Table 369. China Food Safety Testing Equipment Market Size, by Testing Objective, 2017-2040 (USD Million)

Testing Objective	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Chemical Contaminant and Residue Testing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food Allergen Testing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hygiene Verification	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Microbiological Safety Testing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Physical Contaminant Inspection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Preventive Safety-Condition Monitoring	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Radiological Contamination Testing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 370. China Food Safety Testing Equipment Market Size, by End User, 2017-2040 (USD Million)

End User	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Academic and Research Institutions	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food and Beverage Manufacturers and Packers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food Distribution and Logistics Businesses	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food Retailers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food-Contact Material Manufacturers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Foodservice Operators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Government Food-Control Organizations	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Independent Testing Laboratories	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Primary Food Producers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 371. China Food Safety Testing Equipment Market Size, by Deployment Configuration, 2017-2040 (USD Million)

Deployment Configuration	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Portable Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Production-Line-Integrated Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Stationary Standalone Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 372. China Food Safety Testing Equipment Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Agent- and Broker-Mediated Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Distributor and Reseller Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 373. China Food Safety Testing Equipment Market Size, by Tested Matrix, 2017-2040 (USD Million)

Tested Matrix	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Agricultural, Ingredient, and Process Water	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food and Beverage Products and Ingredients	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food-Chain Environments	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food-Contact Materials and Articles	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 374. China Food Safety Testing Equipment Market Size, by Food and Beverage Products and Ingredients, 2017-2040 (USD Million)

Food and Beverage Products and Ingredients	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Cereals and Bakery Products	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Confectionery and Sweeteners	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Dairy Products and Alternatives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Edible Ices	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Eggs and Egg Products	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Fats, Oils, and Fat Emulsions	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Fish and Seafood Products	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Food Additives and Processing Aids	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Fruits, Vegetables, Nuts, and Seeds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Meat and Poultry Products	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Non-Dairy Beverages and Packaged Drinking Water	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Prepared Meals and Composite Dishes	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ready-to-Eat Savory Snacks	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Salt, Spices, Soups, Sauces, Salads, and Protein Products	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Special Dietary Foods and Supplements	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. USDA Foreign Agricultural Service - China Food Processing Ingredients Annual, April 1, 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Attributes 2025 food/agricultural processing revenue and approximately xx.xx registered companies to Chinese public authorities. Broad sector coverage requires the disclosed modeled scope and equipment-intensity reductions.

19. SAMR - Frequently asked questions on the inspection and testing institution one-list, one-database framework
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: May xx.xx 2026 guidance describes the scope-specific framework effective June xx.xx 2026. The model applies no blanket CMA-driven equipment uplift.

20. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))

21. Products and Accessories - Microbiology | INTERSCIENCE
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.

22. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))
23. Testo - Annual Press Conference, February 19, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
24. Digital Food Safety Management with testo Saveris Food
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

25. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
26. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

27. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
28. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
29. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
30. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

31. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
32. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
33. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
34. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
35. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

36. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
37. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
38. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
39. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
40. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

41. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
42. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
43. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
44. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

45. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
46. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
47. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
48. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
49. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

50. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
51. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
52. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
53. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
54. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

55. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

56. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

57. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

58. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

59. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

60. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

61. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
62. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

63. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
64. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
65. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
66. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

16.3. Japan

Table 375. Japan Food Safety Testing Equipment Market Size, 2017-2040 (USD Million)

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. USDA Foreign Agricultural Service - Japan Food Processing Ingredients Annual, April 1, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports about USD xx.xx of 2025 food processing and a xx.xx% contraction. This anchors the industrial activity score and challenges an unconditional purchasing-surge assumption.
19. Japan Ministry of Health, Labour and Welfare - Foreign Official Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists foreign laboratories with differing accepted-report coverage. It supports retaining buyer/equipment location rather than attributing all associated equipment to Japan's food-import destination.
20. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))

21. Products and Accessories - Microbiology | INTERSCIENCE

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.

22. PR18666 - 39903-251283 Percival Incubators - Contract History

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

23. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

24. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

25. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
26. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

27. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
28. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
29. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
30. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

31. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
32. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
33. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
34. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
35. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

36. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
37. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
38. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
39. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
40. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

41. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
42. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
43. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
44. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

45. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
46. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
47. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
48. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
49. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

50. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
51. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
52. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
53. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
54. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

55. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
56. Frequently Asked Questions - Wholesale - U.S. Census Bureau
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

57. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

58. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

59. Mettler-Toledo Standard Terms and Conditions for Sales and Service

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

60. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

61. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
62. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

63. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
64. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
65. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
66. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides German food-industry turnover/value-added inputs.
19. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
20. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
21. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

22. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

23. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

24. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
25. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

26. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
27. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
28. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
29. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

30. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
31. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
32. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
33. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
34. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

35. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
36. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
37. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
38. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
39. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

40. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
41. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
42. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
43. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

44. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
45. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
46. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
47. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
48. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

49. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
50. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
51. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
52. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
53. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

54. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

55. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

56. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

57. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

58. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

59. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

60. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
61. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

62. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
63. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
64. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
65. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

16.5. France

Sources & Evidence

1. **Processing & Marketing - Food and Beverage Manufacturing**

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides French food-industry turnover/value-added inputs.
19. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
20. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
21. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

22. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

23. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

24. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
25. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

26. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
27. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
28. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
29. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

30. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
31. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
32. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
33. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
34. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

35. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
36. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
37. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
38. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
39. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

40. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
41. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
42. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
43. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

44. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
45. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
46. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
47. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
48. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

49. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
50. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
51. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
52. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
53. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

54. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

55. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

56. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

57. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

58. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

59. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

60. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
61. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

62. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
63. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
64. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
65. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

16.6. Canada

Table 405. Canada Food Safety Testing Equipment Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. USDA Foreign Agricultural Service - Canada Food Processing Ingredients Annual, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes approximately xx.xx Canadian food/beverage processing establishments, constraining the customer-pool proxy. Mean activity, equipment intensity and forecast change remain modeled.
19. CFIA - Framework for Quality Management Oversight of Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes separate Canadian laboratory oversight and recognition arrangements; no quantitative equipment-acquisition effect is inferred.
20. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))

21. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
22. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))
23. Testo - Annual Press Conference, February 19, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

24. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

25. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
26. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

27. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
28. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
29. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
30. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

31. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
32. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
33. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
34. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
35. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

36. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
37. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
38. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
39. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
40. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

41. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
42. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
43. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
44. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

45. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
46. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
47. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
48. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
49. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

50. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
51. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
52. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
53. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
54. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

55. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

56. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

57. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

58. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

59. Mettler-Toledo Standard Terms and Conditions for Sales and Service

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

60. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

61. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
62. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

63. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
64. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
65. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
66. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

16.7. United Kingdom

Table 415. United Kingdom Food Safety Testing Equipment Market Size, 2017-2040 (USD Million)

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. Defra - Food statistics in your pocket, manufacturing businesses
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official 2025 employer food/drink manufacturer counts constrain the UK commercial buyer scale; they do not verify the assumed equipment-activity score.
19. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
20. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
21. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

22. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

23. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

24. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
25. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

26. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
27. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
28. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
29. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

30. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
31. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
32. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
33. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
34. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

35. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
36. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
37. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
38. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
39. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

40. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
41. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
42. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
43. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

44. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
45. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
46. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
47. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
48. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

49. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
50. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
51. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
52. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
53. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

54. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

55. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

56. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

57. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

58. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

59. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

60. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
61. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

62. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
63. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
64. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
65. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

Sources & Evidence

1. **Processing & Marketing - Food and Beverage Manufacturing**

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Italian food-industry turnover/value-added inputs.
19. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
20. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
21. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

22. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

23. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

24. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
25. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

26. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
27. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
28. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
29. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

30. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
31. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
32. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
33. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
34. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

35. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
36. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
37. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
38. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
39. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

40. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
41. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
42. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
43. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

44. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
45. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
46. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
47. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
48. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

49. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
50. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
51. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
52. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
53. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

54. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

55. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

56. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

57. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

58. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

59. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

60. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
61. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

62. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
63. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
64. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
65. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

16.9. Brazil

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. USDA Foreign Agricultural Service - Brazil Food Processing Ingredients Annual, March 31, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 food-processing revenue of USD xx.xx attributed to ABIA. It anchors the food-industry activity proxy, not equipment-market revenue or a future share.
19. Brazil Ministry of Agriculture - Accredited Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes accredited third-party laboratories and demanded activities, constraining the model against equating industrial processing growth or equipment acquisition with expanded official recognition.
20. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))

21. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
22. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))
23. Testo - Annual Press Conference, February 19, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

24. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

25. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
26. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

27. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
28. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
29. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
30. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

31. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
32. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
33. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
34. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
35. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

36. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
37. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
38. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
39. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
40. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

41. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
42. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
43. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
44. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

45. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
46. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
47. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
48. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
49. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

50. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
51. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
52. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
53. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
54. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

55. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

56. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

57. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

58. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

59. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

60. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

61. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
62. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

63. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
64. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
65. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
66. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. FoodDrinkEurope Data & Trends - National food and drink industry statistics, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides Spanish food-industry turnover/value-added inputs.
19. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
20. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
21. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

22. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

23. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

24. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
25. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

26. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
27. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
28. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
29. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

30. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
31. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
32. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
33. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
34. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

35. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
36. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
37. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
38. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
39. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

40. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
41. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
42. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
43. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

44. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
45. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
46. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
47. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
48. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

49. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
50. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
51. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
52. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
53. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

54. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

55. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

56. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

57. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

58. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

59. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

60. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
61. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

62. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
63. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
64. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
65. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
19. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
20. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

21. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

22. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

23. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
24. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

25. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
26. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
27. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
28. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

29. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
30. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
31. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
32. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
33. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

34. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
35. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
36. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
37. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
38. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

39. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
40. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
41. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
42. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

43. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
44. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
45. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
46. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
47. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

48. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
49. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
50. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
51. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
52. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

53. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

54. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

55. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

56. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

57. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

58. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

59. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
60. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

61. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
62. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
63. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
64. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

16.12. South Korea

Table 465. South Korea Food Safety Testing Equipment Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
19. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
20. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

21. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

22. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

23. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
24. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

25. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
26. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
27. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
28. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

29. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
30. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
31. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
32. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
33. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

34. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
35. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
36. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
37. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
38. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

39. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
40. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
41. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
42. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

43. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
44. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
45. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
46. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
47. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

48. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
49. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
50. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
51. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
52. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

53. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

54. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

55. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

56. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

57. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

58. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

59. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
60. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

61. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
62. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
63. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
64. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
19. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
20. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

21. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

22. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

23. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
24. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

25. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
26. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
27. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
28. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

29. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
30. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
31. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
32. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
33. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

34. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
35. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
36. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
37. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
38. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

39. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
40. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
41. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
42. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

43. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
44. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
45. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
46. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
47. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

48. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
49. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
50. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
51. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
52. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

53. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

54. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

55. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

56. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

57. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

58. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

59. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
60. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

61. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
62. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
63. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
64. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

16.14. Australia

Table 485. Australia Food Safety Testing Equipment Market Size, 2017-2040 (USD Million)

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. Food Standards Australia New Zealand - Standard 3.2.2A Food safety management tools
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes category-dependent foodservice, catering and retail obligations. It constrains the forecast against a universal connected-hardware acquisition assumption.
19. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
20. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
21. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

22. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

23. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

24. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
25. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

26. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
27. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
28. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
29. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

30. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
31. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
32. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
33. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
34. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

35. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
36. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
37. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
38. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
39. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

40. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
41. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
42. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
43. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

44. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
45. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
46. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
47. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
48. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

49. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
50. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
51. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
52. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
53. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

54. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

55. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence.
([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

56. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

57. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

58. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

59. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

60. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
61. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

62. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
63. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
64. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
65. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

Sources & Evidence

1. Processing & Marketing - Food and Beverage Manufacturing

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports xx.xx US food and beverage manufacturing establishments in 2022. This constrains the scale of the industrial customer universe but is not a global equipment-purchasing census.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial purchaser scale without establishing global equipped-site counts.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx US food and beverage manufacturing establishments in 2022; constrains industrial customer scale, not global equipment sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dairy represented xx.xx% of 2021 US manufacturing sales in this broader food-and-beverage dataset; used only as regional activity calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Grain and oilseeds represented xx.xx% of sales; this combined category requires an explicit oils-versus-cereals crosswalk.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The combined grain/oilseed activity anchor does not measure bakery equipment spending; category coverage and equipment intensity remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Meat processing represented xx.xx% of sales, including slaughter, processing and rendering; broader scope prevents direct copying into equipment share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Beverages represented xx.xx% of sales; provides a regional activity anchor rather than an equipment-market observation.

2. Review of Allergen Analytical Testing Methodologies: Measurement Parameters and Sensitivity of Methods

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separates hardware investment from consumables, testing fees, maintenance and other laboratory costs.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports quote-based hardware costs of approximately GBP xx.xx for ELISA instrumentation, GBP xx.xx for PCR hardware and upwards of GBP xx.xx for mass-spectrometry hardware. These constrain equipment-cost tiers, not global average selling prices.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cost comparison assumes existing common preparation assets, supporting separate equipment accounting and a conditional reuse premise rather than automatic whole-laboratory replacement.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Existing incubation assets are distinguished from additional analytical hardware investment; this supports modular purchasing, not a measured incubation sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based hardware tiers of approximately GBP xx.xx GBP xx.xx and upwards of GBP xx.xx constrain reader-versus-capital-instrument valuation; they are not global 2025 average prices. ([science.food.gov.uk](https://science.food.gov.uk/article/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Quote-based mass-spectrometry hardware investment constrains relative capital intensity; it is not a global ASP or platform-sales observation. Used as a base-model and forecast valuation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PCR hardware is costed separately from consumables and testing fees, supporting the molecular equipment-only valuation bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The PCR hardware-cost tier informs relative equipment values; application-specific method counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ELISA instrumentation provides a lower-cost reader reference for the broader affinity/biochemical model, without measuring its non-immunological portion.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Quote-based PCR hardware cost of approximately GBP xx.xx provides a reader/platform capital-intensity reference, not a global microbiological equipment ASP or sales share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximate hardware costs of GBP xx.xx for ELISA, GBP xx.xx for PCR and upwards of GBP xx.xx for mass spectrometry; these constrain relative equipment-value tiers.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The capital-intensive mass-spectrometry reference supports distinguishing high-value analytical portfolios from

3. Mettler-Toledo International Inc. - 2025 Form 10-K

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 product sales of USD xx.xx and service revenue of USD xx.xx across all applications; supports separating equipment from service revenue.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 product sales of USD xx.xx service revenue of USD xx.xx and total sales of USD xx.xx.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Describes food-contaminant inspection alongside weighing, pharmaceutical and other applications, requiring food-safety and equipment-only adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 product sales of USD xx.xx separately from services, enabling an equipment-only supplier scale check with explicitly modeled food and safety adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes contaminant inspection from broader weighing and quality applications and reports stronger 2025 inspection growth than laboratory growth; this supports forecast direction, not the exact future share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes camera-based package and label inspection from weighing and other applications, requiring safety-only optical attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies contamination X-ray systems separately from quality-only uses and reports strong 2025 product-inspection growth; this supports scope and forecast direction, not technology share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies metal-detection equipment as a distinct contaminant-inspection offering within a mixed-scope inspection business.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx.805m of 2025 product sales and distinguishes services. The inspection portfolio includes contaminant detection and quality-only applications; food and safety eligibility remain modeled adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes inspection technologies integrated with material handling and use in packaging lines. Reports 2025 corporate sales of USD xx.xx; this is a broad scale-check input, not food-safety or deployment-specific revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates product and service revenue and describes capital-spending sensitivity, supporting equipment-only attribution and caution against treating a supported installation package as hardware value.

4. Mettler-Toledo International Inc. - January 2026 Healthcare Conference Presentation
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Historical company-wide sales of USD xx.xx provide an instrument-industry cycle reference, not an exact-market observation.
   - Evidence informing the 2018 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% constrains the pre-pandemic expansion assumption.
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides a moderating cycle reference.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% provides counterevidence to assuming that every food-related equipment function contracted during 2020.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Historical company-wide reported USD sales growth of xx.xx% supports a strong reopening and delivery-recovery period, with a smaller increase assumed for the target market.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Historical local-currency growth of xx.xx% and reported USD growth of xx.xx% demonstrate the importance of currency translation when calibrating nominal historical growth.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Company-wide reported USD sales declined xx.xx%, supporting a capital-equipment normalization counterforce.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Company-wide reported USD sales increased xx.xx%, providing a broad reference alongside weaker analytical-instrument purchasing.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Management's approximate 2025 sales mix assigns xx.xx% to product inspection and xx.xx% to food manufacturers. These are company mix estimates, not target-market shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates Product Inspection at approximately xx.xx% of 2025 company sales. This is a mixed-scope supplier business mix, not a target-market share. ([s202.q4cdn.com](https://s202.q4cdn.com/xx.xx/files/doc_presentations/2026/Jan/xx.xx/JPMorgan-2026-Healthcare-Conference-Presentation-FINAL.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimated product inspection at approximately xx.xx% of 2025 company sales. This constrains supplier scale after explicit hardware, food and safety adjustments; it is not a global market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Management estimates product inspection at approximately xx.xx% of 2025 company sales. The model applies explicit equipment, food and safety adjustments for a bounded supplier scale check; this is not a global integrated-equipment share.
5. Agilent Technologies - 2017 Annual Report
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: Reports xx.xx% growth in the life sciences and applied markets business in 2017 and describes strong food-market growth; supports the direction of the early historical bridge without measuring equipment-only food-safety revenue.

6. Agilent Technologies - Fourth Quarter Fiscal 2021 Prepared Remarks
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2020, challenging a blanket pandemic contraction assumption for laboratory equipment.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: States that Agilent's food business grew xx.xx% in fiscal 2021; used to calibrate, rather than directly copy, the laboratory recovery assumption.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Describes strong entering backlog and logistics and inflation pressures, supporting a delivery-and-price bridge rather than assuming that all revenue growth represented new underlying testing demand.
7. Agilent Technologies - Fiscal 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Describes a significant 2024 decline in the Applied Markets food business, including weaker chromatography-mass-spectrometry and spectroscopy demand.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports fiscal 2025 revenue of USD xx.xx and describes renewed food-market growth.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The disclosed business includes services, consumables, software, quality applications and remarketed instruments; explicit exclusions are required before using it as a new-equipment sales proxy.
8. Agilent Technologies - Q1 2025 Results Presentation
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports food as xx.xx% of first-quarter fiscal 2025 revenue and instruments as xx.xx% of company revenue.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The model treats the food percentage as a full-year proxy and assumes a higher equipment mix within food; neither adjustment is presented as a disclosed annual food-equipment figure.
9. Waters Corporation - 2025 Annual Report
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx down xx.xx%, providing a hardware-specific capital-cycle reference.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Waters instrument-system sales of USD xx.xx up xx.xx%, separately from chemistry consumables and services.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Food-safety attribution remains modeled because food is included within a broader industrial customer category.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx sales offices and approximately xx.xx field representatives in 2025. These constrain the plausibility of direct analytical-equipment coverage but are not revenue-share weights. ([s205.q4cdn.com](https://s205.q4cdn.com/xx.xx/files/doc_financials/2025/ar/Waters-2025-Annual-Report.pdf))
10. Thermo Fisher Scientific Inc. - 2025 Form 10-K
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 chromatography and mass-spectrometry revenue of USD xx.xx.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: This broader business includes non-food applications and supporting revenue; equipment, food and safety adjustments are explicit modeled inputs.

11. bioMérieux - 2025 Financial Results
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports 2025 Industrial Applications sales of EUR xx.xx.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports group equipment sales of EUR xx.xx, equipment rentals of EUR xx.xx, reagents and services. The model excludes rental and non-equipment revenue and estimates the industrial food-equipment split.
12. Neogen Corporation - Fiscal 2025 Annual Report
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports Food Safety segment revenue of USD xx.xx for the fiscal year ended May xx.xx 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The segment includes kits, media, services and other activities; an equipment-only and human-food attribution is modeled rather than treating the segment total as equipment sales.

13. Testo - Annual Press Conference, January 23, 2025

- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reports 2023 group turnover growth of xx.xx%, providing a broad monitoring-supplier cycle reference.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports 2024 group revenue of EUR xx.xx, up xx.xx%; Instrumentation represented xx.xx% and Solutions represented xx.xx%.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reports EUR xx.xx of industrial-services revenue and a slight decline in Solutions, demonstrating why group growth and connected offerings cannot be equated with food-monitoring hardware growth.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides the prior-year operating and revenue mix used for an explicitly assumed xx.xx% calendar-2025 bridge and food-hardware scope adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx, with Instrumentation at xx.xx% and Solutions at xx.xx%; Solutions declined slightly. These mixed-scope observations constrain equipment attribution and challenge automatic connected-hardware growth. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-testo-verzeichnet-wachstum))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 group revenue of EUR xx.xx.5m, a xx.xx% Instrumentation mix, xx.xx% Instrumentation growth and an xx.xx% Solutions mix with slight decline. Separately reported services prevent treating broad group or connected-solutions revenue as food-monitoring hardware.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports a slight 2024 Solutions revenue decline alongside geographically uneven performance; qualifies assumptions of universal connected-equipment adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports nearly EUR xx.xx of Spanish growth associated with McDonald's in 2024, but not a global foodservice hardware growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2024 business mix of xx.xx% Instrumentation and xx.xx% Solutions, used only after explicit food, hardware and within-business deployment assumptions to calibrate light-commercial monitoring.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Solutions declined slightly in 2024, providing counterevidence to an aggressive connected-hardware adoption assumption. The business categories do not themselves measure fixed deployment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2024 Instrumentation at xx.xx% and Solutions at xx.xx% of group revenue, with a slight Solutions decline. These are product-business observations used to challenge an automatic enterprise/direct-channel uplift, not channel weights. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2025-

14. Anritsu Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports PQA revenue of JPY xx.xx for the fiscal year ended March 2025, with xx.xx% growth.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PQA includes food and pharmaceutical inspection, weighing and maintenance; it provides a mixed-scope scale and growth check, not calendar-2025 food-contaminant equipment sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PQA revenue increased xx.xx% to JPY xx.xx, with reported overseas X-ray demand. Mixed food/pharmaceutical and equipment/service scope prevents treating this as target-category revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported metal-detector demand in selected markets provides counterevidence to assuming complete displacement by X-ray inspection.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports engagement with Asian PQA distributors during the fiscal year ended March 2025. This is a commercial counterforce to automatic disintermediation, not a calendar-2025 distribution percentage. ([dl.cdn-anritsu.com](https://dl.cdn-anritsu.com/en-en/about-anritsu/ir/annual-report/2025/ar2025e.pdf))

15. Eurofins Scientific - FY 2025 Results Presentation
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Reports leasehold improvements, machinery, laboratory equipment and other capital expenditure declining from EUR xx.xx in 2024 to EUR xx.xx in 2025.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Separately reports IT and real-estate expenditure. The broader capital-expenditure total is not treated as food-safety equipment purchases.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Provides an observed capital-intensity counterforce to the forecast: testing-network expansion and growth need not produce proportionate new-equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Declining mixed laboratory-related capital expenditure provides a purchasing-restraint counterforce for the common laboratory forecast, not a sampling-specific growth observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The broader buyer expenditure series constrains assumptions about laboratory expansion automatically requiring new supporting equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Continued network investment alongside lower mixed equipment-related expenditure supports retaining a capital-intensity restraint, without measuring incubation purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leasehold improvements, machinery, laboratory equipment and other capex declined from EUR xx.xx in 2024 to EUR xx.xx in 2025; food-only instrument spending is not separately identified. ([cdnmedia.eurofins.com](https://cdnmedia.eurofins.com/corporate-eurofins/media/x0jkreyr/eurofins-scientific-2025-full-year-results-presentation.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mixed leasehold, machinery, laboratory-equipment and other capex fell from EUR xx.xx in 2024 to EUR xx.xx in 2025; constrains outsourcing-related hardware-growth assumptions.
16. Federal Reserve - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Provides 2025 average exchange rates of USD xx.xx per EUR and JPY xx.xx per USD for converting financial cross-check inputs.
17. FDA - FSMA Final Rule on Pre-Harvest Agricultural Water
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The risk-based agricultural-water framework does not provide equipment-purchase quantities. It constrains the model against converting a compliance milestone directly into equipment sales.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: Supports retaining a conditional purchasing assumption rather than inserting a mandatory farm-equipment acquisition surge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies staggered 2025-2027 compliance dates and an assessment-based framework; does not provide equipment acquisition quantities or justify a purchasing surge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The agricultural-water framework establishes compliance context but does not disclose equipment orders; constrains the forecast against treating a regulatory milestone as a mandatory purchasing surge.

18. USDA Mexico - Food Processing Ingredients Annual, April 3, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports food processing as xx.xx% of Mexico's GDP in 2024. Applying that sector-specific composition to captured 2025 GDP and an explicit equipment-intensity adjustment creates the modeled activity score.
19. Professional Samplers for Food, Pharmaceutical, Chemical and Environmental Industries
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes collection hardware for bulk goods, liquids and frozen-food applications. This establishes category mapping, not a numerical sales weight. ([buerkle.de](https://www.buerkle.de/en/samplers/products))
20. Products and Accessories - Microbiology | INTERSCIENCE
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately marketed preparation equipment supports its distinct functional budget; product listings do not determine the allocation weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Combined incubation/reading offerings establish commercial overlap, supporting one-time principal-function attribution rather than duplicated equipment revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Standalone readers are distinguished from preparation and integrated incubation products, supporting non-overlapping category accounting. ([interscience.com](https://www.interscience.com/en/products/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately lists sample-preparation hardware, supporting the mechanical/fluidic purchased-function boundary rather than a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Colony-reading and associated bacterial-analysis equipment establish a commercial role distinct from separately allocated preparation and thermal equipment.
21. PR18666 - 39903-251283 Percival Incubators - Contract History
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CFIA's incubator contract awarded October xx.xx 2025 totals CAD xx.xx. It establishes dated procurement activity, not global unit prices or realized annual producer sales. ([canadabuys.canada.ca](https://canadabuys.canada.ca/en/tender-opportunities/contract-history/cw2410409-xx.xx))

22. Testo - Annual Press Conference, February 19, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 group revenue of EUR xx.xx, Industrial Services revenue of EUR xx.xx and xx.xx% Saveris growth. The mixed hardware/software/services recovery qualifies extrapolation of 2024 weakness but does not measure food-only hardware sales. ([testo.com](https://www.testo.com/de-DE/unternehmen/press-releases/xx.xx-xx.xx-2026-jahrespressekonferenz))

23. Digital Food Safety Management with testo Saveris Food

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports xx.xx active sensors across more than xx.xx environments and distinguishes monitoring hardware from software and services. These undated installed-stock indicators support commercial presence, not annual shipments or a replacement rate. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies distribution centers among application settings; current sensor stock supports commercial classification, not logistics hardware ownership or annual sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies retail applications within an offering reporting xx.xx sensors across over xx.xx environments; the footprint is not backdated to 2025.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies restaurant and catering applications; supports multisensor premises-monitoring relevance without converting software activity into hardware sales.

24. CSIR-CFTRI Procurement Plan for Financial Year 2025-26, Updated February 24, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed GC and HPLC procurement examples constrain chromatography hardware tiers, not worldwide sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Spectrophotometer budget examples illustrate equipment-price heterogeneity used in the cohort assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Costed PCR hardware supports equipment-only molecular valuation, not reagent or service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Real-time PCR and thermal-cycler budgets constrain the range of molecular instrument values.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A separately budgeted flow cytometer provides a commercial hardware-cost reference, not safety-attributable purchasing volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Homogenizer and centrifuge budgets supply the mechanical side of the explicitly bounded xx.xx:xx.xx preparation-value proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Freezer and incubator budgets support separate thermal equipment attribution; planned values remain funding-dependent.
25. LOMA Systems - Understanding the FAQs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer discussion establishes an X-ray price premium and differentiated purchasing role, but does not quantify a global ASP or substitution rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer identifies metal detection as generally less expensive for its distinct application set, supporting relative-price assumptions and continued participation.

26. Hanna Instruments - Foodcare Meters
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: US manufacturer asking-price examples include a USD xx.xx pH tester and higher-value portable meters; used only to constrain indicative hardware tiers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A USD xx.xx thermometer example constrains the low-cost physical-monitoring tier. Current retail prices are not treated as observed 2025 producer realizations.
27. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2024 institutional purchasing announcement supports continued commercial participation of a distinct molecular platform, not its global equipment-sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports more than five years of prior agency use and a renewed purchasing relationship for the isothermal platform; instrument-only consideration is not disclosed.
28. CDC - PulseNet Timeline
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents an institutional sequencing role within the broader molecular category, qualifying a universal industrial-platform replacement assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: All xx.xx state public-health laboratories transitioned to sequencing surveillance in 2019. This supports established deployment, not worldwide equipment revenue or forecast placement counts.
29. bioMérieux - GENE-UP
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A marketed foodborne-hazard detection instrument supports the molecular equipment category and continued commercial availability, not sales volume.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GENE-UP establishes a distinct marketed PCR offering; associated assays and support are not included as separate equipment revenue.

30. Hygiena - EnSURE Touch ATP Hygiene Monitoring System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: EnSURE Touch establishes a marketed ATP hygiene-monitoring instrument within the broader luminescence category. Its listing does not measure placements or separately supplied software revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes the cleaning-verification equipment category and multi-application platform boundary only; it supplies no 2025 sales weight or installed-base observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies EnSURE Touch as a handheld hygiene-monitoring instrument connected to SureTrend, supporting portable-reader classification without assuming independence from software or support relationships.
31. R-Biopharm Food & Feed Analysis - Testing Laboratories
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: RIDA CUBE SCAN establishes a marketed enzymatic/colorimetric reader, including a sulfite application, supporting the broader biochemical boundary beyond immunoassay readers without establishing revenue.
32. FOSS - BacSomatic
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: BacSomatic establishes a commercial flow-cytometry offering for raw-milk hygiene assessment; broader quality and somatic-cell activity is not automatically food-safety-attributable revenue.
33. Mirion - FoodScreen Radiological Food Screening System
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoodScreen establishes an offered radiological food-screening system, supporting a commercial category distinct from physical-contaminant X-ray inspection. No sales or installed-base quantity is disclosed.
34. Agilent Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 food revenue was USD 637m versus USD 592m; company-wide instrumentation revenue was USD 2427m versus USD 2354m. These broader-scope inputs constrain analytical hardware scale and relative growth, not objective shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Food and instrumentation disclosures constrain a shared analytical-platform proxy but do not identify allergen-specific sales.

35. bioMérieux - 2025 Financial Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports EUR xx.xx.3m group equipment sales, EUR xx.xx.8m total sales and EUR xx.xx.9m Industrial Applications sales in 2025. Separate equipment, reagent, service and rental categories constrain hardware eligibility; equipment growth is a forecast calibration input, not a future share observation.
36. Switch to EnSURE Touch - Hygiena
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A conditional hardware trade-in offer shows that placements and standalone equipment realization can diverge. Used to temper the forecast price/mix assumption, not backdated to 2025 or treated as observed uptake.
37. Sum Up of Radionuclide Test Results Reported in FY2024 - Report as of March 31, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Japan reported xx.xx food radionuclide samples in FY2024, ended March xx.xx 2025. This is an activity comparator supporting continuing surveillance, not equipment purchases or calendar-2025 equipment revenue.
38. FSMA Final Rule for Preventive Controls for Human Food - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes monitoring and verification responsibilities. Supports the commercial objective boundary and the assumption that required records do not automatically create new-equipment purchases; supplies no purchasing quantity.
39. Environmental Sampling - FDA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Environmental sampling can concern named microbial hazards. Supports attributing relevant equipment to microbiological objectives rather than automatically classifying environmental activity as nonspecific hygiene.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes food-production environmental contamination from product sampling and covers contact and non-contact surfaces; supports the environmental application boundary, not market size.

40. Metastudy on Food Testing Laboratories in India
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical NABL data identify captive food-business laboratories while warning that many captive facilities fall outside accreditation coverage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Private laboratories account for xx.xx% of the historical accredited population; this is an ownership proxy, not equipment spending.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Central and state government categories total xx.xx% of the historical accredited population, supporting a distinct public institutional cohort.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional laboratories represent xx.xx% of the historical accredited population; global academic equipment attribution remains modeled.
41. Ishida X-ray Technology Delivers Enhanced Quality Control for Poultry Line - Nikas Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports an installed inspection system at Nikas's food-manufacturing factory; planned additional systems are not treated as realized sales or a global allocation weight.
42. Laboratory Accreditation for Analyses of Foods (LAAF) Program & Final Rule
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Specified owners and consignees must use accredited laboratories in covered circumstances; this establishes external fulfillment, not universal instrument ownership or a purchase quantity.
43. Accreditation of Laboratories to Conduct Food Testing - Preliminary Regulatory Impact Analysis
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A historical survey of xx.xx multi-farm egg owners reported xx.xx% using state/public-university laboratories and xx.xx% private laboratories; a narrow check against assuming farm ownership.

44. Legislation - Food Contact Materials
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer compliance documentation establishes a commercial responsibility but does not distinguish internal equipment ownership from accepted external evidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Establishes material-safety compliance documentation and traceability obligations distinct from surface contamination; supports the allocation boundary, not an observed equipment-purchase ratio.
45. Retail Food Protection
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FDA identifies more than one million US retail/foodservice establishments in aggregate; supports a large premises-monitoring universe, not the modeled global retail count.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Includes restaurants, cafeterias and institutional outlets in the regulated universe; supports foodservice monitoring relevance without measuring annual purchases.
46. FSMA Final Rule on Sanitary Transportation of Human and Animal Food
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates shippers, loaders, carriers and receivers and their responsibilities; supports acquisition-authority attribution rather than allocating hardware to every shipment participant.
47. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Competition covers one instrument and additional support; the workspace records a February xx.xx 2026 award-notice publication, not hardware-only realized value or 2025 sales.
48. Equipment Grants Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 program lists USD xx.xx estimated funding and USD xx.xx-xx.xx awards for shared food/agricultural science equipment; neither amount measures global food-safety sales.

49. Thermo Fisher Scientific - Quality control, beyond the standard: Innovative products for quality control in food and beverage production
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The food-and-beverage portfolio distinguishes portable meters and reusable handheld equipment from laboratory installations. This supports configuration mapping only, not numerical sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists benchtop preparation equipment, laboratory refrigerators, clean benches and microbiological incubators, supporting the standalone classification of the relevant inherited laboratory budgets.
50. MAS-100 Eco Airsampler for food industry - Merck
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies MAS-xx.xx Eco as portable sampling equipment for the food-and-beverage industry. Establishes a commercial sampling-category mapping, not a sales fraction or equipment-use instruction.
51. Sampling System - Dinnissen
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes a dedicated automated sampling offering for food producers and production installations. Supports the production-connected sampling category; neither broader processing equipment nor full-system project value is included in the modeled sampling numerator.
52. ID 6121155 - AFBI - Supply, Delivery and Support of a Liquid-Chromatographic Mass-Spectrometer - UK7 Contract Details Notice, March 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official contract notice reports GBP xx.xx excluding VAT, signed February xx.xx 2026, for an LC-MS package including support obligations. It tests the handover and package-comparability finding but does not establish 2025 equipment revenue, completed delivery or a hardware-only price.
53. testo 104-IR - Dual purpose IR and penetration thermometer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets a pocket-sized food thermometer for receiving and inspection roles, supporting portable preventive-monitoring attribution without establishing its market weight.

54. Testo - Automated monitoring and documentation of temperatures at all refrigerated sites with testo Saveris 2

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated supermarket offering describes a three-logger connected monitoring package. It supports classifying fixed facility monitoring separately from production-line integration; the package count is not used as a sales-share weight.

55. Frequently Asked Questions - Wholesale - U.S. Census Bureau

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-controlled sales offices support direct attribution; affiliation, not a local office label, determines classification. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Own-account buying and resale supports the distributor numerator boundary. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commission-based intermediation is distinguished from own-account dealing; the classification does not measure its market prevalence. ([census.gov](https://www.census.gov/programs-surveys/economic-census/year/2022/about/faq/faq-wholesale.html))

56. Agilent Technologies, Inc. - Fiscal 2025 Annual Report

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Describes predominantly direct applied-market selling; this supports the larger-system cohort premise, not the assumed xx.xx% probability.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies an active reseller program alongside direct selling, supporting a nonzero resale route within the analytical-equipment model.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies sales agents supplementing geographic and smaller-account coverage. This supports the agency model's commercial premise, not its numerical share or a future observed allocation.
([s24.q4cdn.com](https://s24.q4cdn.com/xx.xx/files/doc_financials/2025/ar/A-ARS-xx.xx-K-BMK-2025.pdf))

57. METTLER TOLEDO - General Distribution Terms

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Requires distributors to transact on their own account and provide corresponding customer warranty support, supporting role attribution and continuing commercial relevance without providing sales weights.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expressly distinguishes the distributor relationship from agency, supporting separation of own-account resale from commission-mediated manufacturer sales.
([mt.com](https://www.mt.com/ca/fr/home/site_content/legal/distribution-terms/Mettler-Toledo-GDT.html))

58. Mettler-Toledo Standard Terms and Conditions for Sales and Service

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies the contracting manufacturer entity through order documents and makes additional costs and services order-specific. Supports direct attribution and the hardware-only valuation bridge, not a numerical channel share. ([mt.com](https://www.mt.com/gb/en/home/site_content/legal/commercial_terms/sales_service_terms_glo.html))

59. Food and Beverage Resource Guide for Commercial Food Testing Laboratories

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier portfolio spans multiple food-safety application categories, supporting fractional attribution of shared analytical equipment rather than one instrument per commodity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies fats and edible oils within the supplier analytical portfolio; establishes application mapping, not category revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists supplement-related analytical applications; supports commercial-category relevance without quantifying the modeled purchasing exposure.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Lists food-additive and processing-aid analytical applications, supporting a distinct ingredient-safety allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies food-contact-material safety applications; supports the material-safety boundary rather than surface-hygiene substitution.

60. Food Categories - Codex GSFA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hierarchical food descriptors constrain the product crosswalk; they are not equipment-spending weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates dairy products and analogues from fat-product categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes edible ices separately from dairy products; supports the non-dairy frozen-dessert boundary, not a sales observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately recognizes confectionery and sweeteners, combined within the retained node.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes cereals from bakery wares; the retained node combines both.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes eggs and egg products as a distinct commodity group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Category xx.xx supports the combined seasoning, soup, sauce and protein-product crosswalk.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes special dietary foods and supplements separately.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes beverages separately from dairy-based products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes ready-to-eat savory snacks as a product category.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes prepared foods, supporting supplied-product attribution rather than ingredient double counting.
61. FAO Food Outlook: Global Output of Key Food Commodity Crops on Course for New Records
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports xx.xx tonnes of global hen-egg production in 2023, with China contributing xx.xx%; constrains global commercial footprint, not equipment revenue.

62. Dairy and Dairy Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official world-milk production projection of xx.xx% annually implies approximately xx.xx% over seven years; independently constrains, but does not verify, the modeled xx.xx% dairy exposure increase.
63. Fish and Other Aquatic Products - OECD-FAO Agricultural Outlook 2025-2034
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports approximately xx.xx Mt of aquatic production in 2024 and xx.xx% food-use allocation in the projection base period; qualifies a US-only processing proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projects aquatic food demand increasing xx.xx% over ten years, constraining the modeled seven-year seafood exposure multiplier to xx.xx; equipment conversion remains assumed.
64. Safe Water Saves Water
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distinguishes intended food-chain water uses and describes voluntary fit-for-purpose guidance; supports a separate input-water matrix without implying mandatory equipment ownership or purchase quantities.
65. Safety That Suits You - Testo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Markets standalone transport/storage loggers and connected monitoring offerings. Establishes commercial role and alternative configurations, not historical shipments or a market-share percentage.

17. Competitive Landscape

17.1. Market Share Analysis, 2025

Supported positioning in Food Safety Testing Equipment follows application coverage and account access rather than a supplier's overall laboratory breadth. bioMérieux's GENE-UP offer combines a platform with associated applications and instrument support. ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪

OEM and represented-platform routes can provide alternatives to developing every branded equipment relationship independently. IUL, SA explicitly supplies OEM products, and ProGnosis Biotech markets equipment through both its own related business and a Byonoy partnership. ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪

Latin American channel suppliers often provide access to an existing manufacturer's equipment rather than another independent platform. ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ These routes can support a local quotation and handover relationship, but each still requires confirmation of present appointment, model availability, warranty authority, and support responsibility.

▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ Buyers can investigate local supply for a specific preparation requirement without assuming that each seller manufactures a separate competing platform. The comparison should establish the actual equipment maker and the party responsible for delivery, installation, and support.

Manufacturer-documented channels provide stronger appointment evidence than an uncorroborated regional-presence claim. Bentley Instruments identifies HTS Centroamérica in its distributor information. ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪

[illegible] These propositions differ from a direct manufacturer contract because the local seller and manufacturer may retain separate obligations. Equipment buyers should obtain a model-and-destination undertaking and a clear escalation route before treating an advertised local portfolio as a complete service commitment.

Hospitality and site-measurement channels serve a different acquisition from specialist laboratory platforms. [illegible] For restaurants and catering businesses, the procurement question is whether the offered instrument, records arrangement, and support fit the required site control; a general compliance-oriented description does not confer customer or regulatory approval.

[illegible] ECC Algérie's EnSURE listing is an advertised equipment route, while LabMart Limited lists Romer Labs' AgraVision Pro in a Ghana-facing storefront. These are relevant alternatives for local contracting and support qualification, not evidence of independent manufacture, completed delivery, or identical support across countries.

Water-related local suppliers should be assessed against the accepted food-chain water requirement. Labearer Court Limited markets Lovibond instruments to food-and-beverage users in Kenya. [illegible]

Southeast Asian access is particularly territory-sensitive. [illegible]

[illegible] These routes should be compared as different local commercial relationships, not automatically as equivalent independent equipment platforms or evidence of nationwide rights.

North American and Australasian channel relationships create another distinction between the equipment maker and the local supplier. [illegible] A channel can contribute commercial access and support while leaving application acceptance and manufacturer responsibility separate.

Figure 28. Global Food Safety Testing Equipment Market Share, by Key Player, 2025

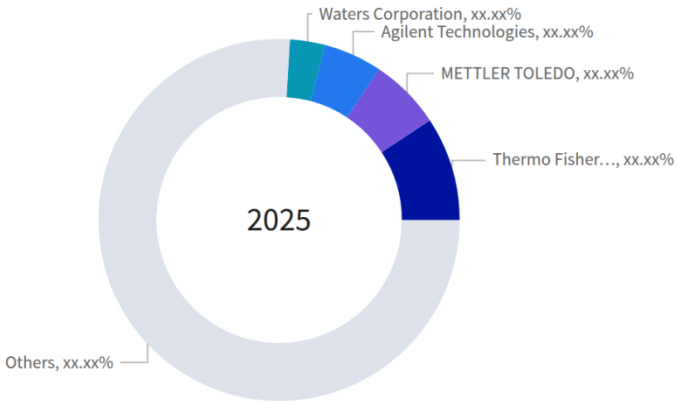

Table 505. Global Food Safety Testing Equipment Market Share, by Key Player, 2025

Key Player	Share (%)
Agilent Technologies, Inc.	xx.xx
Anritsu	xx.xx
bioMérieux	xx.xx
Bruker Corporation	xx.xx
FOSS	xx.xx
Hygiena	xx.xx
Loma Systems	xx.xx
METTLER TOLEDO	xx.xx
Minebea Intec	xx.xx
Neogen Corporation	xx.xx
PerkinElmer	xx.xx
Sartorius	xx.xx
Shimadzu Corporation	xx.xx
Testo	xx.xx
Thermo Fisher Scientific Inc.	xx.xx
Waters Corporation	xx.xx
Others	xx.xx

Sources & Evidence

1. GENE-UP - bioMérieux
   - bioMérieux associates GENE-UP with application offerings and instrument support, supporting package-specific account-access analysis. ([biomerieux.com](https://www.biomerieux.com/corp/en/our-offer/industry-products/gene-up-automated-pathogen-detection.html))
   - Evidence informing base-year company-share estimates: Establishes the GENE-UP food-related instrument and associated support offering; supports separating equipment from separately supplied application and service revenue.
2. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
   - Neogen's June xx.xx 2024 announcement reports USDA FSIS selection of its isothermal MDS for specified applications; continuing purchases are not established. ([investors.neogen.com](https://investors.neogen.com/news/news-details/2024/Neogen-MDS-Awarded-Contract-from-USDA-Food-Safety-and-Inspection-Service-xx.xx-xx.xx-2024/default.aspx))
   - Evidence informing base-year company-share estimates: Confirms the June xx.xx 2024 company-reported FSIS selection; establishes a dated customer reference rather than a measured 2025 hardware numerator.
3. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia
   - The January xx.xx 2025 Malaysian announcement assigns DKSH commercialization and after-sales roles for Hygiena products. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))

4. Driving Market Expansion for Hygiena's Diagnostic Solutions in Southeast Asia
   - DKSH's August xx.xx 2025 account limits Indonesian food-and-beverage coverage to Sumatra. ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/driving-market-expansion-for-hygienas-diagnostic-solutions-in-southeast-asia/))
5. XDive Instrument - Star Array Pte. Ltd.
   - The OEM proposition supports an alternative commercial sourcing route, conditional on actual rights and obligations. ([star-array.com](https://www.star-array.com/xdive))
6. Equipment - ProGnosis Biotech
   - The documented represented-platform route supports a conditional OEM and channel sourcing comparison. ([prognosis-biotech.com](https://www.prognosis-biotech.com/equipment/))
7. Company - IUL
   - IUL's OEM offering establishes a commercial sourcing route, not automatic customer acceptance or territorial rights. ([iul-instruments.com](https://iul-instruments.com/company/))
8. Luminultra and Kikkoman Partnership: Food Safety Testing
   - The relationship establishes a distribution route rather than separate ownership of Kikkoman equipment design. ([luminultra.com](https://www.luminultra.com/resource/luminultra-kikkoman-partnership/))
9. Hygiene ATP Testing Meter - Bioeasy International
   - Bioeasy International advertises hygiene-monitoring meters in Malaysia; the offering does not establish ownership linkage to Shenzhen Bioeasy. ([bioeasy.my](https://www.bioeasy.my/hygiene-atp-testing-meter/))
10. NEOGEN - Biodinamix
    - Biodinamix advertises Neogen plate-reading and LM1 hygiene equipment through its Mexican commercial offering. ([biodinamix.com.mx](https://biodinamix.com.mx/wp/neogen/))
11. Luminómetro ATP Clean-Trace - Rodin SRL
    - Rodin commercially presents Neogen Clean-Trace hygiene equipment and purchase-related support in Argentina. ([rodinsrl.com.ar](https://rodinsrl.com.ar/luminometro-atp-xx.xx-beneficios-del-clean-trace-para-verificar-la-higiene/))
12. Environmental Monitoring Catalog - Redilab
    - Redilab's Argentine environmental-monitoring catalog lists Neogen Clean Trace LM1. ([redilab.com.ar](https://redilab.com.ar/shop?id=xx.xx))
13. SystemSURE Plus - BioCheck
    - BioCheck SPA offers Hygiena SystemSURE Plus through its Chilean commercial catalog. ([biocheck.cl](https://biocheck.cl/catalogo/equipos-instrumentacion/systemsure-plus-luminometer/))
14. Nosotros - Miuras
    - Miuras describes representation of Hygiena Qualicon and BAX in Colombia; continuing appointment terms are not established. ([miuras.com.co](https://www.miuras.com.co/nosotros/))
15. Luminómetro MVP ICON - Quimiem
    - Quimiem identifies an Ecuadorian distribution role for MVP ICON hygiene-monitoring equipment. ([quimiem.com](https://www.quimiem.com/producto/luminometro-mvp-icon/))
16. Charm EZ Protect+ - PEF Analysis
    - PEF Analysis offers Charm EZ Protect+ through a Uruguay-facing quotation route. ([pefanalysis.com.uy](https://pefanalysis.com.uy/productos/charm-ez-protect-))
17. Homogeneizador AGI.130 - Ethik
    - Ethik markets AGI.xx.xx microbiological preparation equipment, establishing a local offering rather than a complete laboratory replacement package. ([ethik.com.br](https://www.ethik.com.br/produto/homogeneizador-stomacher-agi-xx.xx/))
18. Homogeneizador - Marconi
    - Marconi's catalog lists microbiological homogenizer equipment, supporting a preparation-specific local supply comparison. ([marconi.com.br](https://marconi.com.br/categoria/xx.xx/xx.xx/homogeneizador))

19. Homogeneizador de Amostras INT-BAGMIXER-400-S - Tecnal
    - Tecnal lists INT-BAGMIXER equipment and identifies a French manufacturer, distinguishing local commercialization from assumed Tecnal manufacture. ([web2021aws.tecnal.com.br](https://web2021aws.tecnal.com.br/pt-BR/produtos/detalhes/8965_homogeneizador_de_amostras))
20. Distributor Information - Mexico - Bentley Instruments
    - Bentley's manufacturer distributor information identifies HTS de Centroamerica, supporting a manufacturer-documented channel inquiry. ([bentleyinstruments.com](https://bentleyinstruments.com/distributor-countries/mexico))
21. About Advanced Scales & Equipment Ltd.
    - Advanced Scales describes Jamaican sales and service for metal-detection and X-ray equipment and claims a SAFELINE distribution role. ([advancedscales.com](https://advancedscales.com/about/))
22. Hygiena - RESTECH-AL BAHATHA
    - RESTECH-AL BAHATHA lists named Hygiena equipment including BAX and EnSURE Touch through its Saudi commercial offering. ([albahatha.com](https://albahatha.com/hygiena))
23. Food Processing - Perfect Vision Trading & Services LLC
    - Perfect Vision lists EnSURE Touch within its Oman-facing food-processing offering. ([perfectvisionllc.com](https://perfectvisionllc.com/product/food-processing/))
24. Food Safety and Microbiology Testing Solutions - REDA Lab
    - REDA Lab markets food-related microbiology, preparation, and hygiene-equipment categories across addressed GCC locations; named configurations remain necessary. ([redalab.com](https://redalab.com/products/food-safety-microbiology-testing/))
25. About Us - ThermoPro UAE
    - ThermoPro UAE identifies its operating measuring-instrument business and hospitality offering; the page does not establish blanket food-safety approval. ([thermopro.ae](https://thermopro.ae/aboutus/))
26. Food Management - Specifico & Co.
    - Specifico presents food-safety tools and temperature/time-control catalog categories, supporting a hospitality-tool purchasing context. ([specificoco.com](https://specificoco.com/product-section/food-management/))
27. BAX System Q7 - National Separations
    - National Separations advertises Hygiena BAX Q7 through a quotation route, establishing a local equipment-channel offering. ([natsep.co.za](https://natsep.co.za/product/one-bax-system-q7-cycler-detector/))
28. Brands We Represent - Beckman Egypt
    - Beckman Egypt states that it supplies, installs, and supports represented equipment and includes Hygiena among its brands. ([beckman-egypt.com](https://www.beckman-egypt.com/brands))
29. AgraVision Pro Reader - LabMart Limited
    - LabMart lists AgraVision Pro in its Ghana-facing commercial storefront; the listing does not establish completed delivery or appointment terms. ([labmartgh.com](https://www.labmartgh.com/shop/xx.xx-agravisiontm-pro-reader-xx.xx))
30. Food & Beverage Water Testing Equipment - Labearer Court Limited
    - Labearer Court markets Lovibond instruments to Kenyan food-and-beverage operations for water-related measurement. ([labearercourt.com](https://labearercourt.com/industries/food-beverage))
31. Hach Technologies Products - Nesvax Innovations
    - Nesvax describes a Kenyan Hach appointment covering laboratory and online instrumentation and identifies food-and-beverage applications. ([nesvax.co.ke](https://nesvax.co.ke/our-products/hach-technologies-products/))
32. About Aqualytic
    - Aqualytic describes a geographically bounded South African HACH distribution role and local instrumentation support. ([aqualytic.co.za](https://www.aqualytic.co.za/about/))

33. Food Safety Division - Premier Diagnostics
    - Premier Diagnostics' Malaysian food-safety catalog lists Lumitester Smart equipment. ([premierdiagnostics.com.my](https://www.premierdiagnostics.com.my/eco6.html))
34. Food Safety - Camtech Diagnostics
    - Camtech's food-safety portfolio identifies Veritide-produced portable contamination-screening equipment, separating manufacturer and channel roles. ([camtechdiagnostics.com](https://www.camtechdiagnostics.com/food-safety.html))
35. MinebeaMitsumi Inc. - Products, Locations and Technologies in Europe
    - Evidence informing base-year company-share estimates: Reports more than xx.xx inspection systems sold across industries, providing a historical cumulative commercial anchor rather than annual shipments or active calendar-2025 equipment.
    - Evidence informing base-year company-share estimates: Identifies checkweighers, metal detectors and X-ray inspection systems within a broader industrial portfolio, requiring product and application exclusions.
36. Minebea Intec Strengthens Global Growth Strategy
    - Evidence informing base-year company-share estimates: The September xx.xx 2025 company announcement confirms continuing inspection operations, MinebeaMitsumi ownership and a local commercial partnership.
    - Evidence informing base-year company-share estimates: Supports producer-versus-channel attribution; the announcement, employee counts and partner network do not disclose attributable annual equipment sales.
37. X-Ray Inspection Systems for the Food Industry - Minebea Intec
    - Evidence informing base-year company-share estimates: Markets food-contaminant inspection equipment while distinguishing additional quality-checking applications.
    - Evidence informing base-year company-share estimates: Supports eligible equipment classification and exclusion of quality-only activity, but does not establish the assumed product mix, prices or annual purchase conversion.
38. Thermo Fisher Scientific Inc. - 2025 Form 10-K
    - Evidence informing base-year company-share estimates: Provides 2025 revenue anchors for chromatography/mass spectrometry, chemical analysis, microbiology, genetic sciences and laboratory products; food-equipment attribution remains modeled.
39. Food and Beverage - Thermo Fisher Scientific
    - Evidence informing base-year company-share estimates: Maps food analytical, molecular, supporting laboratory and inspection offerings while also identifying quality and authenticity applications that require exclusion.
40. bioMérieux - 2025 Financial Results
    - Evidence informing base-year company-share estimates: Reports Industrial Applications revenue of EUR xx.xx and separates group equipment sales from reagents, services and rentals; supplies the equipment-mix proxy.
    - Evidence informing base-year company-share estimates: The disclosed equipment-to-total-sales ratio calibrates the assumed microbiology hardware fraction; it is not an observed Thermo Fisher ratio.
41. VIDAS KUBE - bioMérieux
    - Evidence informing base-year company-share estimates: Provides a separate marketed food-pathogen instrument proposition; does not establish platform-level sales or identical application coverage.
42. Neogen Corporation - 2025 Form 10-K
    - Evidence informing base-year company-share estimates: Reports fiscal-2025 Food Safety product-category revenue used as the hardware-attribution base and identifies substantial consumable and service activity requiring removal.
43. SureTrend Food Safety Management Software - Hygiena
    - Evidence informing base-year company-share estimates: Reports a current footprint exceeding xx.xx facilities and xx.xx users; supplies the facility-model anchor, not observed 2025 equipment sales.
    - Evidence informing base-year company-share estimates: Shows support for external and third-party results, requiring an assumed hardware-participation adjustment.

44. EnSURE Touch ATP Luminometer for Hygiene Monitoring - Hygiena
    - Evidence informing base-year company-share estimates: Establishes the handheld hygiene-instrument category and connected-records relationship; supports the hardware classification, not assumed ownership or annual replacement quantities.
45. Real-Time PCR Pathogen Detection for Food Safety Testing - Hygiena
    - Evidence informing base-year company-share estimates: Establishes marketed BAX/PCR and associated preparation-equipment roles included in the modeled facility basket; supplies no shipment counts or equipment revenue.
46. Agilent Technologies, Inc. - Fiscal 2025 Annual Report
    - Evidence informing base-year company-share estimates: Reports annual food revenue of USD xx.xx and instrumentation revenue of USD xx.xx; defines remarketed and third-party equipment inclusions requiring adjustment.
    - Evidence informing base-year company-share estimates: Food revenue divided by revenue excluding Diagnostics and Clinical supplies the explicitly bridged comparable-supplier food-mix proxy.
47. 6546 LC/Q-TOF - Agilent
    - Evidence informing base-year company-share estimates: Markets the xx.xx LC/Q-TOF for food safety alongside authenticity and other uses, supporting application-specific safety attribution rather than counting the complete portfolio.
48. Multi-Vendor Services - Agilent
    - Evidence informing base-year company-share estimates: Establishes a separately marketed multi-vendor service offering; supports excluding service coverage and service revenue from the new-equipment numerator.
49. Waters Corporation - 2025 Annual Report
    - Evidence informing base-year company-share estimates: Reports USD xx.xx of 2025 Waters instrument-system sales separately from chemistry, service and TA sales; provides the hardware-specific numerator anchor.
    - Evidence informing base-year company-share estimates: Reports a broader industrial customer category that cannot be equated with food-safety revenue.
50. Food Contaminant Testing - Waters
    - Evidence informing base-year company-share estimates: Establishes LC/MS and GC/MS food-contaminant equipment participation; does not disclose the assumed food or safety revenue fractions.
51. Analytical Standards & Reagents - Waters
    - Evidence informing base-year company-share estimates: Lists VICAM among Waters brands, supporting the explicit cross-brand nonduplication condition.
52. Shimadzu - Presentation Slides for the Fiscal Year Ended March 31, 2025
    - Evidence informing base-year company-share estimates: Provides the rounded January-March 2025 analytical-segment revenue contribution and recurring-sales context used for calendar conversion.
53. Shimadzu - Third-Quarter Presentation Slides for the Fiscal Year Ending March 2026
    - Evidence informing base-year company-share estimates: Reports April-December 2025 Analytical & Measuring Instruments revenue of JPY xx.xx and recurring-sales ratios; supports the calendar and equipment-oriented revenue bridges.
54. Solutions for Food Safety - Shimadzu Corporation
    - Evidence informing base-year company-share estimates: Maps named LC/MS equipment to food-contaminant applications while warning that local product availability varies; supports bounded application attribution.

55. Federal Reserve - Foreign Exchange Rates, G.5A, January 5, 2026
    - Evidence informing base-year company-share estimates: Provides the 2025 annual average of USD xx.xx per EUR used to translate the modeled equipment numerator.
    - Evidence informing base-year company-share estimates: Provides the 2025 annual average of JPY xx.xx per USD used for the calendar equipment-revenue bridge.
    - Evidence informing base-year company-share estimates: Reports the 2025 annual average of DKK xx.xx per USD, used to convert the modeled DKK xx.xx numerator.
    - Evidence informing base-year company-share estimates: Reports the 2025 annual average of USD xx.xx per EUR, used to convert the modeled EUR xx.xx numerator.
    - Evidence informing base-year company-share estimates: Provides the 2025 annual exchange rate of JPY xx.xx per USD used to translate the modeled Anritsu numerator.
    - Evidence informing base-year company-share estimates: Provides the 2025 annual exchange rate of USD xx.xx per EUR used to translate the modeled Testo numerator.
56. Bruker Corporation - 2025 Annual Report
    - Evidence informing base-year company-share estimates: Reports 2025 BSI CALID revenue of USD xx.xx and BioSpin revenue of USD xx.xx, providing the two reporting envelopes used in the model.
    - Evidence informing base-year company-share estimates: Describes food-microbiology and analytical applications alongside substantial clinical, research and quality-control activity; equipment, food and safety fractions remain modeled.
57. PerkinElmer Announces Financial Results for the Fourth Quarter and Full Year of 2022
    - Evidence informing base-year company-share estimates: Reports USD xx.xx combined Discovery & Analytical Solutions revenue and USD xx.xx continuing revenue for 2022.
    - Evidence informing base-year company-share estimates: Their USD xx.xx rounded difference supplies the historical disposed-business envelope, not a directly observed 2025 food-equipment numerator.
58. Revvity, Inc. - Quarterly Report for the Period Ended July 2, 2023
    - Evidence informing base-year company-share estimates: Records the March xx.xx 2023 sale of Applied, Food and Enterprise Services to the New Mountain-controlled purchaser, including PerkinElmer branding.
    - Evidence informing base-year company-share estimates: Supports separation of the modeled operating business from the former public company's continuing Revvity activities.
59. PerkinElmer - New Mountain Capital
    - Evidence informing base-year company-share estimates: Identifies PerkinElmer as a controlled New Mountain investment dated March 2023.
    - Evidence informing base-year company-share estimates: Describes analytical instruments, consumables and OneSource services, supporting the need for an equipment-only scope adjustment rather than using all operating-business revenue.
60. Food Testing Solutions - PerkinElmer
    - Evidence informing base-year company-share estimates: Markets food-testing instruments for contaminant analysis, establishing the commercial product connection used to scope the historical business envelope.
    - Evidence informing base-year company-share estimates: The portfolio does not disclose the model's equipment, food or safety revenue fractions.
61. A record year for FOSS - FOSS company announcement
    - Evidence informing base-year company-share estimates: FOSS's official company announcement reports DKK xx.xx of 2025 revenue and xx.xx% organic growth.
    - Evidence informing base-year company-share estimates: Provides the broad commercial revenue envelope; the new-equipment, dairy, microbiology and safety fractions are explicitly modeled.
62. Fast and simple bacteria and somatic cell count in one handy instrument - FOSS
    - Evidence informing base-year company-share estimates: Markets BacSomatic for raw-milk bacterial and somatic-cell counting.
    - Evidence informing base-year company-share estimates: Supports separating a bacterial/hygienic equipment role from composition and payment-only applications; does not establish product sales or the modeled family weights.

63. Sartorius achieves considerable profitable growth in 2025 and maintains positive outlook
    - Evidence informing base-year company-share estimates: Reports preliminary 2025 Lab Products & Services sales of EUR xx.xx, down xx.xx% reported and up xx.xx% in constant currencies.
    - Evidence informing base-year company-share estimates: Distinguishes strong consumables/services from subdued instruments, supporting hardware-specific rather than divisional-growth attribution.
64. Instruments - Microbiological Testing - Sartorius
    - Evidence informing base-year company-share estimates: Identifies microbiological sampling and filtration instruments for food, beverage and water laboratories.
    - Evidence informing base-year company-share estimates: Supplies the commercial connection for supporting-hardware attribution, not the assumed customer or product-family revenue shares.
65. Mettler-Toledo International Inc. - 2025 Form 10-K
    - Evidence informing base-year company-share estimates: Reports 2025 product sales of USD xx.xx separately from USD xx.xx of service revenue.
    - Evidence informing base-year company-share estimates: Reports laboratory instruments and related services at approximately xx.xx% of sales and describes inspection and laboratory-measurement offerings used to construct separate non-overlapping modeled components.
66. Mettler-Toledo International Inc. - January 12, 2026 Healthcare Conference Presentation
    - Evidence informing base-year company-share estimates: Provides management's approximate xx.xx% product-inspection and xx.xx% food-manufacturer sales mixes.
    - Evidence informing base-year company-share estimates: These broad mix anchors require modeled hardware, application and safety adjustments and are not final market-share observations.
67. LOMA SYSTEMS - Inspection Technologies Overview
    - Evidence informing base-year company-share estimates: Reports more than xx.xx installed machines across more than xx.xx countries and a business established in the 1960s.
    - Evidence informing base-year company-share estimates: Describes metal-detection, X-ray and weighing offerings; the active-retention adjustment, annual purchase conversion, food mix and equipment values are modeled rather than observed.
68. Lock Inspection - The History - Loma Systems
    - Evidence informing base-year company-share estimates: Identifies Loma as an ITW division and records its 2012 acquisition of Lock Inspection.
    - Evidence informing base-year company-share estimates: Supports including the commercially continuous Lock business within Loma rather than adding a duplicate independent numerator.
69. Anritsu - Financial Results for the Nine Months Ended December 31, 2025
    - Evidence informing base-year company-share estimates: Reports PQA revenue of JPY xx.xx for January-March 2025 and JPY xx.xx, xx.xx and xx.xx for the following quarters. Their rounded-million sum anchors the calendar-2025 bridge.
    - Evidence informing base-year company-share estimates: Identifies mixed PQA products including weighing and inspection equipment; the final food-safety attribution remains modeled.
70. Anritsu Integrated Report 2025 - Financial Statements
    - Evidence informing base-year company-share estimates: Reports PQA product revenue of JPY xx.xx and service revenue of JPY xx.xx for the year ended March xx.xx 2025.
    - Evidence informing base-year company-share estimates: Supports the product/service exclusion ratio used as a calendar-year proxy, not the assumed food or safety percentages.
71. Testo verzeichnet Wachstum von 2,8 Prozent inmitten deutscher Rezession
    - Evidence informing base-year company-share estimates: Reports 2024 group revenue of EUR xx.xx and revenue mix of xx.xx% Instrumentation and xx.xx% Solutions.
    - Evidence informing base-year company-share estimates: Provides the divisional starting values; food and hardware attribution are explicit assumptions rather than reported percentages.

72. Testo blickt auf ein solides Geschäftsjahr 2025 zurück
    - Evidence informing base-year company-share estimates: Reports 2025 Instruments growth of xx.xx%, Saveris growth of xx.xx%, group revenue of EUR xx.xx and Industrial Services revenue of EUR xx.xx.
    - Evidence informing base-year company-share estimates: Updates the calendar-2025 divisional bridge and qualifies extrapolation of earlier Solutions weakness; it does not disclose food-only hardware revenue.
73. Digital Food Safety Management with testo Saveris Food
    - Evidence informing base-year company-share estimates: Describes Saveris Food as a hardware, software and services offering and reports xx.xx active sensors across more than xx.xx environments.
    - Evidence informing base-year company-share estimates: The undated installed-stock observations support commercial scope only; they are not treated as calendar-2025 shipments or annual revenue.
74. Food Thermometers - Testo
    - Evidence informing base-year company-share estimates: Separately markets food thermometers, including testo xx.xx-IR, for professional kitchens, restaurants and supermarkets.
    - Evidence informing base-year company-share estimates: Supports standalone equipment participation without assuming purchase of a software-and-service bundle.

17.2. Market Concentration Analysis, 2025

Control over the commercial relationship is more informative than the number of supplier names. ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ PerkinElmer's analytical business is identified by New Mountain Capital as a controlled investment, requiring separation from assumptions based on the former public-company identity.

Brand relationships can also conceal different business roles without establishing common ownership. ProGnosis Biotech markets Byonoy equipment under a partnership and describes reader supply through its Lateral Logic subsidiary. ■■■■ ■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■ ■■■■■ ■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■ ■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■

[redacted] Buyers comparing Microsep and National Separations should establish their present ownership and contracting relationship before treating them as independent sources. Local brand choice, contracting choice, and ownership diversification are different procurement objectives.

Installed equipment can create application and records dependencies, but original-manufacturer service dependence is not universal. bioMérieux advertises continuing GENE-UP support, whereas Agilent offers maintenance and repair for non-Agilent chromatography and mass-spectrometry instruments. [redacted]

Application acceptance remains a separate control point. [redacted] Conversely, a broader catalog or an additional reseller does not improve bargaining options when the accepted application or enforceable support package remains unmatched.

[redacted] Laboratory buyers should establish the accepted food-safety function, associated software and supplies, and accountable seller before treating these propositions as substitutes for an existing equipment relationship. A focused purchase can preserve suitable assets, but responsibility across retained and newly purchased equipment remains with the parties identified in the actual agreement.

Broad sector portfolios require a different attribution check. [redacted] Those configuration-specific facts remain necessary for a defensible comparison with a single-platform supplier.

Yarok Microbio Ltd. presents a developed microbiological testing system for fresh food, but its company description does not settle a standalone hardware offer, licensing arrangement, or buyer-specific delivery and support undertaking. A prospective customer should obtain the named offering and commercial model before treating the company as an executable equipment-replacement source. [redacted]

■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■

Sources & Evidence

1. GENE-UP - bioMérieux

   · bioMérieux associates GENE-UP with application offerings and advertises instrument maintenance and repairs. These establish a supported application-and-service relationship, not universal exclusive servicing rights.
   ([biomerieux.com](https://www.biomerieux.com/corp/en/our-offer/industry-products/gene-up-automated-pathogen-detection.html))

2. Multi-Vendor Services - Agilent

   · Agilent offers repair, maintenance, and compliance support for non-Agilent chromatography and mass spectrometry instruments. The offering provides a counterforce to universal original-manufacturer service exclusivity; matched contractual coverage remains necessary.
   ([agilent.com](https://www.agilent.com/en/s/maintenance-repair/service-plans/multi-vendor))

3. FGIS Performance Verified Aflatoxin Test Kits

   · FGIS associates named readers and software with specified tests and commodities. Its entries establish bounded application pairings rather than universal hardware acceptance, supporting comparison of complete accepted alternatives.
   ([ams.usda.gov](https://www.ams.usda.gov/sites/default/files/media/FGISApprovedMycotoxinRapidTestKits.pdf))

4. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia

   · The January xx.xx 2025 Malaysian announcement assigns DKSH marketing, sales, distribution, and after-sales functions for Hygiena offerings including ATP cleaning-verification systems. It establishes a documented channel role rather than separate manufacture of those systems.
   ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))

5. Driving Market Expansion for Hygiena’s Diagnostic Solutions in Southeast Asia

   · DKSH's August xx.xx 2025 account describes country- and sector-specific Hygiena appointments, including food-and-beverage coverage in Sumatra rather than throughout Indonesia. Continuing appointment rights remain a transaction-specific verification condition.
   ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/driving-market-expansion-for-hygienas-diagnostic-solutions-in-southeast-asia/))

6. Equipment - ProGnosis Biotech

   · ProGnosis Biotech identifies Lateral Logic as its subsidiary and as the manufacturer of S-FLOW. It separately advertises Byonoy Absorbance xx.xx under a partnership, establishing different relationships between marketer and underlying equipment supplier.
   ([prognosis-biotech.com](https://www.prognosis-biotech.com/equipment/))

7. Lumitester Smart - OPTEX

   · OPTEX identifies Lumitester Smart as co-developed with Kikkoman Biochemifa and explicitly states that OPTEX does not sell it. Co-development therefore does not establish an alternative end-customer seller.
   ([optex.co.jp](https://www.optex.co.jp/products/water-quality-measurement/development/smart.html))

8. About Romer Labs

   · Romer Labs describes its affiliation with dsm-firmenich. That corporate description does not independently establish a transaction-specific transfer or contractual succession.
   ([romerlabs.com](https://www.romerlabs.com/gb_en/about-romer-labs))

9. Analytical Standards & Reagents - Waters

   · Waters identifies VICAM among its brands, supporting separation of brand choice from ownership diversification. ([waters.com](https://www.waters.com/nextgen/en/products/standards-and-reagents.html))

10. Advanced Automation Technologies (AAT) to Rebrand Under New Name - Velaris

· The January xx.xx 2026 Velaris announcement identifies GERSTEL and LCTech within the laboratory-automation platform's acquired company portfolio. Different market-facing names therefore do not establish ownership-diversified sources. ([lctech.de](https://www.lctech.de/hubfs/PR_VelarisGroup_050126%xx.xx%xx.xx%xx.xx.pdf?hsLang=de))

11. LCTech Becomes a Product Line Within the GERSTEL Brand

· GERSTEL's customer notice announces integration of LCTech as a product line. It states that LCTech GmbH will remain the legal entity and that the product portfolio, contacts, service, support, ordering processes, and business relationships will remain unchanged. These are announced continuity commitments, not proof of each customer's contractual performance. ([lctech.de](https://www.lctech.de/hubfs/LCTech-and-GERSTEL.pdf?hsLang=en))

12. Novonesis Annual Report 2024

· Novonesis' annual report records completion of the Novozymes-Chr. Hansen statutory merger on January xx.xx 2024, supporting successor-sensitive treatment of CHR Hansen. ([backend.novonesis.com](https://backend.novonesis.com/sites/default/files/document/2025-xx.xx/Novonesis_Annual_Report_2024.pdf))

13. Incubators and Readers - Novonesis

· Novonesis advertises milk-testing incubators and readers and describes their connection with the MilkSafe records environment. This establishes successor-group equipment context, not an independent contemporary CHR Hansen supplier. ([novonesis.com](https://www.novonesis.com/en/biosolutions/food-and-beverages/dairy/milk/more-inputs/incubators-and-readers))

14. PerkinElmer - New Mountain Capital

· New Mountain Capital identifies PerkinElmer as a current controlled private-equity investment and describes its analytical-instrument and laboratory-services business. This supports distinguishing the operating business from assumptions based on its former public-company identity. ([newmountaincapital.com](https://www.newmountaincapital.com/portfolio/perkinelmer/))

15. IUL OEM

· IUL advertises an OEM business helping other companies obtain instruments. The offering establishes a commercial inquiry route, not a particular customer's branding rights, territory, supply agreement, or warranty undertaking. ([iul-instruments.com](https://iul-instruments.com/iul-oem/))

16. Products - SY-LAB

· SY-LAB's instrument catalog lists BacTrac xx.xx and BioTrac xx.xx within Electric Microbiology. The catalog establishes named advertised instruments, not a buyer's application acceptance or destination-specific supply commitment. ([microbiology.sylab.com](https://microbiology.sylab.com/products/p/list/Product/category/mikro-category.html))

17. Food & Nutrition - Copan

· Copan's Food & Nutrition portfolio identifies CYCLONE as an automated microbiological quality-control offering. This establishes a food-linked equipment proposition without proving suitability for every food-safety deliverable. ([copangroup.com](https://www.copangroup.com/industrial-world/food-nutrition/))

18. Food, Agricultural & Environmental - Labindia Instruments

· Labindia Instruments' Food, Agricultural & Environmental catalog combines Labindia-branded LABORAM analyzers with named third-party instruments, including Agilent Cary equipment. Catalog breadth does not independently establish manufacture of every item or a matched food-safety configuration. ([labindiainstruments.com](https://www.labindiainstruments.com/application-and-industry-details/xx.xx/food-agricultural-environmental))

19. Food and Beverage Testing Solutions - Molecular Devices

· Molecular Devices' Food & Beverage page addresses quality, authenticity, and safety together. That page supports broad application positioning, not a particular food-safety instrument configuration or its purchasing and support terms. ([moleculardevices.com](https://www.moleculardevices.com/applications/food-and-beverage))

20. Company - Yarok Microbio
    - Yarok Microbio Ltd.'s company description states that it developed a microbiological testing system for fresh food. That description does not settle a standalone hardware offer, licensing arrangement, or buyer-specific delivery and support undertaking. ([yaroktt.com](https://www.yaroktt.com/company))

17.3. Recent Developments & Impact Analysis, 2025

Distribution developments changed the commercial route more directly than the underlying equipment alternatives. ■■■ ■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■ ■■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■ ■■ ■ ■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■ ■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ Continuing appointment rights still require confirmation.

Luminultra's September xx.xx 2025 announcement of a North American Kikkoman Biochemifa distribution agreement similarly added a commercial route for hygiene-monitoring and colony-counting offerings. ■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■ ■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ The agreement's purchasing significance depends on those local undertakings, not on an assumed technology-replacement advantage.

■■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■■ This supports continued certificate coverage within the named systems and application scope; it is not a new instrument launch or blanket approval of every food-microbiology use. Laboratories considering confirmation equipment should use the applicable certificate and accepted deliverable as shortlist conditions while treating destination-specific supply and support separately.

Ownership announcements must not be converted into completed competitive consolidation. On February xx.xx 2026, dsm-firmenich announced an agreement to divest Animal Nutrition & Health to CVC, with completion expected at the end of 2026 subject to conditions. ■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■ ■■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■■

Sources & Evidence

1. MicroVal Certificate of Compliance 2017LR75 - MALDI Biotyper Listeria Confirmation
   · The certificate records renewal on January xx.xx 2026; it does not establish a new product launch or universal food-microbiology approval. ([assets.eu.bettyblocks.com](https://assets.eu.bettyblocks.com/eu-central-xx.xx-2e826c3765f4401c84671a06de961fc7/7ec88453307c4ce7af6f9258f9645792/xx.xx/2017LR75_-_MALDI_Biotyper_Listeria_Mono_and_spp._renewal__2026_-_2030_.pdf))
2. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia
   · The dated announcement establishes the Malaysian commercial-route change, not indefinite appointment rights or buyer-specific fulfillment. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))
3. Driving Market Expansion for Hygiena's Diagnostic Solutions in Southeast Asia
   · The dated account qualifies regional generalization of the Malaysian partnership. ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/driving-market-expansion-for-hygienas-diagnostic-solutions-in-southeast-asia/))
4. About Romer Labs
   · The stated affiliation does not establish transaction-specific closing or contract succession. ([romerlabs.com](https://www.romerlabs.com/gb_en/about-romer-labs))
5. Luminultra and Kikkoman Partnership: Food Safety Testing
   · Luminultra announced a North American Kikkoman distribution agreement on September xx.xx 2025, covering hygiene-monitoring and colony-counting offerings. ([luminultra.com](https://www.luminultra.com/resource/luminultra-kikkoman-partnership/))
6. dsm-firmenich Announces Agreement to Divest Animal Nutrition & Health to CVC Capital Partners
   · The February xx.xx 2026 announcement describes an agreed Animal Nutrition & Health divestment to CVC, expected to complete at the end of 2026 subject to conditions; it is not closing evidence. ([dsm-firmenich.com](https://www.dsm-firmenich.com/content/dam/dsm-firmenich/corporate/documents/our-company/news/press-releases/2026/xx.xx/press-release-dsm-firmenich-announcement-divestment-anh-xx.xx.pdf))

17.4. Product Portfolio Analysis, 2025

Food Safety Testing Equipment competition is organized around different purchasing requirements, not interchangeable supplier catalogs. ■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ A laboratory seeking procurement consolidation should compare the actual equipment package rather than attribute every supplier's food-quality and authenticity business to safety testing.

■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■

RESEARCH SAMPLE REPORT

[illegible] These suppliers expand the available analytical approaches, but a shared food-sector label does not make pesticide, elemental-contaminant, and preventive-condition instruments substitutes. Lumex Instruments' RA-xx.xx Lab provides a dedicated mercury-analysis proposition that should be compared against a defined mercury requirement rather than an entire multipurpose laboratory platform.

[illegible] Buyers should establish whether the acquisition must deliver detection, identification, confirmation, or characterization before comparing platforms. Purchasing an additional identification capability need not require replacing an otherwise suitable detection system.

Supporting molecular equipment is a separate investment category. [illegible] The buyer must allocate responsibility for the complete equipment relationship and accepted application, particularly when preparation and detection are sourced separately.

Reader competition combines specialist test families, software relationships, and differing automation levels. [illegible] These offerings create different procurement options, but platform availability alone does not establish an accepted pairing for a particular commodity or customer.

Dairy buyers face distinct measurement and residue-screening choices. [illegible] Raw-milk bacterial information and

antibiotic-residue evidence support different intake decisions; neither should be purchased on the assumption that it replaces the other.

■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ These are application-specific alternatives to investigate, not an established performance hierarchy. A seafood business should identify the accepted substance-and-matrix deliverable before deciding between dedicated onsite equipment and a broader laboratory relationship.

Supporting microbiology portfolios permit selective investment. ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■■ Laboratories can therefore investigate renewal of a specific supporting function without assuming a complete analyzer replacement, provided retained equipment remains suitable.

■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■■■■ Anton Paar's Multiwave portfolio supplies another analytical-preparation role. Flexible automation can preserve downstream equipment choice, but it also leaves the buyer to resolve responsibility across instruments, software, associated supplies, and service providers.

■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ Detectores Brasil and Atabey Teknik describe food-related metal-detection manufacturing propositions. The commercial comparison should concern the proposed installation, integration accountability, records, and continuing support; the existence of several catalogs does not establish that every system fits the same production-line requirement.

Hygiene verification and preventive monitoring should not be combined into one substitution pool. Hygiena markets EnSURE Touch with optional connected analysis; Kikkoman Biochemifa

Company's Lumitester Smart is a co-developed hygiene instrument; and Tianlong markets Biolum for food-processing and catering settings. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪

8. Food Safety Contract Lab Solutions - Neogen
   · Neogen markets its Molecular Detection System within a food-testing contract-laboratory proposition. ([engage.neogen.com](https://engage.neogen.com/contract-labs-en-usac/))
9. 6546 LC/Q-TOF - Agilent
   · Agilent markets xx.xx LC/Q-TOF for food-safety screening and associated contaminant applications, supporting a bounded analytical comparison. ([agilent.com](https://www.agilent.com/en/product/liquid-chromatography-mass-spectrometry-lc-ms/lc-ms-instruments/quadrupole-time-of-flight-lc-ms/xx.xx-lc-q-tof))
10. MALDI Biotyper for Food Microbiology - Bruker
    · Bruker markets MALDI Biotyper for food-microbiology identification and confirmation, supporting a deliverable-specific comparison. ([bruker.com](https://www.bruker.com/en/applications/microbiology-and-diagnostics/food-beverage-microbiology/maldi-biotyper-for-food-microbiology.html))
11. FGIS Performance Verified Aflatoxin Test Kits
    · FGIS lists reader-associated applications from Charm, EnviroLogix, Romer, R-Biopharm, ProGnosis, and VICAM. ([ams.usda.gov](https://www.ams.usda.gov/sites/default/files/media/FGISApprovedMycotoxinRapidTestKits.pdf))
12. BacSomatic - FOSS
    · FOSS markets BacSomatic for bacterial and somatic-cell information in raw-milk hygienic-quality assessment. ([fossanalytics.com](https://www.fossanalytics.com/en/products/bacsomatic))
13. Advanced Microbiological Testing Solutions for Contamination Control and Product Quality - Sartorius
    · Sartorius markets sampling and filtration instruments for food, beverage, and water microbiology laboratories. ([sartorius.com](https://www.sartorius.com/en/products/microbiological-testing/instruments))
14. Mix and Match Your Ideal Combination Inspection System
    · METTLER TOLEDO markets standalone and combination inspection systems, supporting a package-accountability comparison rather than automatic end-to-end responsibility. ([mt.com](https://www.mt.com/us/en/home/library/product-brochures/product-inspection/PI/Combinations_Brochure.html))
15. Professional Foodcare Portable pH Meter - HI98161
    · Hanna markets HI98161 as a Foodcare pH instrument with stored records and computer transfer. ([hannainst.com](https://hannainst.com/hi98161-portable-foodcare-ph-meter.html))
16. The FREESTYLE Robotic System - LCTech
    · LCTech markets FREESTYLE preparation automation for food-contaminant applications; downstream equipment replacement is not established by that offering. ([lctech.de](https://www.lctech.de/en/products/robotic-systems))
17. BIOFISH 3000 HIS - BIOLAN
    · BIOLAN markets BIOFISH for fish histamine, a dedicated target-and-matrix proposition. ([biolanmb.com](https://biolanmb.com/en/biofish-xx.xx-his/))
18. Food Contaminant Testing - Waters
    · Waters presents Xevo and APGC equipment within its food-contaminant testing proposition. ([waters.com](https://www.waters.com/nextgen/us/en/c/promo/food-contaminant-testing-reliable-lc-ms-ms-gc-ms-ms.html))
19. Solutions for Food Safety - Shimadzu
    · Shimadzu links named LCMS instruments with pesticide, veterinary-drug, toxin, and other food-safety applications. ([shimadzu.com](https://www.shimadzu.com/an/news-events/campaign/xx.xx/solutions_for_food_safety.html))
20. Food Testing Solutions - SCIEX
    · SCIEX markets mass-spectrometry systems, associated software, and services for food-contaminant and residue analysis. ([sciex.com](https://sciex.com/landing-pages/food-testing-solutions))

21. Food Testing Solutions - PerkinElmer
    - PerkinElmer markets elemental, GC, and LC/MS/MS offerings for food testing, including contaminant applications alongside quality uses. ([contact.perkinelmer.com](https://contact.perkinelmer.com/food-testing-solutions-landing-page))
22. Determination of Pesticides in Tomato by GCxGC-TOFMS - LECO
    - LECO associates Pegasus BT equipment with pesticide analysis in tomatoes; the source supports application participation, not comparative superiority. ([leco.com](https://www.leco.com/documents/xx.xx-xx.xx-xx.xx/))
23. Pesticides - JEOL Ltd.
    - JEOL presents JMS-TQ4000GC UltraQuad TQ for residual-pesticide analysis in food. ([jeol.com](https://www.jeol.com/solutions/environment/pesticides.php))
24. Gas Chromatograph Mass Spectrometer - Jiangsu Skyray Instrument
    - Jiangsu Skyray's GC-MS xx.xx catalog identifies food-safety and pesticide-residue applications. ([en.skyray-instrument.com](https://en.skyray-instrument.com/product/detail/xx.xx/xx.xx))
25. Food & Agriculture - Analytik Jena
    - Analytik Jena's food-and-agriculture portfolio includes elemental-analysis instruments and other laboratory equipment. ([analytik-jena.us](https://www.analytik-jena.us/industries-solutions/industries/food-agriculture/))
26. Food Analysis - Hitachi High-Tech Analytical Science
    - Hitachi High-Tech Analytical Science positions XRF equipment for food-contaminant analysis alongside quality applications. ([hha.hitachi-hightech.com](https://hha.hitachi-hightech.com/en/product-range/applications/food))
27. Food & Beverages - Elico
    - Elico's food-and-beverage offering identifies analytical equipment and contaminant or adulteration applications. ([elico.co](https://www.elico.co/food-beverages))
28. Food and Beverage - Metrohm
    - Metrohm offers analytical equipment to food-and-beverage laboratories and expressly addresses contaminants. ([metrohm.com](https://www.metrohm.com/en/industries/food-and-beverage.html))
29. RA-915 Lab - Lumex Instruments
    - Lumex markets RA-xx.xx Lab as dedicated mercury-analysis equipment with food applications. ([lumexinstruments.com](https://www.lumexinstruments.com/catalog/atomic-absorption-spectrometry/ra_915_lab.php))
30. ICGENE Mini - Enbiotech
    - Enbiotech markets ICGENE Mini and identifies food applications. ([enbiotech.eu](https://www.enbiotech.eu/eng/prodotti/icgene-mini/))
31. XDive Instrument - Star Array Pte. Ltd.
    - Star Array markets XDive, identifies food-safety applications, and presents an OEM proposition. ([star-array.com](https://www.star-array.com/xdive))
32. Products - Biolog
    - Biolog markets Odin and ID Station for identification and characterization and identifies food-and-beverage users. ([biolog.com](https://www.biolog.com/products/))
33. Food Testing - Promega
    - Promega's food-testing portfolio connects Maxwell equipment with food-related laboratory applications. ([promega.com](https://www.promega.com/applications/applied-sciences/food-testing/))
34. Food Safety - TANBead Application & Support
    - TANBead identifies Taiwan Advanced Nanotech and markets automated extraction instruments for food-safety applications. ([tanbead.com](https://www.tanbead.com/en/application/project/page/FoodSafety))
35. Food Safety Product List - Anatolia Geneworks
    - Anatolia Geneworks' food-safety catalog lists UNIO M32 extraction equipment. ([anatoliageneworks.com](https://www.anatoliageneworks.com/wp-content/uploads/2025/xx.xx/Food-Safety-Product-List-2025_v6.pdf))

36. Equipment - ProGnosis Biotech
    - ProGnosis markets Byonoy Absorbance xx.xx under a partnership and describes reader supply through Lateral Logic. ([prognosis-biotech.com](https://www.prognosis-biotech.com/equipment/))
37. About Gold Standard Diagnostics
    - Gold Standard Diagnostics identifies food-related diagnostics and commercially lists automated assay analyzers and other instruments. ([goldstandarddiagnostics.com](https://www.goldstandarddiagnostics.com/about-us.html))
38. Portable Food Safety Reader - Kwinbon
    - Beijing Kwinbon markets a Portable Food Safety Reader under its own equipment catalog. ([kwinbonbio.com](https://www.kwinbonbio.com/elisa-microplate-reader-product/))
39. 手持金标检测仪 - 山东海曼科学仪器有限公司
    - The company-branded catalog advertises LD-JD01 and identifies 山东海曼科学仪器有限公司; manufacturing attribution is not established. ([anyuyq.com](https://www.anyuyq.com/sycl/xx.xx.html))
40. Feyond-S400 - Allsheng
    - Allsheng's Feyond-S400 commercial page includes food safety among its applications. ([allsheng.com](https://www.allsheng.com/products-details-xx.xx))
41. Bioeasy ReadEasy - Bentley Instruments
    - Bentley presents bacterial-counting equipment in its portfolio and separately markets Bioeasy ReadEasy. ([bentleyinstruments.eu](https://www.bentleyinstruments.eu/en-bioeasy-readeasy/))
42. SNAPshot DSR Reader - IDEXX
    - IDEXX markets SNAPshot DSR Reader within its dairy-test and records ecosystem and provides an ordering route. ([idexx.com](https://www.idexx.com/en/milk/dairy-tests/accessories/snapshot-dsr-reader/))
43. Delvotest - dsm-firmenich
    - dsm-firmenich's Delvotest portfolio includes associated reading and automation equipment for dairy antibiotic-residue testing. ([dsm-firmenich.com](https://www.dsm-firmenich.com/en/businesses/taste-texture-health/markets-products/dairy/fresh-dairy-non-fermented/delvotest.html))
44. Drug Residue & Contamination Testing for Food Diagnostics - Unisensor
    - Unisensor identifies its own food-diagnostics portfolio for antibiotic residues, mycotoxins, and other contamination concerns. ([unisensor.be](https://unisensor.be/en/))
45. Fish & Seafood - BioSystems
    - BioSystems markets Y15 for fish-and-seafood analysis, including histamine and sulfites. ([biosystems.global](https://biosystems.global/service/food-beverage-analysis/food-beberage-analysis-fish-seafood))
46. AAA 500 - INGOS s.r.o.
    - INGOS markets AAA xx.xx for applications including biogenic amines and food/feed control. ([ingos.cz](https://www.ingos.cz/aaa500-xx.xx))
47. Company - IUL
    - IUL describes microbiology automation and an explicit OEM business. ([iul-instruments.com](https://iul-instruments.com/company/))
48. About Seward
    - Seward identifies its Stomacher laboratory-blender business and food-microbiology applications. ([seward.co.uk](https://www.seward.co.uk/about-seward/))
49. Food & Beverage Safety Portfolio - Merck
    - Merck KGaA's portfolio includes preparation, filtration, and environmental-monitoring instruments for food-and-beverage safety laboratories. ([merckmillipore.com](https://www.merckmillipore.com/deepweb/assets/sigmaaldrich/marketing/global/documents/xx.xx/xx.xx/food-and-beverage-safety-br13419en-mk.pdf))

50. Food Industry - Alliance Bio Expertise
    - Alliance Bio Expertise markets named preparation and sampling equipment to food-industry laboratories. ([alliance-bio-expertise.com](https://www.alliance-bio-expertise.com/en/food-industry/))
51. Synbiosis - Synoptics
    - Synoptics presents Synbiosis colony-counting equipment and food-testing customer context. ([synoptics.co.uk](https://www.synoptics.co.uk/synbiosis/))
52. 50 Years of Culturing Innovation - Don Whitley Scientific
    - Don Whitley Scientific describes microbiology automation offerings serving food and water laboratories. ([dwscientific.com](https://www.dwscientific.com/blog/xx.xx-years-culturing-innovation))
53. About Axel Semrau
    - Axel Semrau presents CHRONECT automation and food-contaminant application categories. ([axelsemrau.de](https://www.axelsemrau.de/en/the-company/about-axel-semrau))
54. Automated Liquid-Liquid Extraction Systems - Aurora Biomed
    - Aurora Biomed markets VERSA preparation equipment with food-related applications. ([aurorabiomed.com](https://www.aurorabiomed.com/automated-liquid-liquid-extraction-lle-systems/))
55. Applied Markets - Food - Tecan
    - Tecan markets automation for food-related applied markets; a buyer-specific configuration remains a separate commercial requirement. ([lifesciences.tecan.com](https://lifesciences.tecan.com/applications_and_solutions/applied_markets?p=Food))
56. Analytical Chemistry - Hamilton Company
    - Hamilton's analytical-chemistry automation proposition includes food safety, without establishing every buyer's configured package. ([hamiltoncompany.com](https://www.hamiltoncompany.com/applications/analytical-chemistry))
57. Multiwave - Anton Paar
    - Anton Paar markets Multiwave analytical-preparation equipment with food-related application categories. ([anton-paar.com](https://www.anton-paar.com/corp-en/products/details/multiwave/))
58. Dymond - Minebea Intec
    - Minebea Intec markets Dymond X-ray inspection equipment for packaged-food foreign-object inspection. ([minebea-intec.com](https://www.minebea-intec.com/en/inspection-solutions/sideshooters-x-ray/x-ray-inspection-system-dymond))
59. X-Ray Inspection - Loma Systems
    - Loma markets X5 food X-ray inspection systems. ([loma.com](https://www.loma.com/en-US/Products/X-Ray-Inspection))
60. X-Ray Inspection Systems for Food & Pharmaceutical Products - Anritsu
    - Anritsu markets X-ray inspection equipment for food and pharmaceutical products. ([anritsu.com](https://www.anritsu.com/en-us/product-inspection/products/x-ray-inspection-systems/))
61. X-Ray Inspection Systems - Ishida
    - Ishida markets IX-series food X-ray inspection systems. ([ishida.com](https://www.ishida.com/ww/en/products/inspection/xray/))
62. MEKI Compact Food X-Ray Inspection System - Mekitec
    - Mekitec markets MEKI food X-ray inspection equipment. ([mekitec.com](https://mekitec.com/solutions/meki))
63. Interceptor Metal Detector - Fortress Technology
    - Fortress markets Interceptor metal detection for food applications. ([fortresstechnology.com](https://fortresstechnology.com/solutions/interceptor-metal-detector/))
64. AD-4976 Metal Detector - A&D
    - A&D markets AD-xx.xx metal-detection equipment; the page establishes hardware rather than a buyer-specific installation undertaking. ([aandd.jp](https://www.aandd.jp/products/inspection_systems/metaldetector/ad4976.html))

65. Quem Somos - Detectores Brasil
    - Detectores Brasil describes manufacturing metal-detection equipment for food and other sectors. ([detectoresbrasil.com.br](https://detectoresbrasil.com.br/quem-somos/))
66. Hakkımızda - Atabey Teknik
    - Atabey Teknik describes a food metal-detector manufacturing proposition; this does not resolve every similarly named legal entity. ([atabeyteknik.com](https://atabeyteknik.com/hakkimizda/))
67. Lumitester Smart - OPTEX
    - OPTEX identifies Lumitester Smart as co-developed with Kikkoman Biochemifa. ([optex.co.jp](https://www.optex.co.jp/products/water-quality-measurement/development/smart.html))
68. Biolum Handheld ATP Instrument - Tianlong
    - Tianlong markets Biolum hygiene-monitoring equipment for food-processing and catering applications. ([medtl.com](https://www.medtl.com/products/instruments/other/xx.xx.html))
69. N-Light ATP - NEMIS Technologies
    - NEMIS presents a luminometer-associated food-industry environmental-monitoring platform. ([nemistech.com](https://www.nemistech.com/products/atp-test/))
70. Equipment - Promicol
    - Promicol markets PROMILITE equipment for its microbial ATP product-screening portfolio, supporting distinction from handheld cleaning verification. ([promicol.com](https://www.promicol.com/equipment/))
71. Food Processing - ThermoWorks
    - ThermoWorks markets professional food-processing temperature instruments, including records-oriented equipment. ([thermoworks.com](https://www.thermoworks.com/collections/food-processing))
72. Company Overview - DeltaTrak
    - DeltaTrak describes portable temperature instruments, data loggers, and monitoring systems serving food and food safety. ([deltatrak.com](https://deltatrak.com/about-us/company-overview/))
73. HACCP - ATAGO
    - ATAGO markets measurement instruments, including pH categories, for HACCP-related food hygiene management. ([atago.net](https://www.atago.net/en/haccp.php))
74. Indústria Alimentícia - AKSO
    - AKSO's food-industry catalog includes pH and related measurement equipment; safety attribution remains application-specific. ([akso.com.br](https://akso.com.br/industria-alimenticia/))
75. About - Addium Inc.
    - Addium identifies its AQUALAB business and food-safety role, supporting water-activity procurement context without establishing an individual model offer. ([addium.io](https://addium.io/company/about))
76. Use Cases - ColiMinder
    - ColiMinder identifies beverage production among its microbial water-monitoring applications; this is supplier-reported application context. ([coliminder.com](https://www.coliminder.com/use-cases/))
77. Bottled Water & Fruit Juice - Diamidex
    - Diamidex markets microbial monitoring to bottled-water and fruit-juice producers. ([diamidex.com](https://diamidex.com/applications/bottled-water-fruit-juice))

17.5. Benchmarking Analysis, 2025

Benchmarking should begin with the accepted deliverable and then compare the complete commercial package. [redacted]

[redacted] A supplier's broader marketed capability is not proof that every proposed use is covered.

[redacted] This is not evidence that Bio-Rad has exited food-safety equipment, but it makes the continuing compatible application menu a purchasing question rather than an assumption based on historical CFX food-testing materials. Buyers considering retention or replacement should obtain a product-specific continuity undertaking instead of generalizing either continued supply or discontinuation across the portfolio.

Connected-equipment benchmarking should distinguish records requirements from a compulsory software replacement. Hygiena describes advanced EnSURE Touch analysis as optional; Testo's Saveris Food offering combines equipment, software, and services; and Hanna's HI98161 provides a more limited computer-transfer proposition. [redacted]

Challenger comparisons require an executable business model as well as a marketed instrument. [redacted] These companies should be compared against the actual acquisition or external-fulfillment decision, not placed in an assumed hardware league table.

Broad molecular participation does not resolve a food-specific configuration. HiMedia Laboratories, Bioer Technology, GeneReach Biotechnology Corp., and OptiGene connect their businesses or instrument portfolios with food applications, but the presently offered food-specific package, associated application rights, and local support must be confirmed. [redacted]

[redacted]

[illegible] For Milestone, a contemporary DMA-xx.xx offer and support undertaking must be distinguished from historical customer references. These are configuration and commercial-continuity questions, not evidence that the accepted analytical categories are outside the market.

[illegible] FoodChek Systems Inc. and Bioavlee S.A. require current operating-supplier and marketed-equipment confirmation. A buyer should not rely on historical development activity as a replacement source, nor infer liquidation or nonparticipation from unresolved continuity.

Several specialist distinctions remain commercially consequential. [illegible] These unresolved facts limit substitution conclusions without changing the study's inclusion of dairy-related safety measurement, water applications, or production-line inspection.

Similar names must not substitute for an entity relationship. [illegible] Buyers and partners should obtain the named manufacturer, contracting seller, territorial authority, and support undertaking before treating these routes as either diversified sourcing or a unified regional relationship.

Latin American comparisons need to distinguish equipment sales, represented products, and aftermarket work. RELES S.R.[illegible]

[illegible] LabX Supplies FZCO requires separation of qualifying hardware from general equipment and supplies. These gaps prevent treating general scientific-supply presence as equivalent food-safety fulfillment.

African supplier comparison is also uneven at the executable-offer level. Katchey Company Limited, Precur Chem Technologies Limited, Medics & Procurement, Archiepollo Solutions Limited, and Chemoquip require the named offered instrument, continuing appointment where applicable, and destination-specific support commitment. [illegible] Moris Entreprises, Safetyaro, and Biolegend Scientific Ltd require identifiable food-safety hardware, the responsible manufacturer or supplier, and current fulfillment terms; broad water, hygiene, or dairy relevance does not settle those facts. These distinctions matter before consolidating purchases through a local supplier or treating several local catalogs as independent equipment alternatives.

Asia-Pacific channel breadth also needs package-level qualification. [illegible]

[redacted]

These are commercial verification gates, not evidence of lower competitive significance.

Sources & Evidence

1. Digital Food Safety Management with testo Saveris Food
   · The bundle establishes a broader records-and-support relationship than an isolated measurement instrument. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
2. EnSURE Touch ATP Luminometer for Hygiene Monitoring
   · Optional analysis is counterevidence to mandatory platform-wide software replacement; specific software rights and obligations still require confirmation. ([hygiena.com](https://www.hygiena.com/hygiene-monitoring/atp-cleaning-verification/ensure-touch/hygiena-ensure-touch))
3. MicroVal Certificate of Compliance 2017LR75 - MALDI Biotyper Listeria Confirmation
   · MicroVal's certificate names specified MALDI Biotyper systems for Listeria confirmation, supporting bounded application benchmarking. ([assets.eu.bettyblocks.com](https://assets.eu.bettyblocks.com/eu-central-xx.xx-2e826c3765f4401c84671a06de961fc7/7ec88453307c4ce7af6f9258f9645792/xx.xx/2017LR75_-_MALDI_Biotyper_Listeria_Mono_and_spp._renewal__2026_-_2030_.pdf))
4. FGIS Performance Verified Aflatoxin Test Kits
   · Named equipment pairings provide a bounded acceptance benchmark rather than approval of every marketed application. ([ams.usda.gov](https://www.ams.usda.gov/sites/default/files/media/FGISApprovedMycotoxinRapidTestKits.pdf))
5. Professional Foodcare Portable pH Meter - HI98161
   · The computer-transfer proposition is narrower than a complete centralized monitoring-and-records service. ([hannainst.com](https://hannainst.com/hi98161-portable-foodcare-ph-meter.html))
6. BIOFISH 3000 HIS - BIOLAN
   · The product description lists fish sauce as an application while excluding it from the stated AOAC certification coverage. ([biolanmb.com](https://biolanmb.com/en/biofish-xx.xx-his/))
7. Bioeasy ReadEasy - Bentley Instruments
   · The ReadEasy offering establishes a Bioeasy-branded relationship, not the precise legal linkage or ownership of similarly named captured companies. ([bentleyinstruments.eu](https://www.bentleyinstruments.eu/en-bioeasy-readeasy/))
8. iQ-Check Listeria monocytogenes II PCR Detection Kit - Bio-Rad
   · Bio-Rad's inspected iQ-Check Listeria monocytogenes II page marks that particular kit discontinued; it does not establish a company-wide exit. ([bio-rad.com](https://www.bio-rad.com/en-us/product/iq-check-listeria-monocytogenes-ii-pcr-detection-kit?ID=b5eaf877-xx.xx-481f-b1bd-c0bc4384b760))
9. SpectacularOne - Spectacular Labs
   · Spectacular Labs advertises SpectacularOne for onsite pathogen testing and provides a demonstration route; that does not independently establish shipments or acceptance. ([spectacularlabs.ca](https://www.spectacularlabs.ca/product/spectacular-one))
10. Inside Ancera's Labs
    · Ancera's November xx.xx 2024 account describes PIPER within its own poultry-focused operations; standalone sale, lease, or service-only fulfillment is not settled. ([ancera.com](https://www.ancera.com/post/inside-anceras-labs))

11. Molecular Biology - HiMedia Laboratories
    - HiMedia identifies molecular instruments and food/water applications at business-portfolio level, without settling the exact food-specific acquisition package. ([himedialabs.com](https://www.himedialabs.com/us/molecular-biology.html))
12. Digital PCR Instrument Brochure - Bioer Technology
    - Bioer's instrument brochure identifies food safety among business applications, supporting a configuration-verification need rather than universal food-package equivalence. ([en.bioer.com](https://en.bioer.com/uploadfiles/2025/xx.xx/xx.xx.pdf))
13. About GeneReach Biotechnology
    - GeneReach describes developing, manufacturing, and marketing equipment and reagents across multiple industries including food; the exact current food configuration remains separate. ([genereach.com](https://genereach.com/index.php?func=about))
14. About OptiGene
    - OptiGene identifies food safety, Genie instruments, and OEM variants, without establishing every current food-specific purchasing configuration. ([optigene.co.uk](https://www.optigene.co.uk/about/))
15. Genesystem Has Obtained AOAC Certification for Its Salmonella Assay
    - Genesystem's dated announcement links its Salmonella application to GENECHECKER UF-xx.xx; it is not a continuing-availability undertaking. ([genesystem.co.kr](https://genesystem.co.kr/en/board/news/read/xx.xx))
16. About CEM
    - CEM describes food-analysis and analytical-preparation businesses; the company overview does not settle a named food-contaminant package. ([cem.com](https://cem.com/en/company))
17. Food/Feed and Beverages Applications - KNAUER
    - KNAUER identifies food/feed chromatography and mycotoxin applications; application positioning does not establish a single executable equipment configuration. ([knauer.net](https://www.knauer.net/food-feed-beverages))
18. Food & Beverage - HORIBA
    - HORIBA's food-and-beverage portfolio includes spectroscopic and contaminant-related applications; a named buyer-specific safety configuration requires confirmation. ([horiba.com](https://www.horiba.com/sgp/life-science/applications/food-beverage/))
19. INSPECTO - Project Fact Sheet - European Commission CORDIS
    - CORDIS identifies Inspecto Solutions Ltd as coordinator of a closed historical food-contaminant equipment project; current supply or closure is not established. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx))
20. Bac-Tracker - Project Fact Sheet - European Commission CORDIS
    - CORDIS identifies BactuSense as coordinator of the historical Bac-Tracker project; the record does not establish contemporary equipment supply or company closure. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx))
21. Institutions - Ipanema Consortium
    - The consortium identifies Diagenetix and BioRanger; this institutional reference does not settle present operations or contemporary purchasing availability. ([ipanema2020.com](https://ipanema2020.com/consortium/))
22. Hygiene ATP Testing Meter - Bioeasy International
    - The Malaysian commercial listing does not resolve the legal relationship between the captured Bioeasy identities. ([bioeasy.my](https://www.bioeasy.my/hygiene-atp-testing-meter/))
23. Equipment and Technical Service - RELES S.R.L.
    - RELES advertises technical support for named Neogen instruments; this does not establish equipment sales for every supported model. ([reles.com.pe](https://www.reles.com.pe/opc))
24. Luminómetro Clean Trace LM1 - Mavar
    - Mavar lists LM1 with legacy 3M branding, leaving the present manufacturer-channel relationship unresolved. ([mavar.com.uy](https://mavar.com.uy/producto/luminometro-3m-clean-trace-instrument-lm1/))

25. About Kormay Biomedicals
    - Kormay identifies a Canadian laboratory-supply business serving food production, but its company page does not establish the named hardware needed for a matched comparison. ([kormay.ca](https://www.kormay.ca/pages/about-kormay-biomedicals))
26. Mycotoxin Readers - Agrobiotek Internacional
    - Agrobiotek maintains a mycotoxin-reader category, but the rendered category does not settle a specific currently offered reader and appointment. ([agrobiotek.com](https://www.agrobiotek.com/productos/lectores-micotoxinas))
27. Sobre Nosotros - ITS Technologies
    - ITS Technologies describes instrumentation and support activities; a named current food-safety equipment relationship remains necessary. ([itstecno.com](https://www.itstecno.com/sobre-nosotros/))
28. Quienes Somos - Rilab
    - Rilab describes represented brands and technical support for analytical and food-related users; the company page does not settle a named matched hardware offer. ([rilab.cl](https://rilab.cl/quienes-somos/))
29. Food Testing Equipment in Kuwait - Burgan Equipment Co.
    - Burgan markets food-testing and hygiene categories in Kuwait; the page does not establish every named configuration and appointment. ([burganequipment.com](https://burganequipment.com/food-testing-kuwait/))
30. Merck Food Safety Testing - Gulf Scientific Corporation
    - Gulf Scientific promotes Merck food-testing packages; the historical offering does not settle current model-specific appointment and fulfillment. ([gulf-scientific.com](https://gulf-scientific.com/news-events/merck-food-safety-testing-solutions-in-the-era-of-covid-xx.xx/))
31. Our Partners - Modern Scientific Supplies
    - Modern Scientific Supplies lists food-related analytical and monitoring partners; the partner list does not settle a complete local equipment bid. ([mss-jo.com](https://www.mss-jo.com/our-partners))
32. Food Safety - elwan LABTECH Supply
    - elwan LABTECH presents ATP and food-microbiology categories, requiring a named hardware and local undertaking for matched comparison. ([labtech.ps](https://www.labtech.ps/products/category/food-safety/))
33. Syria Distributor - Pharma Test
    - Pharma Test identifies VART as its Syrian distributor; this appointment does not itself establish a named qualifying food-safety instrument. ([pharma-test.de](https://www.pharma-test.de/en/contact/distributor-contacts/asia/syria/))
34. Laboratory Devices - ABU NOOR AL-DEEN Medical Corporation
    - ABU NOOR AL-DEEN describes laboratory devices serving food-and-beverage users among other sectors, but not the complete food-specific configuration. ([abunooraldeen.com](https://www.abunooraldeen.com/Division-Units.php?div_id=xx.xx&lang=en))
35. Food & Beverages - Katchey Company Limited
    - Katchey's food-and-beverage page establishes sector participation but does not settle the instrument, appointment, and support package for a particular bid. ([katchey.com](https://katchey.com/services/beverages/))
36. Partners - Precur Chem Technologies Limited
    - Precur Chem identifies Interscience-related microbiology equipment categories in its partner portfolio; local configuration and continuing appointment remain separate. ([precurchem.co.tz](https://precurchem.co.tz/partners/))
37. Company Profile - Medics & Procurement
    - Medics & Procurement describes a Tanzanian laboratory-supply and procurement business; a named food-safety instrument and responsibilities remain to be established. ([medicsprocurementservices.com](https://medicsprocurementservices.com/company-profile))

38. Products - Archiepollo Solutions Limited
· Archiepollo lists analytical, microbiology, and food-testing categories; these do not settle the named qualifying instrument or channel undertaking. ([archiepollosolutions.co.ke](https://archiepollosolutions.co.ke/products/))
39. Products - Chemoquip
· Chemoquip presents laboratory equipment and support categories; the matched food-safety hardware and local agreement remain configuration-specific. ([chemoquip.com](https://www.chemoquip.com/products))
40. About - Future Company for Scientific Services
· Future Company describes new and refurbished instruments plus installation and continuing local support, creating an asset-condition and warranty comparison. ([gc-future.net](https://gc-future.net/about))
41. Laboratory Equipment Suppliers in Egypt - Gemicatech
· Gemicatech describes Egyptian laboratory equipment serving food-and-beverage users; a named executable safety package remains necessary. ([gemicatech.com](https://www.gemicatech.com/posts/lab-equipment-suppliers-in-egypt))
42. A Propos - Tradetec
· Tradetec identifies laboratory distribution with a consumables emphasis; this does not settle a named food-safety hardware offering. ([tradetec.ma](https://tradetec.ma/a-propos/))
43. Instrument de Mesure - SMS Bio
· SMS Bio markets measurement categories including pH and temperature to agro-food laboratories; named application and local obligations remain separate. ([smsbio.tn](https://www.smsbio.tn/instrument-de-mesure-tunisie/))
44. Food Safety - SMART SCIENCE CO., LTD.
· SMART SCIENCE lists food-safety and equipment categories; those categories do not establish every named configuration or appointment. ([smartscience.co.th](https://www.smartscience.co.th/food-safety))
45. Food-Safety Product and Equipment Catalog - S&S Bioproducts
· S&S Bioproducts lists equipment alongside food-safety offerings, but buyer-specific appointment and support commitments require confirmation. ([ssbpc.com](https://www.ssbpc.com/en/))
46. Food Safety and Instrument Catalog - Scientific Supply Co., Ltd.
· Scientific Supply presents food-safety testing and instrument categories including readers and washers; a named executable package remains a separate requirement. ([scientificsupply.co.th](https://www.scientificsupply.co.th/))

18. Company Profiles

18.1. bioMérieux

[redacted] GENE-UP is marketed for food, feed, and environmental applications; the US VIDAS KUBE page provides an ordering route. This gives food manufacturers and testing laboratories a within-supplier platform choice, but does not establish that the systems cover identical applications or that either is deliverable in every country.

For GENE-UP, bioMérieux advertises installation, IT integration, training, maintenance, repairs, and remote support. [redacted] Delivery and service obligations should be confirmed in the local agreement.

Sources & Evidence

1. GENE-UP - bioMérieux
   - bioMérieux markets GENE-UP as a real-time PCR platform for food, feed, and environmental applications.
   - The offering advertises installation, IT integration, training, maintenance, repairs, and remote support.
2. VIDAS KUBE - bioMérieux
   - The US commercial page presents VIDAS KUBE as an automated food-pathogen detection instrument using immunoassay technology and provides an ordering route.
   - This establishes a distinct marketed platform, not identical application coverage or worldwide delivery.
   - Company verification: Commercially offers VIDAS KUBE as an automated food-pathogen detection instrument, with ordering and sales-contact options.
3. bioMérieux Annual Report 2024
   - Company verification: The 2024 annual report identifies GENE-UP food-industry offerings and reports use of specified tests by USDA FSIS laboratories.
4. News - Certification Announcements | MicroVal
   - Company verification: Records certification of a bioMérieux GENE-UP food-pathogen detection application.

18.2. Neogen Corporation

[redacted] This is a dated customer-selection event, not merely a product launch. It does not establish universal regulatory authorization, acceptance by another customer, or continuing purchasing commitments.

Neogen also markets the Molecular Detection System to commercial food-testing laboratories through its contract-laboratory offering. [illegible] Application acceptance and the buyer's own delivery and support agreement remain separate purchasing conditions.

Sources & Evidence

1. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
   - Neogen's June xx.xx 2024 announcement reports a USDA FSIS contract and MDS selection for specified Salmonella and Listeria applications involving meat, poultry, and egg products.
   - It identifies MDS as an isothermal amplification platform but does not establish the contract's continuing term or subsequent purchasing commitments.
   - Company verification: A June xx.xx 2024 announcement reports a USDA FSIS contract for the Neogen Molecular Detection System and associated food-pathogen testing products.
2. Food Safety Contract Lab Solutions - Neogen
   - Neogen's commercial contract-laboratory offering includes the Molecular Detection System under pathogen testing.
   - The page supports marketed participation but does not establish continuation of the USDA FSIS contract.
3. Neogen Outlines Strategy for Growth, Innovation and Margin Expansion at 2026 Investor Day
   - Company verification: The October xx.xx 2026 announcement confirms continuing Neogen Corporation operations and a dedicated Global Food Safety business.
   - Company verification: Describes an international food-industry customer base and offerings spanning pathogen detection, allergens, and sanitation monitoring; these are not equipment-only revenue disclosures.
4. FGIS Performance Verified Mycotoxin Test Kits - Tables Updated October 15, 2026
   - Company verification: Lists Neogen Veratox Aflatoxin with Stat Fax Reader Model xx.xx.

18.3. Hygiena

Hygiena's EnSURE Touch addresses portable ATP-based cleaning verification in food processing, a distinct purchasing role from pathogen identification. [illegible] Its proposition therefore combines local hygiene hardware with a shared records environment; the commercial materials do not independently establish improved food-safety outcomes.

Food manufacturers evaluating a multi-site deployment should specify reporting access, record retention, connectivity permissions, and the responsible support provider before standardizing. These are procurement conditions to verify, not guaranteed features of every purchase. [illegible]

Sources & Evidence

1. EnSURE Touch ATP Luminometer for Hygiene Monitoring
   - Hygiena markets EnSURE Touch as a handheld ATP cleaning-verification instrument for applications including food processing.
   - The page describes SureTrend synchronization, remote training and troubleshooting, and optional advanced data analysis.
   - Company verification: Offers the EnSURE Touch handheld ATP hygiene-monitoring instrument for food-processing cleaning verification.
2. Identifying Sources and Root Causes of Food Hazards - Part 1
   - Hygiena distinguishes cleaning verification from raw-material and finished-product testing.
   - It describes SureTrend storing and trending EnSURE Touch results across facilities, supporting the connected-records proposition rather than independent outcome claims.
3. About Us | Hygiena
   - Company verification: Hygiena's corporate history records its acquisition by EW Group in 2021.
   - Company verification: The company describes an international operating and distributor network supporting its food-safety instrument business.
   - Company verification: Its corporate history identifies the 2018 acquisition of Charles River's Celsis Dairy, Food & Beverage division. ([hygiena.com](https://www.hygiena.com/about-us))
4. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia
   - Company verification: The announcement identifies DKSH as a Malaysian commercial channel for Hygiena products. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))

18.4. Agilent Technologies, Inc.

Agilent Technologies, Inc. provides named chemical-contaminant analysis options rather than a food-only instrument portfolio. Its xx.xx LC/Q-TOF is marketed for food-safety screening, with associated libraries addressing pesticides, veterinary drugs, and mycotoxins. ■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■

■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■ A service renewal or proposed provider change should trigger an instrument- and region-specific coverage review, including obligations and exclusions. Equipment selection and maintenance-provider selection are separate commercial decisions.

Sources & Evidence

1. Multi-Vendor Services - Agilent
   - Agilent offers repair, maintenance, and compliance support for non-Agilent chromatography and mass spectrometry instruments.
   - Its service advisor distinguishes plans by instrument and region, supporting conditional rather than universal coverage.
2. 6546 LC/Q-TOF - Agilent
   - Agilent markets the xx.xx LC/Q-TOF for food-safety screening and identifies associated libraries for pesticides, veterinary drugs, and mycotoxins.
   - The product page provides a quotation route, not a location-specific delivery commitment.
3. 7250 GC/Q-TOF - Agilent
   - Agilent markets the xx.xx GC/Q-TOF for applications including pesticide screening and compound identification.
   - Its commercial page provides a quotation route and identifies food-testing application coverage.
4. Food Safety and Authenticity Testing - Agilent High-Resolution Mass Spectrometry Workflows
   - Company verification: Identifies the Agilent xx.xx LC/Q-TOF and xx.xx GC/Q-TOF instruments as offerings for food-contaminant screening and identification.

18.5. Bruker Corporation

Bruker Corporation's relevant food-safety proposition is MALDI Biotyper for microbial identification and confirmation, rather than a general replacement for every detection or hygiene-verification platform. ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ This provides bounded third-party support beyond the company's promotional performance claims.

Food-industry and independent laboratories should first establish whether their equipment gap concerns identification or confirmation, then match the offered system and certificate scope to the accepted deliverable. ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ Certificate renewal or scope changes should prompt reassessment before procurement or substitution.

Sources & Evidence

1. MALDI Biotyper for Food Microbiology - Bruker
   - Bruker commercially presents MALDI Biotyper for food-microbiology identification and confirmation.
   - The page describes application-specific certification claims, not universal substitution for other food-testing equipment.
   - Company verification: Offers the MALDI Biotyper instrument for food-microbiology identification and confirmation applications.

2. MicroVal Certificate of Compliance 2017LR75 - MALDI Biotyper Listeria Confirmation
   - MicroVal certificate 2017LR75 records renewal on January xx.xx 2026 for specified MALDI Biotyper systems used for confirmation of Listeria spp. and Listeria monocytogenes.
   - The certificate names Bruker Daltonics GmbH & Co. KG as manufacturer and supplier and identifies LRQA Nederland B.V. as issuer.
3. News - Certification Announcements | MicroVal
   - Company verification: Records certification activity for Bruker MALDI Biotyper food-microbiology applications.

18.6. R-Biopharm AG

[redacted] The offering combines hardware with a specified software and test family; it does not establish interchangeability with other lateral-flow products. Software compatibility and continuing support therefore belong in the purchasing specification rather than being inferred from the reader alone.

The USDA Federal Grain Inspection Service performance-verified list names RIDA QUICK Aflatoxin RQS with RIDA SMART BOX and RIDA SMART APP for corn. [redacted] The trade-off is a bounded accepted application relationship rather than unrestricted reader choice; extending into the marketed allergen menu requires a separate acceptance check.

Sources & Evidence

1. RIDA SMART BOX - R-Biopharm Food & Feed Analysis
   - R-Biopharm markets RIDA SMART BOX with RIDA SMART APP for quantitative RIDAQUICK allergen and mycotoxin lateral-flow applications.
   - The commercial description establishes a reader, software, and associated test-family relationship, not compatibility with every lateral-flow product.
2. FGIS Performance Verified Aflatoxin Test Kits
   - The FGIS performance-verified list associates R-Biopharm RIDA QUICK Aflatoxin RQS with RIDA SMART BOX and RIDA SMART APP for corn.
   - The same list contains other reader-associated systems, supporting a bounded, nonexclusive acceptance comparison rather than blanket reader approval.
   - Company verification: Lists R-Biopharm testing with RIDA SMART BOX.
3. About us - R-Biopharm AG
   - Company verification: Identifies R-Biopharm AG as a family-run business with food and feed analysis operations.
   - Company verification: Describes international subsidiaries and distributors, supporting the company's commercial reporting identity.
4. RIDA SMART BOX - Food & Feed Analysis | R-Biopharm
   - Company verification: Offers the RIDA SMART BOX imaging instrument for quantitative allergen and mycotoxin lateral-flow testing in food and feed laboratories.

18.7. FOSS

FOSS markets BacSomatic for bacterial and somatic-cell counting in raw milk, giving equipment buyers a dairy-specific flow-cytometry proposition. ■■■ ■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ That is supplier-published use evidence, not independent proof of performance across dairy plants.

For a dairy processor, the buying question is whether this raw-milk measurement role fits its accepted intake decisions. ■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ A new receiving-site requirement or service renewal should trigger a package review, not an assumption that every dairy operation needs another instrument.

Sources & Evidence

1. BacSomatic - FOSS
   - FOSS markets BacSomatic for raw-milk bacterial and somatic-cell counting and positions it within flow-cytometry-based hygienic-quality assessment.
   - The page publishes a Müller Milk and Ingredients customer account about incoming milk quality; this is supplier-published use evidence.
   - Company verification: Offers BacSomatic for bacterial and somatic-cell counting associated with raw-milk hygienic quality.
2. Service Agreements - FOSS
   - FOSS markets FossCare service agreements offering on-site and remote preventive maintenance with configurable support plans.
   - This general offering does not independently establish a particular BacSomatic customer's local coverage or contractual obligations.
3. News - Certification Announcements | MicroVal
   - Company verification: Records certification activity for FOSS BactoScan raw-milk testing instruments.

18.8. Sartorius

■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ These offerings serve distinct sampling and filtration purchasing needs; they are not interchangeable with a pathogen-detection instrument. The filtration portfolio provides named commercial configurations and quotation routes, allowing buyers to specify an equipment package rather than treat all microbiology purchases as one undifferentiated requirement.

Sartorius separately markets maintenance services and contracts for MD8 air samplers and states that service intervals are defined by contract. ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■

[redacted] A laboratory whose immediate gap is sampling or filtration can compare supporting hardware without assuming analyzer replacement, while retaining responsibility for downstream analysis and acceptance of the resulting evidence.

Sources & Evidence

1. Advanced Microbiological Testing Solutions for Contamination Control and Product Quality - Sartorius
   - Sartorius explicitly addresses food, beverage, and water microbiology laboratories.
   - Its portfolio lists MD8 air samplers and Microsart pumps and manifolds alongside associated supplies, establishing distinct supporting-equipment roles.
   - Company verification: Offers microbiological instruments for food and beverage laboratories, including Microsart pumps and manifolds and MD8 air samplers.
2. Filtration Equipment for Microbiological Testing - Sartorius
   - Sartorius provides named microbiological filtration equipment, including Microsart Combi.jet, manifolds, and pumps.
   - The page provides a quotation and information-request route for the commercial equipment offering.
3. Services for Microbiological Testing Instruments - Sartorius
   - Sartorius markets microbiological instrument services and maintenance contracts that explicitly include MD8 air samplers.
   - Its service information states that maintenance intervals are defined by contract; regulated-industry positioning does not establish universal food-industry obligations.

18.9. METTLER TOLEDO

[redacted] Its filing describes integration with material-handling and packaging systems and ProdX connections to manufacturing and enterprise systems. Equipment integration and inspection-record continuity therefore belong in the purchasing decision; the presence of associated weighing or quality functions does not make those functions interchangeable with contamination inspection.

[redacted] Separate equipment purchases remain an alternative where existing systems are suitable, but leave coordination responsibilities with the buyer or integrator. Destination-specific support and the allocation of obligations among seller, integrator, and customer must be established in the offer.

Sources & Evidence

1. Mettler-Toledo International Inc. - 2025 Form 10-K
   · The filing describes food-related metal detection and X-ray inspection, integration with material-handling and packaging systems, and ProdX integration with manufacturing and enterprise systems. These support an integration-focused purchasing assessment, not automatic allocation of contractual responsibility. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mtd-xx.xx.htm))
2. Mix and Match Your Ideal Combination Inspection System
   · METTLER TOLEDO markets standalone and combination inspection systems, including CM and CX configurations, together with global service, training, and ProdX connectivity support. The page supports comparison of combined and separate purchases, not a destination-specific fulfillment guarantee. ([mt.com](https://www.mt.com/us/en/home/library/product-brochures/product-inspection/PI/Combinations_Brochure.html))
3. Product Inspection Systems | METTLER TOLEDO
   · Company verification: Offers food-industry metal-detection and X-ray equipment for physical-contamination inspection.

18.10. Interscience

Interscience supports selective laboratory investment rather than an assumed complete analyzer replacement. ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ A laboratory can therefore compare replacement of a particular supporting function with purchasing combined equipment, without assuming that renewing a reader requires replacing all preparation assets.

The commercial choice depends on the equipment that the laboratory intends to retain and the responsibilities it wants to consolidate. Combined incubation and reading can bring those functions into one equipment relationship, while separate purchases preserve independent renewal choices. ■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■

Support also has a purchasing gate. ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ Buyers should settle the applicable plan and local support coverage with the initial order rather than assume that identical protection can be added later.

Sources & Evidence

1. Products and Accessories - Microbiology
   · Interscience lists food among its sectors and separately markets blenders, gravimetric dilutors, dispensing pumps, platers, and colony counters. This establishes distinct purchasable equipment functions, without establishing compatibility with a buyer's retained equipment. ([interscience.com](https://www.interscience.com/en/products/))
2. Real-Time Incubator and Colony Counter - Interscience
   · The ScanStation catalog identifies combined real-time incubation and colony-counting equipment. It provides a documented combined-function alternative to separately listed supporting equipment. ([interscience.com](https://www.interscience.com/en/products/real-time-incubator-and-colony-counter/?lang=en))

3. Service Offers - Interscience
   - Interscience publishes warranty-extension and service options subject to conditions and area-dependent availability. Warranty extension is available only at equipment purchase and requires warranty registration. ([interscience.com](https://www.interscience.com/en/support/services/service-offers?lang=en))
4. BagMixer 400 P - Lab Blender | Interscience
   - Company verification: Offers the BagMixer xx.xx P laboratory blender for food-industry microbiological analysis.

18.11. Clear Labs

[illegible] Laboratories should establish whether characterization serves a defined traceback or facility-monitoring decision; buyers needing only an accepted detection result should not assume that additional capabilities justify replacement. Comparative performance statements remain supplier claims.

Clear Labs lists separate client-services and technical-support channels, including training and troubleshooting. These provide a route for commercial qualification, not a Clear Safety-specific delivery or service undertaking. [illegible]

Sources & Evidence

1. Clear Safety - Clear Labs
   - Clear Labs markets Clear Safety for Listeria and Salmonella sequencing, characterization, and environmental mapping. Its comparative performance statements are supplier claims; the page does not establish an executable destination-specific supply agreement. ([clearlabs.com](https://clearlabs.com/clear-safety/))
   - Company verification: Clear Labs markets Clear Safety as an automated food-pathogen testing platform.
   - Company verification: The portfolio addresses Listeria and Salmonella characterization for food-safety programs.
2. Contact Us - Clear Labs
   - Clear Labs provides client-services channels for products and orders and technical-support channels covering instrumentation, training, and troubleshooting. These are inquiry routes, not Clear Safety-specific contractual coverage. ([clearlabs.com](https://www.clearlabs.com/contact-us))
3. About Clear Labs - Clear Labs
   - Company verification: Clear Labs describes food safety as a commercial application of its automated genomic platforms.
   - Company verification: Its company history documents the Clear Safety launch and a US operating presence.

18.12. Hanna Instruments

Hanna Instruments provides a food-specific portable pH proposition rather than an interchangeable substitute for every preventive-condition instrument. [illegible]

■■■■■■ The catalog addresses food safety alongside composition, texture, and other quality objectives, so purchasing relevance must follow the intended pH requirement rather than the supplier's entire food portfolio.

The HI98161 offering includes a Foodcare electrode, stored measurement records, associated traceability information, and USB transfer to a computer. These features make the record-transfer arrangement and continuing electrode supply relevant commercial considerations for a food manufacturer purchasing portable measurement equipment. ■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■

Buyers should specify whether the required deliverable is pH evidence for a defined food-safety control or a quality measurement, then obtain a product-specific offer covering the meter, electrode, record access, and local support. ■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■ ■■■■ ■ ■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■

Sources & Evidence

1. Food Testing Equipment - Hanna Instruments
   · Hanna's US food catalog lists HI99161 and HI98161 portable pH instruments and discusses food safety alongside quality and composition applications. This supports application-specific attribution rather than treating its complete food portfolio as safety equipment. ([hannainst.com](https://hannainst.com/food/?filter=food-other))
   · Company verification: Hanna Instruments markets equipment explicitly addressing food safety and product integrity.
   · Company verification: Its food-testing catalog lists the HI99161 food and dairy pH meter and HI98161 Professional Foodcare Portable pH Meter.
2. Professional Foodcare Portable pH Meter - HI98161
   · HI98161 is marketed as a portable Foodcare pH meter with a food-specific electrode, stored records and associated traceability data, and USB computer connectivity. These establish product features, not centralized records management or worldwide service commitments. ([hannainst.com](https://hannainst.com/hi98161-portable-foodcare-ph-meter.html))
3. Foodcare Meters and Testers - Hanna Instruments Romania
   · Company verification: The Romanian commercial catalog markets Foodcare pH instruments for food-safety and HACCP-related applications.
   · Company verification: Identifies HANNA INSTRUMENTS SERVICE S.R.L. as the local commercial entity.
4. ISO 9001:2015 Certificate - HANNA INSTRUMENTS S.R.L.
   · Company verification: The certificate identifies HANNA INSTRUMENTS S.R.L. in Nușfalău, Romania, with analytical-device manufacturing and related activities.
   · Company verification: The stated certificate validity runs from November xx.xx 2023, through October xx.xx 2026.

18.13. LCTech GmbH

■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ This creates a distinct investment choice: automate an identified preparation requirement while

assessing downstream instrument replacement separately. Retaining an existing analyzer remains conditional on documented application fit and any required equipment connections; a modular catalog does not establish universal compatibility.

LCTech advertises installation, training, spare parts, maintenance, and repair support, and directs customers to an existing in-country distributor first. Buyers should establish whether the distributor or LCTech owns each handover and continuing-support obligation. ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■ ■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■

■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ Buying through both brands therefore should not automatically be treated as ownership-diversified sourcing.
Brand-specific offerings and contractual relationships still require separate assessment; shared ownership does not establish interchangeable products or a unified customer contract.

Sources & Evidence

1. The FREESTYLE Robotic System - LCTech
   - LCTech markets FREESTYLE robotic preparation equipment for food and feed, including mycotoxin, pesticide, and MOSH/MOAH application configurations. This supports a preparation-automation role, not universal downstream instrument compatibility. ([lctech.de](https://www.lctech.de/en/products/robotic-systems))
   - Company verification: Markets FREESTYLE robotic equipment for food/feed laboratory sample preparation.
   - Company verification: Identifies commercial configurations addressing mycotoxins, pesticides, and MOSH/MOAH.
2. Service at LCTech
   - LCTech advertises installation, training, spare parts, maintenance, and repair assistance and instructs customers to contact an existing in-country distributor first. Particular distributor obligations remain contract-specific. ([lctech.de](https://www.lctech.de/en/support/service))
3. Velaris and GERSTEL FAQs: Stronger Together, What It Means for You
   - GERSTEL describes Velaris as a group operating under shared ownership and lists both GERSTEL and LCTech among its brands. This supports an ownership-diversification caution without establishing interchangeable products or unified contracts. ([gerstelus.com](https://www.gerstelus.com/blogs/velaris-and-gerstel-faqs-stronger-together-what-it-means-for-you/))
   - Company verification: Identifies LCTech among brands operating under shared Velaris ownership.
   - Company verification: Supports a common-parent reporting relationship with GERSTEL, not an assumption that the two are independent consolidated competitors.
4. Press Release LCTech GmbH
   - Company verification: The September xx.xx 2023 company announcement identifies LCTech within a laboratory-automation platform following acquisitions backed by Battery Ventures.
   - Company verification: Provides dated ownership-platform history rather than evidence of an independent LCTech parent group.

18.14. BIOLAN

■■■■■■ ■■■■■■ ■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ It markets BIOFISH xx.xx HIS as a connected enzymatic biosensor for histamine measurement in fish, while its histamine catalog also presents the portable BIOFISH xx.xx HIS.

The distinction from a broad laboratory platform is the dedicated purchasing purpose: a buyer can assess equipment for an identified fish-histamine requirement without assuming that it replaces other contaminant-testing capabilities.

Application coverage is a material qualification condition. BIOLAN's BIOFISH xx.xx HIS description explicitly excludes fish sauce from its stated AOAC certification coverage, despite listing fish sauce as a measurement application. ■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■■■ ■■■ ■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■

■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ These provide contacts for an application-specific offer, not evidence that every model has identical delivery or support arrangements in every destination. Buyers should obtain the named seller's commitment for the selected model, associated supplies, training, and service before choosing a dedicated onsite route over an accepted laboratory relationship.

Sources & Evidence

1. Histamine - BIOLAN
   - BIOLAN's histamine catalog presents BIOFISH xx.xx HIS and portable BIOFISH xx.xx HIS for fish-histamine measurement, establishing a dedicated target-and-matrix equipment proposition. ([biolanmb.com](https://biolanmb.com/en/category/products/histamine/))
   - Company verification: Lists BIOFISH xx.xx HIS and BIOFISH xx.xx HIS instruments for histamine measurement in fish.
   - Company verification: Provides a Zamudio, Bizkaia commercial contact address.
2. BIOFISH 3000 HIS - BIOLAN
   - BIOLAN describes BIOFISH xx.xx HIS as a connected enzymatic biosensor for histamine in fish. Its product description lists fish sauce as an application but explicitly excludes it from the stated AOAC certification coverage. ([biolanmb.com](https://biolanmb.com/en/biofish-xx.xx-his/))
3. Sales Network - BIOLAN
   - BIOLAN publishes sales hubs and regional offices across EMEA, APAC, Latin America, and North America. The network establishes inquiry routes, not identical model-specific delivery or service obligations in all destinations. ([biolanmb.com](https://biolanmb.com/en/sales-network/))

18.15. Testo

Testo presents two distinct purchasing relationships: individual food-measurement instruments and an integrated monitoring-and-records offering. ■■■ ■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ This makes the allocation of responsibility between site users and central food-safety teams part of the acquisition, rather than treating every sensor or handheld meter as an isolated purchase.

A digital bundle is not the only documented route. Testo's food-thermometer catalog separately markets instruments such as the testo xx.xx-IR to professional kitchens, restaurants, and supermarkets. ■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■

[redacted] The UK offering describes monitoring and documentation capabilities; it does not independently establish accepted audit evidence or an identical service undertaking in other countries.

Sources & Evidence

1. Digital Food Safety Management with testo Saveris Food
   - Testo's UK Saveris Food offering combines stationary monitoring, handheld instruments, software, and services and identifies restaurants, catering, and distribution centers as application settings. It describes monitoring, records, and escalation functionality, not independent customer acceptance. ([testo.com](https://www.testo.com/en-UK/solutions/food-safety-management))
2. Food Thermometers - Testo
   - Testo separately markets food thermometers, including testo xx.xx-IR, for professional kitchens, restaurants, and supermarkets. This supplies a documented standalone purchasing alternative to a broader digital-management bundle. ([testo.com](https://www.testo.com/en-UK/products/food-thermometers))
   - Company verification: The official UK store markets food-safety thermometers to professional kitchens, restaurants, and supermarkets.
   - Company verification: Specifically presents the testo xx.xx-IR food thermometer.
3. Food safety instruments | Testo Middle East Dubai
   - Company verification: The UAE commercial catalog lists food thermometers, frying-oil testers, and pH meters under Food Safety and provides a Dubai showroom contact.

18.16. Novasina

[redacted] Neutec's commercial listing identifies Novasina as the manufacturer and positions the instrument for food-production and quality laboratories, with user management and computer or printer interfaces. Buyers should specify the safety-related water-activity requirement rather than attribute every quality-laboratory application to food safety.

The delivery relationship deserves separate attention. Neutec advertises calibration, equipment qualification, and preventive-maintenance services for its Novasina offering, while Novasina directs prospective buyers through a country- and device-specific partner inquiry. [redacted]

Sources & Evidence

1. LabMaster Neo - Water Activity Meter - Neutec
   · Neutec markets LabMaster Neo as Novasina water-activity equipment for food-production and quality laboratories, describes user management and data interfaces, and advertises calibration, equipment qualification, and preventive maintenance. These are Neutec's offering claims, not universal manufacturer service commitments. ([neutecgroup.com](https://www.neutecgroup.com/p/water-activity-labmaster-neo-detail/))
2. Distributors Around the Globe - Novasina
   · Novasina provides a partner-inquiry route asking for country, topic, and device. This establishes manufacturer-facilitated channel inquiry, not a named partner's appointment or enforceable destination-specific support coverage. ([novasina.ch](https://novasina.ch/distributors-around-the-globe/))
3. Water Activity - Novasina Sensors
   · Company verification: Advertises LabMaster-aw neo and other water-activity instruments with food and microbial-safety positioning. ([novasina.ch](https://novasina.ch/water-activity/))

18.17. DKSH

DKSH's documented contribution is distribution and customer support for Hygiena-branded equipment, not a separate manufacturing capability for those systems. The partners' January xx.xx 2025 Malaysian announcement assigned DKSH Business Unit Technology marketing, sales, distribution, and after-sales responsibilities for a portfolio including ATP cleaning-verification systems. ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■ ■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■

The commercial contribution extends beyond shipment. ■■ ■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■ ■■ ■ ■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ DKSH's Malaysian service portfolio separately advertises maintenance, repair, spare parts, and warranty coverage, but those general services should not be assumed to cover every Hygiena instrument.

Territorial scope constrains regional purchasing. DKSH's August xx.xx 2025 account describes exclusive Hygiena partnerships in Malaysia, the Philippines, Laos, Myanmar, and Cambodia, with Indonesian food-and-beverage coverage limited to Sumatra. ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■

Malaysia's LabShop terms identify DKSH Technology Sdn Bhd as operator and allocate fulfillment, delivery, and customer support to DKSH, while stating that business-to-business transactions require separate arrangements. ■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■

RESEARCH SAMPLE REPORT

[redacted] If appointment continuity or required support cannot be confirmed, the channel's purchasing advantage is unproven.

Sources & Evidence

1. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia
   - The January xx.xx 2025 announcement describes an exclusive Malaysian Hygiena partnership covering ATP cleaning-verification systems and assigns DKSH marketing, sales, distribution, and after-sales functions. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))
   - Company verification: Announced a Malaysian Hygiena distribution partnership on January xx.xx 2025, including ATP cleaning-verification systems. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))
2. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia
   - Hygiena's January xx.xx 2025 release confirms the Malaysian partnership and DKSH's commercial and after-sales responsibilities. It describes Hygiena as developing, producing, and providing its diagnostic offerings. ([hygiena.com](https://www.hygiena.com/documents/xx.xx/dksh-and-hygiena-expand-partnership-in-malaysia.pdf))
3. Hygiena EnSURE Touch Instrument ETOUCH | DKSH Malaysia LabShop
   - Malaysia's LabShop lists Hygiena EnSURE Touch as a cleaning-verification and monitoring instrument for food-processing environments, establishing a named advertised offering rather than a completed delivery. ([labshop.dksh.com.my](https://labshop.dksh.com.my/shop/p/hygiena-ensure-touch-instrument-etouch-tecpim000531181))
4. Brewing Efficiency: Heineken Lao Brewery's Success with Hygiena EnSURE Touch
   - DKSH's November xx.xx 2025 account reports Heineken Lao Brewery's selection of EnSURE Touch after its previous hygiene-monitoring method was discontinued, with DKSH providing user familiarization and SureTrend Cloud onboarding. This is supplier-reported customer evidence. ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/brewing-efficiency-heineken-lao-brewerys-success-with-hygiena-ensure-touch/))
5. Our Services | DKSH Technology Malaysia
   - DKSH Technology Malaysia advertises preventive maintenance, repair, spare-parts supply, and warranty coverage. This general service portfolio does not specify an undertaking for every Hygiena instrument. ([dksh.com](https://www.dksh.com/my-en/home/technology/services))
6. Driving Market Expansion for Hygiena's Diagnostic Solutions in Southeast Asia
   - The August xx.xx 2025 account names Malaysia, the Philippines, Laos, Myanmar, Cambodia, and Sumatra food-and-beverage coverage; Indonesia-wide coverage concerns hospitals. These are DKSH-reported exclusive appointments. ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/driving-market-expansion-for-hygienas-diagnostic-solutions-in-southeast-asia/))
   - Company verification: Its August xx.xx 2025 account identifies Hygiena channel territories including the Philippines, Cambodia, Laos, Myanmar, Malaysia, and Indonesia's Sumatra food-and-beverage sector. ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/driving-market-expansion-for-hygienas-diagnostic-solutions-in-southeast-asia/))
7. Terms and Conditions | DKSH Malaysia LabShop
   - LabShop terms identify DKSH Technology Sdn Bhd as operator and assign fulfillment, delivery, and customer support to DKSH. Business-to-business transactions require separate arrangements, and product references do not establish availability in every location. ([labshop.dksh.com.my](https://labshop.dksh.com.my/shop/terms-and-conditions))

Sources & Evidence

1. About Us | Hygiena
   - Company verification: Hygiena's corporate history records its acquisition by EW Group in 2021.
   - Company verification: The company describes an international operating and distributor network supporting its food-safety instrument business.
   - Company verification: Its corporate history identifies the 2018 acquisition of Charles River's Celsis Dairy, Food & Beverage division. ([hygiena.com](https://www.hygiena.com/about-us))
2. About us - R-Biopharm AG
   - Company verification: Identifies R-Biopharm AG as a family-run business with food and feed analysis operations.
   - Company verification: Describes international subsidiaries and distributors, supporting the company's commercial reporting identity.
3. Neogen Outlines Strategy for Growth, Innovation and Margin Expansion at 2026 Investor Day
   - Company verification: The October xx.xx 2026 announcement confirms continuing Neogen Corporation operations and a dedicated Global Food Safety business.
   - Company verification: Describes an international food-industry customer base and offerings spanning pathogen detection, allergens, and sanitation monitoring; these are not equipment-only revenue disclosures.
4. Eurofins Technologies is now Gold Standard Diagnostics!
   - Company verification: Documents the December 2022 rebranding of Eurofins Technologies to Gold Standard Diagnostics.
   - Company verification: Explains that the branding covers its test-kit, reagent, and instrument development and manufacturing business.
5. About Gold Standard Diagnostics
   - Company verification: Identifies Gold Standard Diagnostics as a commercial network supplying diagnostic instruments to food and other industries.
   - Company verification: Currently presents ThunderBolt and The BOLT analyzer families alongside food-allergen, pathogen, mycotoxin, and residue-testing offerings.
6. Analytik Jena inaugurates new buildings | Endress+Hauser
   - Company verification: The October xx.xx 2026 announcement confirms continuing Analytik Jena development, manufacturing, and commercial operations.
   - Company verification: States that Analytik Jena has been wholly owned by Endress+Hauser since 2016.

7. Discover all IUL highlights with the last news - IUL Instruments
   - Company verification: Publishes a February xx.xx 2025 customer account connecting Eddy Jet 2W equipment with a Japanese food company's microbiological testing.
   - Company verification: Identifies a Japanese distributor in that commercial customer account.
8. Privacy Policy | Byonoy
   - Company verification: Identifies Byonoy GmbH as the company responsible for the website and provides its Hamburg business address.
   - Company verification: Establishes the legal operator behind the staged Byonoy market-facing identity.
9. Automated DNA Extraction | Maxwell Instruments | Automated RNA Extraction
   - Company verification: Commercially presents Maxwell instrument families and identifies a PureFood Pathogen food-testing application within the platform portfolio.
   - Company verification: Establishes a food-specific equipment-workflow role rather than relying solely on general molecular-instrument capability.
10. Food Testing | Promega
    - Company verification: Promega's commercial food-testing portfolio expressly addresses food pathogens and associated Maxwell instrument applications.
    - Company verification: Supports the company's participation in dedicated food-testing laboratory workflow equipment.
11. Food Safety Testing Solutions Since 1978 | Charm Sciences
    - Company verification: Identifies Charm Sciences as an operating food-safety testing business.
    - Company verification: Describes its food-contaminant testing focus, complementing captured reader offerings and government-listed reader associations.
12. Velaris and GERSTEL FAQs: Stronger Together, What It Means for You - Gerstel
    - Company verification: Identifies LCTech among brands operating under shared Velaris ownership.
    - Company verification: Supports a common-parent reporting relationship with GERSTEL, not an assumption that the two are independent consolidated competitors.
    - Company verification: Explains GERSTEL's participation in the Velaris laboratory-automation group.
    - Company verification: Identifies GERSTEL and LCTech within the same ownership platform while describing continued brand-level commercial operations.
13. Press Release LCTech GmbH
    - Company verification: The September xx.xx 2023 company announcement identifies LCTech within a laboratory-automation platform following acquisitions backed by Battery Ventures.
    - Company verification: Provides dated ownership-platform history rather than evidence of an independent LCTech parent group.
14. GERSTEL Solutions worldwide No. 20
    - Company verification: GERSTEL's company publication commercially discusses automation for mineral-oil-residue analysis in food and food packaging.
    - Company verification: Provides direct food-contaminant business support, although a complete current named-system offering and legal reporting assessment remain unresolved.
15. Impressum - ColiMinder
    - Company verification: Identifies VWMS Vienna Water Monitoring Solutions GmbH as the operator behind the ColiMinder website.
    - Company verification: Provides an Austrian company-register reference and describes the business as developing, manufacturing, and selling microbial water-monitoring equipment.
16. Novonesis Annual Report 2024
    - Company verification: Records completion of the Novozymes and Chr. Hansen combination on January xx.xx 2024.
    - Company verification: Establishes a successor-group reporting issue for the protected CHR Hansen title; it does not establish that CHR Hansen remains an independent consolidated competitor.

17. Incubators and readers | Novonesis
- Company verification: Novonesis commercially presents MilkSafe-linked readers and incubators for milk antibiotic-residue, aflatoxin, and adulteration testing.
- Company verification: Resolves the historical portfolio's hardware-only uncertainty at successor-group level, without resolving the protected CHR Hansen reporting title.

18. SABS Certificate of Registration - Microsep and National Separations
- Company verification: A SABS certificate identifies Microsep (Pty) Ltd and its owned subsidiary National Separations (Pty) Ltd.
- Company verification: The certificate's stated validity ended April xx.xx 2024; it supports historical identity and ownership, not current certification or unchanged ownership.
- Company verification: The historical certificate identifies National Separations (Pty) Ltd as owned by Microsep (Pty) Ltd.
- Company verification: Creates a reporting-overlap qualification; present ownership and consolidation still require confirmation.

19. About us | PerkinElmer
- Company verification: PerkinElmer's present company overview describes an operating analytical-instrument and laboratory-services business.
- Company verification: Supports continuing activity under the PerkinElmer market-facing identity, but does not independently resolve its ownership and legal consolidation perimeter.

20. Know What's in Your Food | Thermo Fisher Scientific
- Company verification: Offers molecular food-testing instrumentation, chromatography and mass-spectrometry equipment, and physical-contaminant inspection systems for food applications.

21. VIDAS KUBE | bioMérieux
- Company verification: Commercially offers VIDAS KUBE as an automated food-pathogen detection instrument, with ordering and sales-contact options.

22. bioMérieux Annual Report 2024
- Company verification: The 2024 annual report identifies GENE-UP food-industry offerings and reports use of specified tests by USDA FSIS laboratories.

23. Neogen MDS Awarded Contract from USDA Food Safety and Inspection Service
- Company verification: A June xx.xx 2024 announcement reports a USDA FSIS contract for the Neogen Molecular Detection System and associated food-pathogen testing products.

24. EnSURE Touch ATP Luminometer for Hygiene Monitoring | Hygiena
- Company verification: Offers the EnSURE Touch handheld ATP hygiene-monitoring instrument for food-processing cleaning verification.

25. CFX Opus 96 and CFX Opus Deepwell Real-Time PCR Systems for Food, Beverage, and Water Safety Testing
- Company verification: Markets CFX Opus xx.xx and CFX Opus Deepwell real-time PCR instruments for food, beverage, and water safety testing.

26. Food Safety and Authenticity Testing - Agilent High-Resolution Mass Spectrometry Workflows
- Company verification: Identifies the Agilent xx.xx LC/Q-TOF and xx.xx GC/Q-TOF instruments as offerings for food-contaminant screening and identification.

27. Food Contaminant Testing | Reliable LC-MS/MS & GC-MS/MS | Waters
- Company verification: Offers LC-MS/MS and GC-MS/MS food-contaminant testing solutions and identifies Xevo mass-spectrometry and APGC equipment.

28. Solutions for Food Safety | Shimadzu Corporation
- Company verification: Markets LCMS-based food-safety solutions covering pesticide residues, veterinary drugs, natural toxins, and allergens.

29. Food Testing Solutions | SCIEX
- Company verification: Offers mass-spectrometry instruments and associated software for food safety, residue, and contaminant testing.

30. Danaher | SCIEX
    - Company verification: Identifies SCIEX as a life-sciences company within Danaher Corporation.
31. MALDI Biotyper for Food Microbiology | Bruker
    - Company verification: Offers the MALDI Biotyper instrument for food-microbiology identification and confirmation applications.
32. Food Testing Solutions | PerkinElmer
    - Company verification: Offers QSight xx.xx LC/MS/MS and Clarus Nova GC equipment to food manufacturers and testing laboratories for contaminant analysis.
33. RIDA SMART BOX - Food & Feed Analysis | R-Biopharm
    - Company verification: Offers the RIDA SMART BOX imaging instrument for quantitative allergen and mycotoxin lateral-flow testing in food and feed laboratories.
34. Charm SL Aflatoxin M1 Test (SLAFM) | Charm Sciences
    - Company verification: Offers Charm EZ and ROSA Pearl-X reader systems associated with dairy aflatoxin and antibiotic screening.
35. AgraVision Pro Reader | Romer Labs
    - Company verification: Lists AgraVision Pro as an available reader for AgraStrip Pro mycotoxin, GMO, and allergen tests.
36. Gold Standard Diagnostics Product Catalogue - Industrial and Animal Health 2025
    - Company verification: The 2025 catalog offers ThunderBolt and The BOLT analyzers for food allergens, pathogens, mycotoxins, and veterinary-drug residue assays.
37. BacSomatic | FOSS
    - Company verification: Offers BacSomatic for bacterial and somatic-cell counting associated with raw-milk hygienic quality.
38. Instruments - Microbiological Testing | Sartorius
    - Company verification: Offers microbiological instruments for food and beverage laboratories, including Microsart pumps and manifolds and MD8 air samplers.
39. Food & Beverage Safety Portfolio | Merck
    - Company verification: The food and beverage portfolio identifies Merck KGaA and instrument families including DiluCult, Milliflex OASIS, and MAS environmental-monitoring systems.
40. Lumitester Smart | Kikkoman Biochemifa
    - Company verification: Commercially presents Lumitester Smart as a hygiene-monitoring instrument.
    - Company verification: Identifies Kikkoman Biochemifa Company and OPTEX Co., Ltd. as co-developers.
    - Company verification: Kikkoman's marketed Lumitester Smart product page identifies OPTEX Co., Ltd. as a co-developer; it does not establish OPTEX's current sales role.
41. Product Inspection Systems | METTLER TOLEDO
    - Company verification: Offers food-industry metal-detection and X-ray equipment for physical-contamination inspection.
42. Dymond X-Ray Inspection System | Minebea Intec
    - Company verification: Offers Dymond X-ray equipment for detecting foreign objects in packaged food.
43. X-Ray Inspection | Loma Systems
    - Company verification: Offers the X5 series of food X-ray inspection systems for foreign-contaminant detection.
44. X-Ray Inspection Systems for Food & Pharmaceutical Products | Anritsu
    - Company verification: Offers XR75 X-ray inspection equipment for detecting physical contaminants in food and pharmaceutical products.
45. QuickScan - Quantify Mycotoxins and GMOs with One Traceability System | EnviroLogix
    - Company verification: Offers QuickScan reader systems for grain companies and food processors, including mycotoxin and allergen applications.

46. BactoCount IBC Brochure | Bentley Instruments
    - Company verification: Markets BactoCount IBC equipment for assessing raw-milk hygienic quality in dairy plants and milk-testing laboratories.
47. BagMixer 400 P - Lab Blender | Interscience
    - Company verification: Offers the BagMixer xx.xx P laboratory blender for food-industry microbiological analysis.
48. Company | IUL
    - Company verification: Identifies IUL, SA as a microbiology-automation supplier that designs, manufactures, and markets lateral-flow readers for food applications and supplies OEM products.
49. Products - IUL Micro | IUL Instruments
    - Company verification: Lists microbiology equipment categories including homogenizers, gravimetric dilutors, colony counters, and air-sampling instruments.
50. Equipment | ProGnosis Biotech
    - Company verification: Offers 3PR Mini and S-FLOW readers for food-safety testing.
    - Company verification: Identifies Lateral Logic as its subsidiary and states that it offers Byonoy Absorbance xx.xx under a partnership.
    - Company verification: ProGnosis identifies a partnership under which it offers Byonoy's Absorbance xx.xx reader.
51. Absorbance 96 - A New Category of Plate Reader | Byonoy
    - Company verification: Commercially offers the Absorbance xx.xx microplate reader through its own product portfolio.
52. Food & Agriculture | Analytik Jena
    - Company verification: Markets PlasmaQuant MS and PlasmaQuant xx.xx instruments for food safety and identifies additional food-testing automation and molecular-instrument offerings.
53. About Seward | Seward
    - Company verification: Manufactures Stomacher laboratory blenders for food-testing applications at its United Kingdom factory.
    - Company verification: States that Seward became part of the FermionX group in 2016.
54. About CEM
    - Company verification: Identifies CEM Corporation's food-analysis and elemental-analysis sample-preparation equipment businesses; the page does not establish a named current food-safety offering.
55. Molecular Biology | HiMedia Laboratories
    - Company verification: Identifies HiGenoMB as a division of HiMedia Laboratories and describes molecular instruments serving food and water testing, among other industries.
56. Portable Food Safety Reader | Kwinbon
    - Company verification: Offers a Portable Food Safety Reader explicitly identified as developed and produced by Beijing Kwinbon Technology Co., Ltd.
57. FGIS Performance Verified Mycotoxin Test Kits - Tables Updated October 15, 2026
    - Company verification: Lists Charm mycotoxin tests with the EZ-M Reader.
    - Company verification: Lists EnviroLogix tests with QuickScan readers.
    - Company verification: Lists Neogen Veratox Aflatoxin with Stat Fax Reader Model xx.xx.
    - Company verification: Lists R-Biopharm testing with RIDA SMART BOX.
    - Company verification: Lists Romer Labs tests with AgraVision Pro.
    - Company verification: Lists ProGnosis tests with S-FLOW and 3PR-MINI readers.
    - Company verification: Identifies BYONOY xx.xx equipment for listed ProGnosis tests.
    - Company verification: Lists VICAM tests with Vertu TOUCH and Series-4EX equipment.

58. News - Certification Announcements | MicroVal
    - Company verification: Records certification activity for Bruker MALDI Biotyper food-microbiology applications.
    - Company verification: Records certification activity for FOSS BactoScan raw-milk testing instruments.
    - Company verification: Records certification activity for Bentley BactoCount devices.
    - Company verification: Records certification of a bioMérieux GENE-UP food-pathogen detection application.
59. QuickScan Support | EnviroLogix Brazil
    - Company verification: Provides a Brazilian Portuguese commercial support page for QuickScan equipment.
60. iQ-Check Listeria monocytogenes II PCR Detection Kit | Bio-Rad
    - Company verification: The inspected iQ-Check Listeria monocytogenes II page marks the listed kit discontinued while describing Bio-Rad's associated PCR instrument offering.
61. SNAPshot DSR Reader - IDEXX US
    - Company verification: IDEXX publicly offers the SNAPshot DSR Reader for reading its dairy SNAP tests.
    - Company verification: The US product page provides customer-service and ordering channels for the reader.
62. Clear Safety - Clear Labs
    - Company verification: Clear Labs markets Clear Safety as an automated food-pathogen testing platform.
    - Company verification: The portfolio addresses Listeria and Salmonella characterization for food-safety programs.
63. About Clear Labs - Clear Labs
    - Company verification: Clear Labs describes food safety as a commercial application of its automated genomic platforms.
    - Company verification: Its company history documents the Clear Safety launch and a US operating presence.
64. Products - Biolog
    - Company verification: Biolog offers Odin and ID Station instruments for microbial identification and characterization.
    - Company verification: Its product portfolio explicitly serves food and beverage organizations as well as other industries.
65. Environmental Monitoring and QC - Biolog
    - Company verification: Biolog markets environmental-monitoring and quality-control capabilities and identifies food and beverage as a served application area.
    - Company verification: The page distinguishes instrumentation from outsourced laboratory services.
66. Inside Ancera's Labs
    - Company verification: A November xx.xx 2024 business article identifies Ancera's Branford, Connecticut laboratory operations.
    - Company verification: Ancera describes PIPER as its proprietary diagnostic instrument deployed within its poultry-focused food-defense business.
    - Company verification: The article establishes an instrument-enabled business role, not standalone hardware sales.
67. About - Pathotrak
    - Company verification: Pathotrak identifies its business as providing technologies for food-safety laboratories and producers.
    - Company verification: Its company history connects the business with the University of Maryland and NIST.
    - Company verification: This page establishes company identity and commercial focus but does not independently resolve current named hardware availability.
68. Determination of Pesticides in Tomato by GCxGC-TOFMS
    - Company verification: LECO associates its Pegasus BT instrument with pesticide analysis in tomatoes.
    - Company verification: The equipment-linked page explicitly positions this application within food-safety requirements.

69. About | Addium Inc.
    - Company verification: Addium identifies its business presence in Pullman, Washington.
    - Company verification: Its company materials connect the AQUALAB business with food-safety applications.
    - Company verification: The inspected company page does not by itself establish current availability of an individual instrument model.
70. Food Processing - ThermoWorks
    - Company verification: ThermoWorks markets instruments specifically for professional food-processing and food-safety applications.
    - Company verification: The offered portfolio includes the Saf-T-Log Paperless HACCP Thermometer and professional temperature-monitoring instruments.
71. About Us - ThermoWorks
    - Company verification: ThermoWorks describes itself as a family-owned Utah company.
    - Company verification: Its business materials identify professional food chains among the markets served by its instruments.
72. about us - DeltaTrak
    - Company verification: DeltaTrak describes the development and manufacture of portable temperature instruments, data loggers, and monitoring systems.
    - Company verification: The company explicitly identifies food and food safety among its served industries.
73. Food Testing Equipment | Hanna Instruments
    - Company verification: Hanna Instruments markets equipment explicitly addressing food safety and product integrity.
    - Company verification: Its food-testing catalog lists the HI99161 food and dairy pH meter and HI98161 Professional Foodcare Portable pH Meter.
74. SpectacularOne - On-Site Pathogen Testing Device | Spectacular Labs
    - Company verification: Spectacular Labs advertises SpectacularOne as an on-site food-pathogen detection device.
    - Company verification: The Canadian-facing product page offers a demonstration pathway for prospective customers.
    - Company verification: Advertising and demonstrations do not establish customer shipments or independently verified certification.
75. Automated Liquid-Liquid Extraction (LLE) Systems - Aurora Biomed
    - Company verification: Aurora Biomed markets VERSA xx.xx and VERSA xx.xx automated sample-preparation equipment.
    - Company verification: The commercial page identifies aflatoxins in seafood products among the equipment's applications.
76. Luminultra and Kikkoman Partnership: Food Safety Testing
    - Company verification: On September xx.xx 2025, Canada-headquartered Luminultra announced a North American distribution agreement with Kikkoman Biochemifa.
    - Company verification: The stated offering includes Kikkoman's A3 hygiene-monitoring system and a colony-counting system for Easy Plate.
    - Company verification: The announcement establishes a channel relationship, not separate manufacturing ownership of Kikkoman equipment.
77. About Kormay Biomedicals
    - Company verification: Kormay Biomedicals identifies itself as a Canadian laboratory supplier serving customers across Canada.
    - Company verification: It identifies food-production facilities among its customers and lists food-safety tests and laboratory equipment in its portfolio.
    - Company verification: The page does not identify a named food-safety-specific hardware offering.

78. Dissel Mexicana | Inocuidad Alimentaria y Control de Higiene
    - Company verification: Dissel Mexicana advertises equipment for food and beverage safety and hygiene monitoring.
    - Company verification: Its offering page identifies the YZ3900 ATP luminometer.
    - Company verification: The page establishes an advertised supplier role but does not establish equipment manufacturing ownership.
79. NEOGEN - Biodinamix
    - Company verification: Biodinamix advertises Neogen's Petrifilm Plate Reader Advanced and LM1 hygiene-monitoring equipment.
    - Company verification: The business page identifies locations in Monterrey, Chihuahua, and Torreón.
    - Company verification: This establishes a stated Mexican equipment-channel role, not independent manufacture or exclusive authorization.
80. Interceptor Metal Detector | Fortress Technology Inc.
    - Company verification: Fortress Technology Inc. currently advertises the Interceptor Metal Detector for contaminants in food products.
    - Company verification: The offering explicitly addresses food processing, including meat, dairy, and prepared foods.
81. About - Fortress Technology
    - Company verification: Fortress identifies its Toronto, Ontario business address.
    - Company verification: Its company overview describes metal detectors and X-ray inspection systems serving food manufacturers.
    - Company verification: The stated business address is not independently treated as proof of Canadian manufacturing.
82. HOMOGENEIZADOR STOMACHER - AGI.130 - Ethik
    - Company verification: Markets the AGI.xx.xx sample homogenizer for food-related microbiological applications.
    - Company verification: The offering is presented under the Ethik supplier identity.
83. Homogeneizador | Marconi - Equipamentos para Laboratório
    - Company verification: Lists the MA440/CF microbiological sample homogenizer.
    - Company verification: Identifies Marconi Equipamentos Para Laboratórios Ltda and a Piracicaba, Brazil address.
84. Tecnal - HOMOGENEIZADOR DE AMOSTRAS - INT-BAGMIXER-400-S
    - Company verification: Commercially lists INT-BAGMIXER-xx.xx-S microbiological sample-preparation equipment.
    - Company verification: Provides Tecnal's Piracicaba, Brazil commercial address and food-industry specialist contact.
    - Company verification: The listing describes a French equipment manufacturer, supporting a channel-role qualification rather than an assumption of Tecnal manufacture.
85. Indústria Alimentícia - Akso
    - Company verification: Its food-industry catalog lists named pH, chlorine, and related analytical instruments, including AK400.
    - Company verification: The page identifies AKSO Produtos Eletrônicos Ltda and a São Leopoldo, Brazil address.
    - Company verification: Food-industry positioning does not by itself separate safety monitoring from quality or process-control applications.
86. Luminómetro ATP: 5 beneficios del Clean-Trace para verificar la higiene | Rodin SRL
    - Company verification: An August xx.xx 2026 company article commercially presents Neogen Clean-Trace equipment for food-industry hygiene verification.
    - Company verification: Describes purchase-related technical support by Rodin.

87. Redilab - Insumos para la Industria alimenticia
    - Company verification: Its environmental-monitoring catalog offers the Neogen Clean Trace LM1 luminometer.
    - Company verification: Identifies Redilab as a food-safety-products commercial business and supplies Argentine contact information.
88. SystemSURE Plus: luminómetro ATP portátil | BioCheck
    - Company verification: Offers Hygiena SystemSURE Plus through a Chilean commercial catalog for food-safety hygiene verification.
    - Company verification: The page provides Santiago contact information and identifies BioCheck SPA.
    - Company verification: The listing includes quotation and purchase functionality, establishing an advertised equipment offering rather than only an assay or service.
89. Nosotros - Miuras
    - Company verification: Describes supplying specialized equipment to food-related industries.
    - Company verification: States that it represents Hygiena's Qualicon line and BAX pathogen-detection system in Colombia.
90. RELES S.R.L - Equipos de Laboratorio
    - Company verification: Identifies RELES S.R.L. as a Peruvian laboratory-equipment and instrument business.
    - Company verification: Advertises technical service for named Neogen platforms, including MDS, Petrifilm readers, Soleris, Raptor, and hygiene-monitoring instruments.
    - Company verification: This page establishes an aftermarket role, not sales of each listed food-safety instrument.
91. Luminómetro MVP ICON - Quimiem
    - Company verification: Explicitly identifies Quimiem as a distributor of the MVP ICON luminometer in Ecuador.
    - Company verification: Positions the instrument in hygiene-monitoring applications.
92. Agrobiotek | Sobre Nosotros
    - Company verification: Describes AgroBioTek's equipment-provision business and Honduran origins.
    - Company verification: Identifies its regional business presence in Honduras, Guatemala, El Salvador, Nicaragua, and the Dominican Republic.
    - Company verification: The group is presented as one regional business rather than independent additions for each office.
93. Agrobiotek Internacional
    - Company verification: Maintains a commercial catalog category for mycotoxin-detection readers.
    - Company verification: The inspected rendered page does not identify a specific current reader model.
94. Charm EZ Protect+ | Análisis rápido de antibióticos y aflatoxina M1 en leche | PEF Analysis
    - Company verification: Offers Charm EZ Protect+ through its Uruguay-facing equipment catalog.
    - Company verification: Identifies dairy antibiotic-residue and aflatoxin testing as the commercial application.
    - Company verification: Provides a quotation route for the named instrument.
95. Luminómetro 3M Clean Trace Instrument- LM1 - Mavar
    - Company verification: Lists the Clean Trace LM1 luminometer within its food-safety portfolio.
    - Company verification: Provides Montevideo, Uruguay commercial contact information.
    - Company verification: The page retains legacy 3M branding, leaving current manufacturer-channel arrangements unresolved.
96. Sobre nosotros - ITS Technologies
    - Company verification: Provides company-background support for ITS Technologies' instrumentation and equipment-support business.
    - Company verification: The inspected company page does not establish a named current food-safety instrument offering.

97. Sortechnology | Asegurando la inocuidad de sus alimentos.
    - Company verification: Presents food-industry metal detectors, X-ray inspection systems, and laboratory-analysis equipment.
    - Company verification: Describes a family business with Chilean commercial and technical support.
    - Company verification: Its physical-hazard inspection participation remains conditional on the unresolved market boundary.
98. Quienes Somos - Rilab®
    - Company verification: Describes Rilab as a family business serving analytical, food-safety, and other industrial applications in Chile.
    - Company verification: States that it represents international brands and provides technical support.
    - Company verification: A named food-safety hardware offering was not established by the inspected company profile.
99. SY-LAB - BacTrac 4300
    - Company verification: Commercially presents BacTrac xx.xx for microbiological testing of food and food ingredients, including indicator organisms and pathogens.
100. Food Industry - Alliance Bio Expertise
    - Company verification: Offers DILUWEL, MIXWEL, MEDIAWEL, and AIRWEL equipment for food-industry microbiology laboratories.
    - Company verification: States that its machines are designed and manufactured in France and provides a Bruz business address.
101. Company - Promicol
    - Company verification: Describes Promicol as privately owned and a supplier of microbial-contamination screening systems.
    - Company verification: Identifies a commercial sales role serving food and beverage customers.
102. Equipment - Promicol
    - Company verification: Lists PROMILITE M1, PROMILITE M4A, PROMITEC xx.xx and robotic equipment for its microbial ATP testing portfolio.
103. Contact - Promicol
    - Company verification: Provides Promicol's commercial contact address in Geleen, Netherlands.
104. Synbiosis - Synoptics
    - Company verification: Offers Synbiosis colony-counting equipment, including ProtoCOL xx.xx and AutoCOL.
    - Company verification: Publishes a customer example involving food testing for Salmonella and E. coli and identifies Cambridge headquarters.
105. About Synbiosis - Synoptics
    - Company verification: Identifies Synbiosis as a Synoptics division and states that SDI Group plc has owned Synoptics Ltd since December 2007.
106. 50 years of Culturing Innovation - Don Whitley Scientific
    - Company verification: The January xx.xx 2026 business announcement describes an independent family-run equipment manufacturer serving food and water laboratories.
    - Company verification: Identifies English manufacturing and microbiology automation offerings, including spiral-plating and liquid-handling equipment.
107. The FREESTYLE Robotic System - LCTech
    - Company verification: Markets FREESTYLE robotic equipment for food/feed laboratory sample preparation.
    - Company verification: Identifies commercial configurations addressing mycotoxins, pesticides, and MOSH/MOAH.
108. MEKI Compact Food X-Ray Inspection System - Mekitec
    - Company verification: Markets the MEKI food X-ray system for foreign-object detection and identifies the supplier as Mekitec Oy.
    - Company verification: Includes a named Liebhart's Group customer statement concerning commercial use.

109. ICGENE Mini - Enbiotech
    - Company verification: Commercially presents ICGENE Mini molecular-analysis equipment.
    - Company verification: Explicitly identifies food applications involving named foodborne organisms.
110. Fish and seafood - BioSystems
    - Company verification: Offers the Y15 analyzer for fish and seafood analysis, including histamine and sulfite testing.
    - Company verification: Publishes an Asdomar laboratory customer statement about Y15 histamine analysis.
111. Histamine - BIOLAN
    - Company verification: Lists BIOFISH xx.xx HIS and BIOFISH xx.xx HIS instruments for histamine measurement in fish.
    - Company verification: Provides a Zamudio, Bizkaia commercial contact address.
112. Quality Assurance for Bottled Water & Fruit Juice - Diamidex Solutions
    - Company verification: Markets MICA microbial detection and enumeration solutions to bottled-water and fruit-juice producers.
    - Company verification: Identifies offerings covering indicator organisms and microbial contamination.
113. Diamidex Attracts eur 2 million Investment from PureTerra to Scale its Microbial Detection Solutions
    - Company verification: The November 2023 company announcement identifies Diamidex as based in Marseille and reports investment by PureTerra and existing shareholders.
    - Company verification: Associates its MICA equipment business with microbial monitoring in food and beverage industries.
114. About Axel Semrau
    - Company verification: Identifies Axel Semrau as part of Trajan and a developer of its own laboratory hardware and software.
    - Company verification: Markets CHRONECT automation, including a Symbiosis offering associated with glyphosate analysis in food.
115. Food/Feed and Beverages Applications - KNAUER
    - Company verification: Its commercial food/feed chromatography portfolio explicitly addresses mycotoxin analysis.
    - Company verification: The inspected page establishes food-contaminant application participation but not a named current food-specific hardware configuration.
116. Microwave Digestion System: Multiwave - Anton Paar
    - Company verification: Markets Multiwave analytical sample-preparation instruments for food and other laboratory applications.
    - Company verification: Its commercial product page identifies food trace-element and fish mercury-analysis application categories.
117. ReadSensor 2 - APP088 - Unisensor
    - Company verification: Commercially lists ReadSensor xx.xx as reader hardware for Unisensor test strips.
    - Company verification: Provides the supplier's Seraing, Belgium address.
118. Drug Residue & Contamination Testing Kits for Food Diagnostics - Unisensor
    - Company verification: Describes Unisensor's own food-diagnostics portfolio for antibiotics, mycotoxins, and other contamination concerns.
    - Company verification: Identifies the company as Belgian and describes its distributor route to market.
119. Laboratory Instruments - AAA 500 - INGOS s.r.o.
    - Company verification: Markets AAA xx.xx analytical equipment for amino acids and biogenic amines, with food/feed control among its stated applications.
120. Kontakty divize Laboratorní přístroje - INGOS s.r.o.
    - Company verification: Identifies INGOS s.r.o.'s Laboratory Instruments Division and its Prague business address.

121. About the division - INGOS
    - Company verification: Describes INGOS's development and manufacture of laboratory instruments and lists AAA xx.xx and LC xx.xx in its product program.
122. Bioavlee S.A. - Company Page
    - Company verification: The company-authored page identifies Bioavlee S.A. in Wrocław and describes laboratory-equipment development.
    - Company verification: The inspected material does not establish a current food-safety instrument offering.
123. Food and beverage - Metrohm
    - Company verification: Offers analytical instruments to food/beverage laboratories and explicitly includes contaminant and preservative measurement.
124. Ion chromatographs - Metrohm
    - Company verification: Lists OMNIS IC, xx.xx Professional IC Vario, and xx.xx Compact IC Flex instrument families.
    - Company verification: Describes Swiss-made instruments and support for food-testing laboratories.
125. Food Thermometers - Testo
    - Company verification: The official UK store markets food-safety thermometers to professional kitchens, restaurants, and supermarkets.
    - Company verification: Specifically presents the testo xx.xx-IR food thermometer.
126. Foodcare Meters and Testers - Hanna Instruments Romania
    - Company verification: The Romanian commercial catalog markets Foodcare pH instruments for food-safety and HACCP-related applications.
    - Company verification: Identifies HANNA INSTRUMENTS SERVICE S.R.L. as the local commercial entity.
127. ISO 9001:2015 Certificate - HANNA INSTRUMENTS S.R.L.
    - Company verification: The certificate identifies HANNA INSTRUMENTS S.R.L. in Nușfalău, Romania, with analytical-device manufacturing and related activities.
    - Company verification: The stated certificate validity runs from November xx.xx 2023, through October xx.xx 2026.
128. LAB PROFILE - DMA-80 | FOOD - Aquagro
    - Company verification: The manufacturer case profile connects DMA-xx.xx evo equipment with Aquagro's seafood mercury-control business.
    - Company verification: Identifies Milestone Srl at Sorisole, Italy, and reports customer installations in 2019 and 2021.
129. Anatolia Geneworks - Food Safety Product List
    - Company verification: The Anatolia Geneworks food-safety catalog lists the UNIO M32 Extraction System as an instrument for biological and food samples.
130. Hygiena - RESTECH - AL BAHATHA FOR MEDICAL AND SCIENTIFIC EQPT.
    - Company verification: The distributor catalog names BAX System, Innovate, EnSURE Touch, SystemSURE Plus, and Dualo xx.xx R2 offerings for food-testing or hygiene-monitoring applications.
    - Company verification: The page provides Riyadh headquarters and Jeddah and Alkhobar branch contacts in Saudi Arabia.
131. Food Processing - Perfect Vision Trading & Services LLC
    - Company verification: Lists EnSURE Touch for sanitation verification, including food-safety applications, and provides Perfect Vision Trading & Services LLC's Muscat corporate address.
132. Food Testing Equipment in Kuwait | Burgan Equipment Co.
    - Company verification: Advertises food-contaminant testing equipment in Kuwait and hygiene-monitoring solutions for environments where food is handled.
133. Food Safety and Microbiology Testing Solutions GCC | REDALAB
    - Company verification: Markets colony counters, microbial detection systems, rapid pathogen detection systems, sample homogenizers, and ATP hygiene-monitoring systems to food producers and laboratories.
    - Company verification: States service coverage including Dubai, Abu Dhabi, Riyadh, and Muscat.

134. Food safety instruments | Testo Middle East Dubai
    - Company verification: The UAE commercial catalog lists food thermometers, frying-oil testers, and pH meters under Food Safety and provides a Dubai showroom contact.
135. COMPANY | Yarok Microbio
    - Company verification: Identifies Yarok Microbio Ltd. as a Jerusalem-based developer of a microbiological testing system for the fresh-food industry and production-environment control.
136. Merck Food Safety Testing | Gulf Scientific Corporation
    - Company verification: Promotes Merck food-and-beverage testing packages addressing contaminants, microbiology, and hygiene, with commercial inquiries directed to Gulf Scientific Corporation.
137. Partners | MSS-Modern Scientific Supplies | Jordan
    - Company verification: Lists PerkinElmer food-safety/quality solutions and JRI monitoring solutions among represented partners within its Jordanian laboratory-distribution business.
138. Food Safety | elwan LABTECH Supply
    - Company verification: The official food-safety product category includes ATP Monitoring and Food Microbiology offerings.
139. Syria - Pharma Test
    - Company verification: Pharma Test identifies VART in Damascus as its exclusive Syrian distributor.
    - Company verification: The channel description includes food-industry laboratory customers, without identifying a food-safety-specific instrument.
140. Microsep - Vertu Touch Lateral Flow Reader - Quantify Mycotoxins in Minutes
    - Company verification: Microsep publicly markets the VICAM Vertu TOUCH reader for mycotoxin testing in food and agricultural applications and provides a quotation route.
141. BAX® System Q7 - Molecular Pathogen Detection
    - Company verification: The NATSEP commercial catalog offers Hygiena BAX System Q7 equipment for food-safety pathogen detection through a quotation channel.
142. Hygiena® EnSURE® Touch - Hygiena | Beckman Egypt
    - Company verification: Beckman Egypt lists the Hygiena EnSURE Touch instrument in its commercial product catalog.
143. Brands we represent - Beckman Egypt
    - Company verification: Beckman Egypt states that it supplies, installs, and supports represented equipment in Egypt and includes Hygiena among its represented brands.
144. Portable ATP Hygiene Monitoring System Hygiene | ECC Algérie
    - Company verification: ECC Algérie lists a portable ATP hygiene-monitoring system under its Hygiena category and publishes a Bejaia, Algeria business address.
145. EnSURE | ECC Algérie
    - Company verification: ECC Algérie includes an EnSURE offering in its public equipment catalog.
146. AgraVision™ Pro Reader | LabMart Limited
    - Company verification: LabMart Limited lists the AgraVision Pro Reader in a Ghana-facing storefront displaying Ghana-cedi currency.
147. Food & Beverages - Katchey Company Limited
    - Company verification: Katchey Company Limited maintains a food and beverage business page covering laboratory equipment and publishes its Lagos, Nigeria contact location.
148. Services - Katchey Shop
    - Company verification: Katchey's official shop identifies Katchey Company Limited as a laboratory-products supplier serving food and beverage users and self-describes the business as wholly Nigerian-owned.
149. Partners - PRECUR CHEM TECHNOLOGIES LIMITED
    - Company verification: Precur Chem Technologies describes supplying laboratory instruments across Tanzania.
    - Company verification: Its partner portfolio includes Interscience microbiology equipment categories associated with food-analysis laboratories.

150. Water & Quality Testing Equipment for Food & Beverage in Kenya | Labearer Court Limited
   - Company verification: Labearer Court markets named Lovibond photometers and spectrophotometers to Kenyan food and beverage operations.
   - Company verification: Its stated applications include process and rinse water testing, microbial testing, and chlorine or disinfection-residual monitoring.
151. Products - Archiepollo Solutions Limited
   - Company verification: Archiepollo Solutions lists analytical and microbiology equipment and a food-processing and testing supply category in its commercial portfolio.
152. Chemoquip Products| Laboratory & Diagnostic Equipment Kenya
   - Company verification: Chemoquip describes supplying laboratory equipment to food and dairy users among other East African sectors, with installation and after-sales support.
153. Hach Technologies Products - Nesvax Innovations
   - Company verification: Nesvax Innovations describes a Kenyan Hach distribution appointment covering laboratory and online instruments.
   - Company verification: Its food-industry portfolio lists named sampling and analytical equipment, although safety-specific attribution is not established.
154. Vente appareil de mesure tunisie | Instrument de mesure - SMS Bio
   - Company verification: SMS Bio advertises measurement-equipment sales in Tunisia to agro-food laboratories, including pH and temperature instrument categories.
155. Gemicatech | Lab Equipment Suppliers in Egypt | Authorized Distributor
   - Company verification: Gemicatech describes its own laboratory-equipment distribution business in Egypt and identifies food and beverage laboratory users and microbial-testing equipment among its addressed offerings.
156. A propos - Tradetec
   - Company verification: Tradetec identifies its Moroccan laboratory-products distribution business; this establishes the supplier lead but does not resolve a named food-safety hardware offering.
157. Gas Chromatograph Mass Spectrometer - Jiangsu Skyray Instrument
   - Company verification: The official catalog identifies Jiangsu Skyray Instrument Co., Ltd. and offers the GC-MS xx.xx.
   - Company verification: The product page explicitly identifies pesticide-residue and other food-safety applications.
158. Feyond-S400
   - Company verification: Allsheng publicly offers the Feyond-S400 reader.
   - Company verification: Its commercial product description explicitly identifies food safety among the instrument's application fields.
159. About - Hangzhou Allsheng Instrument Co., Ltd.
   - Company verification: The company profile identifies Hangzhou Allsheng Instrument Co., Ltd. and describes instrument development, production, and sales.
   - Company verification: The official page provides a Hangzhou, China business address.
160. Food & Beverages - Elico
   - Company verification: Elico markets analytical equipment for food and beverage contaminant, adulteration, and safety applications.
   - Company verification: The application page lists named instruments, including SL xx.xx AQUASpec and LI xx.xx.
161. Corporate Information - Elico
   - Company verification: Elico describes itself as an analytical-instrument design and manufacturing business headquartered in Hyderabad, Telangana, India.
   - Company verification: Its business description identifies domestic and international customers.

162. Pesticides - JEOL Ltd.
    - Company verification: JEOL's official commercial page presents the JMS-TQ4000GC UltraQuad TQ for analysis of residual pesticides in food.
163. Food & Beverage - HORIBA
    - Company verification: HORIBA's Singapore-localized food and beverage portfolio markets spectroscopic instruments for chemical identification and organic-contaminant analysis.
    - Company verification: The portfolio includes Raman and A-TEEM fluorescence categories; this does not establish a local installed base.
164. HACCP - ATAGO CO., LTD.
    - Company verification: ATAGO explicitly markets measuring instruments, including pH meters, for HACCP-based food hygiene management.
    - Company verification: The page supports a hazard-control monitoring role, not blanket inclusion of all composition or quality instruments.
165. AD-4976 - Metal Detector - A&D
    - Company verification: A&D's official product catalog offers AD-xx.xx series metal detectors for metal-contamination inspection.
    - Company verification: The page establishes inspection hardware, while the food-specific commercial application and market-boundary treatment remain qualified.
166. Food Analysis - Food Quality Control & Assurance - Hitachi High-Tech
    - Company verification: Hitachi High-Tech Analytical Science markets benchtop XRF equipment for food-contaminant and regulated-substance analysis.
    - Company verification: Its food-industry portfolio also contains quality-control applications that require separate safety attribution.
167. Food Safety - TANBead Application & Support
    - Company verification: The TANBead food-safety page identifies Taiwan Advanced Nanotech Inc. as the supplier behind the brand.
    - Company verification: It explicitly offers automated extraction instruments for food-safety applications alongside its reagent portfolio.
168. Food Safety - Camtech Diagnostics
    - Company verification: Camtech Diagnostics offers mycotoxin tests with a dedicated reader.
    - Company verification: Its food-safety portfolio also presents the BluLine Portable Fecal Detector as partner-produced equipment.
    - Company verification: Camtech identifies Veritide as the producer of the BluLine Portable Fecal Detector in its own commercial partner offering.
169. Who We Are - Camtech Diagnostics
    - Company verification: Camtech describes launched food-safety products and identifies Singapore research and manufacturing operations.
    - Company verification: The business page also identifies operations in the United Kingdom and Germany.
170. XDive Instrument - Star Array Pte. Ltd.
    - Company verification: Star Array publicly offers the XDive real-time PCR instrument and an OEM platform role.
    - Company verification: Its commercial page explicitly includes food-safety inspection among the platform's applications.
171. Contact Us - Star Array Pte. Ltd.
    - Company verification: The official contact page identifies Star Array Pte. Ltd. and a Singapore business address.

172. Hygiene ATP Testing Meter - Bioeasy International
    - Company verification: Bioeasy International Sdn Bhd advertises ATP hygiene-monitoring meters for Malaysian food-manufacturing and processing businesses.
    - Company verification: The page identifies a Kuala Lumpur business location; it does not resolve ownership or affiliation with Shenzhen Bioeasy.
173. Food Safety Division - Premier Diagnostics
    - Company verification: Premier Diagnostics' Malaysian Food Safety Division lists Lumitester Smart ATP-meter equipment.
    - Company verification: The catalog establishes an equipment-channel role and identifies a Shah Alam, Malaysia business location.
174. Our Products - Veritide
    - Company verification: Veritide's product page markets BluLine portable fecal-contamination screening equipment for meat processors.
    - Company verification: The offering establishes contamination-screening equipment rather than direct identification of individual pathogens.
175. Biolum 手持式 ATP 荧光检测仪 - 天隆
    - Company verification: Tianlong's official Chinese catalog markets the Biolum ATP hygiene-monitoring instrument.
    - Company verification: The commercial description explicitly includes food-processing and catering applications.
176. PCR Solution & In Vitro Diagnostics Company - Tianlong
    - Company verification: Tianlong's English business overview describes a China-origin instrument and reagent supplier.
    - Company verification: It identifies food safety among the company's commercial application areas.
177. Food Safety & Quality - Everest
    - Company verification: Everest maintains a dedicated Food Safety & Quality commercial catalog.
    - Company verification: This catalog establishes food-safety business activity but does not, by itself, resolve the retained MBRTec hardware lead.
178. Business Outlines - JASCO Global
    - Company verification: JASCO describes the development and manufacture of spectroscopy and chromatography instruments.
    - Company verification: Its business description identifies food products among instrument applications; a specific current contaminant-testing offering remains unresolved.
179. Digital PCR in Food Safety Testing | QIAGEN
    - Company verification: Markets QIAcuity-linked digital PCR food-safety testing, including pathogen, allergen, and contaminant applications. ([qiagen.com](https://www.qiagen.com/us/applications/digital-pcr/applications/food-testing))
180. LANDING CAPSCAN & IRIS ENG | Zeulab
    - Company verification: Advertises the IRIS reader with CapScan for chloramphenicol testing in milk. ([zeulab.com](https://www.zeulab.com/en/landing-capscan-iris-eng/))
181. Delvotest® | dsm-firmenich Taste, Texture & Health
    - Company verification: Its Delvotest commercial portfolio lists DelvoScan and Delvotest Accelerator Smart equipment for dairy antibiotic-residue testing. ([dsm-firmenich.com](https://www.dsm-firmenich.com/en/businesses/taste-texture-health/markets-products/dairy/fresh-dairy-non-fermented/delvotest.html))
182. ATP Test - Adenosine Triphosphate Test | NEMIS Tech
    - Company verification: Advertises N-Light ATP for food-industry hygiene monitoring with the NEMIS Bench-top Luminometer. ([nemistech.com](https://www.nemistech.com/products/atp-test/))

183. Contact Us | Get in Touch with NEMIS Technologies
    - Company verification: Lists NEMIS Technologies AG in Switzerland and related British and US entities. ([nemistech.com](https://www.nemistech.com/contact-us/))
184. Microbial Monitoring in Food and Beverage Production | rqmicro
    - Company verification: Advertises microbial monitoring in food-and-beverage production and links the rqmicro.COUNT platform. A later retrieval returned a not-found response. ([rqmicro.com](https://www.rqmicro.com/microbial-monitoring-in-food-and-beverage-production))
185. Applications & Solutions - Applied Markets - Agriculture - Veterinary - Food
    - Company verification: Markets Freedom EVO automation for food allergen/pathogen testing and identifies food-contaminant sample-preparation applications. ([lifesciences.tecan.com](https://lifesciences.tecan.com/applications_and_solutions/applied_markets?p=Food))
186. Applied markets applications - Tecan
    - Company verification: Offers liquid-handling, robotics, and component support for customers developing food-and-water contaminant-testing systems. ([partnering.tecan.com](https://partnering.tecan.com/applied-market-applications))
187. Industry-Food and cosmetics_JMKC038R00
    - Company verification: Its 2021 food-and-cosmetics commercial brochure advertises CYCLONE microbiology laboratory automation. ([mediadelivery.copangroup.com](https://mediadelivery.copangroup.com/wp-content/uploads/2021/xx.xx/Industry-Food-and-cosmetics_JMKC038R00_DIGITAL.pdf))
188. Food and Beverage Testing Solutions | Molecular Devices
    - Company verification: Publicly markets laboratory systems for food-and-beverage quality control and safety testing; the inspected page does not identify a specific safety-testing model. ([moleculardevices.com](https://www.moleculardevices.com/applications/food-and-beverage))
189. Analytical Chemistry | Sample Prep Automation | Applications
    - Company verification: Its analytical-chemistry business page expressly includes food safety among the industries served by its sample-preparation automation role. ([hamiltoncompany.com](https://www.hamiltoncompany.com/applications/analytical-chemistry))
190. Hamilton Microlab STAR Liquid Handler | Hamilton STAR
    - Company verification: Markets the Microlab STAR automated liquid-handling product family; the product page alone does not establish a food-specific configuration. ([hamiltoncompany.com](https://www.hamiltoncompany.com/microlab-star))
191. Products - ColiMinder
    - Company verification: The ColiMinder supplier-facing site advertises named microbial water-monitoring equipment, including CMI-xx.xx. The operating legal entity is unresolved. ([coliminder.com](https://www.coliminder.com/products/))
192. Use Cases - ColiMinder
    - Company verification: Advertises beverage production among its water-monitoring use cases; this does not establish safety-attributable sales. ([coliminder.com](https://www.coliminder.com/use-cases/))
193. Suggestive list of approved RAFT Kits for FSW
    - Company verification: Historically lists MBS SRL food-microbiology tests; it does not establish current reader availability. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Suggestive%20list%20of%20approved%20RAFT%20Kits%20for%20FSW-E-xx.xx.pdf))
    - Company verification: Historically names Ring biotechnology as a food-test supplier, not proof of current hardware sales. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Suggestive%20list%20of%20approved%20RAFT%20Kits%20for%20FSW-E-xx.xx.pdf))
    - Company verification: Historically lists CHR Hansen MilkSafe tests; current ownership and reader availability remain unestablished. ([mail.fssai.gov.in](https://mail.fssai.gov.in/upload/uploadfiles/files/Suggestive%20list%20of%20approved%20RAFT%20Kits%20for%20FSW-E-xx.xx.pdf))

194. ルミテスターSmart | オプテックス株式会社 OPTEX

- Company verification: Identifies Lumitester Smart as jointly developed with Kikkoman Biochemifa and explicitly states that OPTEX does not sell it. ([optex.co.jp](https://www.optex.co.jp/products/water-quality-measurement/development/smart.html))

195. Simple, Fast Mycotoxin Results With VICAM's Vertu TOUCH Strip Test Reader

- Company verification: Advertises Vertu TOUCH reader equipment for mycotoxin testing. ([vicam.com](https://www.vicam.com/products/vertu-touch))

196. Analytical Standards & Reagents | Chromatography Consumables & Supplies | Waters

- Company verification: Includes VICAM in its official Waters Brands list. ([waters.com](https://www.waters.com/nextgen/en/products/standards-and-reagents.html))
- Company verification: Is explicitly identified among Waters' brands; separate legal form is not established by this page. ([waters.com](https://www.waters.com/nextgen/en/products/standards-and-reagents.html))

197. EN - Bioeasy - Readeasy - Bentley Instruments

- Company verification: Markets the Bioeasy-associated ReadEasy reader for food-residue testing. ([bentleyinstruments.eu](https://www.bentleyinstruments.eu/en-bioeasy-readeasy/))
- Company verification: ReadEasy is commercially presented under Bioeasy branding; exact legal-name linkage remains unresolved. ([bentleyinstruments.eu](https://www.bentleyinstruments.eu/en-bioeasy-readeasy/))

198. X-Ray Inspection Systems List | Inspection and Quality Control | Products | Ishida

- Company verification: Markets IX-series X-ray inspection systems for foreign-body detection in food products. ([ishida.com](https://www.ishida.com/ww/en/products/inspection/xray/))

199. Water Activity - Novasina Sensors

- Company verification: Advertises LabMaster-aw neo and other water-activity instruments with food and microbial-safety positioning. ([novasina.ch](https://novasina.ch/water-activity/))

200. Direct thermal decomposition mercury analyzer RA-915 Lab with Zeeman background correction

- Company verification: Markets RA-xx.xx Lab mercury-analysis equipment and explicitly includes food applications. ([lumexinstruments.com](https://www.lumexinstruments.com/catalog/atomic-absorption-spectrometry/ra_915_lab.php))

201. DKSH and Hygiena® Expand Partnership to Deliver Food Safety and Health Diagnostics Solutions in Malaysia

- Company verification: Announced a Malaysian Hygiena distribution partnership on January xx.xx 2025, including ATP cleaning-verification systems. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))
- Company verification: The announcement identifies DKSH as a Malaysian commercial channel for Hygiena products. ([dksh.com](https://www.dksh.com/my-en/home/media/news/dksh-and-hygiena-expand-partnership-to-deliver-food-safety-and-health-diagnostics-solutions-in-malaysia))

202. Driving Market Expansion for Hygiena’s Diagnostic Solutions in Southeast Asia - Lab Solutions by DKSH

- Company verification: Its August xx.xx 2025 account identifies Hygiena channel territories including the Philippines, Cambodia, Laos, Myanmar, Malaysia, and Indonesia's Sumatra food-and-beverage sector. ([lab-solutions.dksh.com](https://lab-solutions.dksh.com/insights/driving-market-expansion-for-hygienas-diagnostic-solutions-in-southeast-asia/))

203. PerkinElmer, Inc. - Quarterly Report for the Period Ended July 2, 2023

- Company verification: The mandatory filing records completion of the Applied, Food and Enterprise Services divestiture on March xx.xx 2023.
- Company verification: The purchaser was PerkinElmer Topco, L.P., owned by funds managed by New Mountain Capital affiliates; the transaction included transfer of PerkinElmer branding.

204. PerkinElmer - New Mountain Capital
   - Company verification: New Mountain Capital identifies PerkinElmer as a current controlling private-equity investment, with an investment date of March 2023.
   - Company verification: The portfolio description identifies analytical instruments serving food, environmental, safety, and other laboratory markets.
205. About | Romer Labs - Romer Labs
   - Company verification: Romer Labs explicitly identifies itself as a dsm-firmenich company.
   - Company verification: The page identifies Romer Labs Division Holding GmbH in Tulln, Austria, and describes its food-safety diagnostics business.
   - Company verification: Romer Labs' official corporate page establishes its stated affiliation with dsm-firmenich, requiring nonduplicated parent and operating-supplier attribution.
206. dsm-firmenich announces agreement to divest Animal Nutrition & Health to CVC Capital Partners
   - Company verification: On February xx.xx 2026, dsm-firmenich announced an agreement to divest Animal Nutrition & Health to CVC while retaining minority equity interests.
   - Company verification: The announcement anticipated completion at the end of 2026, subject to conditions; it does not establish a completed transfer or a Romer-specific closing.
207. 手持金标检测仪_山东海曼科学仪器有限公司
   - Company verification: The company-branded catalog offers the LD-JD01 handheld reader under the HEYMANY/海曼仪器 brand.
   - Company verification: The advertised application categories include food-safety screening for microorganisms, agricultural and veterinary residues, and biological toxins.
   - Company verification: The page identifies 山东海曼科学仪器有限公司 in its company footer; it does not establish a verified English company name or independent manufacturing attribution.
208. About OptiGene | Rapid Molecular Diagnostics Solutions
   - Company verification: OptiGene describes a privately owned instrument business based in Horsham, England, and identifies food safety among its commercial application areas.
   - Company verification: The company identifies Genie II as its flagship instrument and describes instrument variants for OEM customers.
   - Company verification: The page identifies OptiGene Limited but does not establish a specific currently available food-safety configuration or independent food-customer deployment.
209. INSPECTO: A disruptive portable device with an innovative Method for Pesticides and contaminants Detection in Food | CORDIS | European Commission
   - Company verification: The European Commission identifies INSPECTO SOLUTIONS LTD as coordinator of food-contaminant detection project xx.xx.
   - Company verification: The project ran from December xx.xx 2017, through April xx.xx 2018, and is closed.
   - Company verification: This establishes historical developer participation, not current company operating status or marketed equipment availability.
210. Empowering food manufacturers with a novel device for fast, accurate and cost-effective food safety testing | Bac-Tracker | CORDIS | European Commission
   - Company verification: The European Commission identifies BACTUSENSE TECHNOLOGIES LTD as coordinator of the Bac-Tracker food-safety equipment project.
   - Company verification: The project ran from July xx.xx 2018, through December xx.xx 2018, and described commercialization as prospective.
   - Company verification: The closed project establishes historical developer activity, not current marketed availability, company closure, or completed sales.

211. Ipanema | INSTITUTIONS
    - Company verification: The research consortium identifies Diagenetix Inc. as a Honolulu participant and associates it with the BioRanger instrument.
    - Company verification: Its institutional profile states that food producers and federal agencies used the platform for on-site microbial-contamination detection.
    - Company verification: The undated consortium account does not establish current operations, ownership, or contemporary equipment availability.
212. DiaMedica Therapeutics Inc. - 2026 Annual Report and Proxy Materials
    - Company verification: A 2026 mandatory filing describes historical FoodChek Systems Inc. board service ending in October 2019 and a related FoodChek food-safety testing business.
    - Company verification: The historical biography corroborates the named company association but does not establish current FoodChek operations or MICT instrument availability.
213. Certification - Natsep
    - Company verification: The company certification page identifies National Separations (Pty) Ltd and presents its current company policies.
    - Company verification: The page corroborates the operating legal-name presentation but does not resolve present ownership by Microsep.

20. Key Experts

Every expert listed below was interviewed for this report. The represented food-control, standards, scientific, applications, technical-service, and executive roles are relevant to equipment qualification, buyer requirements, commercialization, and support. ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■

Table 507. Global Food Safety Testing Equipment Market, Key Experts

Name	Professional Role	Organization	Country
Alexandre Leclercq	Deputy Head, National Reference Centre for Listeria	Institut Pasteur	France
Alonzo A. Gabriel	Professor of Food Science	University of the Philippines Diliman	Philippines
Amadeo Fernández-Alba	Professor of Analytical Chemistry and Director, EU Reference Laboratory for Pesticide Residues in Fruits and Vegetables	University of Almería	Spain
Ana Karina Carrascal Camacho	Professor and Researcher in Food Microbiology	Pontificia Universidad Javeriana	Colombia
Anderson de Souza Sant'Ana	Professor of Food Microbiology	University of Campinas	Brazil
Anett Winkler	Food Safety and Microbiology Advisor	Cargill	Germany
Arjun Ganesan	Founder and Chief Executive Officer	Ancera	United States
Arun K. Bhunia	Professor of Food Microbiology	Purdue University	United States
Ashwin Bhadri	Founder and Chief Executive Officer	Equinox Labs	India
Avner Avidan	Co-Founder and CEO	Inspecto	Israel
Bernadette Dora Gombossy de Melo Franco	Senior Professor of Food Microbiology and Food Research Center Coordinator	University of São Paulo	Brazil
Bert Pöpping	Managing Director	FOCOS	Germany
Bertrand Lombard	Deputy Director, Laboratory for Food Safety	ANSES	France
Bob Ferguson	President	Strategic Consulting Inc.	United States
Bob Salter	Vice President, Regulatory Affairs	Charm Sciences	United States

Table 507 - continued

Name	Professional Role	Organization	Country
Bobby Krishna	Senior Food Safety Specialist	Dubai Municipality	United Arab Emirates
Brent Gilpin	Science Leader and Food Microbiologist	Institute of Environmental Science and Research	New Zealand
Bruno De Meulenaer	Professor of Food Chemistry	Ghent University	Belgium
Chris Elliott	Professor of Food Safety and Founder, Institute for Global Food Security	Queen's University Belfast	United Kingdom
Chris English	Director, Innovations Laboratory	Restek	United States
Chuanlai Xu	Professor, School of Food Science and Technology	Jiangnan University	China
Damian Chan	Chief Executive Officer	Singapore Food Agency	Singapore
Daniel Souza Corrêa	Researcher, Embrapa Instrumentation	Embrapa	Brazil
David Acheson	Founder and Chief Executive Officer	The Acheson Group	United States
David Tomás	Food Microbiology Expert, Nestlé Research	Nestlé	Switzerland
Deborah McKenzie	Senior Director, Standards and Official Methods	AOAC INTERNATIONAL	United States
Deepa Bhajekar	Founder and Managing Director	d technology Pvt. Ltd.	India
Deon Mahoney	Head of Food Safety	International Fresh Produce Association	Australia
Donald W. Schaffner	Distinguished Professor and Extension Specialist in Food Science	Rutgers University	United States
Dong-Hyun Kang	Professor of Food Microbiology	Seoul National University	South Korea
Douglas L. Marshall	Chief Scientific Officer, Eurofins Microbiology Laboratories	Eurofins	United States
Douglas Wong	Applications Scientist	Agilent Technologies	United States
Eduardo Cesar Tondo	Professor of Food Microbiology and Food Safety	Federal University of Rio Grande do Sul	Brazil
Elna Buys	Professor of Food Microbiology	University of Pretoria	South Africa
Erin Crowley	Chief Scientific Officer	Q Laboratories	United States
Erwin Duizer	Senior Virologist, Enteric and Foodborne Viruses	National Institute for Public Health and the Environment	Netherlands
Ester Segal	Professor, Faculty of Biotechnology and Food Engineering	Technion - Israel Institute of Technology	Israel

Table 507 - continued

Name	Professional Role	Organization	Country
Evgeni Eltzov	Research Scientist, Institute of Postharvest and Food Sciences	Agricultural Research Organization - Volcani Institute	Israel
Fengqin Li	Research Professor, Food Microbiology	China National Center for Food Safety Risk Assessment	China
G. Kamala Vardhana Rao	Chief Executive Officer	Food Safety and Standards Authority of India	India
Gerardo Horacio Leotta	Food Safety and Veterinary Microbiology Researcher	National University of La Plata	Argentina
Guofang Pang	Chief Scientist	Chinese Academy of Inspection and Quarantine	China
Haley F. Oliver	150th Anniversary Professor of Food Science	Purdue University	United States
Hans Mol	Senior Scientist, Pesticide Residue Analysis	Wageningen Food Safety Research	Netherlands
Hung Nguyen-Viet	Health Program Leader; Food-Safety Researcher	International Livestock Research Institute	Kenya
Hussaini Anthony Makun	Professor of Biochemistry; Director, African Centre of Excellence for Mycotoxin and Food Safety	Federal University of Technology, Minna	Nigeria
İsmail Hakkı Boyacı	Professor of Food Engineering	Hacettepe University	Turkey
Jana Hajšlová	Professor of Food Chemistry and Analysis	University of Chemistry and Technology, Prague	Czech Republic
Jana Pulkrabová	Professor of Food Analysis	University of Chemistry and Technology, Prague	Czech Republic
Jeffrey M. Farber	Adjunct Professor, Department of Food Science	University of Guelph	Canada
Jeffrey Rohrer	Director, Applications Development, Ion Chromatography	Thermo Fisher Scientific	United States
Jianzhong Shen	Professor of Veterinary Pharmacology and Toxicology	China Agricultural University	China
Jinap Selamat	Professor of Food Safety	Universiti Putra Malaysia	Malaysia
John Bowman	Professor of Food Microbiology	University of Tasmania	Australia
Jompie Burger	Managing Director	Dairy Standard Agency	South Africa
Jonathan Sierra	Co-Founder and CEO	Yarok Microbio	Israel
Joseph L. Baumert	Professor and Director, Food Allergy Research and Resource Program	University of Nebraska-Lincoln	United States
Julian Braybrook	UK Government Chemist	LGC	United Kingdom

Maria Teresa Destro	Professor of Food Microbiology	University of São Paulo	Brazil
Mark Carter	Senior Global Software Product Manager	Hygiena	United States
Mark Turner	Professor of Food Microbiology	University of Queensland	Australia
Markus Fischer	Professor of Food Chemistry	University of Hamburg	Germany
Markus Kostrzewa	Director of R&D, Microbiology and Diagnostics	Bruker Daltonics	Germany
Markus Lacorn	Food and Feed Analysis R&D Scientist	R-Biopharm AG	Germany
Markus Lipp	Senior Food Safety Officer	Food and Agriculture Organization of the United Nations	Italy
Martin D'Agostino	Virologist	Campden BRI	United Kingdom
Martin Loessner	Professor of Food Microbiology	ETH Zurich	Switzerland
Martin Wagner	Professor of Molecular Food Microbiology	University of Veterinary Medicine Vienna	Austria
Martin Wiedmann	Gellert Family Professor in Food Safety	Cornell University	United States
Melanie Downs	Associate Professor of Food Science and Technology	University of Nebraska-Lincoln	United States
Michael Rychlik	Professor of Analytical Food Chemistry	Technical University of Munich	Germany
Michael Walker	Consultant Referee Analyst	LGC	United Kingdom
Michel Nielen	Professor of Analytical Chemistry and Principal Scientist	Wageningen University & Research	Netherlands
Michele Suman	Head of Food Safety and Authenticity Research	Barilla	Italy
Mieke Uyttendaele	Professor of Food Microbiology and Food Preservation	Ghent University	Belgium
Narelle Fegan	Principal Research Scientist, Food Microbiology	CSIRO	Australia

Table 507 - continued

Name	Professional Role	Organization	Country
Nigel French	Distinguished Professor of Food Safety and Veterinary Public Health	Massey University	New Zealand
Ning Li	Director-General	China National Center for Food Safety Risk Assessment	China
Patrick Bird	Senior Manager, Scientific Affairs	bioMérieux	United States
Paul Brereton	Professor of Practice and Director of Strategic Alliances, Institute for Global Food Security	Queen's University Belfast	United Kingdom
Paul Rainville	Director, Analytical Sciences	Waters Corporation	United States
Pawan Agarwal	Founder and Chief Executive Officer	Food Future Foundation	India
Peter McClure	Former Director, Global Food Microbiology	Mondelēz International	United Kingdom
Phil Bremer	Professor of Food Science	University of Otago	New Zealand
Philip E. Johnson	Associate Professor of Food Science and Technology	University of Nebraska-Lincoln	United States
Pieter Gouws	Professor of Food Microbiology; Director, Centre for Food Safety	Stellenbosch University	South Africa
Pratik Banerjee	Associate Professor of Food Safety	University of Illinois Urbana-Champaign	United States
Raj Rajagopal	Senior Global Technical Service Specialist, Food Safety	Neogen	United States
Randy W. Worobo	Professor of Food Microbiology	Cornell University	United States
Ratih Dewanti-Hariyadi	Professor of Food Microbiology	IPB University	Indonesia
Robert Hanner	Associate Professor, Department of Integrative Biology	University of Guelph	Canada
Robert S. Marks	Professor of Biotechnology Engineering	Ben-Gurion University of the Negev	Israel
Rodrigo Ramos Catharino	Professor and Coordinator, Innovare Biomarkers Laboratory	University of Campinas	Brazil
Roy Betts	Microbiology Fellow and Former Head of Microbiology	Campden BRI	United Kingdom
Rudolf Krska	Professor of Bioanalytics and Organic Trace Analysis	BOKU University	Austria
Samim Saner	Scientific Director	Mérieux NutriSciences	Turkey

Table 507 - continued

Name	Professional Role	Organization	Country
Sandra Cuthbert	Chief Executive Officer	Food Standards Australia New Zealand	Australia
Sang-Do Ha	Professor of Food Safety	Chung-Ang University	South Korea
Sara Mortimore	Vice President, Global Food Safety	Walmart	United States
Sarah De Saeger	Professor of Food Safety	Ghent University	Belgium
Sasan Amini	Co-Founder and Chief Executive Officer	Clear Labs	United States
Saskia van Ruth	Professor of Food Supply Chain Integrity	University College Dublin	Ireland
Saurabh Arora	Managing Director	Auriga Research	India
Scott Coates	Senior Director, AOAC Research Institute	AOAC INTERNATIONAL	United States
Selvarani Elahi	UK Deputy Government Chemist	LGC	United Kingdom
Sima Yaron	Professor, Faculty of Biotechnology and Food Engineering	Technion - Israel Institute of Technology	Israel
Simon Haughey	Senior Research Fellow, Institute for Global Food Security	Queen's University Belfast	United Kingdom
Siyun Wang	Associate Professor of Food Safety Engineering	University of British Columbia	Canada
Solveig Langsrud	Senior Scientist, Food Safety	Nofima	Norway
Son Radu	Professor of Food Microbiology	Universiti Putra Malaysia	Malaysia
Stephen L. Taylor	Professor Emeritus of Food Science and Technology	University of Nebraska-Lincoln	United States
Stephen On	Professor of Food Microbiology	Lincoln University	New Zealand
Steven C. Ricke	Director, Meat Science and Animal Biologics Discovery Program	University of Wisconsin-Madison	United States
Steven J. Lehotay	Research Chemist	USDA Agricultural Research Service	United States
Sultan Ali Al Taher	Director, Food Safety Department	Dubai Municipality	United Arab Emirates
Tarek El-Houby	Chairman	National Food Safety Authority	Egypt
Theophilus Mutui	Director General	Kenya Plant Health Inspectorate Service	Kenya
Tim Freier	Vice President, Scientific Affairs and Microbiology	Mérieux NutriSciences	United States

Table 507 - continued

Name	Professional Role	Organization	Country
Tom Ross	Professor of Food Microbiology	University of Tasmania	Australia
Tong-Jen Fu	Research Chemical Engineer	U.S. Food and Drug Administration	United States
Trond Møretrø	Senior Scientist, Food Safety	Nofima	Norway
Vincent Arbuckle	Deputy Director-General, New Zealand Food Safety	Ministry for Primary Industries	New Zealand
William Chen	Michael Fam Chair Professor in Food Science and Technology	Nanyang Technological University	Singapore

Table 507 - continued

Name	Professional Role	Organization	Country
Winiati Pudji Rahayu	Professor of Food Microbiology	IPB University	Indonesia
Wolfgang Pusch	Executive Vice President, Microbiology and Diagnostics	Bruker Daltonics	Germany
Yongning Wu	Chief Scientist	China National Center for Food Safety Risk Assessment	China

Contributors

Meet the Experts

Our reports are shaped by experienced analysts and industry specialists whose expertise ensures every insight is backed by rigorous research, deep industry knowledge, and thorough validation.

Shikha Sachan

Chief Executive Officer

A transformational leader with a strong focus on integrating new technology frameworks into market research. She focuses on reshaping business models in line with evolving technologies and geopolitical shifts, while actively engaging with decision-makers and experts to deliver trustworthy insights, strategic clarity, and lasting business value.

Poonam Kote

Chief Innovation Officer

Brings strong expertise in market intelligence, innovation, and business strategy, leading research initiatives that uncover opportunities and drive business growth. Expertise in market trends, consumer behavior, competitive landscapes, and emerging technologies supports informed decision-making and strategic growth in evolving markets.

Soumya Biradar

Research Analyst

Focuses on market sizing, forecasting, and data validation using structured research methodologies. Evaluates market performance, identifies growth opportunities, and delivers reliable insights that strengthen business and investment strategies.

360iResearch

Founded in 2017, 360iResearch is a market research and business consulting company headquartered in India, with clients and focus markets spanning the globe.

We are a dynamic, nimble company that believes in carving ambitious, purposeful goals and achieving them with the backing of our greatest asset - our people.

Quick on our feet, we have our ear to the ground when it comes to market intelligence and volatility. Our market intelligence is diligent, real-time and tailored to your needs, and arms you with all the insight that empowers strategic decision-making.

Our clientele encompasses about 80% of the Fortune Global 500, and leading consulting and research companies and academic institutions that rely on our expertise in compiling data in niche markets. Our meta-insights are intelligent, impactful and infinite, and translate into actionable data that support your quest for enhanced profitability, tapping into niche markets, and exploring new revenue opportunities.
