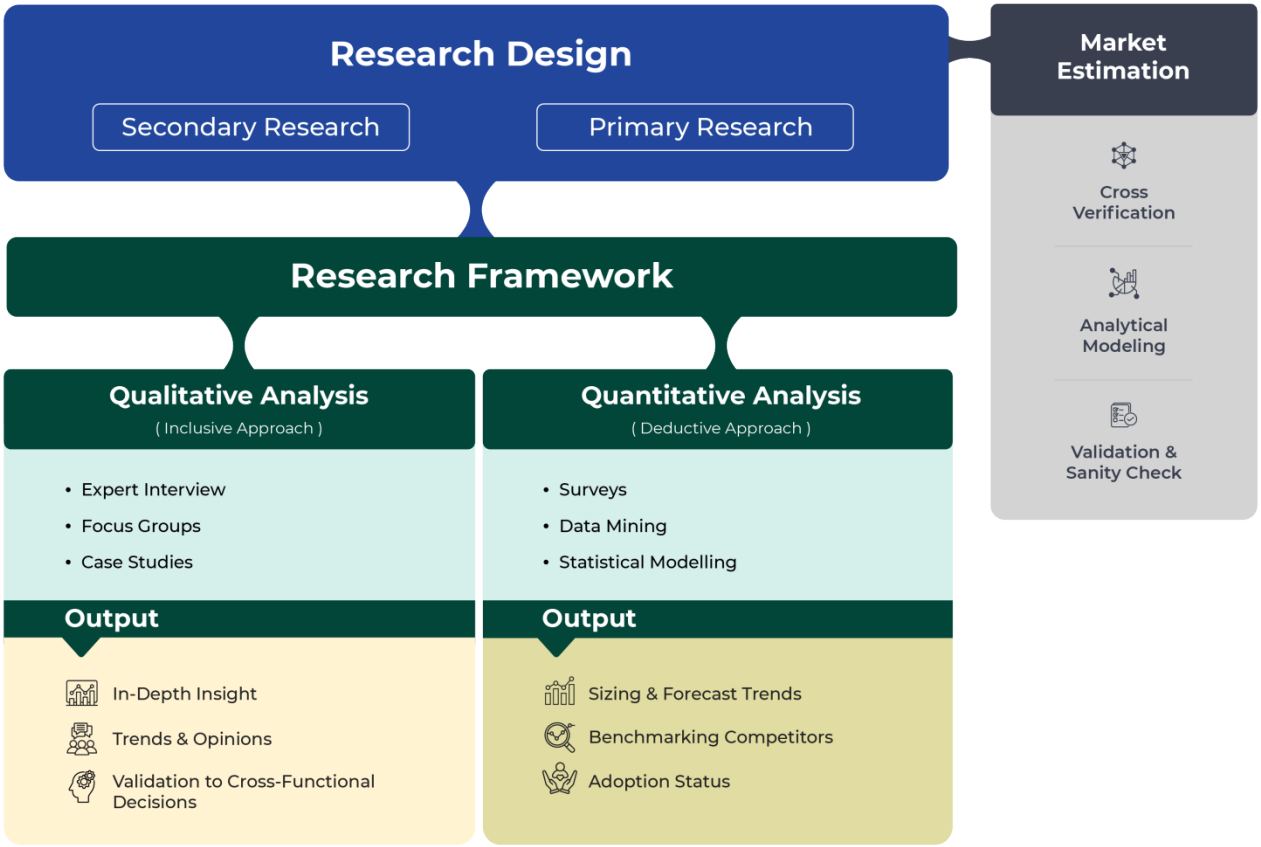
Interpretation must distinguish an announcement from documented commercial availability and a particular authorization from access across all jurisdictions. A source's effective period, coverage, and underlying authority determine the claim it can support. Multiple accounts derived from the same original authority do not provide independent corroboration.

2.3. Research Framework

The framework connects offering eligibility to buyer fit, then to the commercial rights and delivery commitments needed for access. The accepted taxonomy organizes comparable questions, while competitive interpretation concerns evidenced participation, control of the offering, routes to customers, and support responsibilities. Measurement must retain the same equipment boundary rather than allowing a broader financial description to redefine the market.

Strategic options are interpreted against their supporting conditions. Technology breadth can identify useful comparisons, but does not by itself establish buyer preference, competitive advantage, or an attractive entry opportunity.

Figure 3. Global Food Safety Testing Equipment Market, Research Framework



2.3.1. Qualitative Analysis

Qualitative analysis examines how buyer qualification, recognition requirements, equipment compatibility, integration, service continuity, channel commitments, and ownership economics can affect procurement choices. These are commercial mechanisms to examine against evidence, not universal barriers presumed for every equipment category. Relevant alternatives can include retaining an existing equipment arrangement, changing suppliers, or using an independent testing provider; their implications depend on the buyer and application rather than on technology labels alone.

2.3.2. Quantitative Analysis

The Global equipment boundary, specified period roles, USD reporting currency, and absolute monetary scale govern quantitative interpretation. Financial evidence must correspond to the relevant equipment activity, geography, and period before it can describe the study. Equipment Type, Technology Platform, Testing Objective, End User, Deployment Configuration, Sales Channel, and Tested Matrix are cross-cutting views of the same market, not separate opportunities to be added together.

Quantitative conclusions require their own supporting evidence and must distinguish reported observations, attributed activity, estimates, and forecasts. A corporate financial

disclosure cannot be assigned wholesale to Food Safety Testing Equipment merely because the company advertises an included offering.

2.4. Market Size Estimation

Market valuation concerns commercial activity attributable to the included equipment, not total food-safety expenditure or the broader scientific-instrument business. Its analytical role is to translate a consistently bounded equipment universe into monetary interpretation while keeping application attribution, bundled offerings, and channel overlap explicit. Category inclusion or documented supplier capability establishes eligibility for analysis, not a particular financial contribution.

2.4.1. Top-Down Approach

A top-down perspective can provide a scope and plausibility check where a broader public business aggregate has an identifiable relationship to Food Safety Testing Equipment. An aggregate that mixes food and non-food applications, hardware and services, or incompatible periods cannot be treated as the defined equipment market without justified scope reconciliation. Its role is contextual discipline, not a substitute for establishing the included equipment activity.

2.4.2. Bottom-Up Approach

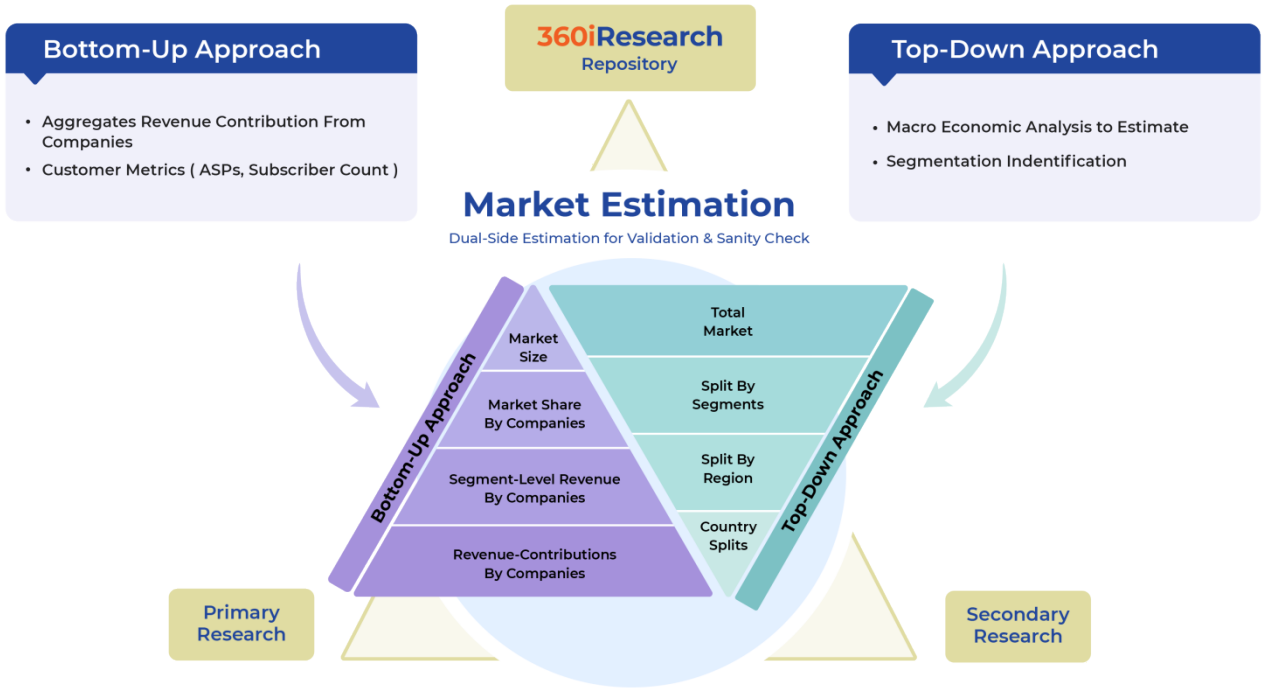
A bottom-up perspective concerns individually evidenced equipment offerings and their documented commercial participation. Its relevance depends on connecting each business fact to the included food-safety equipment activity; a portfolio listing alone does not establish financial attribution. Manufacturer and intermediary records may describe the same offering or transaction, so their overlap requires reconciliation rather than treatment as separate underlying activity.

2.5. Data Triangulation

Reconciliation concerns the substance of a claim before numerical agreement: product identity, application, geography, period, and commercial status must align. A portfolio, an authorization, and a channel agreement can complement one another because they establish different facts, but one cannot replace the others. Shared underlying sources do not constitute independent support, and unresolved differences must retain their effect on the conclusion rather than be averaged away.

The qualitative challenge layer is considered alongside documentary evidence to distinguish plausible economic explanations from established business conditions. It can identify assumptions requiring closer examination without resolving financial attribution or numerical conclusions by itself.

Figure 4. Global Food Safety Testing Equipment Market, Data Triangulation



2.6. Research Outcomes

The intended outcome is decision support that helps equipment suppliers assess which buyers and channels match documented capabilities, helps purchasers distinguish relevant alternatives and qualification obligations, and helps investors evaluate the commercial conditions behind an apparent opportunity. Conclusions should identify the access rights, buyer requirements, integration commitments, and service responsibilities that matter before a commercial commitment, together with credible alternatives and conditions that could change the decision.

2.7. Research Assumptions

- Food-safety attribution: A multipurpose supplier's broader laboratory or industrial portfolio is not assumed to belong wholly to this study. Commercial conclusions must relate to the specific included equipment offering and its food-safety application.
- Application comparability: A shared technology platform or testing objective does not establish that offerings are substitutes. Purchasing comparisons depend on documented relevance to the tested matrix, deployment configuration, and buyer acceptance requirements.
- Local commercial access: Permissions, distribution rights, and service commitments are not assumed to transfer between jurisdictions. Global opportunity assessments must retain the geographic and contractual scope of their supporting facts.
- Commercial continuity: Historical and base-year conditions are not assumed to persist unchanged through the forecast year. Forward-looking interpretations depend on

explicit conditions concerning product availability, regulation, distribution, competition, and buyer priorities.

2.8. Research Limitations

- Mixed business disclosures: When a disclosure combines food and non-food applications, equipment and services, or several product families, its reporting boundary can constrain direct attribution. Apparently similar supplier disclosures may therefore be unsuitable for an equipment-only comparison without scope reconciliation.
- Commercial-status inference: A product announcement, a recognition or authorization, and a buyer's purchase decision establish different facts. One cannot substitute for another when assessing availability, qualification, adoption, or access.
- Bundled offerings: Hardware packages can include associated software, reagents, integration, or service commitments. A package description alone does not justify treating all associated business activity as equipment or treating separately described elements as additive opportunities.
- Demand interpretation: A food-safety requirement does not necessarily lead to a new equipment purchase. A buyer may rely on existing assets or an external laboratory, so evidence of an obligation alone cannot establish demand for additional equipment.

3. Executive Summary

3.1. Introduction

Food Safety Testing Equipment is commercially divided by the safety decision the buyer must support, not by a single interchangeable instrument class. Within the Global market, supporting laboratory equipment, analytical instruments and readers, production-line inspection, and preventive monitoring perform complementary roles. Interscience's preparation and reading offerings, METTLER TOLEDO's inspection systems, and Testo's monitoring portfolio illustrate why equipment function, matrix, objective, and deployment must be matched before shortlisting.

Acceptance is a separate access condition. FDA's Laboratory Accreditation for Analyses of Foods program requires accredited laboratories for specified testing circumstances, with covered import-related obligations subject to applicable scope and compliance dates; it does not cover all food testing. The food owner needing accepted results may therefore differ from the laboratory authorizing equipment. Suppliers should qualify that acquisition authority and the accepted deliverable rather than translate an assurance obligation directly into a hardware order.

Sources & Evidence

1. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
   · LAAF requires owners and consignees to use accredited laboratories in specified circumstances, not for all food testing. Covered import-related implementation depends on applicable analyte groups and compliance dates. Separating the evidence customer from the equipment purchaser is a bounded commercial inference. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/laboratory-accreditation-analyses-foods-laaf-program-final-rule))
2. Products and Accessories - Microbiology
   · Interscience separately lists preparation equipment, colony counters, and combined incubation-and-counting equipment, illustrating distinct purchasing functions rather than universal interchangeability. ([interscience.com](https://www.interscience.com/en/products/))
3. Digital Food Safety Management with testo Saveris Food
   · Testo markets stationary monitoring and handheld measurement for food-business settings, a purchasing role distinct from laboratory analysis or production-line inspection. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
4. Mix and Match Your Ideal Combination Inspection System
   · METTLER TOLEDO markets standalone and combined inspection systems, including metal detection and X-ray inspection, establishing an inspection-specific commercial role. ([mt.com](https://www.mt.com/us/en/home/library/product-brochures/product-inspection/PI/Combinations_Brochure.html))

3.2. CXO Perspective

Laboratory executives should compare selective functional renewal with combined equipment before approving a complete replacement. Interscience markets separate functions and combined incubation-reading equipment; retaining assets remains conditional on application fit and continuing support. Incumbents can compete on application continuity and contracted support, as bioMérieux's GENE-UP offering illustrates. Entrants need a matched deliverable

and accountable handover, not merely a similar technology label. Selective investment preserves assets but retains cross-supplier coordination; combined purchasing becomes preferable when consolidation matters and complete accountability can be contracted.

Manufacturers and channel entrants face a different commitment question in international expansion: whether local selling and support authority can be secured. DKSH's January xx.xx 2025 Malaysian Hygiena announcement assigns commercialization and after-sales roles, while its LabShop terms require separate business-to-business arrangements. Buyers should identify the seller, warranty authority, and escalation owner; suppliers should verify continuing appointment and territory before customer commitments. A local channel can simplify handover but adds a contractual interface. Direct selling is an alternative only when destination-specific obligations can be undertaken.

Sources & Evidence

1. Products and Accessories - Microbiology
   · The separate and combined equipment categories support comparison of selective renewal with functional consolidation; retained-equipment suitability is not established by the catalog. ([interscience.com](https://www.interscience.com/en/products/))
2. GENE-UP - bioMérieux
   · bioMérieux associates GENE-UP with food-related applications and advertises installation, IT integration, training, maintenance, repairs, and remote support. This supports application-and-service positioning, not universal acceptance or guaranteed local fulfillment. ([biomerieux.com](https://www.biomerieux.com/corp/en/our-offer/industry-products/gene-up-automated-pathogen-detection.html))
3. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia
   · The January xx.xx 2025 Malaysian announcement assigns DKSH marketing, sales, distribution, and after-sales functions for Hygiena offerings, including ATP cleaning-verification systems. It documents a channel role, not separate manufacture or indefinite appointment rights. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))
4. Terms and Conditions | DKSH Malaysia LabShop
   · LabShop identifies DKSH Technology Sdn Bhd as operator, retains product fulfillment and customer-support obligations with DKSH, and states that business-to-business transactions are subject to separate arrangements. Customer-specific obligations therefore require agreement-level confirmation. ([labshop.dksh.com.my](https://labshop.dksh.com.my/shop/terms-and-conditions))

3.3. New Revenue Opportunities

The assessed revenue routes are selective functional renewal in installed laboratories; complete accepted grain-reader packages; coordinated monitoring for Food Retailers and Foodservice Operators with a defined oversight gap; and accountable production-line inspection for Food and Beverage Manufacturers and Packers. DKSH's Malaysian EnSURE Touch listing adds a country-specific procurement lead, while institutional opportunities depend on authorized funding and procurement milestones. These routes remain conditional on an accepted application and executable support package; suitable existing assets or narrower purchases can be preferable. The Opportunity Mapping section provides the detailed assessment.

Sources & Evidence

1. Products and Accessories - Microbiology
   · Separately advertised preparation and reading functions provide the commercial premise for the previously assessed selective-renewal opportunity. ([interscience.com](https://www.interscience.com/en/products/))
2. Digital Food Safety Management with testo Saveris Food
   · The UK Saveris Food offering addresses coordinated monitoring and documentation in restaurants, catering, and distribution centers, supporting the assessed oversight-related opportunity. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
3. FGIS Performance Verified Aflatoxin Test Kits
   · FGIS lists RIDA QUICK Aflatoxin RQS with RIDA SMART BOX and RIDA SMART APP for corn alongside other reader-associated packages. Acceptance attaches to the complete listed application rather than unrestricted reader use. ([ams.usda.gov](https://www.ams.usda.gov/sites/default/files/media/FGISApprovedMycotoxinRapidTestKits.pdf))
4. Mix and Match Your Ideal Combination Inspection System
   · Standalone and combination systems are advertised with service, training, and connectivity support. These offerings support the assessed inspection-package opportunity without establishing buyer-specific integration accountability. ([mt.com](https://www.mt.com/us/en/home/library/product-brochures/product-inspection/PI/Combinations_Brochure.html))
5. Hygiena EnSURE Touch Instrument ETOUCH | DKSH Malaysia LabShop
   · DKSH Malaysia LabShop advertises the Hygiena EnSURE Touch instrument and provides a quotation route. The listing establishes a country-specific procurement lead, not completed delivery or continuing appointment rights. ([labshop.dksh.com.my](https://labshop.dksh.com.my/shop/p/hygiena-ensure-touch-instrument-etouch-tecpim000531181))
6. ID 6121155 - AFBI - CSB - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer with Linear Ion Trap Functionality
   · AFBI's March xx.xx 2026 notice describes an equipment package including installation, training, warranty, and maintenance. An additional acquisition remains subject to funding, budgetary approval, and buyer-supplier agreement; the notice does not establish exercise of that option. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=MAR598215&catID=))

3.4. Next-Generation Business Models

Equipment monetization can extend into a continuing records-and-service relationship without making every purchase a platform replacement. Testo's UK Saveris Food offering combines hardware, software, and services, while separately marketed thermometers preserve a narrower alternative. Central food-safety teams should choose the bundle only for an explicit oversight need, with record access, review ownership, and local support agreed; central visibility comes with continuing platform obligations.

Ownership and maintenance are also separable choices. METTLER TOLEDO markets external and mobile inspection plus rentals for bounded requirements; Agilent offers support for non-Agilent chromatography and mass spectrometry instruments. These are documented commercial options, not evidence of universal adoption. Buyers should compare them with ownership or separate manufacturer agreements only after matching acceptance, scheduling, and instrument-location coverage. Continuous onsite control or excluded application support can make the alternatives unsuitable.

Subscription flexibility remains a distinct unresolved risk. SureTrend's product description and service terms do not settle an individual buyer's cancellation rights. Optional expansion or renewal should await written clarification of the governing agreement, exit mechanics, and continuing record access.

Sources & Evidence

1. Digital Food Safety Management with testo Saveris Food
   · Saveris Food combines hardware, software, and services. The associated governance and support prerequisites are conditional commercial implications, not demonstrated customer outcomes. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
2. Multi-Vendor Services - Agilent
   · Agilent markets repair, maintenance, and compliance support for non-Agilent chromatography and mass spectrometry instruments, providing a maintenance-provider alternative without establishing universal coverage. ([agilent.com](https://www.agilent.com/en/s/maintenance-repair/service-plans/multi-vendor))
3. X-ray Inspection Services with X-ray Reclaim
   · METTLER TOLEDO advertises off-site inspection, mobile inspection, and X-ray equipment rentals, including arrangements for temporary requirements and maintenance periods. These establish commercial alternatives to permanent ownership, subject to a matched customer agreement. ([mt.com](https://www.mt.com/us/en/home/products/Product-Inspection_1/x-ray-inspection-services.html?cmp=als_xray-reclaim))
4. SureTrend Terms of Service
   · SureTrend's published service terms prescribe automatic renewal unless the customer requests nonrenewal in writing xx.xx days before the next subscription period. The governing purchase agreement must be identified before treating exit flexibility as settled. ([hygiena.com](https://www.hygiena.com/terms-and-conditions-suretrend))
5. SureTrend Food Safety Management Software
   · SureTrend's product page describes cancellation to prevent future billing and no long-term commitments. These statements require reconciliation with the separate service terms for the buyer's particular plan; they do not establish post-exit record entitlements. ([hygiena.com](https://www.hygiena.com/software/suretrend))
6. Food Thermometers - Testo
   · Testo separately markets food thermometers, including testo xx.xx-IR, for professional kitchens, restaurants, and supermarkets. This establishes a narrower purchasing alternative to its broader records-and-service bundle. ([testo.com](https://www.testo.com/en-UK/products/food-thermometers))

3.5. Industry Roadmap

During 2026-2027, public milestones should trigger commercial qualification, not assumed replacement. April xx.xx 2027 is the pre-harvest agricultural-water compliance date for covered very small farms producing non-sprout produce under FDA's systems-based framework; it is not a hardware mandate. FGIS lists August xx.xx 2027 as the certificate expiration for R-Biopharm AG's RIDA QUICK Aflatoxin RQS pairing with RIDA SMART BOX and RIDA SMART APP for corn. Affected buyers should verify continuing acceptance before commitment; expiration does not establish failed renewal.

During 2028-2029, service renewal offers a decision point separate from equipment replacement. Mixed-brand laboratories can compare Agilent's multi-vendor proposition with manufacturer agreements, retaining the latter where necessary application or local support would be lost. The trigger is matched contractual coverage, not an assumed fleet-refresh cycle.

During 2030-2032, renewal should follow application and support continuity. Laboratories should compare retained assets, eligible certified pre-owned instruments, and supported new equipment. Agilent's pre-owned program documents that option, while covered EU equipment also requires allocation of national Waste Electrical and Electronic Equipment responsibilities. Future eligibility, support, and legal applicability must be reconfirmed; neither asset age nor refurbishment alone establishes the better choice.

Sources & Evidence

1. FSMA Final Rule on Pre-Harvest Agricultural Water

   · FDA's revised non-sprout pre-harvest agricultural-water framework uses systems-based assessments. The listed compliance date for covered very small farms is April xx.xx 2027; that milestone does not independently establish an equipment purchase. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-pre-harvest-agricultural-water))

2. WEEE Responsibilities

   · For covered electrical and electronic equipment, Your Europe describes registration in each EU country of sale and waste-management responsibilities. The long-term renewal scenario retains equipment classification and applicable national arrangements as conditions. ([europa.eu](https://europa.eu/youreurope/business/product-rules-compliance/recycling-waste-management/weee-responsibilities/index_en.htm))

3. Multi-Vendor Services - Agilent

   · Agilent distinguishes service plans by instrument and region. Comparing matched coverage at renewal during 2028-2029 is a conditional purchasing scenario, not a forecast of adoption or future plan availability. ([agilent.com](https://www.agilent.com/en/s/maintenance-repair/service-plans/multi-vendor))

4. FGIS Performance Verified Aflatoxin Test Kits

   · The specified R-Biopharm corn-aflatoxin pairing has a listed certificate expiration of August xx.xx 2027. The expiration is an acceptance-review milestone, not evidence of failed renewal. ([ams.usda.gov](https://www.ams.usda.gov/sites/default/files/media/FGISApprovedMycotoxinRapidTestKits.pdf))

5. Agilent Certified Pre-Owned Instruments - Frequently Asked Questions

   · Agilent documents a certified pre-owned analytical-instrument purchasing program with warranty and support options. Service-contract eligibility depends on the instrument's support life; the document does not guarantee future eligibility or food-safety application suitability. ([agilent.com](https://www.agilent.com/content/dam/about/newsroom/media-room/circular-economy/CPO%xx.xx-%20FAQ%20Final%20Document.pdf))

4. Market Overview

4.1. Introduction

Food Safety Testing Equipment comprises complementary purchasing markets rather than a single interchangeable instrument class. ■■■ ■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ Portable, stationary standalone, and production-line-integrated configurations address different decisions across food products and ingredients, water, food-contact materials, and food-chain environments.

■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ INTERSCIENCE lists sample-preparation equipment, incubators, and counters; Thermo Fisher Scientific describes analytical instruments and food inspection equipment; METTLER TOLEDO offers standalone and integrated inspection systems; and Testo describes handheld and stationary food-safety monitoring equipment. These are examples of distinct commercial roles, not evidence that every platform serves every matrix or that an offering is available under identical terms worldwide.

The purchasing question is therefore which equipment function supports an accepted safety decision, where it must operate, and who will maintain it. ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ Associated software, consumables, integration, and services influence those conditions without becoming independent equipment categories.

Figure 5. Global Food Safety Testing Equipment Market Size, 2017-2040 (USD Million, Growth %)

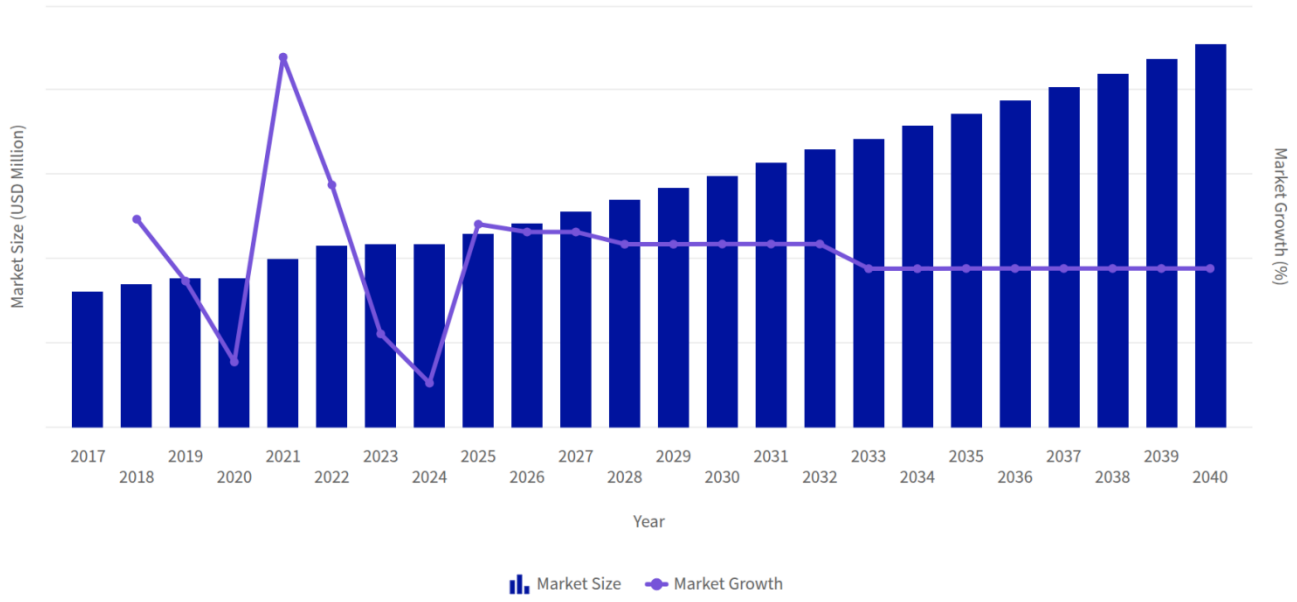


Table 2. Global Food Safety Testing Equipment Market Size, 2017-2040 (USD Million, Growth %)

Metric	2017	2024	2025	2026	2027	2032	2040
Market Size (USD Million)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Market Growth (%)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Food and Beverage - Thermo Fisher Scientific
   - Thermo Fisher Scientific's food and beverage portfolio describes analytical instruments and food inspection equipment, supporting distinct equipment roles. ([thermofisher.com](https://www.thermofisher.com/us/en/home/industrial/food-beverage.html))
2. Products and Accessories - Microbiology
   - INTERSCIENCE lists laboratory blenders, sample-preparation equipment, incubators, and counters and identifies food among its served sectors. ([interscience.com](https://www.interscience.com/en/products/))
3. Product Inspection Systems - METTLER TOLEDO
   - METTLER TOLEDO describes standalone and integrated product inspection equipment, including metal detection, X-ray, and vision offerings. ([mt.com](https://www.mt.com/us/en/home/products/Product-Inspection_1.html))
4. Digital Food Safety Management with testo Saveris Food
   - Testo describes stationary monitoring, handheld meters, software, and services for food-safety management, with restaurant, catering, and distribution-center applications. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
5. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
6. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
7. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.

8. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
9. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
10. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
11. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.

12. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
13. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
14. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
15. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
16. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
17. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
18. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

19. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
20. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
21. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

4.2. Key Growth Contribution

Documented verification and customer-assurance obligations can support equipment adoption when existing capability cannot deliver the accepted evidence. FDA requires application-dependent monitoring and verification records, while Walmart requires applicable assurance activities and access to results. Serving this need requires equipment matched to the safety objective, usable records, and continuing support; connected hygiene instruments illustrate an offered records capability without making advanced analysis compulsory. The material counterforce is fulfillment choice: suitable installed assets or an accepted external relationship can satisfy the evidence need without another purchase. Suppliers should qualify that gap and the acquisition authority before treating assurance obligations as demand.

Figure 6. Global Food Safety Testing Equipment Market, Key Growth Contribution, by Region, 2025-2032 (USD Million)

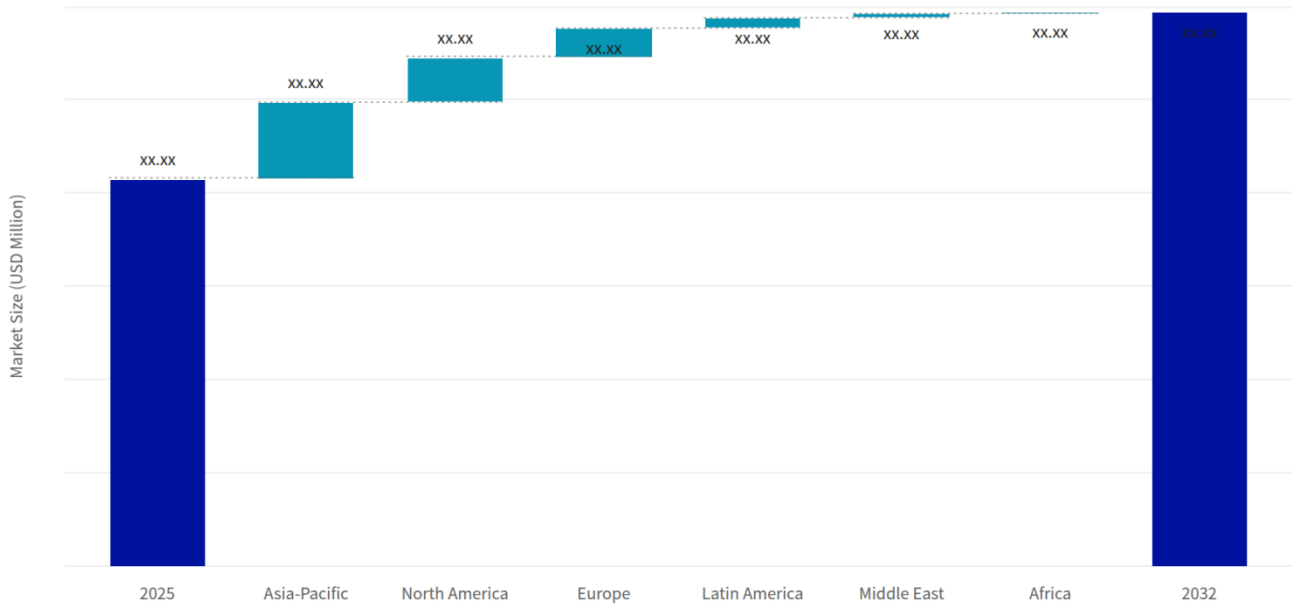

Figure 7. Global Food Safety Testing Equipment Market, Key Growth Contribution, by Country, 2025-2032 (CAGR %)

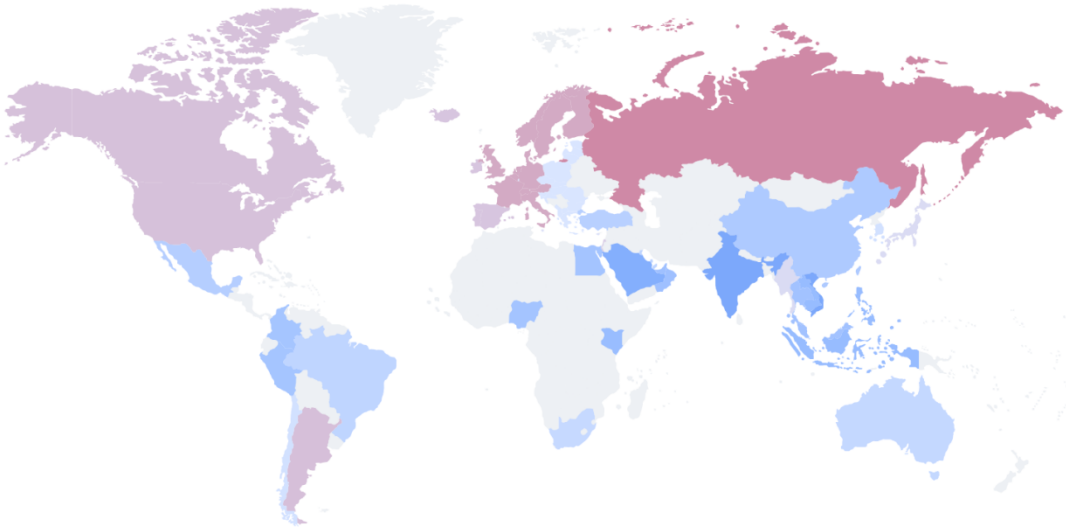

Table 3. Global Food Safety Testing Equipment Market, Key Growth Contribution, 2025-2032

Scope	Leading Category	Added Market Size (USD Million)	Growth Share (%)	CAGR (%)
Country	xx.xx	xx.xx	xx.xx	xx.xx
Deployment Configuration	xx.xx	xx.xx	xx.xx	xx.xx
End User	xx.xx	xx.xx	xx.xx	xx.xx
Equipment Type	xx.xx	xx.xx	xx.xx	xx.xx
Region	xx.xx	xx.xx	xx.xx	xx.xx
Sales Channel	xx.xx	xx.xx	xx.xx	xx.xx
Technology Platform	xx.xx	xx.xx	xx.xx	xx.xx
Tested Matrix	xx.xx	xx.xx	xx.xx	xx.xx
Testing Objective	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FSMA Final Rule for Preventive Controls for Human Food

   · FDA requires documented monitoring and verification, with product testing and environmental monitoring applicable according to the facility, food, and preventive control. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-preventive-controls-human-food))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.

2. EnSURE Touch ATP Luminometer for Hygiene Monitoring

   · EnSURE Touch is marketed with SureTrend connectivity and remote support; advanced data analysis is described as optional. ([hygiena.com](https://www.hygiena.com/hygiene-monitoring/atp-cleaning-verification/ensure-touch/hygiena-ensure-touch))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.

3. Audits, Certifications and Testing - Walmart
   - Walmart requires applicable audits, inspections, tests, results, and access to supplier records; its policy does not prescribe equipment ownership. ([corporate.walmart.com](https://corporate.walmart.com/suppliers/requirements/audits-and-certifications))
4. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.

5. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from lower-cost readers; it is not a chemical-objective revenue disclosure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Public hardware-cost tiers distinguish lower-cost readers from capital-intensive analytical systems; supports asset-weighted captive-laboratory allocation rather than unadjusted counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Public hardware-cost tiers distinguish lower-cost readers from capital-intensive analytical systems; supports

6. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only

7. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

14. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The differing Instrumentation and Solutions results support retaining a heterogeneous monitoring cohort model rather

15. Anritsu Integrated Report 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

16. Eurofins Scientific - FY 2025 Results Presentation

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.

17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
19. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
20. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
21. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
22. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.

23. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
24. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
25. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
26. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
27. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
28. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.

29. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
30. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
31. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
32. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))

33. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
34. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))
35. Testo - Annual Press Conference, February 19, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

36. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

37. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
38. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

39. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
40. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
41. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
42. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
43. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
44. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.

45. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
46. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.
47. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
48. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
49. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
50. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

51. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
52. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
53. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
54. FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

55. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
56. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
57. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
58. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
59. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

60. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
61. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
62. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
63. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
64. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

65. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

66. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

67. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

68. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

69. Mettler-Toledo Standard Terms and Conditions for Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
70. Food and Beverage Resource Guide for Commercial Food Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
71. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
72. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
73. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

4.3. Industry Ecosystem & Value Chain Analysis

Value is created by supplying equipment that supports a usable safety decision, but equipment delivery alone does not control acceptance of that decision. FDA's LAAF program links covered US import-related analyses to laboratory accreditation, applicable analyte groups, and compliance dates. ▬▬▬▬▬▬▬▬▬▬ ▬▬▬▬▬▬▬▬▬▬ ▬▬▬▬▬▬▬▬▬▬ ▬▬▬▬▬▬▬▬▬ ▬▬▬▬▬▬▬▬▬

[redacted] Contracted handover and support form another control point. [redacted] It nevertheless demonstrates why a hardware-only quotation may not satisfy a laboratory acquisition: responsibility extends beyond shipment to the buyer's specified handover and support obligations.

Data relationships can extend this dependency after installation. [redacted] It should be evaluated as a contractual dependency and supporting value-chain relationship, not automatically counted as additional equipment activity.

Sources & Evidence

1. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
   · FDA links covered import-related testing to LAAF laboratory scope, analyte-specific capacity determinations, and applicable compliance dates; the program does not cover all food testing. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/laboratory-accreditation-analyses-foods-laaf-program-final-rule))
2. Laboratory Recognition Programme
   · Singapore's programme requires local facilities, accreditation, and regulatory assessment. Recognized laboratories can serve export-certificate testing needs and participate in SFA outsourcing tenders. These are laboratory-access relationships, not equipment approvals. ([sfa.gov.sg](https://www.sfa.gov.sg/recognition-programmes-grants/recognition-programmes/laboratory-recognition-programme))
3. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
   · AFBI's December xx.xx 2025 tender requested LC-MS supply, installation, commissioning, training, additional warranty, and preventive maintenance. It establishes requested obligations, not award or completion. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025/PDF))
4. ProdX - The Next Level in Product Safety
   · METTLER TOLEDO describes ProdX inspection-record management, remote access, and enterprise-system integration. ([mt.com](https://www.mt.com/us/en/home/products/Product-Inspection_1/prodx-quality-management-software.html))

4.3.1. Supply-Side Analysis

[redacted] A broad catalog is not proof of equivalent capability across all accepted Technology Platform, Tested Matrix, or Testing Objective categories. Buyers should compare the specific offered equipment and its food-safety application rather than the supplier's total laboratory or industrial portfolio.

For platform-centered purchases, associated application coverage and support can influence continuity. ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ This creates a reason to examine the supported application, compatible associated products, and service commitments together, without assuming that every associated purchase belongs to the equipment boundary.

After-sales dependence is not necessarily exclusive to the original manufacturer. ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ A supplier's general service portfolio does not replace a product-specific undertaking.

Sources & Evidence

1. Food and Beverage - Thermo Fisher Scientific
   · The company's described analytical and inspection offerings support a function-specific supply comparison, not attribution of its entire business.
2. Products and Accessories - Microbiology
   · The catalog establishes supporting microbiology equipment roles, not capability across every accepted platform.
3. Product Inspection Systems - METTLER TOLEDO
   · The portfolio supports inspection-specific supply roles and integration relationships.
4. GENE-UP - bioMérieux
   · bioMérieux presents GENE-UP with validated test kits and instrument-support services. This establishes an associated offering, not automatic acceptance for every application. ([biomerieux.com](https://www.biomerieux.com/corp/en/our-offer/industry-products/gene-up-automated-pathogen-detection.html))
5. Multi-Vendor Services - Agilent
   · Agilent markets repair, maintenance, and compliance support for non-Agilent chromatography and mass spectrometry instruments. Actual instrument and regional coverage require confirmation. ([agilent.com](https://www.agilent.com/en/s/maintenance-repair/service-plans/multi-vendor))

4.3.2. Demand-Side Analysis

Demand differs according to the decision the buyer must support. Food and Beverage Manufacturers and Packers may need evidence for their own control systems and customer commitments, while Food-Contact Material Manufacturers face a separate documentation chain. ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■

Downstream buyers have a different equipment proposition. ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ Central procurement should distinguish site-level equipment needs from organization-wide data and support commitments.

[redacted] Government Food-Control Organizations have additional surveillance requirements, illustrated by CDC's use of sequencing in PulseNet. These distinctions mean that the organization requiring evidence, the organization operating equipment, and the organization financing an acquisition need not be the same.

Sources & Evidence

1. Ramping Up Singapore's Food Testing Capabilities
   · SFA's January xx.xx 2023 account describes progressive outsourcing of food-testing services to recognized private laboratories, supporting an observed alternative to internal equipment ownership. ([sfa.gov.sg](https://www.sfa.gov.sg/food-for-thought/article/detail/ramping-up-singapore%27s-food-testing-capabilities))
2. Legislation - Food Contact Materials
   · The Commission explains that plastic food-contact material declarations of compliance rely on supporting safety documentation that must be available to enforcement authorities. ([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en))
3. PulseNet Timeline
   · CDC documents PulseNet's transition to whole-genome sequencing for surveillance and outbreak detection, establishing a public-health institutional use case distinct from routine manufacturer checks. ([cdc.gov](https://www.cdc.gov/pulsenet/php/anniversary/timeline.html))
4. Digital Food Safety Management with testo Saveris Food
   · The offering supports a downstream monitoring purchasing context distinct from laboratory analysis.

4.3.3. Stakeholder Analysis

Regulators and accreditation bodies control different access conditions from those controlled by equipment suppliers. [redacted] Instrument ownership must not be represented as equivalent to regulatory recognition.

[redacted] The food supplier must establish which evidence satisfies that customer relationship; the equipment vendor cannot confer customer approval merely by describing audit-support functionality. Procurement should identify who accepts the evidence separately from who signs the equipment and service contract.

Academic and Research Institutions also participate through funded infrastructure and skills development. [redacted] For such projects, the relevant commitment trigger is a funded, specified acquisition rather than a manufacturer's production requirement.

Sources & Evidence

1. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
   · FDA recognizes accreditation bodies, which accredit participating laboratories. Owners and consignees face obligations in specified circumstances, distinct from purchasing equipment.
2. Devolution Grants to Build Skills Training Infrastructure in Agrifood
   · Lincolnshire County Council's May xx.xx 2025 announcement included proposed food-science laboratory resources and chemical-analysis equipment for DN Colleges Group. It establishes announced funding and intended infrastructure, not completed procurement. ([lincolnshire.gov.uk](https://www.lincolnshire.gov.uk/news/article/xx.xx/devolution-grants-to-build-skills-training-infrastructure-in-agrifood))
3. Audits, Certifications and Testing - Walmart
   · Walmart requires applicable audits, inspections, tests, access to products, facilities, and records, and provision of results. ([corporate.walmart.com](https://corporate.walmart.com/suppliers/requirements/audits-and-certifications))

4.4. Market Dynamics

[redacted] The same obligation can support an internal equipment purchase, use of an existing asset, or expenditure with an external laboratory. Equipment demand should therefore be interpreted through the buyer's chosen fulfillment model rather than inferred directly from the existence of regulation.

Regulatory change is not uniformly expansionary for equipment purchasing. FDA's agricultural-water rule replaced certain prescriptive pre-harvest testing provisions with systems-based assessments, while retaining testing in relevant circumstances. [redacted]

Sources & Evidence

1. FSMA Final Rule on Pre-Harvest Agricultural Water
   · FDA's revised rule replaces certain previous pre-harvest agricultural-water criteria and testing requirements with systems-based assessments for covered produce other than sprouts. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-pre-harvest-agricultural-water))
2. ProdX - The Next Level in Product Safety
   · The associated offering supports a commercial interpretation involving continuity and integration rather than equipment ownership alone.

4.4.1. Key Drivers

4.4.1.1. Documented verification requirements create application-specific purchasing triggers

FDA's preventive-controls framework requires documented verification and identifies product testing, environmental monitoring, and instrument accuracy checks as applicable activities.

[redacted] Suppliers must connect the equipment's role to the buyer's applicable plan rather than present regulation as universal purchase demand.

Sources & Evidence

1. FSMA Final Rule for Preventive Controls for Human Food
   · FDA identifies documented verification, instrument accuracy checks, product testing, and environmental monitoring as relevant activities, with applicability depending on the food, facility, and preventive control. The equipment-purchasing implication is conditional rather than a mandated acquisition. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-preventive-controls-human-food))

4.4.1.2. Customer assurance requirements connect safety documentation to supply-chain access

Walmart requires suppliers to obtain applicable audits, inspections, and tests and make products, facilities, and records available. Such customer conditions can make demonstrable assurance a requirement for retaining a food-supply relationship. [redacted]

Sources & Evidence

1. Audits, Certifications and Testing - Walmart
   · The buyer policy supports a customer-assurance purchasing rationale without specifying a hardware brand or universal ownership requirement.

4.4.1.3. Connected instruments extend the purchasing case to records management

Hygiena's EnSURE Touch combines a handheld hygiene-monitoring instrument with SureTrend connectivity and remote support functions. The purchasing rationale extends beyond a local reading to consistent management of records across facilities. [redacted]

Sources & Evidence

1. EnSURE Touch ATP Luminometer for Hygiene Monitoring
   · Hygiena describes EnSURE Touch as a handheld hygiene-monitoring instrument with SureTrend connectivity, centralized reporting, and remote training and support functions. The adoption rationale is an inference, not demonstrated universal uptake. ([hygiena.com](https://www.hygiena.com/hygiene-monitoring/atp-cleaning-verification/ensure-touch/hygiena-ensure-touch))

4.4.1.4. Public surveillance sustains specialist laboratory purchasing requirements

Public surveillance supports equipment roles beyond manufacturers' routine checks. CDC documents PulseNet's transition to whole-genome sequencing for foodborne surveillance, while the Food Standards Agency's 2026/xx.xx plan includes laboratory support, surveillance, and statutory radioactivity monitoring. ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■

Sources & Evidence

1. FSA 2026/27 Annual Plan and Budget
   - The FSA's 2026/xx.xx plan includes a national food-surveillance programme with laboratory support and statutory radioactivity monitoring. These establish planned institutional activities, not a particular equipment award. ([gov.uk](https://www.gov.uk/government/publications/fsa-bc-xx.xx-fsa-xx.xx-annual-plan-and-budget/fsa-xx.xx-annual-plan-and-budget))
2. PulseNet Timeline
   - The timeline supports sequencing's surveillance role, not a new equipment procurement.

4.4.2. Key Restraints

4.4.2.1. Risk-based obligations do not establish mandatory equipment ownership

FDA's revised pre-harvest agricultural-water framework for covered produce other than sprouts uses systems-based assessments instead of the previous set of microbial quality criteria and testing requirements. Testing can remain relevant, but a compliance deadline alone does not establish a new equipment requirement for a Primary Food Producer. ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■■■■

Sources & Evidence

1. FSMA Final Rule on Pre-Harvest Agricultural Water
   - Testing remains relevant in applicable circumstances; the rule does not independently establish a farm's equipment acquisition.

4.4.2.2. External and temporary fulfillment can displace permanent acquisitions

Recognized external laboratories and temporary inspection arrangements compete with equipment ownership for suitable requirements. ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■ ■■■■■■■ ■■■■■■■■■■■■ Their suitability depends on local availability, customer acceptance, scheduling, and the buyer's need for continuous onsite capability; they are not universal substitutes for installed equipment.

Sources & Evidence

1. Ramping Up Singapore's Food Testing Capabilities
   · Recognized laboratories support food businesses and traders through external testing services; suitability as a substitute remains application-specific.
2. X-ray Inspection Services with X-ray Reclaim
   · METTLER TOLEDO describes X-ray Reclaim external inspection, mobile services, and equipment rentals. These are stated alternatives for bounded requirements, subject to local contractual availability. ([mt.com](https://www.mt.com/us/en/home/products/Product-Inspection_1/x-ray-inspection-services.html?cmp=als_xray-reclaim))

4.4.2.3. Recognition and accreditation constrain the commercially usable choice set

Acceptance is specific to the laboratory's recognized role and scope. EU official-control laboratory designation normally requires accreditation, subject to stated derogations. ■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■

Sources & Evidence

1. Legislation on Official Controls
   · The European Commission describes accreditation to EN ISO/IEC xx.xx as a condition for official-control laboratory designation and identifies permanent and temporary derogations. This supports a scoped recognition constraint, not a universal instrument-approval requirement. ([food.ec.europa.eu](https://food.ec.europa.eu/horizontal-topics/official-controls-and-enforcement/legislation-official-controls_en))
2. Compliance Order for All Laboratories - FSSAI, I/35118/2026
   · FSSAI's 2026 order directs notified laboratories to follow prescribed methods within NABL accreditation scope and prescribed report formats. ([fssai.gov.in](https://www.fssai.gov.in/upload/advisories/2026/xx.xx/699855f2b69d3Compliance%20Order%20for%20All%20Laboratories.pdf))

4.4.3. Key Opportunities

4.4.3.1. Selective renewal of a documented laboratory equipment gap

Laboratories with an identified supporting-equipment gap can consider selective renewal rather than complete platform replacement. ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ The opportunity depends on retained assets remaining suitable and responsibility across suppliers being explicit; consolidation remains preferable when combining functions and accountability is the actual purchasing objective.

Sources & Evidence

1. Products and Accessories - Microbiology
   · Interscience separately markets preparation and reading equipment alongside combined incubation-and-counting equipment. ([interscience.com](https://www.interscience.com/en/products/))

4.4.3.2. Accountable monitoring records across food-business sites

Multisite food businesses can address fragmented monitoring records through a coordinated equipment-and-service relationship where central oversight is an explicit need. Testo markets such a bundle as well as standalone thermometers. ■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■

Sources & Evidence

1. Digital Food Safety Management with testo Saveris Food
   · Testo's UK Saveris Food offering combines stationary monitoring, handheld instruments, software, and services for food-business settings. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
2. Food Thermometers - Testo
   · Testo separately markets food thermometers, including testo xx.xx-IR, for professional kitchens, restaurants, and supermarkets. ([testo.com](https://www.testo.com/en-UK/products/food-thermometers))

4.4.3.3. Authorized local supply and handover for a defined territory

Country-specific equipment handover is an opportunity where the buyer needs an accountable local commercial interface. The announced DKSH-Hygiena Malaysian relationship assigns commercialization and after-sales functions. ■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■

Sources & Evidence

1. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia
   · The January xx.xx 2025 Malaysian announcement assigns DKSH marketing, sales, distribution, and after-sales functions for Hygiena offerings including ATP cleaning-verification systems. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))

4.4.3.4. Complete reader packages aligned with a bounded acceptance record

■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ FGIS lists R-Biopharm's named reader-and-software pairing for corn aflatoxin alongside alternatives. The opportunity requires continuing application coverage, associated-product continuity, and local support; a broader marketed menu does not extend the accepted scope.

Sources & Evidence

1. FGIS Performance Verified Aflatoxin Test Kits
   · FGIS lists RIDA QUICK Aflatoxin RQS with RIDA SMART BOX and RIDA SMART APP for corn, alongside other reader-associated alternatives. ([ams.usda.gov](https://www.ams.usda.gov/sites/default/files/media/FGISApprovedMycotoxinRapidTestKits.pdf))

4.4.4. Key Challenges

4.4.4.1. Equipment fulfillment must cover the buyer's full lifecycle package

A purchase can require a complete handover and continuing support commitment. AFBI's published LC-MS tender included installation, commissioning, training, additional warranty, and preventive maintenance. ▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
   - The procurement package supports the need to allocate handover and continuing support obligations.

4.4.4.2. Connected equipment does not automatically deliver accepted reporting

▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ Buyers must establish responsibility for record transfer, retention, and accepted reporting before relying on connected equipment. The existence of both systems does not establish a direct integration between them or automatic regulatory acceptance.

Sources & Evidence

1. Compliance Order for All Laboratories - FSSAI, I/35118/2026
   - The order requires prompt uploading of reports to InFoLNet and accurate profiles, supporting a reporting obligation separate from equipment-generated records.
2. ProdX - The Next Level in Product Safety
   - Inspection-data functionality does not establish integration with InFoLNet or automatic fulfillment of prescribed reporting.

4.4.4.3. Local channel accountability must be established contract by contract

Indirect reach does not settle service responsibility. Hygiena lists affiliate offices and distributors, while Mettler-Toledo's company-wide filing describes indirect arrangements in which distributors assume further end-customer obligations. ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. Mettler-Toledo International Inc. - 2025 Form 10-K
   · Mettler-Toledo's company-wide filing describes indirect arrangements where distributors assume further end-customer obligations; this does not establish a particular food-equipment contract. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
2. About Us - Hygiena
   · Hygiena identifies affiliate offices and a distributor network. The page establishes described channel reach, not the warranty authority or service obligations of a specific intermediary. ([hygiena.com](https://www.hygiena.com/about-us))

4.5. Porter's Five Forces Analysis

Competitive rivalry is application-specific rather than a contest among interchangeable instruments. Thermo Fisher Scientific and METTLER TOLEDO both describe food inspection offerings, whereas a laboratory reader or sample-preparation device addresses a different purchasing requirement. ■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■

Entry barriers include the ability to contract for dependable fulfillment, while supplier leverage depends on the surrounding equipment ecosystem. ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ Patents require product-specific assessment: Mettler-Toledo's filing states that no individual patent or related patent group is material to its business, which qualifies a blanket patent-lockout explanation without establishing freedom to operate for an entrant.

Counterforces prevent a universal lock-in conclusion. Agilent offers support for non-Agilent chromatography and mass spectrometry instruments, subject to the applicable service scope. ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■ ■■■■■ ■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Ramping Up Singapore's Food Testing Capabilities
   · The documented external laboratory route qualifies a universal equipment-ownership model.
2. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
   · The tender illustrates buyer-defined fulfillment requirements beyond hardware.
3. Food and Beverage - Thermo Fisher Scientific
   · Its inspection portfolio provides a documented alternative supplier example without establishing product interchangeability.
4. Product Inspection Systems - METTLER TOLEDO
   · The described inspection portfolio supports an application-bounded competition analysis.

5. GENE-UP - bioMérieux
   - Associated applications and support provide a supported premise for conditional switching-dependency analysis.
6. Mettler-Toledo International Inc. - 2025 Form 10-K
   - The filing says no individual patent or related patent group is material to the business, qualifying a blanket patent-lockout explanation.
7. Multi-Vendor Services - Agilent
   - The multi-vendor offering is counterevidence to universal original-manufacturer service exclusivity.
8. X-ray Inspection Services with X-ray Reclaim
   - Temporary inspection and rental offerings qualify a universal permanent-ownership model without proving equivalence for continuous inspection requirements.

4.6. PESTLE Analysis

[redacted] In the EU, plastic food-contact materials require declarations of compliance supported by documentation. Consequently, retail monitoring and packaging-compliance equipment address different obligations, purchasers, and acceptance conditions.

Trade-policy changes can redistribute costs after an equipment contract is signed. [redacted] Cross-border equipment contracts should identify responsibility for duties, subsequent adjustments, and customer credits rather than assume an unchanged tariff burden.

Macroeconomic exposure also differs from regulatory exposure. [redacted] Budget authorization and procurement milestones are therefore more useful commitment indicators than regulatory obligations alone.

[redacted] Walmart requires applicable supplier audits, inspections, tests, and access to records, while Testo describes equipment connected with software and services for food-safety documentation. This creates a commercial rationale for auditable records, but buyers must distinguish an equipment supplier's functionality claims from acceptance by their own customer or regulator.

Environmental obligations affect market access and lifecycle contracting. For electrical and electronic equipment within the EU WEEE regime, national registration and waste-management responsibilities can attach to manufacturers, distributors, and sellers. [redacted]

RESEARCH SAMPLE REPORT

[redacted]

Sources & Evidence

1. Legislation - Food Contact Materials
   · The plastic food-contact documentation chain establishes a distinct regulatory purchasing context, not a mandate for every manufacturer to own analytical equipment.
2. Devolution Grants to Build Skills Training Infrastructure in Agrifood
   · The announcement illustrates project-specific, earmarked capital support rather than a general equipment purchasing obligation.
3. FDA Food Code
   · FDA describes the Food Code as a model used by local, state, tribal, and federal regulators to develop or update retail and foodservice rules. Publication of a model does not establish identical local applicability. ([fda.gov](https://www.fda.gov/food/retail-food-protection/fda-food-code))
4. WEEE Responsibilities
   · Your Europe describes national registration and waste collection, treatment, recycling, and recovery responsibilities for parties supplying covered electrical and electronic equipment. Application to a particular instrument requires classification. ([europa.eu](https://europa.eu/youreurope/business/product-rules-compliance/recycling-waste-management/weee-responsibilities/index_en.htm))
5. Digital Food Safety Management with testo Saveris Food
   · Connected monitoring and documentation are supplier-described functions, not independently established customer approval.
6. Mettler-Toledo International Inc. - 2025 Form 10-K
   · The filing identifies customer capital-expenditure delays during economic downturns as a risk, not an observed outcome across the studied market.
7. Mettler-Toledo International Inc. Reports Second Quarter 2026 Results
   · Mettler-Toledo's second-quarter 2026 results disclose government tariff refunds and related customer refunds. This dated company event supports a bounded contract-allocation inference, not a general claim about prevailing tariff rates. ([investor.mt.com](https://investor.mt.com/news/news-details/2026/Mettler-Toledo-International-Inc--Reports-Second-Quarter-2026-Results/default.aspx))
8. Audits, Certifications and Testing - Walmart
   · The policy establishes customer evidence obligations distinct from a supplier's equipment functionality claims.

4.7. Market Outlook

The outlook through 2032 is conditional upgrading of accepted evidence capability rather than an automatic progression toward equipment ownership. FDA's preventive-controls framework connects equipment use with application-specific obligations, while US LAAF and EU official-control arrangements preserve separate laboratory-access gates. [redacted]

[redacted]

Suppliers should therefore monitor changes in accepted activity, funded procurement, and support continuity. Regulatory announcements or broader product catalogs alone do not establish an executable opportunity, and the direction of purchasing remains sensitive to who operates the equipment and controls the budget.

Sources & Evidence

1. FSMA Final Rule for Preventive Controls for Human Food
   · The preventive-controls framework establishes application-dependent evidence obligations, not a universal equipment-acquisition requirement. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-preventive-controls-human-food))
2. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
   · LAAF applies to specified testing circumstances and connects covered import-related obligations with accredited laboratory scope and applicable compliance dates. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/laboratory-accreditation-analyses-foods-laaf-program-final-rule))
3. Legislation on Official Controls
   · EU official-control laboratory designation normally requires EN ISO/IEC xx.xx accreditation, with specified permanent and temporary derogations. ([food.ec.europa.eu](https://food.ec.europa.eu/horizontal-topics/official-controls-and-enforcement/legislation-official-controls_en))
4. X-ray Inspection Services with X-ray Reclaim
   · METTLER TOLEDO markets off-site inspection, mobile services, and X-ray equipment rentals, establishing alternatives for suitable bounded requirements. ([mt.com](https://www.mt.com/us/en/home/products/Product-Inspection_1/x-ray-inspection-services.html?cmp=als_xray-reclaim))

4.7.1. Near-Term Market Outlook (0-2 Years)

During 2026-2027, compliance milestones should trigger buyer qualification rather than speculative equipment commitments. The US pre-harvest agricultural-water compliance date for covered very small farms producing non-sprout produce is April xx.xx 2027. ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■

Application-certification milestones require a different response. ■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■ ■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■ ■■■■■■ The observable trigger is the applicable updated acceptance record, not an assumed platform replacement.

Sources & Evidence

1. FSMA Final Rule on Pre-Harvest Agricultural Water
   · The covered non-sprout pre-harvest agricultural-water framework uses systems-based assessments; the compliance date for very small farms is April xx.xx 2027. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-pre-harvest-agricultural-water))
2. FGIS Performance Verified Aflatoxin Test Kits
   · The R-Biopharm pairing's listed certificate expiration is August xx.xx 2027; expiry does not establish that renewal will fail. ([ams.usda.gov](https://www.ams.usda.gov/sites/default/files/media/FGISApprovedMycotoxinRapidTestKits.pdf))

4.7.2. Medium-Term Market Outlook (3-5 Years)

During 2028-2029, service renewal can become a purchasing decision before hardware replacement. ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ The indicator favoring consolidation is matched contractual coverage, not a general promise of simpler laboratory management.

▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ Assuming these institutional arrangements continue, an expanded rollout should require confirmation of reporting ownership, ongoing access, and local applicability. A changed reporting obligation or demonstrated governance gap favors reassessment; adequate existing records favor retention rather than automatic platform-wide replacement.

Sources & Evidence

1. Compliance Order for All Laboratories - FSSAI, I/35118/2026
   · FSSAI's February xx.xx 2026 order directs notified laboratories to remain within NABL scope, follow prescribed reporting formats, and upload reports promptly to InFoLNet. ([fssai.gov.in](https://www.fssai.gov.in/upload/advisories/2026/xx.xx/699855f2b69d3Compliance%20Order%20for%20All%20Laboratories.pdf))
2. FDA Food Code
   · FDA describes the Food Code as a model used by regulatory jurisdictions to develop or update their own retail and foodservice rules. ([fda.gov](https://www.fda.gov/food/retail-food-protection/fda-food-code))
3. EnSURE Touch ATP Luminometer for Hygiene Monitoring
   · Optional connected analysis provides counterevidence to treating equipment renewal as mandatory replacement of the buyer's entire records architecture. ([hygiena.com](https://www.hygiena.com/hygiene-monitoring/atp-cleaning-verification/ensure-touch/hygiena-ensure-touch))

4. Multi-Vendor Services - Agilent
   · Agilent offers maintenance, repair, and compliance support for non-Agilent chromatography and mass spectrometry instruments, with plans distinguished by instrument and region. ([agilent.com](https://www.agilent.com/en/s/maintenance-repair/service-plans/multi-vendor))

4.7.3. Long-Term Market Outlook (5-10 Years)

During 2030-2032, a defensible renewal strategy should compare continued supported use, new equipment, and eligible certified pre-owned equipment rather than assume a standard replacement cycle. Agilent's documented pre-owned program establishes a commercial alternative with warranty and support options, not guaranteed future eligibility or suitability. [redacted] Circular acquisition is unsuitable if accepted functionality, continuing support, or destination obligations cannot be maintained; a supported new purchase remains the alternative. Neither refurbishment nor centralized purchasing independently establishes a superior environmental or economic outcome.

Sources & Evidence

1. WEEE Responsibilities
   · For covered electrical and electronic equipment, WEEE responsibilities include national registration and collection, treatment, recycling, and recovery obligations. ([europa.eu](https://europa.eu/youreurope/business/product-rules-compliance/recycling-waste-management/weee-responsibilities/index_en.htm))
2. The Circular Economy & Agilent's Certified Pre-Owned Instruments Program
   · Agilent's certified pre-owned program advertises a manufacturer warranty and installation, training, and service options; future instrument eligibility is not guaranteed. ([agilent.com](https://www.agilent.com/about/newsroom/media-room/cpo.html))
3. Agilent Product Recycling Program
   · Agilent distinguishes product and regional eligibility and identifies local laws, distributor arrangements, contracts, and appointed providers as factors affecting recycling options. ([agilent.com](https://www.agilent.com/environment/product/index.shtml))

4.8. Go-to-Market Strategy

[redacted] An incumbent can compete on continuity of its supported application package; bioMérieux's GENE-UP proposition illustrates associated applications and instrument support. An entrant must establish a matched commercial package rather than rely on a shared platform label.

Use indirect entry only where the partner contributes documented selling authority and delivery capability. DKSH's Malaysian Hygiena relationship provides an evidenced commercialization and after-sales route, but its Indonesian food-and-beverage remit is described as Sumatra-specific. ■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■ ■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■ ■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■■■

■■■ ■ ■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■ ■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ OEM sourcing may provide a distinct branded proposition while increasing dependence on the underlying supplier. Defer customer commitments if the necessary rights or continuing support cannot be secured.

■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ Settle protection at ordering where required: Interscience makes warranty extension purchase-time dependent and local service availability conditional. Contract acceptance, not catalog breadth, should trigger delivery commitments.

Sources & Evidence

1. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
   - Food owners and consignees can be required to use an accredited laboratory without themselves becoming equipment operators. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/laboratory-accreditation-analyses-foods-laaf-program-final-rule))
2. GENE-UP - bioMérieux
   - bioMérieux associates GENE-UP with food-related applications and advertises installation, IT integration, training, maintenance, repairs, and remote support. ([biomerieux.com](https://www.biomerieux.com/corp/en/our-offer/industry-products/gene-up-automated-pathogen-detection.html))
3. Audits, Certifications and Testing - Walmart
   - Walmart's supplier policy establishes a customer evidence-acceptance relationship distinct from equipment purchasing authority. ([corporate.walmart.com](https://corporate.walmart.com/suppliers/requirements/audits-and-certifications))
4. METTLER TOLEDO - General Distribution Terms
   - METTLER TOLEDO's distribution terms define product and territory appointments and assign distributors after-sales capability and corresponding customer warranty work. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

5. Service Offers - Interscience
   · Interscience makes service availability area-dependent; warranty extension is available only at equipment purchase and requires registration. ([interscience.com](https://www.interscience.com/en/support/services/service-offers?lang=en))
6. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia
   · The announced Malaysian relationship documents a local commercialization-and-support contribution, not an indefinitely available appointment for another supplier. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))
7. Driving Market Expansion for Hygiena's Diagnostic Solutions in Southeast Asia
   · DKSH's August xx.xx 2025 account describes territory- and sector-specific Hygiena appointments, including Sumatra rather than nationwide Indonesian food-and-beverage coverage. ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/driving-market-expansion-for-hygienas-diagnostic-solutions-in-southeast-asia/))
8. Terms and Conditions | DKSH Malaysia LabShop
   · LabShop terms identify DKSH Technology Sdn Bhd and require separate business-to-business arrangements, while retaining product fulfillment and support obligations with DKSH. ([labshop.dksh.com.my](https://labshop.dksh.com.my/shop/terms-and-conditions))
9. Company - IUL
   · IUL explicitly advertises OEM products alongside microbiology equipment and food-related reader activity; a specific sourcing agreement is not established. ([iul-instruments.com](https://iul-instruments.com/company/))
10. ID 6121155 - AFBI - CSB - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer with Linear Ion Trap Functionality
    · AFBI's public notice combines LC-MS supply with installation, commissioning, training, warranty, and maintenance obligations. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=MAR598215&catID=))

5. Market Insights

5.1. Consumer Insights & End-User Perspective

The buyer's job is to obtain evidence accepted by the party controlling the food-supply relationship, not simply to acquire a named instrument. ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ An equipment supplier's documentation features do not themselves confer customer acceptance.

AFBI's December 2025 LC-MS tender couples supply with installation, training, warranty, and maintenance. Training and delivery are pass/fail criteria; a possible additional purchase requires further funding and budgetary approval. ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■

The organization needing accepted results also need not be the equipment purchaser. FDA's LAAF framework places specified laboratory-use obligations on food owners and consignees. ■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
   · FDA places specified obligations on food owners and consignees to use LAAF-accredited laboratories; this is distinct from requiring those businesses to own equipment. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/laboratory-accreditation-analyses-foods-laaf-program-final-rule))
2. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
   · AFBI's December xx.xx 2025 tender includes installation, training, warranty, and maintenance; training and delivery are pass/fail criteria. An optional additional acquisition requires further funding and budgetary approval. ([find-tender.service.gov.uk](https://www.find-tender.service.gov.uk/Notice/xx.xx-2025/PDF))
3. Audits, Certifications and Testing - Walmart
   · Walmart requires suppliers to obtain applicable audits, inspections, and tests, provide results, and make products, facilities, and records available. This establishes customer evidence obligations, not a prescribed equipment purchase. ([corporate.walmart.com](https://corporate.walmart.com/suppliers/requirements/audits-and-certifications))

5.2. Consumer Experience Benchmarking

Connected hygiene-monitoring instruments provide a defensible purchasing-role comparison, but their connectivity does not establish equivalent analytical performance. Hygiena describes EnSURE Touch with direct Wi-Fi synchronization to SureTrend and remote training and support. ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■■■■■■

[redacted]

Kikkoman also provides an application version without cloud functionality. This is a documented counterexample to the assumption that centralized cloud operation is unavoidable. [redacted]

[redacted] Buyers should compare the actual regional undertaking, update responsibility, and escalation arrangements. A feature list is not an adequate proxy for the support experience available at the installation site.

Sources & Evidence

1. EnSURE Touch ATP Luminometer for Hygiene Monitoring
   · Hygiena describes EnSURE Touch as a handheld hygiene-monitoring instrument with direct Wi-Fi synchronization to SureTrend and remote training and support functionality. These are supplier-described capabilities, not comparative outcome evidence.
   ([hygiena.com](https://www.hygiena.com/hygiene-monitoring/atp-cleaning-verification/ensure-touch/hygiena-ensure-touch))
2. Lumitester Smart - Kikkoman Biochemifa
   · Kikkoman Biochemifa describes Lumitester Smart as a portable hygiene-monitoring luminometer with application-based data visualization and cloud access. This supports a purchasing-role comparison, not analytical equivalence.
   ([biochemifa.kikkoman.com](https://biochemifa.kikkoman.com/e/products/detail/?id=xx.xx))
3. Lumitester Smart Manual and App
   · Kikkoman's support page describes centralized multisite cloud management and also provides an application version without cloud functionality, establishing a documented alternative data arrangement.
   ([biochemifa.kikkoman.com](https://biochemifa.kikkoman.com/e/support/dl/smart/?utm_source=openai))
4. Software Care for Product Inspection
   · METTLER TOLEDO defines Product Inspection Software Care through support, license, and service-level agreements, with remote support and software updates. It expressly states that software services are not available in all regions.
   ([mt.com](https://www.mt.com/us/en/home/service/software-care/product-inspection-software-care.html))

5.3. Opportunity Mapping

[redacted] A specialist supplier can address an identified equipment gap while the laboratory retains suitable assets. A combined purchase remains preferable when consolidating responsibility is itself valuable; selective renewal becomes

unsuitable if retained equipment or cross-supplier support cannot sustain the required application.

[redacted] Suppliers should qualify the complete accepted pairing, continuing software and associated-product relationship, and local support. Buyers gain a credible alternative only when these elements match; an additional reader brand without the accepted application does not improve the choice set.

Food Retailers and Foodservice Operators with explicit central-oversight requirements are candidates for coordinated monitoring and records packages. [redacted] Central visibility is an opportunity only where it addresses a documented management gap, not because every site requires a new software relationship.

[redacted] Covered US cabinet X-ray systems add manufacturer documentation and installation-location obligations. A combined route is unsuitable when these responsibilities remain divided without an accountable counterparty.

Malaysia provides a named local hygiene-equipment procurement lead: DKSH LabShop advertises Hygiena EnSURE Touch. Its business-to-business terms require separate customer arrangements, and the documented regional appointments have territorial limits. [redacted]

[redacted] NIFA's shared-instrument program identifies another funding route for eligible institutions, not a purchase award. Suppliers should commit bid and support resources against the actual procurement and funding milestone, preserving the distinction between food-safety use and broader shared institutional activity.

Sources & Evidence

1. Products and Accessories - Microbiology
   · The portfolio supplies distinct purchasing functions, supporting comparison of selective renewal with combined equipment without establishing retained-asset compatibility. ([interscience.com](https://www.interscience.com/en/products/))
2. Digital Food Safety Management with testo Saveris Food
   · Restaurants, catering, and distribution centers are identified settings for the coordinated monitoring-and-records proposition. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
3. Cabinet X-Ray Systems (Closed X-Ray Systems) - FDA
   · FDA identifies food inspection as a cabinet X-ray application and separates manufacturer reporting and product obligations from OSHA or state oversight of use. ([fda.gov](https://www.fda.gov/radiation-emitting-products/security-systems/cabinet-x-ray-systems-closed-x-ray-systems))
4. Equipment Grants Program - NIFA
   · NIFA's Equipment Grants Program supports eligible higher-education institutions acquiring shared instruments for food and agricultural sciences; program eligibility is not an award. ([nifa.usda.gov](https://www.nifa.usda.gov/grants/funding-opportunities/equipment-grants-program))
5. FGIS Performance Verified Aflatoxin Test Kits
   · The official listing associates named equipment and software with a particular application and commodity, rather than granting universal reader acceptance. ([ams.usda.gov](https://www.ams.usda.gov/sites/default/files/media/FGISApprovedMycotoxinRapidTestKits.pdf))
6. Mix and Match Your Ideal Combination Inspection System
   · METTLER TOLEDO markets standalone and combination inspection systems with associated connectivity, service, and training support. ([mt.com](https://www.mt.com/us/en/home/library/product-brochures/product-inspection/PI/Combinations_Brochure.html))
7. Food Thermometers - Testo
   · The standalone instrument catalog provides an alternative to purchasing a broader digital-management bundle. ([testo.com](https://www.testo.com/en-UK/products/food-thermometers))
8. Hygiena EnSURE Touch Instrument ETOUCH | DKSH Malaysia LabShop
   · DKSH Malaysia LabShop advertises Hygiena EnSURE Touch through a quotation route; the listing is not proof of completed delivery. ([labshop.dksh.com.my](https://labshop.dksh.com.my/shop/p/hygiena-ensure-touch-instrument-etouch-tecpim000531181))
9. Driving Market Expansion for Hygiena’s Diagnostic Solutions in Southeast Asia
   · The described appointment boundaries qualify a region-wide access assumption; continuing rights require transaction-specific confirmation. ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/driving-market-expansion-for-hygienas-diagnostic-solutions-in-southeast-asia/))
10. Terms and Conditions | DKSH Malaysia LabShop
    · The terms distinguish the operating seller from payment processing and do not replace an institutional customer's equipment-specific agreement. ([labshop.dksh.com.my](https://labshop.dksh.com.my/shop/terms-and-conditions))
11. ID 6121155 - AFBI - CSB - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer with Linear Ion Trap Functionality
    · The notice published March xx.xx 2026 names AB SCIEX UK LIMITED; an additional acquisition remains funding- and budget-dependent. Estimated contract dates do not prove delivery. ([sell2wales.gov.wales](https://www.sell2wales.gov.wales/search/show/search_view.aspx?ID=MAR598215&catID=))

5.4. Distribution Channel Analysis

Direct Sales and Distributor and Reseller Sales differ in the contracting relationship, not merely in customer reach. METTLER TOLEDO's sales terms describe manufacturer order acceptance, while its distribution terms place appointed resellers in their own-name transactions for specified products and territories and allocate corresponding warranty work to them. ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■

Local partners can contribute an established equipment-and-service relationship. Ishida's Nikas case study identifies its partner Europack alongside the manufacturer in the customer's account of an installed inspection system. ■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■ ■■ ■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■

■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■
Independent Testing Laboratories can therefore assess a consolidated service relationship as an alternative to separate original-manufacturer arrangements. The option remains conditional on coverage of the particular instruments and location, with coordination and responsibility for exclusions established before switching.

Sources & Evidence

1. Multi-Vendor Services - Agilent
   · Agilent offers repair, maintenance, and compliance support for non-Agilent chromatography and mass spectrometry instruments. Its service resources distinguish instrument- and region-specific plans. ([agilent.com](https://www.agilent.com/en/s/maintenance-repair/service-plans/multi-vendor))
2. Mettler-Toledo Standard Terms and Conditions for Sales and Service
   · METTLER TOLEDO's standard sales terms describe order acceptance through written confirmation or execution. They establish a contractual route rather than proof of identical local fulfillment. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
3. METTLER TOLEDO - General Distribution Terms
   · METTLER TOLEDO's distribution terms define nonexclusive appointments for specified territories and products. Distributors transact in their own name and undertake corresponding customer warranty work under their service obligations. ([mt.com](https://www.mt.com/se/sv/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
4. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
   · Ishida's Nikas case study reports an installed X-ray inspection system and identifies Ishida and its partner Europack in the customer's account of the equipment and service relationship. This is supplier-reported deployment evidence. ([ishidaeurope.com](https://www.ishidaeurope.com/media/x4jbsxoh/nikas-gr-ix-pd-for-fresh-chicken-eng-tg-approved-xx.xx.pdf))

5.5. Pricing Trend Analysis

Quotation comparability depends on the contracted package. ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ Procurement should reconcile these obligations before comparing offers; a hardware-only offer and a supported installation are different commercial commitments.

Associated subscriptions introduce renewal and exit conditions beyond equipment ownership. SureTrend's published service terms specify advance recurring payment and written nonrenewal notice xx.xx days before a new subscription period. ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪

▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ This company event does not establish the treatment of another contract. The company's 2025 filing also identifies deferred customer capital spending as an economic risk; budget authorization remains a separate commitment gate.

Sources & Evidence

1. Mettler-Toledo International Inc. - 2025 Form 10-K
   - The filing identifies deferred customer capital spending during economic downturns as a business risk. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
2. Mettler-Toledo International Inc. Reports Second Quarter 2026 Results
   - Mettler-Toledo's July xx.xx 2026 results report both government tariff refunds and related refunds to customers. The event supports a bounded conclusion about contractual adjustment and credits, not a prevailing tariff assumption. ([investor.mt.com](https://investor.mt.com/news/news-details/2026/Mettler-Toledo-International-Inc--Reports-Second-Quarter-2026-Results/default.aspx))
3. Mettler-Toledo Standard Terms and Conditions for Sales and Service
   - The terms exclude installation, shipping, duties, and other specified costs unless included in order documents, and permit adjustments when underlying quotation circumstances change. Package comparability therefore requires order-level reconciliation. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
4. SureTrend Terms of Service
   - SureTrend's published service terms provide for advance recurring payment, automatic renewal, written nonrenewal notice xx.xx days before a new subscription period, and restrictions on partial-period refunds. ([hygiena.com](https://www.hygiena.com/terms-and-conditions-suretrend))
5. SureTrend Food Safety Management Software
   - SureTrend's product page describes monthly or annual subscriptions without long-term commitments and cancellation to prevent future billing. These descriptions require reconciliation with the separate service terms for a particular purchase. ([hygiena.com](https://www.hygiena.com/software/suretrend))

5.6. Regulatory Compliance & Standards Framework

Laboratory recognition and equipment compliance are separate access conditions. In the United States, FDA's Laboratory Accreditation for Analyses of Foods program requires accredited laboratories for specified circumstances, with covered import-related obligations dependent on analyte groups and applicable compliance dates. ■■ ■■■■ ■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■ ■■■ ■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■ ■■■■■ ■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■

India adds a reporting obligation to the recognition relationship. FSSAI's February xx.xx 2026 order directs notified laboratories to remain within their NABL accreditation scope, use prescribed report formats, and upload reports promptly to InFoLNet. ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■■■■

Product Safety Inspection Systems can face equipment-specific rules independently of laboratory recognition. ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■ ■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■ A US purchaser should establish the applicable manufacturer documentation and installation-location obligations before commitment; food-safety functionality alone does not settle these separate requirements.

■■■■■■ ■■■■■■ ■■ ■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ Neither portfolio breadth nor equipment certification establishes an entrant's freedom to operate. Commercial rights require assessment for the actual offering and jurisdiction.

Sources & Evidence

1. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
   · LAAF implementation for covered import-related testing depends on the applicable analyte group and compliance date. FDA expressly states that the program does not cover all food testing. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/laboratory-accreditation-analyses-foods-laaf-program-final-rule))
2. Legislation on Official Controls
   · The European Commission identifies EN ISO/IEC xx.xx accreditation as a condition for official-control laboratory designation, while describing permanent and temporary derogations under specified circumstances. ([food.ec.europa.eu](https://food.ec.europa.eu/horizontal-topics/official-controls-and-enforcement/legislation-official-controls_en))
3. Compliance Order for All Laboratories - FSSAI, I/35118/2026
   · FSSAI's February xx.xx 2026 order directs notified laboratories to remain within NABL accreditation scope, use prescribed report formats, and upload reports promptly to InFoLNet. Continued noncompliance may trigger action. ([fssai.gov.in](https://www.fssai.gov.in/upload/advisories/2026/xx.xx/699855f2b69d3Compliance%20Order%20for%20All%20Laboratories.pdf))

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   · The filing distinguishes limited whole-product patent protection from infringement exposure that can require licensing or cessation of sales.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
5. Cabinet X-Ray Systems (Closed X-Ray Systems) - FDA
   · FDA identifies food inspection as a cabinet X-ray application and assigns manufacturers applicable radiation-product reporting, importation, and performance-standard obligations. Product use is regulated by OSHA or state government.
   ([fda.gov](https://www.fda.gov/radiation-emitting-products/security-systems/cabinet-x-ray-systems-closed-x-ray-systems))

5.7. ESG & Sustainability Analysis

Environmental criteria can enter equipment purchasing through funding conditions rather than general sustainability preferences. UKRI's FEC grant terms require consideration of energy and waste implications in equipment and maintenance procurement. ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■

Circular purchasing is a documented commercial alternative for analytical equipment. Agilent describes certified pre-owned instruments with a manufacturer warranty and installation, training, and service options, alongside refurbishment and recycling arrangements. ■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■

Preventive monitoring creates a different sustainability proposition. ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ Purchasing decisions should assign responsibility for reviewing alerts and addressing exceptions while preserving food-safety obligations; a supplier's waste-reduction proposition is not proof of a realized result.

Sources & Evidence

1. Digital Food Safety Management with testo Saveris Food
   · Testo markets Saveris Food monitoring and documentation for food businesses and describes potential food-waste benefits. Realized waste prevention remains a conditional commercial inference, not an independently demonstrated outcome.
   ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))

2. UKRI Terms and Conditions of FEC Grants
   · UKRI's FEC grant terms require consideration of energy and waste implications when procuring equipment, consumables, and services, including maintenance. This is a scoped funding condition, not a universal food-industry rule. ([ukri.org](https://www.ukri.org/publications/terms-and-conditions-for-research-grants/ukri-terms-and-conditions-of-fec-grants/))
3. The ACT Ecolabel: The Standard for Lab Product Sustainability
   · My Green Lab's ACT program provides independently verified product-level sustainability information for equipment purchasing and supplier comparisons. This supports environmental comparison, not food-safety performance certification. (act.mygreenlab.org)
4. The Circular Economy & Agilent's Certified Pre-Owned Instruments Program
   · Agilent describes certified pre-owned analytical instruments with a manufacturer warranty and options for installation, training, and service coverage. Food-safety suitability remains application-specific. ([agilent.com](https://www.agilent.com/about/newsroom/media-room/cpo.html))
5. Agilent Product Recycling Program
   · Agilent describes refurbishment, resale, trade-in, and recycling arrangements, while distinguishing products and regions not included in its trade-in and buyback programs. Eligibility therefore requires confirmation. ([agilent.com](https://www.agilent.com/environment/product/index.shtml))

5.8. Disruption & Risk Scenarios

▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Buyers should monitor the relevant public scope record and maintain an accepted alternative fulfillment relationship before relying on uninterrupted access. This is a conditional scenario, not evidence that a particular laboratory has lost recognition or that its equipment has become unusable for every purpose.

A channel-change scenario would transmit through selling authority, warranty administration, and local support rather than necessarily through equipment functionality. ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Additional contractual protection can preserve continuity but adds coordination and may limit channel flexibility.

Subscription exit uncertainty creates a separate commitment risk. SureTrend's product description emphasizes cancellation flexibility, while its service terms prescribe advance written nonrenewal. ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
   · Accredited laboratory scopes are a defined acceptance condition for covered LAAF work; scope interruption is analyzed as a scenario, not an observed event. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/laboratory-accreditation-analyses-foods-laaf-program-final-rule))
2. Legislation on Official Controls
   · Official-control designation and accreditation are institutional access conditions; this supports a bounded recognition-interruption scenario rather than a general equipment failure claim. ([food.ec.europa.eu](https://food.ec.europa.eu/horizontal-topics/official-controls-and-enforcement/legislation-official-controls_en))
3. SureTrend Terms of Service
   · SureTrend's service terms prescribe written nonrenewal notice xx.xx days before a new subscription period and restrict partial-period refunds. ([hygiena.com](https://www.hygiena.com/terms-and-conditions-suretrend))
4. SureTrend Food Safety Management Software
   · SureTrend's product page describes cancellation to prevent future billing and no long-term commitments; the applicable purchase terms require reconciliation with separate service terms. ([hygiena.com](https://www.hygiena.com/software/suretrend))
5. METTLER TOLEDO - General Distribution Terms
   · The terms permit termination and distinguish manufacturer obligations from distributor customer undertakings, supporting a conditional channel-continuity scenario. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
6. Driving Market Expansion for Hygiena's Diagnostic Solutions in Southeast Asia
   · Country and sector boundaries establish exposure to appointment changes, without establishing that a termination has occurred. ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/driving-market-expansion-for-hygienas-diagnostic-solutions-in-southeast-asia/))

5.9. Return on Investment & Cost-Benefit Analysis

For a laboratory, the relevant investment comparison is selective functional renewal, a combined equipment purchase, or continued use with a different support arrangement. ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ The decision depends on the actual capability gap, application continuity, handover obligations, service exclusions, and the cost of retaining multiple accountable relationships.

■■■ ■ ■■■■ ■■■■■■■■■■■■ ■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ Ownership becomes more defensible when direct control and continuing onsite access are necessary and a supported installation can be contracted. The comparison must retain the same accepted inspection deliverable; a temporary service proposition is not evidence that continuous production-line requirements can be outsourced without consequence.

[redacted] Discretionary rollout funding should depend on an identified administrative problem, signed entitlements, accountable record review, and a clear local support undertaking. Where existing records meet the requirement or no organizational burden is removed, a narrower purchase or deferral is more defensible than attributing avoided recalls or waste to hardware installation alone.

Sources & Evidence

1. Products and Accessories - Microbiology
   · Separately offered and combined functions provide commercial alternatives for a laboratory investment decision; savings are not established by the catalog. ([interscience.com](https://www.interscience.com/en/products/))
2. Digital Food Safety Management with testo Saveris Food
   · Monitoring, documentation, and escalation are supplier-described capabilities; administrative and waste-related benefits remain conditional on organizational use. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
3. Multi-Vendor Services - Agilent
   · The multi-vendor offering allows maintenance-provider comparison without first replacing analytical hardware; universal coverage or realized savings are not established. ([agilent.com](https://www.agilent.com/en/s/maintenance-repair/service-plans/multi-vendor))
4. X-ray Inspection Services with X-ray Reclaim
   · Rental arrangements are described for temporary requirements and maintenance periods; suitability and local commitments remain project-specific. ([mt.com](https://www.mt.com/us/en/home/products/Product-Inspection_1/x-ray-inspection-services.html?cmp=als_xray-reclaim))
5. Food Thermometers - Testo
   · Separately offered thermometers support comparing a narrower measurement purchase with an integrated records relationship. ([testo.com](https://www.testo.com/en-UK/products/food-thermometers))

6. Cumulative Impact of Artificial Intelligence 2026

[redacted] This establishes a bounded feature release, not general adoption or demonstrated labor savings. Buyers should confirm entitlement and retain responsibility for checking imported information against the underlying record.

[redacted] Compatibility, data access, and the supplier's support undertaking therefore matter alongside hardware selection. The offering description does not establish a particular customer's deployment, reduced staffing requirement, or improved safety outcome; these benefits remain conditional.

Governance should preserve named organizational accountability. [redacted] AI adoption is commercially defensible only where integration, review responsibilities, and continuing access to records are established.

Sources & Evidence

1. Compliance Order for All Laboratories - FSSAI, I/35118/2026
   · The reporting obligations attach to FSSAI-notified laboratories. The commercial inference is that automated data extraction does not independently discharge those obligations. ([fssai.gov.in](https://www.fssai.gov.in/upload/advisories/2026/xx.xx/699855f2b69d3Compliance%20Order%20for%20All%20Laboratories.pdf))
2. SureTrend Software Update
   · SureTrend's February 2025 release notes identify AI-assisted certificate-of-analysis uploads as an alpha release for selected customers. March 2025 notes retain the limited-access description and allow missing information to be entered when parsing is incomplete. ([hygiena.com](https://www.hygiena.com/news/suretrend-software-update))
3. A Review of Smart Factories for Manufacturing and How Ishida's Sentinel 5.0 Answers Key Customer Challenges
   · Ishida's March xx.xx 2025 description presents Sentinel xx.xx, unveiled at Gulfood Manufacturing 2024, as AI-enabled cloud monitoring with machine-pattern analysis, alerts, and chatbot support. It does not establish customer-specific realized outcomes. ([ishidaeurope.com](https://www.ishidaeurope.com/en/about-us/case-studies-and-events/news/a-review-of-smart-factories-for-manufacturing-and-how-ishida-s-sentinel-xx.xx-answers-key-customer-challenges-like-no-one-else/))

4. AI Risk Management Framework - NIST
   - NIST describes its AI Risk Management Framework as voluntary guidance for incorporating trustworthiness into AI use and evaluation. It is not a food-equipment authorization or laboratory recognition scheme. ([nist.gov](https://www.nist.gov/itl/ai-risk-management-framework))

7. Food Safety Testing Equipment Market, by Equipment Type

Equipment Type separates complementary purchasing functions rather than interchangeable instruments. Sampling Equipment addresses collection, while Sample Preparation & Handling Equipment supports the laboratory's analytical capability. ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. Food and Beverage - Thermo Fisher Scientific
   · Thermo Fisher Scientific describes analytical instruments and supporting laboratory equipment within its food-and-beverage portfolio.

2. Products and Accessories - Microbiology
   - INTERSCIENCE lists gravimetric dilutors, laboratory blenders, dispensing pumps, automatic platers, and a combined real-time incubator and colony counter.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
3. Product Inspection Systems - METTLER TOLEDO
   - METTLER TOLEDO lists metal detection, X-ray inspection, vision inspection, and combination systems within a portfolio addressing safety and quality.
4. Digital Food Safety Management with testo Saveris Food
   - Testo describes stationary monitoring, handheld measuring meters, software, and services for documenting food-safety processes.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
5. Professional samplers for food, pharmaceutical, chemical and environmental industries
   - Bürkle's sampler portfolio distinguishes bulk goods, liquids, viscous liquids, and meat, ice cream, and frozen-food applications.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
6. Technical Specifications for Equipment Used in Chemical Analysis of Food - FSSAI
   - Taxonomy evidence: The official catalog distinguishes primary analytical instruments from auxiliary equipment and covers food safety and quality together; it is not an equipment-market partition. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))
7. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory
   - Taxonomy evidence: Annexure I distinguishes chemical-analysis, microbiology, and supporting equipment. Its Indian food-laboratory scope includes safety and quality; it is not a global market partition or blanket inclusion rule. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

8. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
9. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))

10. Mettler-Toledo International Inc. - 2025 Form 10-K
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))

11. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
12. Agilent Technologies - 2017 Annual Report
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
13. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

14. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
15. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
16. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
17. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
18. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
19. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

20. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
21. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

22. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
23. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
24. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
25. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))
26. Testo - Annual Press Conference, February 19, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

7.1. Analytical Instruments & Test Readers

Table 6. Global Food Safety Testing Equipment Market Size, by Analytical Instruments & Test Readers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 7. Global Food Safety Testing Equipment Market Size, by Analytical Instruments & Test Readers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Technical Specifications for Equipment Used in Chemical Analysis of Food - FSSAI

   · Taxonomy evidence: The catalog separately identifies PCR equipment, spectrometers, chromatographs, and an ELISA reader, supporting recognition of analytical hardware rather than consumable kits. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods - Food Standards Agency
   - Taxonomy evidence: The commissioned review's commercial cost section separately identifies plate readers, PCR instruments, LC-MS instruments, consumables, and service-related costs, supporting hardware-only accounting. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
   - Taxonomy evidence: Quote-based hardware discussion identifies plate readers, real-time PCR instruments, and LC-MS instruments separately from common support equipment. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
3. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory
   - Taxonomy evidence: Lists chromatographs, ICP-MS, spectrophotometers, an ELISA reader, and a digital colony counter as food-laboratory instruments. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))
4. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.

30. Brazil Ministry of Agriculture - Accredited Laboratories
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.

31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.

32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.

33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.

34. Products and Accessories - Microbiology | INTERSCIENCE
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))

7.2. Product Safety Inspection Systems

Table 9. Global Food Safety Testing Equipment Market Size, by Product Safety Inspection Systems, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 10. Global Food Safety Testing Equipment Market Size, by Product Safety Inspection Systems, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 11. Global Food Safety Testing Equipment Market Size, by Product Safety Inspection Systems, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. BRCGS Global Standard Food Safety, Issue 9

   · Taxonomy evidence: Section xx.xx recognizes food foreign-body detection equipment, including metal-detection, X-ray, and optical systems. Its broader removal-equipment coverage is not imported into this taxonomy.
   ([nifcc.co.uk](https://www.nifcc.co.uk/site/wp-content/uploads/2023/xx.xx/BRCGS_Food_Safety_Standard_Issue_9.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.

7.3. Safety-Condition Measurement & Monitoring Equipment

Table 12. Global Food Safety Testing Equipment Market Size, by Safety-Condition Measurement & Monitoring Equipment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 13. Global Food Safety Testing Equipment Market Size, by Safety-Condition Measurement & Monitoring Equipment, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 14. Global Food Safety Testing Equipment Market Size, by Safety-Condition Measurement & Monitoring Equipment, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. HACCP Principles & Application Guidelines

   · Taxonomy evidence: Distinguishes hazard testing from monitoring temperature, time, pH, and moisture, supporting a separate safety-condition measurement role. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))

2. Water Activity (aw) in Foods

   · Taxonomy evidence: Provides a food-safety-linked measurement role for water-activity equipment, distinct from the machinery used to process or preserve food. ([fda.gov](https://www.fda.gov/inspections-compliance-enforcement-and-criminal-investigations/inspection-technical-guides/water-activity-aw-foods))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))

16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. Testo - Annual Press Conference, February 19, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
35. Digital Food Safety Management with testo Saveris Food
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))

7.4. Sample Preparation & Handling Equipment

Table 15. Global Food Safety Testing Equipment Market Size, by Sample Preparation & Handling Equipment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 16. Global Food Safety Testing Equipment Market Size, by Sample Preparation & Handling Equipment, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 17. Global Food Safety Testing Equipment Market Size, by Sample Preparation & Handling Equipment, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Technical Specifications for Equipment Used in Chemical Analysis of Food - FSSAI
   · Taxonomy evidence: The auxiliary-equipment headings recognize homogenizers, centrifuges, sample-extraction hardware, and dispensing equipment. Inclusion in this market still requires food-safety attribution.
   ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))
2. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory
   · Taxonomy evidence: Lists homogenizers, grinding mills, centrifuges, pipettes, evaporators, and microwave digestion systems among supporting equipment.
   ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))
3. ISO 7218:2024 - Microbiology of the Food Chain - General Requirements and Guidance for Microbiological Examinations, Public Preview
   · Taxonomy evidence: Separately recognizes pipettors, diluters, homogenizers, centrifuges, and filtration/separation equipment.
   ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))

4. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
5. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.

6. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

7. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
8. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
9. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

10. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
11. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

12. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
13. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
14. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
15. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
16. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
17. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

18. Eurofins Scientific - FY 2025 Results Presentation
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.

19. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.

20. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

21. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.

22. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.

23. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

24. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
25. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
26. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
27. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
28. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
29. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

30. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
31. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
32. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
33. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
34. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
35. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.

7.5. Test Incubation & Culture-Handling Equipment

Table 18. Global Food Safety Testing Equipment Market Size, by Test Incubation & Culture-Handling Equipment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 19. Global Food Safety Testing Equipment Market Size, by Test Incubation & Culture-Handling Equipment, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 20. Global Food Safety Testing Equipment Market Size, by Test Incubation & Culture-Handling Equipment, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ISO 7218:2024 - Microbiology of the Food Chain - General Requirements and Guidance for Microbiological Examinations, Public Preview

   · Taxonomy evidence: Equipment headings distinguish incubators and controlled heating equipment from inoculation hardware, including spiral platers. ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
34. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

7.6. Sampling Equipment

Table 21. Global Food Safety Testing Equipment Market Size, by Sampling Equipment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 22. Global Food Safety Testing Equipment Market Size, by Sampling Equipment, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 23. Global Food Safety Testing Equipment Market Size, by Sampling Equipment, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Dairy Plant - Milk Sample Collector Evaluation Record

   · Taxonomy evidence: The historical dairy-plant record recognizes sample-transfer instruments and in-line samplers, establishing a durable sampling-hardware role rather than current model availability. ([fda.gov](https://www.fda.gov/files/about%20fda/published/Dairy-Plant---Milk-Sample-Collector-Evaluation-Record-%28PDF%xx.xx.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))

8. Food Safety Testing Equipment Market, by Technology Platform

[illegible] Its breadth does not independently establish an electrophoresis purchasing role. A proposed electrophoresis instrument therefore requires a separately documented food-safety offering and a clear distinction between primary analysis and support for another platform.

Nucleic Acid Amplification & Sequencing contains different documented commercial relationships. bioMérieux markets GENE-UP as a PCR Platforms offering for foodborne-hazard detection. [illegible]

Affinity & Biochemical Assay Platforms require attention to the supported application as well as the reader. R-Biopharm markets RIDA CUBE SCAN for enzymatic and colorimetric food-component analysis, including sulfite, demonstrating a non-immunological offering within the broader family. [illegible]

Culture-Based Microbiology, Flow Cytometry, and Bioluminescence & Chemiluminescence likewise should not be treated as interchangeable detection claims. ISO xx.xx recognizes culture enumeration, ATP measurement, and flow cytometry within food-chain analysis; Hygiena's EnSURE Touch illustrates an ATP-based hygiene-monitoring offering. [illegible]

Radiometric Analysis is commercially distinct from X-Ray Imaging: Mirion markets FoodScreen for radiological food screening, whereas METTLER TOLEDO's X-ray systems address physical contamination inspection. Metal Detection and Optical Imaging & Machine Vision also appear

as separate inspection offerings, with vision products addressing labeling and packaging checks. ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■ ■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■

■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ Analytical laboratories can evaluate an alternative service provider without assuming that its coverage extends to every molecular, inspection, or monitoring platform. Switching is defensible only after the actual instrument, location, application continuity, and contractual exclusions are confirmed.

Figure 10. Global Food Safety Testing Equipment Market Size, by Technology Platform, 2025 (%)

Sources & Evidence

1. PulseNet Timeline

- CDC documents PulseNet's use of whole-genome sequencing for foodborne-disease surveillance and outbreak detection, establishing an institutional role distinct from a general manufacturer equipment mandate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.

2. Food and Beverage - Thermo Fisher Scientific
   - The portfolio names chromatography, mass spectrometry, spectroscopy, photometric and electrochemical analysis, while also covering authenticity, composition, and quality applications. It does not independently settle the proposed electrophoresis purchasing role.
3. Products and Accessories - Microbiology
   - The preparation portfolio establishes offered mechanical and fluidic supporting-equipment roles, distinct from the listed reading equipment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
4. Product Inspection Systems - METTLER TOLEDO
   - X-ray equipment is offered for contamination detection; vision equipment is described for labeling and packaging checks. These establish separate offered purposes rather than platform equivalence.
5. EnSURE Touch ATP Luminometer for Hygiene Monitoring
   - EnSURE Touch is described as an ATP bioluminescence hygiene-monitoring instrument, illustrating a defined portion of the broader platform category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
6. GENE-UP - bioMérieux
   - bioMérieux markets GENE-UP as a real-time PCR solution for foodborne-hazard detection and presents associated applications, test kits, and instrument-support services.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
7. Multi-Vendor Services - Agilent
   - Agilent offers repair, maintenance, and compliance support for non-Agilent chromatography and mass spectrometry instruments, qualifying universal manufacturer-service exclusivity.

8. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
   - Neogen's June xx.xx 2024 announcement reports a USDA FSIS contract for its Molecular Detection System and identifies the platform as LAMP-based. This is a company-reported institutional relationship, not a universal adoption claim.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
9. Testing laboratories - R-Biopharm Food & Feed Analysis
   - R-Biopharm lists RIDA CUBE SCAN as a photometric system for enzymatic and colorimetric food-component analysis, including sulfite. Its portfolio spans safety and composition applications.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
10. ISO 19036:2019 - Microbiology of the food chain - Estimation of measurement uncertainty for quantitative determinations
    - ISO xx.xx's public scope recognizes colony-count approaches, ATP measurement, flow cytometry, and qPCR within food-chain quantitative microbiology; recognition does not establish identical commercial purposes.
    - Taxonomy evidence: The scope distinguishes colony-count/MPN, impediometry, ATP, flow cytometry, and qPCR approaches in food-chain analysis, without defining an exhaustive equipment market. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))
11. FoodScreen - Radiological Food Screening System
    - Mirion markets FoodScreen specifically for radiological food screening, supporting a commercial purpose distinct from physical-contaminant X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
12. ISO 7218:2024 - Microbiology of the food chain - General requirements and guidance for microbiological examinations, public preview
    - The public ISO xx.xx:2024 preview separately identifies incubators in its food-chain microbiology equipment headings. No operational guidance is used.

13. Review of allergen analytical testing methodologies: measurement parameters and sensitivity of methods
    - The FSA-commissioned review identifies variation between commercial allergen systems and gaps in publicly comparable application information.
    - Taxonomy evidence: Different analytical platforms are treated as distinct hardware investments. Their differing costs do not establish comparable market-wide price/quality tiers. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
    - Taxonomy evidence: The FSA-commissioned review distinguishes ELISA, PCR, and LC-MS food-allergen technologies and separates associated hardware from consumables and testing fees. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
14. HACCP Principles & Application Guidelines
    - FDA's HACCP guidance identifies pH, temperature, time, and moisture measurements as monitoring activities, supporting electrochemical and physical measurement roles.
15. Processing & Marketing - Food and Beverage Manufacturing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

16. Mettler-Toledo International Inc. - 2025 Form 10-K
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
17. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.

18. Agilent Technologies - 2017 Annual Report
- Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

19. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
- Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

20. Agilent Technologies - Fiscal 2025 Annual Report
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.

21. Agilent Technologies - Q1 2025 Results Presentation
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

22. Waters Corporation - 2025 Annual Report
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.

23. Thermo Fisher Scientific Inc. - 2025 Form 10-K
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

24. bioMérieux - 2025 Financial Results
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.

25. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
26. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
27. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
28. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
29. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.

30. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
31. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
32. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

33. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
34. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.

8.1. Mass Spectrometry

Table 26. Global Food Safety Testing Equipment Market Size, by Mass Spectrometry, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

RESEARCH SAMPLE REPORT

Sources & Evidence

1. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods - Food Standards Agency
   - Taxonomy evidence: LC-MS equipment is identified as a separate hardware investment; this supports platform recognition, not a global revenue allocation. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
   - Taxonomy evidence: Identifies LC-MS hardware as distinct from immunoassay-reader and PCR equipment. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
2. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory
   - Taxonomy evidence: Includes inductively coupled plasma mass-spectrometric equipment. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))
3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.

8.2. X-Ray Imaging

Table 29. Global Food Safety Testing Equipment Market Size, by X-Ray Imaging, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 30. Global Food Safety Testing Equipment Market Size, by X-Ray Imaging, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. BRCGS Global Standard Food Safety, Issue 9

   · Taxonomy evidence: Explicitly identifies X-ray inspection equipment as a food foreign-body detection category.
   ([nifcc.co.uk](https://www.nifcc.co.uk/site/wp-content/uploads/2023/xx.xx/BRCGS_Food_Safety_Standard_Issue_9.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.

8.3. Physical Property Metrology

Table 32. Global Food Safety Testing Equipment Market Size, by Physical Property Metrology, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 33. Global Food Safety Testing Equipment Market Size, by Physical Property Metrology, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 34. Global Food Safety Testing Equipment Market Size, by Physical Property Metrology, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory
   · Taxonomy evidence: Lists analytical balances, thermohygrometers, and water-activity meters. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))
2. ISO 7218:2024 - Microbiology of the Food Chain - General Requirements and Guidance for Microbiological Examinations, Public Preview
   · Taxonomy evidence: Distinguishes temperature-monitoring devices and balances/gravimetric diluters in its equipment headings. ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))
3. HACCP Principles & Application Guidelines
   · Taxonomy evidence: Identifies physical measurements, including temperature, time, and moisture, as food-safety monitoring activities. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))
4. Water Activity (aw) in Foods
   · Taxonomy evidence: The historical equipment discussion identifies hygrometric instruments for assessing food water activity; it does not establish current models or installations. ([fda.gov](https://www.fda.gov/inspections-compliance-enforcement-and-criminal-investigations/inspection-technical-guides/water-activity-aw-foods))

5. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
6. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

7. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

8. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
9. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
10. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

11. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
12. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

13. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
14. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
15. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
16. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
17. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
18. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

19. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
20. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
21. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
22. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
23. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
24. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

25. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
26. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
27. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
28. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
29. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
30. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

31. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
32. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
33. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
34. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
35. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
36. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.

8.4. Metal Detection

Table 35. Global Food Safety Testing Equipment Market Size, by Metal Detection, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 36. Global Food Safety Testing Equipment Market Size, by Metal Detection, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 37. Global Food Safety Testing Equipment Market Size, by Metal Detection, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. BRCGS Global Standard Food Safety, Issue 9

   · Taxonomy evidence: Identifies metal detectors separately from X-ray equipment and passive magnets. ([nifcc.co.uk](https://www.nifcc.co.uk/site/wp-content/uploads/2023/xx.xx/BRCGS_Food_Safety_Standard_Issue_9.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

8.5. Mechanical & Fluidic Sample Handling

Table 38. Global Food Safety Testing Equipment Market Size, by Mechanical & Fluidic Sample Handling, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ISO 7218:2024 - Microbiology of the Food Chain - General Requirements and Guidance for Microbiological Examinations, Public Preview

   · Taxonomy evidence: Its equipment classification recognizes mechanical homogenization, dispensing, centrifugal separation, and filtration hardware. ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
34. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.

8.6. Chromatography & Electrophoresis

Table 41. Global Food Safety Testing Equipment Market Size, by Chromatography & Electrophoresis, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 43. Global Food Safety Testing Equipment Market Size, by Chromatography & Electrophoresis, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Technical Specifications for Equipment Used in Chemical Analysis of Food - FSSAI
   - Taxonomy evidence: Its contents separately name chromatographs and agarose and vertical electrophoresis systems. Electrophoresis appears among auxiliary equipment, so safety-specific purchasing and purchased function are not established.
   ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))
2. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory
   - Taxonomy evidence: Names gas, high-performance liquid, and ion chromatographs; it does not establish the electrophoresis portion.
   ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.

8.7. Thermal Sample Conditioning

Table 44. Global Food Safety Testing Equipment Market Size, by Thermal Sample Conditioning, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ISO 7218:2024 - Microbiology of the Food Chain - General Requirements and Guidance for Microbiological Examinations, Public Preview

   · Taxonomy evidence: Recognizes incubators, controlled baths, and heating blocks as temperature-controlled equipment categories. ([webstore.ansi.org](https://webstore.ansi.org/preview-pages/iso/preview_iso%252B7218-2024.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.

8.8. Optical Imaging & Machine Vision

Table 47. Global Food Safety Testing Equipment Market Size, by Optical Imaging & Machine Vision, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. BRCGS Global Standard Food Safety, Issue 9

   · Taxonomy evidence: Recognizes optical sorting equipment for final-product testing; only identifiable in-scope sensing/inspection hardware is allocated here, not an entire processing installation. ([nifcc.co.uk](https://www.nifcc.co.uk/site/wp-content/uploads/2023/xx.xx/BRCGS_Food_Safety_Standard_Issue_9.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.

8.9. Nucleic Acid Amplification & Sequencing

Table 50. Global Food Safety Testing Equipment Market, by Nucleic Acid Amplification & Sequencing growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
DNA Sequencing Platforms	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Isothermal Amplification Platforms	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
PCR Platforms	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 51. Global Food Safety Testing Equipment Market Size, by Nucleic Acid Amplification & Sequencing, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ISO 24914:2026 - Microbiology of the Food Chain - Loop-Mediated Isothermal Amplification (LAMP) for the Detection of Microorganisms and Associated Genetic Markers - General Requirements and Definitions
   · Taxonomy evidence: The public scope distinguishes LAMP from PCR and supports retention of a separately named isothermal branch within the molecular-platform parent. ([iso.org](https://www.iso.org/standard/xx.xx.html))
2. ISO 22174:2024 - Microbiology of the Food Chain - Polymerase Chain Reaction (PCR) for the Detection and Quantification of Microorganisms - General Requirements and Definitions
   · Taxonomy evidence: Provides independent food-chain recognition for the PCR amplification portion of the molecular-platform parent. ([iso.org](https://www.iso.org/standard/xx.xx.html))
3. ISO 24914 - Microbiology of the Food Chain - Loop-Mediated Isothermal Amplification (LAMP) for the Detection of Microorganisms - Public Scope
   · Taxonomy evidence: Supports inclusion of a separately named isothermal-amplification branch within the molecular-platform parent, without establishing current product sales or authorization. ([iso.org](https://www.iso.org/obp/ui?_escaped_fragment_=iso%3Astd%3Aiso%3A24914%3Aed-xx.xx%3Av1%3Aen))

4. TechTalk Podcast Episode 2: Whole Genome Sequencing in the New Era of Smarter Food Safety
   - Taxonomy evidence: Supports sequencing as a distinct analytical-platform branch alongside amplification within the molecular parent. ([fda.gov](https://www.fda.gov/food/new-era-smarter-food-safety-techtalk-podcast/techtalk-podcast-episode-xx.xx-whole-genome-sequencing-new-era-smarter-food-safety))
5. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
6. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.

7. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

8. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
9. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
10. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

11. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
12. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

13. Waters Corporation - 2025 Annual Report
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.

14. Thermo Fisher Scientific Inc. - 2025 Form 10-K
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

15. bioMérieux - 2025 Financial Results
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.

16. Neogen Corporation - Fiscal 2025 Annual Report
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

17. Testo - Annual Press Conference, January 23, 2025
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.

18. Anritsu Integrated Report 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

19. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
20. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
21. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
22. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
23. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
24. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

25. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
26. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
27. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
28. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
29. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
30. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

31. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
32. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
33. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
34. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
35. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
36. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.

37. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
38. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
39. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

8.9.1. PCR Platforms

Table 54. Global Food Safety Testing Equipment Market Size, by PCR Platforms, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 55. Global Food Safety Testing Equipment Market Size, by PCR Platforms, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods - Food Standards Agency

· Taxonomy evidence: The commercial comparison identifies PCR instrumentation independently of plate-reader and LC-MS hardware. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))

· Taxonomy evidence: The food-allergen hardware comparison includes real-time PCR instruments. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.

2. ISO 22174:2024 - Microbiology of the Food Chain - Polymerase Chain Reaction (PCR) for the Detection and Quantification of Microorganisms - General Requirements and Definitions
   - Taxonomy evidence: Public scope establishes PCR as a named food-chain analytical platform applicable to human food and food-production environmental samples. ([iso.org](https://www.iso.org/standard/xx.xx.html))
3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
34. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

8.9.2. Isothermal Amplification Platforms

Table 57. Global Food Safety Testing Equipment Market Size, by Isothermal Amplification Platforms, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 58. Global Food Safety Testing Equipment Market Size, by Isothermal Amplification Platforms, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ISO 24914:2026 - Microbiology of the Food Chain - Loop-Mediated Isothermal Amplification (LAMP) for the Detection of Microorganisms and Associated Genetic Markers - General Requirements and Definitions

   · Taxonomy evidence: ISO xx.xx:2026 was published on January xx.xx 2026 and recognizes LAMP platforms in food-chain analysis, including human-food and food-production environmental contexts. This establishes current category recognition, not 2025 sales. ([iso.org](https://www.iso.org/standard/xx.xx.html))

2. Rapid In-Field Diagnostics: Horizon Scanning and Technology Readiness Level Study With a Technology Pilot Study - FSA Research and Evidence

   · Taxonomy evidence: The study recognizes instrument-based LAMP platforms in food-safety applications, adding independent deployment context without establishing routine global adoption. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

3. ISO 24914 - Microbiology of the Food Chain - Loop-Mediated Isothermal Amplification (LAMP) for the Detection of Microorganisms - Public Scope

   · Taxonomy evidence: The public scope recognizes LAMP as a food-chain detection platform and distinguishes its general requirements from those for PCR. No operating guidance is reproduced. ([iso.org](https://www.iso.org/obp/ui?_escaped_fragment_=iso%3Astd%3Aiso%3A24914%3Aed-xx.xx%3Av1%3Aen))

4. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
5. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

6. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

7. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
8. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
9. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

10. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
11. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

12. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
13. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
14. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
15. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
16. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
17. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

18. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
19. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
20. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
21. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
22. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
23. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

24. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
25. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
26. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
27. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
28. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
29. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

30. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
31. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
32. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
33. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
34. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
35. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.

8.9.3. DNA Sequencing Platforms

Table 60. Global Food Safety Testing Equipment Market Size, by DNA Sequencing Platforms, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 61. Global Food Safety Testing Equipment Market Size, by DNA Sequencing Platforms, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. TechTalk Podcast Episode 2: Whole Genome Sequencing in the New Era of Smarter Food Safety
   - Taxonomy evidence: Describes whole-genome sequencing in food-safety surveillance and facility investigations, establishing a food-safety use category rather than universal industry adoption. ([fda.gov](https://www.fda.gov/food/new-era-smarter-food-safety-techtalk-podcast/techtalk-podcast-episode-xx.xx-whole-genome-sequencing-new-era-smarter-food-safety))
2. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.

8.10. Electrochemical Analysis

Table 63. Global Food Safety Testing Equipment Market Size, by Electrochemical Analysis, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 64. Global Food Safety Testing Equipment Market Size, by Electrochemical Analysis, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory
   - Taxonomy evidence: Lists pH, conductivity/TDS, and Karl Fischer coulometric instruments. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))
2. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.

8.11. Spectroscopy & Photometry

Table 66. Global Food Safety Testing Equipment Market Size, by Spectroscopy & Photometry, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 67. Global Food Safety Testing Equipment Market Size, by Spectroscopy & Photometry, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory

   · Taxonomy evidence: Names atomic-absorption, FT-IR, fluorescence, and UV-visible instruments. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.

8.12. Culture-Based Microbiology

Table 69. Global Food Safety Testing Equipment Market Size, by Culture-Based Microbiology, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 70. Global Food Safety Testing Equipment Market Size, by Culture-Based Microbiology, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 71. Global Food Safety Testing Equipment Market Size, by Culture-Based Microbiology, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ISO 19036:2019 - Microbiology of the Food Chain - Estimation of Measurement Uncertainty for Quantitative Determinations

   · Taxonomy evidence: The current public scope separately recognizes colony-count and MPN approaches within food-chain quantitative microbiology, supporting the culture-based category without defining equipment sales. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))

   · Taxonomy evidence: Recognizes colony-count and MPN approaches, supporting a separate culture-based enumeration family. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))

2. Standard Specifications for Setting Up of a Basic Functional Food Analysis Laboratory

   · Taxonomy evidence: Includes digital colony-counting equipment within its microbiology instrument list. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Standard_Spec_Equipment_Food_23_07_2021.pdf))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.

8.13. Affinity & Biochemical Assay Platforms

Table 72. Global Food Safety Testing Equipment Market Size, by Affinity & Biochemical Assay Platforms, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Technical Specifications for Equipment Used in Chemical Analysis of Food - FSSAI

   · Taxonomy evidence: An ELISA-reader heading supports the immunoassay-reader subset, not the entire non-immunological biochemical family. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/Notice_Comments_Chemical_Analysis_Food_21_10_2020_.pdf))

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods - Food Standards Agency
   - Taxonomy evidence: Documents ELISA and lateral-flow food-allergen testing, with plate-reader hardware identified for ELISA. This does not establish the non-immunological biochemical portion. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.

8.14. Bioluminescence & Chemiluminescence

Table 75. Global Food Safety Testing Equipment Market Size, by Bioluminescence & Chemiluminescence, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 76. Global Food Safety Testing Equipment Market Size, by Bioluminescence & Chemiluminescence, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Rapid In-Field Diagnostics: Horizon Scanning and Technology Readiness Level Study With a Technology Pilot Study - FSA Research and Evidence

   · Taxonomy evidence: The publication identifies food-industry ATP luminometers and luminometer readout associated with chemiluminescence products; it does not isolate equipment-sale consideration. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

2. ISO 19036:2019 - Microbiology of the Food Chain - Estimation of Measurement Uncertainty for Quantitative Determinations

   · Taxonomy evidence: ATP measurement remains recognized in the public food-chain scope; this supports the ATP-linked subset rather than every chemiluminescence platform. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))

   · Taxonomy evidence: Explicitly recognizes ATP measurement in food-chain analysis. This supports the ATP-linked portion, not every chemiluminescence platform. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.

18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.

19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.

21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.

22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.

8.15. Flow Cytometry

Table 78. Global Food Safety Testing Equipment Market Size, by Flow Cytometry, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ISO 19036:2019 - Microbiology of the Food Chain - Estimation of Measurement Uncertainty for Quantitative Determinations

   · Taxonomy evidence: Flow cytometry is explicitly recognized as a food-chain instrumental approach, supporting category recognition but not food-safety-attributable purchasing volumes. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))

   · Taxonomy evidence: Explicitly recognizes flow cytometry among food-chain microbiology instrumental approaches. ([iso.org](https://www.iso.org/standard/xx.xx.html?browse=tc))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
34. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.

8.16. Radiometric Analysis

Table 81. Global Food Safety Testing Equipment Market Size, by Radiometric Analysis, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Total Diet Study Report: Fiscal Years 2018-2020 Radionuclides Data

   · Taxonomy evidence: Reports food-sample analysis using high-purity germanium gamma spectrometry and gas-flow proportional counting, supporting radiometric analysis rather than irradiation-processing equipment. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.

9. Food Safety Testing Equipment Market, by Testing Objective

[illegible] An environmental location therefore does not make these objectives equivalent. A quality team should retain the distinction when specifying equipment and records, rather than substitute a cleanliness record for a separately required hazard-specific result without acceptance by the relevant customer or authority.

Food Allergen Testing and Chemical Contaminant and Residue Testing also create different application boundaries. FDA connects allergen controls with cross-contact prevention and accurate labeling, while its chemical-contaminant framework covers environmental contaminants, process contaminants, natural toxins, and pesticide residues. [illegible]

Radiological Contamination Testing and Physical Contaminant Inspection should be qualified against different purchasing triggers. The Food Standards Agency's 2026/xx.xx plan includes statutory radioactivity monitoring and reporting, establishing a specialist institutional requirement rather than a general equipment mandate for manufacturers. [illegible]

[illegible] Buyers should specify which records the equipment must deliver and who is responsible for reviewing exceptions. This purchasing route complements required testing and inspection; it should not be presented as discharging every other safety objective or as requiring new equipment when suitable assets already exist.

Figure 12. Global Food Safety Testing Equipment Market Size, by Testing Objective, 2025 (%)

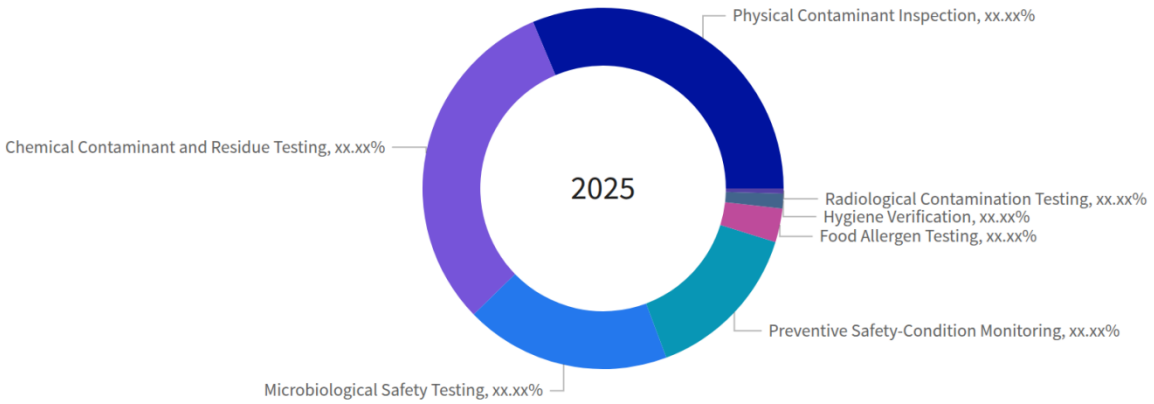

Figure 13. Global Food Safety Testing Equipment Market, by Testing Objective, 2032 (USD Million)

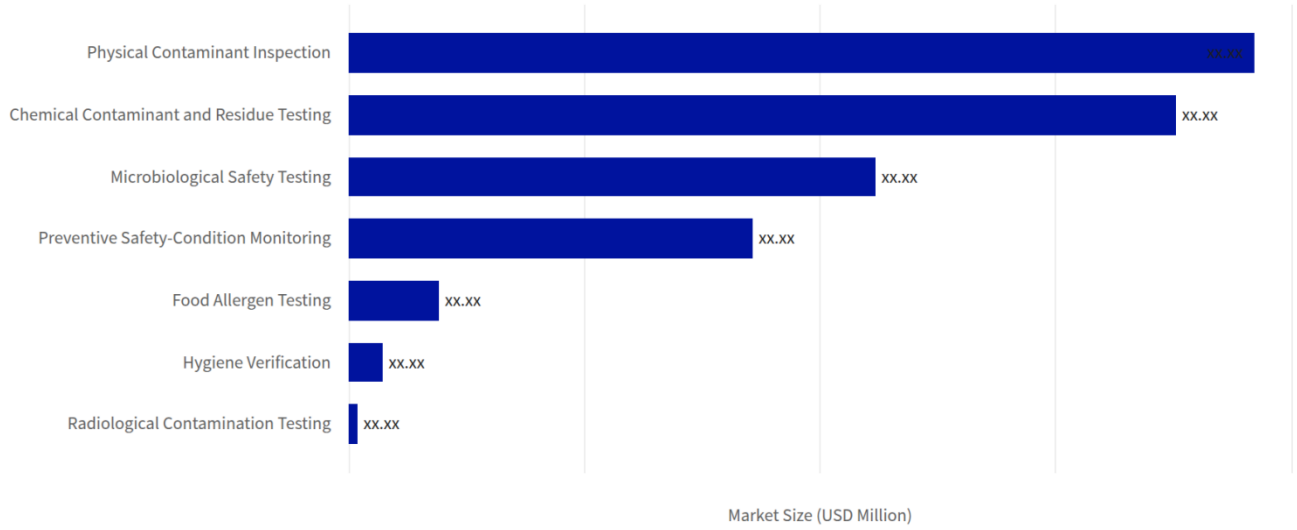

Table 84. Global Food Safety Testing Equipment Market, by Testing Objective growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Chemical Contaminant and Residue Testing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food Allergen Testing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hygiene Verification	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FSMA Final Rule for Preventive Controls for Human Food
   - FDA distinguishes documented monitoring from verification activities, including applicable product testing and environmental monitoring.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
2. FSA 2026/27 Annual Plan and Budget
   - The FSA 2026/xx.xx plan includes statutory monitoring and reporting on radioactivity in the food environment. It establishes a planned institutional duty, not a particular equipment award.
3. EnSURE Touch ATP Luminometer for Hygiene Monitoring
   - Hygiena markets EnSURE Touch for cleaning verification; this offering description is not proof of equivalence with separately required hazard-specific evidence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
4. Cabinet X-Ray Systems (Closed X-Ray Systems) - FDA
   - FDA identifies food inspection for foreign objects as a cabinet X-ray application.
5. Review of allergen analytical testing methodologies: measurement parameters and sensitivity of methods
   - The review reports differing outputs for the same allergen and limitations in cross-system comparability, supporting application-specific equipment and reporting assessment.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from lower-cost readers; it is not a chemical-objective revenue disclosure.
6. Environmental Sampling - FDA
   - FDA describes environmental sampling during inspections as directed at harmful microbial hazards, establishing that environmental location alone does not define a nonspecific hygiene objective.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
7. Food Allergies - FDA
   - FDA connects allergen preventive controls with preventing cross-contact and undeclared allergens, including manufacturing, packaging, and labeling responsibilities.
8. Chemical Contaminants & Pesticides - FDA
   - FDA identifies environmental contaminants, process contaminants, natural toxins, and pesticide residues and describes manufacturers' chemical-hazard prevention responsibilities.

9. HACCP Principles & Application Guidelines

· The guidance distinguishes monitoring control conditions from other safety activities. The equipment-purchasing implication is conditional on the buyer's required records.

· Taxonomy evidence: The guidance distinguishes biological, chemical and physical hazards and addresses monitoring and verification, providing a high-level foundation for an objective-based partition. The proposed taxonomy is an analytical adaptation, not an official FDA segmentation. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))

10. About METTLER TOLEDO Product Inspection

· METTLER TOLEDO describes physical-contaminant detection and other inspection purposes, establishing a manufacturing inspection proposition distinct from statutory radioactivity monitoring.

11. Laboratory development | FAO

· Taxonomy evidence: FAO distinguishes preventive process controls from sampling and testing used to verify food-safety controls, supporting separation of direct testing and verification objectives without treating them as identical activities. ([fao.org](https://www.fao.org/food-safety/food-control-systems/laboratory-development/en))

12. Processing & Marketing - Food and Beverage Manufacturing

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

13. Mettler-Toledo International Inc. - 2025 Form 10-K

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.

14. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
15. Agilent Technologies - 2017 Annual Report
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
16. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

17. Agilent Technologies - Fiscal 2025 Annual Report
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.

18. Agilent Technologies - Q1 2025 Results Presentation
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

19. Waters Corporation - 2025 Annual Report
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.

20. Thermo Fisher Scientific Inc. - 2025 Form 10-K
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

21. bioMérieux - 2025 Financial Results
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.

22. Neogen Corporation - Fiscal 2025 Annual Report
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

23. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
24. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
25. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
26. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
27. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

28. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.
29. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
30. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
31. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.

9.1. Physical Contaminant Inspection

Table 86. Global Food Safety Testing Equipment Market Size, by Physical Contaminant Inspection, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 87. Global Food Safety Testing Equipment Market Size, by Physical Contaminant Inspection, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. HACCP Principles & Application Guidelines

   · Taxonomy evidence: Physical hazards include foreign materials such as stones, glass and metal, and the guidance identifies metal detectors among product-safety devices. This supports foreign-body inspection as a distinct safety purpose. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.

9.2. Chemical Contaminant and Residue Testing

Table 89. Global Food Safety Testing Equipment Market Size, by Chemical Contaminant and Residue Testing, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Legislation - Food-Contact Materials - European Commission

   · Taxonomy evidence: Food-contact chemical migration is a recognized safety-compliance subject, supporting its inclusion within chemical-safety testing rather than packaging-production activity. ([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en))

2. HACCP Principles & Application Guidelines

   · Taxonomy evidence: Its chemical-hazard examples include aflatoxin and antibiotic or pesticide residues, supporting classification of toxin and residue measurement by the chemical target rather than its origin. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))

3. Chemical Contaminants & Pesticides | FDA

   · Taxonomy evidence: FDA describes food testing for chemical contaminants and pesticide residues and distinguishes environmental contaminants, process contaminants and natural toxins. Its environmental examples include toxic elements and industrial chemicals; radionuclides are also listed administratively but are separated in the proposed taxonomy.
   ([fda.gov](https://www.fda.gov/food/chemical-contaminants-pesticides))

4. Legislation - Food Safety - European Commission

   · Taxonomy evidence: The Commission identifies chemical migration testing as part of food-contact-material safety compliance, establishing an application connected to human-food chemical safety rather than packaging production.
   ([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en?prefLang=es))

5. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

6. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from lower-cost readers; it is not a chemical-objective revenue disclosure.

7. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

8. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
9. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
10. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

11. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
12. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

13. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
14. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
15. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
16. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
17. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
18. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

19. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
20. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
21. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
22. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
23. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
24. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

25. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
26. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
27. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
28. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
29. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
30. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

31. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
32. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
33. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
34. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
35. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
36. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.

9.3. Microbiological Safety Testing

Table 92. Global Food Safety Testing Equipment Market Size, by Microbiological Safety Testing, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 93. Global Food Safety Testing Equipment Market Size, by Microbiological Safety Testing, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 94. Global Food Safety Testing Equipment Market Size, by Microbiological Safety Testing, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Environmental Sampling - FDA

   · Taxonomy evidence: Environmental samples may be assessed for named microbial hazards. Their environmental location does not make the testing objective nonspecific hygiene verification. ([fda.gov](https://www.fda.gov/food/sampling-protect-food-supply/environmental-sampling))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.

2. Compendium of Microbiological Criteria for Food | Food Standards Australia New Zealand

   · Taxonomy evidence: The compendium recognizes pathogens and indicator organisms as food-safety testing targets and covers food-production environmental monitoring. ([foodstandards.gov.au](https://www.foodstandards.gov.au/sites/default/files/publications/Documents/Compendium_revised%20Dec%xx.xx.pdf))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.

9.4. Preventive Safety-Condition Monitoring

Table 95. Global Food Safety Testing Equipment Market Size, by Preventive Safety-Condition Monitoring, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 96. Global Food Safety Testing Equipment Market Size, by Preventive Safety-Condition Monitoring, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. HACCP Principles & Application Guidelines

   · Taxonomy evidence: The guidance recognizes monitoring of time, temperature, pH and moisture, and identifies water activity as a safety-relevant intrinsic food characteristic. These are control-condition measurements rather than direct hazard assays. ([fda.gov](https://www.fda.gov/food/hazard-analysis-critical-control-point-haccp/haccp-principles-application-guidelines))

2. 2022 FDA Food Code - Print Version

   · Taxonomy evidence: Food-temperature measuring devices are recognized as monitoring equipment for food-safety conditions. Only separately attributable in-scope hardware qualifies under the working equipment boundary. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.

16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.

9.5. Food Allergen Testing

Table 98. Global Food Safety Testing Equipment Market Size, by Food Allergen Testing, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 99. Global Food Safety Testing Equipment Market Size, by Food Allergen Testing, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 100. Global Food Safety Testing Equipment Market Size, by Food Allergen Testing, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Food Allergies | FDA

   · Taxonomy evidence: FDA treats undeclared allergens and allergen cross-contact as food-safety concerns and describes food-allergen testing using several analytical platforms. This supports a distinct allergen objective independent of technology.
   ([fda.gov](https://www.fda.gov/food/nutrition-food-labeling-and-critical-foods/food-allergies))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.

29. Brazil Ministry of Agriculture - Accredited Laboratories
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.

30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.

31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.

32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.

33. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

9.6. Hygiene Verification

Table 101. Global Food Safety Testing Equipment Market Size, by Hygiene Verification, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 102. Global Food Safety Testing Equipment Market Size, by Hygiene Verification, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 103. Global Food Safety Testing Equipment Market Size, by Hygiene Verification, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Rapid In-Field Diagnostics: Horizon Scanning and Technology Readiness Level Study With a Technology Pilot Study - FSA Research and Evidence

   · Taxonomy evidence: It distinguishes nonspecific ATP cleanliness measurements from identification of a particular microorganism, supporting the objective boundary without treating all hygiene-related tests as equivalent.
   ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

2. Compendium of Microbiological Criteria for Food | Food Standards Australia New Zealand

   · Taxonomy evidence: It distinguishes rapid ATP and protein cleanliness checks from tests determining whether target microorganisms are present.
   ([foodstandards.gov.au](https://www.foodstandards.gov.au/sites/default/files/publications/Documents/Compendium_revised%20Dec%xx.xx.pdf))

3. 2022 FDA Food Code - Print Version

   · Taxonomy evidence: The model recognizes devices for checking sanitation conditions. This supports the verification objective, not inclusion of disposable test supplies or cleaning machinery.
   ([fda.gov](https://www.fda.gov/media/xx.xx/download))

4. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
5. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

6. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

7. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
8. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
9. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

10. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
11. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

12. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
13. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
14. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
15. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
16. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
17. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

18. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
19. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
20. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
21. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
22. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
23. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

24. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
25. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
26. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
27. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
28. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
29. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

30. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
31. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
32. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
33. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
34. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
35. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
36. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.

9.7. Radiological Contamination Testing

Table 104. Global Food Safety Testing Equipment Market Size, by Radiological Contamination Testing, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 105. Global Food Safety Testing Equipment Market Size, by Radiological Contamination Testing, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 106. Global Food Safety Testing Equipment Market Size, by Radiological Contamination Testing, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FDA Response to the Fukushima Daiichi Nuclear Power Facility Incident | FDA

   · Taxonomy evidence: FDA describes routine radionuclide surveillance, laboratory measurement of radioactive contamination in food and public food-testing network capabilities. It also identifies radiation-detection equipment used for food-import screening. These establish the testing category, not equipment-market revenue.
   ([fda.gov](https://www.fda.gov/news-events/public-health-focus/fda-response-fukushima-daiichi-nuclear-power-facility-incident))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.

10. Food Safety Testing Equipment Market, by End User

End User changes both the equipment-use rationale and the organization controlling acquisition. ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ Suppliers should establish the actual fulfillment arrangement and acquisition authority in each setting.

Food-Contact Material Manufacturers face a documentation-centered choice. ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ Singapore's documented use of recognized private laboratories provides a concrete external-fulfillment alternative for food businesses, while leaving equipment acquisition with the laboratory operator.

Food Distribution and Logistics Businesses require particularly careful identification of the responsible buyer. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Contracted access to usable records can matter as much as possession of the device.

Food Retailers and Foodservice Operators have premises-level monitoring needs distinct from specialist laboratory acquisition. ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ Buyers should first establish the applicable local rules and the responsibilities of site staff and central management; a common corporate platform does not independently settle each site's obligations.

Government Food-Control Organizations and Academic and Research Institutions have separate institutional commitment gates. AFBI's December 2025 LC-MS tender specifies installation and continuing support, while an additional acquisition depends on funding and

budget approval. ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. FSMA Final Rule for Preventive Controls for Human Food
   - Covered facilities must implement food-safety plans; testing and monitoring requirements depend on the food, facility, and applicable preventive control rather than a universal instrument purchase.
2. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
   - LAAF connects specified food-testing relationships to accredited laboratories, applicable analyte scope, and compliance dates. Owners' and consignees' laboratory-use obligations are distinct from equipment ownership.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
3. Ramping Up Singapore's Food Testing Capabilities
   - SFA's January xx.xx 2023 account describes recognized private laboratories serving food-industry needs and progressive outsourcing of specified testing services, establishing an observed external-fulfillment route.
4. Legislation - Food Contact Materials
   - The European Commission links plastic food-contact declarations of compliance to supporting safety documentation and manufacturer responsibility. The page does not prescribe internal equipment ownership.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.

5. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
   - AFBI's December xx.xx 2025 tender specifies installation and support; an additional acquisition is conditional on further funding and budgetary approval.
6. FSMA Final Rule on Pre-Harvest Agricultural Water
   - FDA's revised provisions replace specified pre-harvest agricultural-water criteria and testing requirements with systems-based assessments for covered produce other than sprouts. The rule alone does not establish an equipment acquisition.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
7. FDA Food Code
   - FDA identifies grocery stores, restaurants, and institutional foodservice within the Food Code's scope and explains that jurisdictions use it as a model for their own rules.
8. Digital Food Safety Management with testo Saveris Food
   - Restaurants, catering, and distribution centers are identified application settings for the coordinated measurement and documentation offering.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
9. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
   - FDA distinguishes shippers, loaders, carriers, and receivers and addresses agreements, training, and record responsibilities. Those roles do not independently identify the equipment purchaser.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.

10. Equipment Grants Program - NIFA
    - NIFA's Equipment Grants Program supports eligible institutions acquiring shared special-purpose instruments for food and agricultural science research, training, and extension. Program eligibility is not an equipment award.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
11. Food Code 2026 - FDA
    - Taxonomy evidence: FDA's 2026 Food Code identifies retail and foodservice as distinct food-safety operating settings. It is a model offered for jurisdictional adoption, not a uniform global purchasing requirement. ([fda.gov](https://www.fda.gov/food/fda-food-code/food-code-2026))
12. Laboratory development | FAO
    - Taxonomy evidence: FAO describes national authorities, private-sector engagement, laboratory management, universities and research centers within food-control laboratory development. These are operating and institutional roles, not an exhaustive equipment-buyer classification. ([fao.org](https://www.fao.org/food-safety/food-control-systems/laboratory-development/en))
13. Processing & Marketing - Food and Beverage Manufacturing
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.

14. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Public hardware-cost tiers distinguish lower-cost readers from capital-intensive analytical systems; supports asset-weighted captive-laboratory allocation rather than unadjusted counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Public hardware-cost tiers distinguish lower-cost readers from capital-intensive analytical systems; supports asset-weighted captive-laboratory allocation rather than unadjusted counts.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates hardware investment from testing fees and recurring costs; supports the independent-laboratory equipment-only boundary and larger-asset weighting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates hardware investment from testing fees and recurring costs; supports the independent-laboratory equipment-only boundary and larger-asset weighting.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Capital-cost differentiation constrains the ownership-versus-outsourcing model; it does not observe food-contact manufacturers' purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Capital-cost differentiation constrains the ownership-versus-outsourcing model; it does not observe food-contact manufacturers' purchases.
15. Mettler-Toledo International Inc. - 2025 Form 10-K
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.

16. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
17. Agilent Technologies - 2017 Annual Report
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
18. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
19. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.

20. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
21. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
22. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
23. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
24. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

25. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
26. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
27. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
28. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.

29. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
30. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
31. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
32. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.

33. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.

10.1. Food and Beverage Manufacturers and Packers

Table 109. Global Food Safety Testing Equipment Market Size, by Food and Beverage Manufacturers and Packers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Compendium of Microbiological Criteria for Food | Food Standards Australia New Zealand
   · Taxonomy evidence: The dairy chapter recognizes in-house laboratories alongside external commercial laboratories, establishing a captive testing setting within food processing. ([foodstandards.gov.au](https://www.foodstandards.gov.au/sites/default/files/publications/Documents/Compendium_revised%20Dec%xx.xx.pdf))
2. Food Allergies | FDA
   · Taxonomy evidence: The page addresses allergen controls during food manufacturing and packaging, establishing these facilities as distinct operating settings for allergen-safety programs without quantifying their equipment purchases. ([fda.gov](https://www.fda.gov/food/nutrition-food-labeling-and-critical-foods/food-allergies))
3. UNSD - Classification Detail: ISIC Rev. 4, Code 10
   · Taxonomy evidence: ISIC Rev. xx.xx Division xx.xx distinguishes transformation of agricultural and fishery products into food from minimal handling classified as wholesale or retail. The proposed human-food boundary excludes the classification's animal-feed activities. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))
4. UNSD - Classification Detail: ISIC Rev. 4, Code 11
   · Taxonomy evidence: ISIC Rev. xx.xx Division xx.xx separately recognizes beverage manufacturing, including nonalcoholic beverages and mineral water, supporting inclusion of beverage producers alongside food manufacturers. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

5. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
6. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Public hardware-cost tiers distinguish lower-cost readers from capital-intensive analytical systems; supports asset-weighted captive-laboratory allocation rather than unadjusted counts.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Public hardware-cost tiers distinguish lower-cost readers from capital-intensive analytical systems; supports asset-weighted captive-laboratory allocation rather than unadjusted counts.

7. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

8. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
9. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
10. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

11. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
12. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

13. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
14. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
15. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
16. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
17. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
18. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

19. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
20. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
21. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
22. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
23. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
24. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

25. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
26. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
27. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
28. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
29. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
30. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

31. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
32. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
33. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
34. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
35. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
36. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
37. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.

10.2. Independent Testing Laboratories

Table 112. Global Food Safety Testing Equipment Market Size, by Independent Testing Laboratories, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 113. Global Food Safety Testing Equipment Market Size, by Independent Testing Laboratories, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 114. Global Food Safety Testing Equipment Market Size, by Independent Testing Laboratories, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods - Food Standards Agency

   · Taxonomy evidence: The cost assessment concerns an established testing-service laboratory, providing an external laboratory acquisition setting without measuring its food-safety-only capital spending. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates hardware investment from testing fees and recurring costs; supports the independent-laboratory equipment-only boundary and larger-asset weighting.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates hardware investment from testing fees and recurring costs; supports the independent-laboratory equipment-only boundary and larger-asset weighting.

2. Compendium of Microbiological Criteria for Food | Food Standards Australia New Zealand

   · Taxonomy evidence: External accredited commercial laboratories are separately recognized as providers of food-industry testing. ([foodstandards.gov.au](https://www.foodstandards.gov.au/sites/default/files/publications/Documents/Compendium_revised%20Dec%xx.xx.pdf))

3. UNSD - Classification Detail: ISIC Rev. 4, Code 7120

   · Taxonomy evidence: ISIC Rev. xx.xx Code xx.xx recognizes technical testing and analysis, including food-hygiene testing. It provides an economic-activity basis for distinguishing external testing businesses from captive food-industry laboratories; it does not measure their equipment spending. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

4. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.

18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.

19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.

21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.

22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.

28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.

10.3. Foodservice Operators

Table 115. Global Food Safety Testing Equipment Market Size, by Foodservice Operators, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 116. Global Food Safety Testing Equipment Market Size, by Foodservice Operators, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 117. Global Food Safety Testing Equipment Market Size, by Foodservice Operators, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Food Code 2026 - FDA
   · Taxonomy evidence: Foodservice is separately identified in the 2026 model's scope. Current model status does not retroactively establish 2025 requirements or equipment revenue. ([fda.gov](https://www.fda.gov/food/fda-food-code/food-code-2026))
2. FDA Food Code | FDA
   · Taxonomy evidence: The same model addresses restaurants and institutional foodservice, including institutions such as nursing homes, supporting a foodservice category separate from retail. ([fda.gov](https://www.fda.gov/food/retail-food-protection/fda-food-code))
3. 2022 FDA Food Code - Print Version
   · Taxonomy evidence: Its equipment provisions establish temperature-measurement and sanitation-verification needs relevant to foodservice operations, without establishing actual purchasing volumes. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

4. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
5. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

6. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

7. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
8. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
9. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

10. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
11. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

12. Waters Corporation - 2025 Annual Report
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.

13. Thermo Fisher Scientific Inc. - 2025 Form 10-K
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

14. bioMérieux - 2025 Financial Results
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.

15. Neogen Corporation - Fiscal 2025 Annual Report
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

16. Testo - Annual Press Conference, January 23, 2025
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.

17. Anritsu Integrated Report 2025
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

18. Eurofins Scientific - FY 2025 Results Presentation
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.

19. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.

20. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

21. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.

22. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.

23. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

24. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
25. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
26. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
27. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
28. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
29. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

30. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
31. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
32. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
33. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
34. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
35. Digital Food Safety Management with testo Saveris Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
36. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.

10.4. Government Food-Control Organizations

Table 118. Global Food Safety Testing Equipment Market Size, by Government Food-Control Organizations, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 119. Global Food Safety Testing Equipment Market Size, by Government Food-Control Organizations, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 4. Elements of a National Food Control System | FAO

   · Taxonomy evidence: FAO describes food-control laboratories under national and subnational authorities, central reference-laboratory functions and investment in analytical facilities and instruments. This establishes government food-control organizations as equipment-operating institutions, not merely funders. ([fao.org](https://www.fao.org/xx.xx/y8705e/y8705e04.htm))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.

17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.

18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.

20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.

21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
34. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.

10.5. Food Retailers

Table 121. Global Food Safety Testing Equipment Market Size, by Food Retailers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 122. Global Food Safety Testing Equipment Market Size, by Food Retailers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 123. Global Food Safety Testing Equipment Market Size, by Food Retailers, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Food Code 2026 - FDA
   · Taxonomy evidence: The 2026 model explicitly addresses retail food stores, supporting continued recognition of retail operating users without establishing instrument purchases. ([fda.gov](https://www.fda.gov/food/fda-food-code/food-code-2026))
2. FDA Food Code | FDA
   · Taxonomy evidence: FDA identifies grocery stores within the retail segment addressed by its Food Code, establishing a professional retail food-safety operating setting. The Food Code is a model, not a uniform worldwide requirement. ([fda.gov](https://www.fda.gov/food/retail-food-protection/fda-food-code))
3. 2022 FDA Food Code - Print Version
   · Taxonomy evidence: The model includes provision of food-temperature measuring devices, supporting a professional equipment-use setting relevant to covered retail establishments rather than only laboratory testing. ([fda.gov](https://www.fda.gov/media/xx.xx/download))

4. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
5. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

6. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

7. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
8. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
9. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

10. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
11. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

12. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
13. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
14. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
15. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
16. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
17. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

18. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
19. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
20. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
21. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
22. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
23. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

24. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
25. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
26. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
27. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
28. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
29. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

30. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
31. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
32. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
33. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
34. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
35. Digital Food Safety Management with testo Saveris Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
36. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.

10.6. Primary Food Producers

Table 124. Global Food Safety Testing Equipment Market Size, by Primary Food Producers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 125. Global Food Safety Testing Equipment Market Size, by Primary Food Producers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Rapid In-Field Diagnostics: Horizon Scanning and Technology Readiness Level Study With a Technology Pilot Study - FSA Research and Evidence

   · Taxonomy evidence: Grower and agronomist interviews identify possible direct investment or service-based access, not completed farm equipment purchases. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

2. FSMA Final Rule on Produce Safety | FDA

   · Taxonomy evidence: FDA's produce-safety framework addresses food-safety testing and environmental controls at covered farm and sprout operations. It establishes primary-production testing relevance, but does not demonstrate that farms purchase durable instruments rather than use external laboratories. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-produce-safety))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

10.7. Academic and Research Institutions

Table 127. Global Food Safety Testing Equipment Market Size, by Academic and Research Institutions, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Equipment Grants Program | NIFA

   · Taxonomy evidence: The equipment-grant program identifies higher-education and cooperative research institutions as recipients able to acquire shared special-purpose instruments for food and agricultural science. This establishes an institutional acquisition route, not a food-safety-only expenditure allocation. ([nifa.usda.gov](https://www.nifa.usda.gov/grants/funding-opportunities/equipment-grants-program))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

2. Activities: Projects : LMD

   · Taxonomy evidence: The public project listing identifies a university equipment-acquisition project expressly linking an analytical instrument with food-safety research. The listing establishes an acquisition-project setting, not current deployment or wholly food-safety-attributable instrument revenue. ([training-portal.nifa.usda.gov](https://training-portal.nifa.usda.gov/lmdr/projects?agency=NIFA&page=xx.xx&sort=title&source=creems_priv&state=&type=O))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.

10.8. Food-Contact Material Manufacturers

Table 130. Global Food Safety Testing Equipment Market Size, by Food-Contact Material Manufacturers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 131. Global Food Safety Testing Equipment Market Size, by Food-Contact Material Manufacturers, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Legislation - Food-Contact Materials - European Commission

   · Taxonomy evidence: Manufacturer responsibilities and supporting compliance documentation are established, but the page does not establish manufacturers' ownership of testing instruments rather than outsourced laboratory use. ([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.

2. Legislation - Food Safety - European Commission

   · Taxonomy evidence: Food-contact compliance documentation and declarations are linked to manufacturers' responsibilities. This supports a distinct manufacturer compliance setting, but does not establish whether manufacturers own testing equipment or outsource the work. ([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en?prefLang=es))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Capital-cost differentiation constrains the ownership-versus-outsourcing model; it does not observe food-contact manufacturers' purchases.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Capital-cost differentiation constrains the ownership-versus-outsourcing model; it does not observe food-contact manufacturers' purchases.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.

10.9. Food Distribution and Logistics Businesses

Table 133. Global Food Safety Testing Equipment Market Size, by Food Distribution and Logistics Businesses, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. FSMA Final Rule on Sanitary Transportation of Human and Animal Food | FDA

   · Taxonomy evidence: FDA's sanitary-transportation framework distinguishes shippers, loaders, carriers and receivers and addresses contamination prevention and temperature control. Responsibility can depend on agreements, so a transportation role alone does not identify the equipment purchaser or operator. ([fda.gov](https://www.fda.gov/food/food-safety-modernization-act-fsma/fsma-final-rule-sanitary-transportation-human-and-animal-food))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.

2. UNSD - Classification Detail: ISIC Rev. 4, Code 4630

   · Taxonomy evidence: ISIC Rev. xx.xx Code xx.xx recognizes food and beverage wholesale as a commercial activity distinct from manufacturing and retail. Only its human-food and beverage activities fit the proposed market boundary. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

3. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. Digital Food Safety Management with testo Saveris Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.

11. Food Safety Testing Equipment Market, by Deployment Configuration

Deployment Configuration changes the delivery and accountability package independently of the underlying platform. ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■ A mobile buyer should confirm the documented application, continuing record access, and local support rather than treat portability as a substitute for those conditions.

Stationary Standalone Equipment can still require a substantial handover commitment. ■■■■■■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■ Buyers comparing a standalone installation with a wider system project should retain these obligations in the comparison instead of treating standalone as synonymous with unsupported hardware delivery.

Production-Line-Integrated Equipment adds a relationship with the manufacturing installation. ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■

Figure 17. Global Food Safety Testing Equipment Market, by Deployment Configuration, 2032 (USD Million)

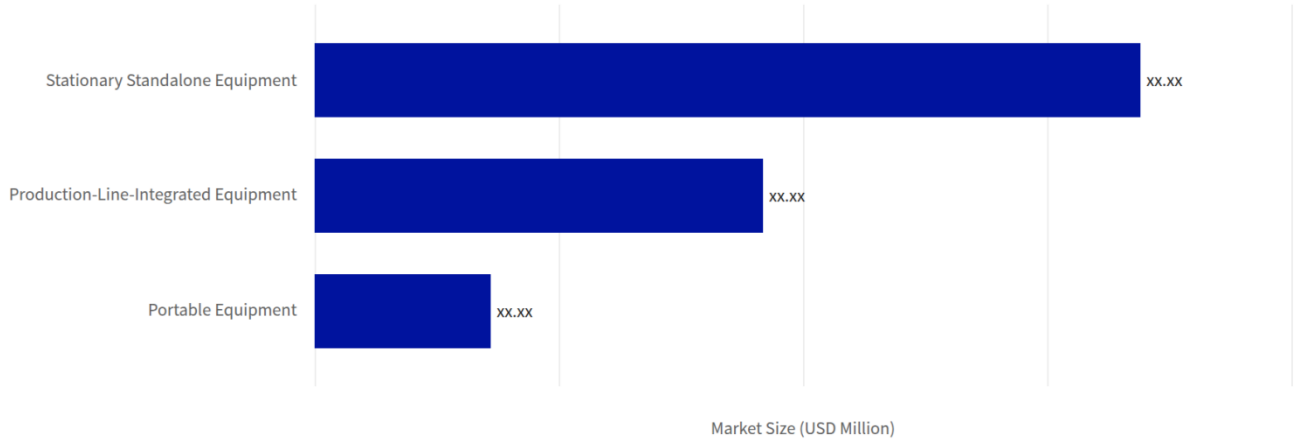

Table 136. Global Food Safety Testing Equipment Market, by Deployment Configuration growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Portable Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Production-Line-Integrated Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Stationary Standalone Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 137. Global Food Safety Testing Equipment Market Size, by Deployment Configuration, 2017-2040 (USD Million)

Deployment Configuration	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Portable Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Production-Line-Integrated Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Stationary Standalone Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
   · The requested LC-MS package includes installation, commissioning, staff training, warranty, and preventive maintenance. The notice does not establish completed fulfillment.

2. EnSURE Touch ATP Luminometer for Hygiene Monitoring
   - The handheld instrument includes Wi-Fi connectivity to SureTrend for records management, showing that portable hardware can retain a connected-platform relationship.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
3. Cabinet X-Ray Systems (Closed X-Ray Systems) - FDA
   - FDA describes applicable cabinet X-ray product obligations separately from OSHA or state oversight of use, supporting an equipment- and location-specific purchasing check.
4. FoodScreen - Radiological Food Screening System
   - FoodScreen is described as transportable food-analysis equipment, with local representative assistance offered. Transportability does not establish another application's suitability.
5. About METTLER TOLEDO Product Inspection
   - The company describes standalone and fully integrated systems, lifecycle support, and relationships with manufacturers, system integrators, and OEMs. Actual responsibility remains contractual.
6. Food inspection technology - Food Science and Technology
   - Taxonomy evidence: Production-line installation is a documented physical deployment distinction, separate from the underlying inspection technology. ([academic.oup.com](https://academic.oup.com/fst/article/xx.xx/xx.xx/xx.xx/xx.xx))
7. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
8. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware constrain the analytical value bridge. They are not deployment shares or universal selling prices.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware constrain the analytical value bridge. They are not deployment shares or universal selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The hardware-cost comparison supports retaining substantial value in capital-intensive laboratory systems and separating equipment investment from other laboratory costs; the forecast reuses this base-model price relationship.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The hardware-cost comparison supports retaining substantial value in capital-intensive laboratory systems and separating equipment investment from other laboratory costs; the forecast reuses this base-model price relationship.

9. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

10. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
11. Agilent Technologies - 2017 Annual Report
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
12. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

13. Agilent Technologies - Fiscal 2025 Annual Report
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.

14. Agilent Technologies - Q1 2025 Results Presentation
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

15. Waters Corporation - 2025 Annual Report
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.

16. Thermo Fisher Scientific Inc. - 2025 Form 10-K
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

17. bioMérieux - 2025 Financial Results
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.

18. Neogen Corporation - Fiscal 2025 Annual Report
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

19. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
20. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
21. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
22. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
23. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

24. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
25. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
26. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
27. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
28. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

29. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

11.1. Stationary Standalone Equipment

Table 138. Global Food Safety Testing Equipment Market Size, by Stationary Standalone Equipment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 139. Global Food Safety Testing Equipment Market Size, by Stationary Standalone Equipment, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 140. Global Food Safety Testing Equipment Market Size, by Stationary Standalone Equipment, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Guidance Document for Setting Up of a Basic Functional Food Analysis Laboratory - FSSAI

   · Taxonomy evidence: The 2021 food-analysis laboratory guidance identifies benchtop instruments and fixed laboratory installations. It supports stationary equipment configurations, not blanket inclusion of every listed laboratory asset. ([fssai.gov.in](https://fssai.gov.in/upload/uploadfiles/files/Book_Food_Testing_22_12_2021.pdf))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The hardware-cost comparison supports retaining substantial value in capital-intensive laboratory systems and separating equipment investment from other laboratory costs; the forecast reuses this base-model price relationship.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The hardware-cost comparison supports retaining substantial value in capital-intensive laboratory systems and separating equipment investment from other laboratory costs; the forecast reuses this base-model price relationship.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
34. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.

35. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

11.2. Production-Line-Integrated Equipment

Table 141. Global Food Safety Testing Equipment Market Size, by Production-Line-Integrated Equipment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 142. Global Food Safety Testing Equipment Market Size, by Production-Line-Integrated Equipment, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Food inspection technology - Food Science and Technology
   - Taxonomy evidence: The professional article describes food inspection systems installed on production lines for real-time assessment, including physical-contamination inspection. This independently supports an integrated deployment distinction. ([academic.oup.com](https://academic.oup.com/fst/article/xx.xx/xx.xx/xx.xx/xx.xx))
2. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

16. Eurofins Scientific - FY 2025 Results Presentation
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.

17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.

18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.

20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.

21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
33. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.

11.3. Portable Equipment

Table 144. Global Food Safety Testing Equipment Market Size, by Portable Equipment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 145. Global Food Safety Testing Equipment Market Size, by Portable Equipment, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 146. Global Food Safety Testing Equipment Market Size, by Portable Equipment, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Rapid In-Field Diagnostics: Horizon Scanning and Technology Readiness Level Study With a Technology Pilot Study - FSA Research and Evidence

   · Taxonomy evidence: The FSA-published study documents portable PCR and isothermal instrument settings in on-site food-safety work, supporting designed portability independently of buyer identity. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx-rapid-in-field-diagnostics-horizon-scanning-and-technology-readiness-level-study-with-a-technology-pilot-study))

2. Request for Proposal for Setting Up of Mobile Food Testing Laboratory (MFTL) - FSSAI

   · Taxonomy evidence: The April 2017 mobile food-testing laboratory procurement includes handheld measurement equipment, establishing a public procurement context for portable instruments. The complete vehicle package is not equipment-only market revenue. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/RFP_Mobile_Food_Testing_Lab_21_04_2017.pdf))

3. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.
4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware constrain the analytical value bridge. They are not deployment shares or universal selling prices.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware constrain the analytical value bridge. They are not deployment shares or universal selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
35. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.

36. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
37. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

12. Food Safety Testing Equipment Market, by Sales Channel

For Direct Sales, METTLER TOLEDO's standard sales terms identify the contracting entity through the order documents. Buyers should verify that entity and the agreed support package instead of inferring local fulfillment from a manufacturer-branded contact.

Distributor and Reseller Sales can place customer obligations with an independently contracting party. METTLER TOLEDO's distribution terms limit appointments to specified products and territories, require own-account transactions, and allocate corresponding warranty work to the distributor.

Agent- and Broker-Mediated Sales require a different authority check. A representative label alone should not be treated as proof of resale rights or authority to bind a manufacturer.

Figure 18. Global Food Safety Testing Equipment Market Size, by Sales Channel, 2025 (%)

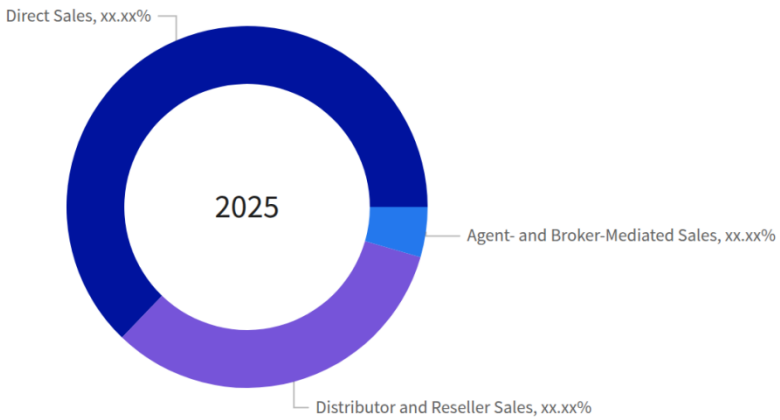

Figure 19. Global Food Safety Testing Equipment Market, by Sales Channel, 2032 (USD Million)

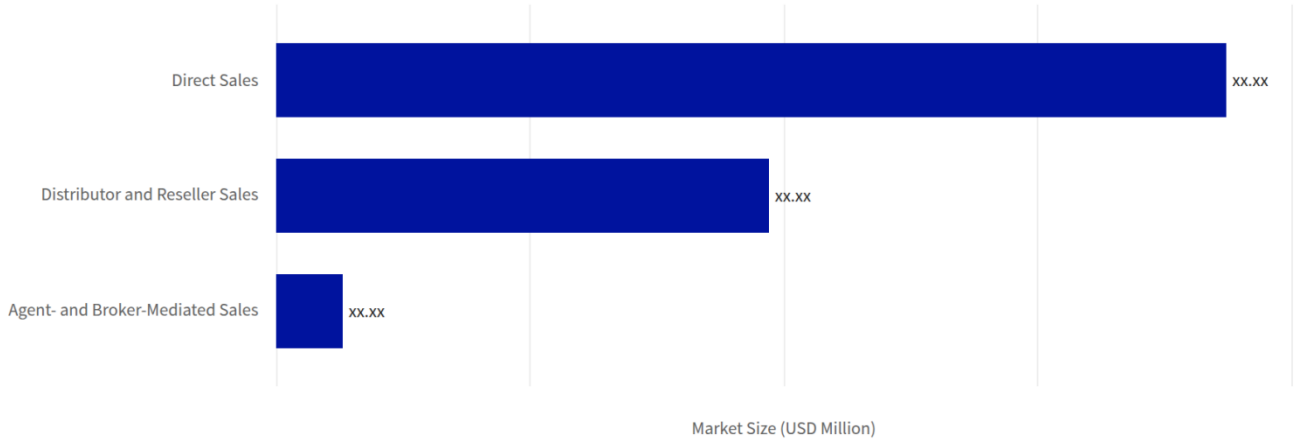

Table 147. Global Food Safety Testing Equipment Market, by Sales Channel growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Agent- and Broker-Mediated Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Distributor and Reseller Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 148. Global Food Safety Testing Equipment Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Agent- and Broker-Mediated Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Distributor and Reseller Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Mettler-Toledo Standard Terms and Conditions for Sales and Service

· METTLER TOLEDO's standard sales terms define the contract with the entity identified in quotation, order, agreement, invoice, or other order documents and make the purchased scope document-specific.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share.
([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share.
([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

2. Frequently Asked Questions - Wholesale - US Census Bureau

· Census distinguishes manufacturer-affiliated sales organizations, own-account wholesalers, and commission-based agents or brokers. These general roles do not establish an equipment-specific agency transaction.

· Taxonomy evidence: Census distinguishes manufacturer-affiliated selling, own-account merchandise resale, agency transactions, and electronic intermediation. Ordering medium alone therefore does not establish the economic channel.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

3. METTLER TOLEDO - General Distribution Terms

   · METTLER TOLEDO's distribution terms specify product and territory appointments, own-account transactions without authority to bind the manufacturer, distributor staffing and approval duties, and corresponding customer warranty work.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

4. Request for Proposal for Setting Up of Mobile Food Testing Laboratory (MFTL) - FSSAI

   · Taxonomy evidence: The procurement distinguishes manufacturer bidders and OEM dealers, providing food-laboratory-specific evidence of different supplier roles without establishing channel shares or transaction-level ownership. ([fssai.gov.in](https://www.fssai.gov.in/upload/uploadfiles/files/RFP_Mobile_Food_Testing_Lab_21_04_2017.pdf))

5. ISIC, Rev. 4 - Code 46: Wholesale trade, except of motor vehicles and motorcycles - UNSD

   · Taxonomy evidence: ISIC Revision xx.xx distinguishes own-account wholesale trade, manufacturer-maintained sales organizations, and commission-based intermediation. These are international commercial-role anchors, not food-safety-equipment market-share estimates. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Structure/Detail/en/xx.xx/xx.xx))

6. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

7. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

8. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports direct sales exceeding indirect sales and a preference for direct selling of sophisticated products. This constrains the allocation direction without establishing exact food-equipment channel percentages. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports direct sales exceeding indirect sales and a preference for direct selling of sophisticated products. This constrains the allocation direction without establishing exact food-equipment channel percentages. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports significant indirect selling and 2025 distributor acquisitions, supporting coexistence of resale and controlled selling. Acquired revenue is not disclosed and acquisition spending is not used as a sales weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports significant indirect selling and 2025 distributor acquisitions, supporting coexistence of resale and controlled selling. Acquired revenue is not disclosed and acquisition spending is not used as a sales weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
9. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.

10. Agilent Technologies - 2017 Annual Report
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
11. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
12. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
13. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
14. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))

15. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
16. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
17. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
18. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The differing Instrumentation and Solutions results support retaining a heterogeneous monitoring cohort model rather than treating all monitoring revenue as enterprise-system purchasing; resale probabilities remain assumptions. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The differing Instrumentation and Solutions results support retaining a heterogeneous monitoring cohort model rather than treating all monitoring revenue as enterprise-system purchasing; resale probabilities remain assumptions. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))

19. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
20. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
21. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
22. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

23. Agilent Technologies, Inc. - Fiscal 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

12.1. Direct Sales

Table 149. Global Food Safety Testing Equipment Market Size, by Direct Sales, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. Frequently Asked Questions - Wholesale - U.S. Census Bureau

   · Taxonomy evidence: Manufacturer sales branches or offices are defined by ownership or corporate affiliation, supporting treatment of controlled selling organizations as direct rather than independent resale. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

   · Taxonomy evidence: Manufacturer sales branches or offices are defined through ownership or corporate affiliation with the manufacturer, supporting their treatment as owned selling rather than independent distribution. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

2. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

3. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

4. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports direct sales exceeding indirect sales and a preference for direct selling of sophisticated products. This constrains the allocation direction without establishing exact food-equipment channel percentages. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports direct sales exceeding indirect sales and a preference for direct selling of sophisticated products. This constrains the allocation direction without establishing exact food-equipment channel percentages. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))

5. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
6. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
7. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

8. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
9. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

10. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
11. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
12. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
13. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

14. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
15. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
16. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
17. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
18. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.

19. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
20. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
21. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
22. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
23. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
24. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.

25. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
26. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
27. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
28. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
29. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
30. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
31. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.

32. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.

33. Agilent Technologies, Inc. - Fiscal 2025 Annual Report
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

34. Mettler-Toledo Standard Terms and Conditions for Sales and Service
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

12.2. Distributor and Reseller Sales

Table 152. Global Food Safety Testing Equipment Market Size, by Distributor and Reseller Sales, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 153. Global Food Safety Testing Equipment Market Size, by Distributor and Reseller Sales, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 154. Global Food Safety Testing Equipment Market Size, by Distributor and Reseller Sales, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Frequently Asked Questions - Wholesale - U.S. Census Bureau

   · Taxonomy evidence: Merchant distributors purchase merchandise from unrelated manufacturers and sell it to customers, supporting an own-account resale distinction. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

   · Taxonomy evidence: Merchant wholesalers buy merchandise on their own account, while distributors and importers are distinguished by their commercial activity rather than ordering medium. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

2. ISIC, Rev. 4 - Code 46: Wholesale trade, except of motor vehicles and motorcycles - UNSD

   · Taxonomy evidence: The classification identifies merchant wholesalers, including industrial distributors, as businesses taking title to the goods sold. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Structure/Detail/en/xx.xx/xx.xx))

3. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

4. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

5. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports significant indirect selling and 2025 distributor acquisitions, supporting coexistence of resale and controlled selling. Acquired revenue is not disclosed and acquisition spending is not used as a sales weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports significant indirect selling and 2025 distributor acquisitions, supporting coexistence of resale and controlled selling. Acquired revenue is not disclosed and acquisition spending is not used as a sales weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))

6. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
7. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
8. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

9. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
10. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

11. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
12. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
13. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
14. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
15. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The differing Instrumentation and Solutions results support retaining a heterogeneous monitoring cohort model rather than treating all monitoring revenue as enterprise-system purchasing; resale probabilities remain assumptions. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The differing Instrumentation and Solutions results support retaining a heterogeneous monitoring cohort model rather than treating all monitoring revenue as enterprise-system purchasing; resale probabilities remain assumptions. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))

16. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
17. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
18. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
19. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
20. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
21. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.

22. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
23. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
24. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
25. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
26. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
27. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.

28. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
29. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
30. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
31. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
32. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
33. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
34. Agilent Technologies, Inc. - Fiscal 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

35. METTLER TOLEDO - General Distribution Terms
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

12.3. Agent- and Broker-Mediated Sales

Table 155. Global Food Safety Testing Equipment Market Size, by Agent- and Broker-Mediated Sales, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Frequently Asked Questions - Wholesale - U.S. Census Bureau

   · Taxonomy evidence: Agency roles and fee-based electronic markets are recognized separately from own-account dealing. These general roles do not establish exact-market participation or channel shares. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

2. ISIC, Rev. 4 - Code 46: Wholesale trade, except of motor vehicles and motorcycles - UNSD

   · Taxonomy evidence: The classification separately recognizes agents, brokers, and commission trade. This establishes a commercial role but not its exact-market prevalence. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Structure/Detail/en/xx.xx/xx.xx))

3. 2022 NAICS Definition: 425120 Wholesale Trade Agents and Brokers - U.S. Census Bureau

   · Taxonomy evidence: Agents and brokers arrange goods transactions without taking title and receive commissions or fees; the definition also covers electronic intermediation. It does not establish food-safety-equipment sales volumes. ([census.gov](https://www.census.gov/naics/?details=xx.xx&input=xx.xx&year=2022))

4. Processing & Marketing - Food and Beverage Manufacturing

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food/beverage manufacturing establishments in 2022, constraining the industrial equipment customer universe used in the national working score.

5. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.

6. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Geographic customer-destination sales constrain the inspection/monitoring proxy, with an assumed North American share of the Americas bucket.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas destination sales support the common commercial proxy; the Latin American split is assumed and excludes Mexico under the captured hierarchy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European customer-destination revenue is the observed broad-scope input for inspection/monitoring allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the Middle Eastern suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World destination revenue constrains the proxy pool; the African suballocation is modeled rather than reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Asia/Rest-of-World customer-destination revenue supports the scope-adjusted inspection/monitoring geographic proxy and its forecast starting position.

7. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
8. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.
9. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.

10. Agilent Technologies - Fiscal 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 customer ship-to regional revenues provide the laboratory-equipment geographic proxy. North America and Latin America require explicit modeled separation of the Americas bucket.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Americas revenue is a commercial destination input; the Latin American suballocation and future adoption index are modeled, not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European destination revenue constrains the laboratory proxy; the three-way Europe/Middle East/Africa adjustment is an explicit allocation assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled Middle East allowance is separated; does not disclose Middle East target-market sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the broad laboratory destination-sales calibration from which a modeled African allowance is separated; no African food-equipment share is reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 Asia-Pacific customer-destination revenue constrains the laboratory portion of the regional allocation; the 2032 change is a modeled relative adoption scenario.
11. Agilent Technologies - Q1 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.

12. Waters Corporation - 2025 Annual Report
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
13. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.
14. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
15. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.
16. Testo - Annual Press Conference, January 23, 2025
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
17. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.

18. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
19. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
20. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
21. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
22. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
23. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.

24. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
25. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
26. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
27. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
28. FDA - Laboratory Accreditation for Analyses of Foods Program and Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LAAF covers specified testing circumstances and has staged capacity/compliance determinations. It constrains the model against applying a universal US equipment-purchase requirement.
29. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.

30. European Commission - Legislation on official controls
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official-control requirements locate institutional buyers and laboratory recognition conditions, not common European purchasing authority or an observed equipment share.
31. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
32. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.
33. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
34. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
35. Agilent Technologies, Inc. - Fiscal 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation. ([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
36. METTLER TOLEDO - General Distribution Terms
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales. ([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

13. Food Safety Testing Equipment Market, by Tested Matrix

[illegible] Buyers should retain a product-level crosswalk and identify the intended safety objective. Prepared Meals and Composite Dishes likewise requires an explicit supplied-product description rather than an assumption that each ingredient creates a separate equipment requirement.

[illegible] These examples support comparing the exact supported application rather than assuming equivalent coverage across Dairy Products and Alternatives, Cereals and Bakery Products, meat, seafood, or composite foods. Catalog breadth does not establish that every food-safety objective or matrix is covered by the same equipment.

[illegible] The buyer should establish that use and its accepted evidence requirement before comparing equipment or external laboratory fulfillment. A shared water-analysis description is insufficient to establish suitability across agricultural water, a processing input, and a finished beverage.

Food-Contact Materials and Articles concerns material-safety evidence rather than merely contamination on a contact surface. The European Commission links plastic food-contact declarations of compliance to supporting safety documentation. [illegible]

Food-Chain Environments contains complementary surface and preventive-condition purchasing roles. FDA distinguishes food-production environmental contamination from product sampling, while Testo markets standalone and connected monitoring for transport and storage conditions. [illegible]

[redacted]

Air-related requirements need a separate application check. [redacted] This unresolved distinction does not remove air-related food-chain environments from the study.

Table 158. Global Food Safety Testing Equipment Market, by Tested Matrix growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Agricultural, Ingredient, and Process Water	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food and Beverage Products and Ingredients	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food-Chain Environments	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food-Contact Materials and Articles	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 159. Global Food Safety Testing Equipment Market Size, by Tested Matrix, 2017-2040 (USD Million)

Tested Matrix	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Agricultural, Ingredient, and Process Water	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food and Beverage Products and Ingredients	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food-Chain Environments	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food-Contact Materials and Articles	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Legislation - Food Contact Materials

   · The European Commission links plastic food-contact declarations of compliance with supporting safety documentation available to enforcement authorities. This establishes a material-documentation relationship distinct from surface hygiene. ([food.ec.europa.eu](https://food.ec.europa.eu/food-safety/chemical-safety/food-contact-materials/legislation_en))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.

2. Environmental Sampling - FDA

   · FDA distinguishes contamination in food-production environments, including contact and non-contact surfaces, from the finished-product contamination it can contribute to. The source supports the environmental evidence role, not equipment interchangeability. ([fda.gov](https://www.fda.gov/food/sampling-protect-food-supply/environmental-sampling))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

3. Food Categories - Codex GSFA

   · Codex's hierarchy places soybean-based beverages under soybean products and separately identifies bakery, beverage, and prepared-food categories. These descriptors support a product crosswalk, not an equipment specification. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))

   · Taxonomy evidence: Foodstuffs are arranged in a hierarchical category system. ([codex.fao.org](https://codex.fao.org/codex-texts/codex-online-databases/gsfa/food-categories))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.

4. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

   · Thermo Fisher Scientific's guide for commercial laboratories covers analytical instrument applications including contaminants, fats and edible oils, additives, food-contact materials, and supplements. It supports a shared-portfolio comparison, not universal application acceptance. ([documents.thermofisher.com](https://documents.thermofisher.com/TFS-Assets/CMD/Application-Notes/ai-xx.xx-fs-food-beverage-resource-guide-compendium-directory-ai73833-en.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

5. Food Allergen Testing - Hygiena

   · Hygiena lists allergen offerings for milk, egg, fish, crustacean, soy, and other targets, and identifies Hygiena Cube as an instrument associated with specified gluten tests. These are supplier-described offerings, not proof of universal matrix coverage. ([hygiena.com](https://www.hygiena.com/allergen-diagnostics-and-data-management))

6. Safe Water Saves Water
   - FAO describes Codex water guidance as fit-for-purpose, recognizing that requirements differ by food product and intended food-chain use. Equipment suitability is a conditional commercial implication. ([fao.org](https://www.fao.org/newsroom/story/Safe-water-saves-water/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
7. Safety That Suits You - Testo
   - Testo markets standalone transport and storage loggers, connected monitoring, and a food-safety package combining instruments, software, and service. The page establishes described alternatives, not realized customer outcomes or identical local availability. ([testo.com](https://www.testo.com/en-SG/food/monitoring))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
8. Accreditation Requirements for Food & Environmental Laboratories - EIAC
   - EIAC distinguishes food, water, and environmental laboratory scopes and includes air within environmental testing. This classification does not establish a specific airborne food-chain equipment offering. ([eiac.gov.ae](https://eiac.gov.ae/wp-content/uploads/2025/xx.xx/EIAC-RQ-LB-xx.xx-Accreditation-Requirements-for-Food-Environmental-Laboratories.pdf))
9. Processing & Marketing - Food and Beverage Manufacturing
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
