Motion Positioning Stages Market

Global Forecast 2026-2032

MRR-F3183FD143B9 | October 2026

Great Place To Work. Certified FEB 2026-FEB 2027 INDIA

Table of Contents

1. Preface 7
   1.1. Objectives of the Study 7
   1.2. Market Definition 7
   1.3. Market Segmentation & Coverage 8
   1.4. Years Considered for the Study 18
   1.5. Currency Considered for the Study 18
   1.6. Language Considered for the Study 18
   1.7. Key Stakeholders 18
2. Research Methodology 20
   2.1. Introduction 20
   2.2. Research Design 20
      2.2.1. Primary Research 21
      2.2.2. Secondary Research 21
   2.3. Research Framework 22
      2.3.1. Qualitative Analysis 22
      2.3.2. Quantitative Analysis 23
   2.4. Market Size Estimation 23
      2.4.1. Top-Down Approach 23
      2.4.2. Bottom-Up Approach 23
   2.5. Data Triangulation 24
   2.6. Research Outcomes 24
   2.7. Research Assumptions 25
   2.8. Research Limitations 25
3. Executive Summary 26
   3.1. Introduction 26
   3.2. CXO Perspective 26
   3.3. New Revenue Opportunities 27
   3.4. Next-Generation Business Models 28
   3.5. Industry Roadmap 29
4. Market Overview 30
   4.1. Introduction 30
   4.2. Key Growth Contribution 33
   4.3. Industry Ecosystem & Value Chain Analysis 66
      4.3.1. Supply-Side Analysis 67
      4.3.2. Demand-Side Analysis 67
      4.3.3. Stakeholder Analysis 68
   4.4. Market Dynamics 68
      4.4.1. Key Drivers 69
         4.4.1.1. Software-supported microscopy creates configuration-specific purchase triggers 69
         4.4.1.2. Packaged control can simplify the purchasing interface 69
         4.4.1.3. Environmental requirements create variant-specific demand 69

4.4.2. Key Restraints 70
4.4.2.1. Installed integration requirements restrict practical switching 70
4.4.2.2. Equipment-program timing separates interest from commitment 70
4.4.2.3. Repair and accessory upgrades compete with stage replacement 70
4.4.3. Key Opportunities 71
4.4.3.1. Bounded motion modules for OEM incorporation 71
4.4.3.2. Environment-matched catalog and modification routes 71
4.4.3.3. Institutional delivery with continuing support 71
4.4.4. Key Challenges 71
4.4.4.1. Comparable quotations require a common delivery boundary 71
4.4.4.2. Channel access does not establish service accountability 72
4.4.4.3. Environmental coverage must remain aligned with the selected configuration 72
4.5. Porter's Five Forces Analysis 72
4.6. PESTLE Analysis 73
4.7. Market Outlook 74
4.7.1. Near-Term Market Outlook (0-2 Years) 75
4.7.2. Medium-Term Market Outlook (3-5 Years) 75
4.7.3. Long-Term Market Outlook (5-10 Years) 75
4.8. Go-to-Market Strategy 76
5. Market Insights 78
5.1. Consumer Insights & End-User Perspective 78
5.2. Consumer Experience Benchmarking 78
5.3. Opportunity Mapping 79
5.4. Distribution Channel Analysis 80
5.5. Pricing Trend Analysis 81
5.6. Regulatory Compliance & Standards Framework 81
5.7. ESG & Sustainability Analysis 82
5.8. Disruption & Risk Scenarios 82
5.9. Return on Investment & Cost-Benefit Analysis 83
6. Cumulative Impact of Artificial Intelligence 2026 85
7. Motion Positioning Stages Market, by Stage Configuration 87
7.1. Single-Axis Linear Stages 96
7.2. Multi-Axis Translation Stages 102
7.3. Combined Translation-Angular Stages 109
7.4. Single-Axis Rotary Stages 116
7.5. Multi-Axis Angular Stages 123
7.6. Single-Axis Goniometer and Tilt Stages 129
8. Motion Positioning Stages Market, by Actuation Mode 137
8.1. Electrically Actuated Stages 144
8.2. Drive-Ready Stages 150
8.3. Manual Stages 157
8.4. Pneumatically Actuated Stages 163
8.5. Mixed-Actuation Stages 170
8.6. Hydraulically Actuated Stages 176

9. Motion Positioning Stages Market, by Drive Mechanism 183
9.1. Screw Drives 192
9.2. Direct Electromagnetic Drives 198
9.3. Fluid-Pressure Drives 205
9.4. Direct Piezoelectric Drives 211
9.4.1. Piezoelectric Deformation Drives 218
9.4.2. Piezoelectric Motor Drives 224
9.5. Belt and Cable Drives 230
9.6. Hybrid and Mixed Drives 236
9.7. Rotary Gear Drives 242
9.8. Stages Without Installed Drive Mechanisms 249
9.9. Cam, Wedge, and Linkage Drives 255
9.10. Rack-and-Pinion Drives 261
9.11. Friction-Roller Drives 267
10. Motion Positioning Stages Market, by Guidance Technology 273
10.1. Ball-Bearing Stages 282
10.2. Roller-Bearing Stages 289
10.3. Flexure-Guided Stages 296
10.4. Air-Bearing Stages 302
10.5. Sliding-Bearing Stages 308
10.6. Mixed-Guidance Stages 314
10.7. Liquid-Hydrostatic-Bearing Stages 320
10.8. Magnetically Levitated Stages 326
11. Motion Positioning Stages Market, by Feedback Architecture 333
11.1. Load-Side Closed-Loop Stages 342
11.2. Actuator-Side Closed-Loop Stages 348
11.3. Open-Loop and Non-Servo Stages 356
11.4. Dual-Position-Feedback Stages 362
11.5. Mixed-Feedback Systems 370
12. Motion Positioning Stages Market, by Application 377
12.1. Material Processing & Patterning 385
12.2. Assembly & Precision Handling 392
12.3. Metrology, Calibration & Inspection 398
12.4. Testing & Characterization 405
12.5. Imaging & Microscopy 411
12.6. Alignment & Coupling 417
13. Motion Positioning Stages Market, by End-User Sector 424
13.1. Manufacturing 434
13.2. Research & Technical Services 441
13.3. Education 450
13.4. Healthcare Services 458
13.5. Public Administration & Defense 464
13.6. Utilities & Environmental Services 471

14. Motion Positioning Stages Market, by Purchasing Role 479
14.1. Equipment OEMs 485
14.2. Direct Operators 492
14.3. Independent System Integrators 498
15. Motion Positioning Stages Market, by Control Integration 505
15.1. External Control Electronics 511
15.2. Stages Without Control Electronics 517
15.3. Onboard Control Electronics 523
15.4. Combined Onboard and External Control Electronics 530
16. Motion Positioning Stages Market, by Customization Level 537
16.1. Configured-to-Order Stages 545
16.2. Standard Catalog Stages 553
16.3. Custom-Engineered Stages 560
17. Motion Positioning Stages Market, by Sales Channel 568
17.1. Direct Manufacturer Sales 575
17.2. Distributor and Reseller Sales 582
18. Motion Positioning Stages Market, by Operating Environment 591
18.1. Standard-Environment Stages 599
18.2. Single-Environment Qualified Stages 607
18.3. Combined-Environment Qualified Stages 613
19. Motion Positioning Stages Market, by Region 622
19.1. Asia-Pacific 629
19.2. Europe 669
19.3. North America 709
19.4. Middle East 749
19.5. Latin America 788
19.6. Africa 827
20. Motion Positioning Stages Market, by Group 867
20.1. G7 873
20.2. NATO 911
20.3. BRICS 950
20.4. European Union 989
20.5. ASEAN 1030
20.6. GCC 1069
21. Motion Positioning Stages Market, by Country 1108
21.1. China 1117
21.2. United States 1154
21.3. Germany 1192
21.4. Japan 1230
21.5. South Korea 1267
21.6. United Kingdom 1305
21.7. France 1343

21.8. Italy 1381
21.9. India 1418
21.10. Canada 1455
21.11. Mexico 1493
21.12. Russia 1531
21.13. Spain 1569
21.14. Brazil 1606
21.15. Australia 1643
22. Competitive Landscape 1682
22.1. Market Share Analysis, 2025 1682
22.2. Market Concentration Analysis, 2025 1690
22.3. Recent Developments & Impact Analysis, 2025 1692
22.4. Product Portfolio Analysis, 2025 1694
22.5. Benchmarking Analysis, 2025 1706
23. Company Profiles 1712
23.1. Aerotech 1712
23.2. Physik Instrumente (PI) SE & Co. KG 1713
23.3. Zaber 1714
23.4. Dover Motion 1715
23.5. Suruga Seiki Co., Ltd. 1716
23.6. ETEL 1717
23.7. attocube 1718
23.8. Prior Scientific Instruments Ltd 1719
23.9. Xeryon 1720
23.10. Holmarc 1721
23.11. ABTech 1722
23.12. New Scale Technologies 1723
23.13. Del-Tron Precision, Inc. 1724
23.14. Edmund Optics 1724
23.15. Kalatec Automação Ltda 1725
23.16. SMC Corporation 1726
23.17. igus SE & Co. KG 1727
23.18. Zolix Instruments Co., Ltd. 1728
24. Companies Covered 1730
25. Key Experts 1756

1. Preface

1.1. Objectives of the Study

- Which documented stage offerings and supplier relationships participate in the Global Motion Positioning Stages market, and how should advertised, announced, and commercially supplied activity be distinguished?
- How do stage configuration, actuation, drive, guidance, feedback, and control integration align with the different requirements of Equipment OEMs, Independent System Integrators, and Direct Operators?
- Which buyer qualification, operating-environment documentation, integration, and support requirements affect supplier selection, and what must be established before treating an alternative stage as a substitute?
- How do catalog, configured-to-order, and custom-engineered offerings allocate responsibility for drives, controls, integration, intellectual property, and lifecycle support, and what consequences follow for buyer dependency and switching?
- What manufacturer, distributor, reseller, licensing, territorial, and service commitments establish commercial access, and which product- and jurisdiction-specific conditions must be verified before choosing a route to customers?
- What evidence connects the included applications and end-user sectors to purchasing decisions, adoption conditions, and qualitative buyer economics without assuming that category inclusion proves demand?
- Which documented differences in supplied capability, delivery responsibility, qualification, and customer support distinguish competing stage offerings, and where do unresolved facts prevent a defensible competitive comparison?

1.2. Market Definition

The Global Motion Positioning Stages market covers identifiable stage assemblies for linear, rotary, angular, or combined positioning. It includes standard catalog, configured-to-order, and custom-engineered stages, including stage offerings supplied for integration into larger equipment. Buyers are Equipment OEMs, Independent System Integrators, and Direct Operators across the accepted end-user sectors.

The offering boundary includes manual, electrically actuated, pneumatically actuated, hydraulically actuated, drive-ready, and mixed-actuation stages. It also includes stages without installed drive mechanisms or control electronics. The accepted guidance, feedback, and control architectures are characteristics of these offerings, not requirements that every stage must share. Standard-environment, single-environment qualified, and combined-environment qualified stages are all included.

Upstream motors, bearings, sensors, controllers, software, and other components provide value-chain context but do not become stage offerings solely because they support positioning. Complete machines, instruments, and other downstream equipment are demand

and integration contexts; their entire commercial activity is not interchangeable with the identifiable stage they incorporate. Distribution and integration relationships inform access and responsibility without expanding the offering boundary to every product or service a participating business supplies.

1.3. Market Segmentation & Coverage

Stage Configuration distinguishes Single-Axis Linear Stages, Single-Axis Rotary Stages, Single-Axis Goniometer and Tilt Stages, Multi-Axis Translation Stages, Multi-Axis Angular Stages, and Combined Translation-Angular Stages. This axis organizes the supplied positioning arrangement. Actuation Mode separately covers Manual Stages, Electrically Actuated Stages, Pneumatically Actuated Stages, Hydraulically Actuated Stages, Drive-Ready Stages, and Mixed-Actuation Stages, preserving offerings with different actuation responsibilities.

Drive Mechanism covers Screw Drives; Belt and Cable Drives; Rack-and-Pinion Drives; Rotary Gear Drives; Friction-Roller Drives; Direct Electromagnetic Drives; Direct Piezoelectric Drives; Fluid-Pressure Drives; Cam, Wedge, and Linkage Drives; Stages Without Installed Drive Mechanisms; and Hybrid and Mixed Drives. Direct Piezoelectric Drives retains the subordinate categories Piezoelectric Deformation Drives and Piezoelectric Motor Drives. These categories distinguish stage offerings by their documented drive arrangement without treating the upstream drive alone as the studied product.

Guidance Technology covers Sliding-Bearing Stages, Ball-Bearing Stages, Roller-Bearing Stages, Flexure-Guided Stages, Air-Bearing Stages, Liquid-Hydrostatic-Bearing Stages, Magnetically Levitated Stages, and Mixed-Guidance Stages. Feedback Architecture covers Open-Loop and Non-Servo Stages, Actuator-Side Closed-Loop Stages, Load-Side Closed-Loop Stages, Dual-Position-Feedback Stages, and Mixed-Feedback Systems. These are separate comparison lenses; neither a guidance category nor a feedback label establishes complete product equivalence.

Application covers Alignment & Coupling; Imaging & Microscopy; Metrology, Calibration & Inspection; Material Processing & Patterning; Assembly & Precision Handling; and Testing & Characterization. This axis identifies the task served by a stage rather than the institutional identity of its buyer.

End-User Sector covers Manufacturing, Research & Technical Services, Education, Healthcare Services, Public Administration & Defense, and Utilities & Environmental Services. Purchasing Role separately distinguishes Equipment OEMs, Independent System Integrators, and Direct Operators. Keeping these axes separate allows a purchasing relationship to be examined without assuming that the purchaser and eventual operator occupy the same sector.

Control Integration covers Onboard Control Electronics, External Control Electronics, Combined Onboard and External Control Electronics, and Stages Without Control Electronics. Customization Level covers Standard Catalog Stages, Configured-to-Order Stages, and Custom-Engineered Stages. Together, these lenses organize questions about the supplied package and the division of integration and delivery responsibilities, rather than presuming that every stage is a complete controlled system.

Sales Channel distinguishes Direct Manufacturer Sales from Distributor and Reseller Sales. Operating Environment covers Standard-Environment Stages, Single-Environment Qualified Stages, and Combined-Environment Qualified Stages. These axes support examination of customer access and the documented scope of environmental qualification without making category inclusion conditional on a preferred channel or operating context.

All axes apply within the Global market boundary and are independent views of the same studied activity, not additive opportunities. Inclusion establishes coverage; it does not establish a particular supplier's capability, local availability, buyer acceptance, or commercial attractiveness.

Table 1. Global Motion Positioning Stages Market Segmentation & Coverage

Segmentation	Coverage
Actuation Mode	• Electrically Actuated Stages • Drive-Ready Stages • Manual Stages • Pneumatically Actuated Stages • Mixed-Actuation Stages • Hydraulically Actuated Stages
Application	• Material Processing & Patterning • Assembly & Precision Handling • Metrology, Calibration & Inspection • Testing & Characterization • Imaging & Microscopy • Alignment & Coupling
Control Integration	• External Control Electronics • Stages Without Control Electronics • Onboard Control Electronics • Combined Onboard and External Control Electronics
Customization Level	• Configured-to-Order Stages • Standard Catalog Stages • Custom-Engineered Stages
Drive Mechanism	• Screw Drives • Direct Electromagnetic Drives • Fluid-Pressure Drives • Direct Piezoelectric Drives o Piezoelectric Deformation Drives o Piezoelectric Motor Drives • Belt and Cable Drives • Hybrid and Mixed Drives • Rotary Gear Drives • Stages Without Installed Drive Mechanisms • Cam, Wedge, and Linkage Drives • Rack-and-Pinion Drives • Friction-Roller Drives

Table 1 - continued

Segmentation	Coverage
End-User Sector	• Manufacturing • Research & Technical Services • Education • Healthcare Services • Public Administration & Defense • Utilities & Environmental Services
Feedback Architecture	• Load-Side Closed-Loop Stages • Actuator-Side Closed-Loop Stages • Open-Loop and Non-Servo Stages • Dual-Position-Feedback Stages • Mixed-Feedback Systems
Guidance Technology	• Ball-Bearing Stages • Roller-Bearing Stages • Flexure-Guided Stages • Air-Bearing Stages • Sliding-Bearing Stages • Mixed-Guidance Stages • Liquid-Hydrostatic-Bearing Stages • Magnetically Levitated Stages
Operating Environment	• Standard-Environment Stages • Single-Environment Qualified Stages • Combined-Environment Qualified Stages
Purchasing Role	• Equipment OEMs • Direct Operators • Independent System Integrators
Sales Channel	• Direct Manufacturer Sales • Distributor and Reseller Sales
Stage Configuration	• Single-Axis Linear Stages • Multi-Axis Translation Stages • Combined Translation-Angular Stages • Single-Axis Rotary Stages • Multi-Axis Angular Stages • Single-Axis Goniometer and Tilt Stages

Sources & Evidence

1. IIT Delhi - Multiaxes Precision CNC Stage for Femtosecond Laser Micromachining System

   · Taxonomy evidence: The institutional tender published August xx.xx 2024 requests one integrated stage system containing X, Y, and Z positioning plus a rotary B axis. This directly supports combined translation-angular complete-stage demand, not an awarded contract or realized sale. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))

   · Taxonomy evidence: The same procurement requires a control panel separate from the CNC stages and places all automation components except motors, including servo drives and the controller, in that panel. This establishes expressly external control-electronics packaging for the requested stage system. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))

   · Taxonomy evidence: The institutional tender specifies supply and integration of a complete positioning-stage system for laser micromachining and expressly excludes the laser source and beam-delivery system. This directly supports stage-attributable material-processing demand rather than whole-machine revenue. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))

   · Taxonomy evidence: The specified installation and institutional-use destination establish an educational purchaser and intended operator; the tender does not prove completed delivery. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))

   · Taxonomy evidence: The institution seeks a stage for integration into equipment at its own site. This demonstrates direct-operator procurement even though the supply contract includes integration responsibilities. OEMs and authorized dealers mentioned as bidders are suppliers, not the buyer role. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))

2. Development of Combined Microstructure and Structure Characterization Facility for In Situ and Operando Studies at the Advanced Photon Source

   · Taxonomy evidence: The 2018 institutional research paper describes an angularly encoded rotation stage coupled through worm gearing to a stepping motor, separately from later direct-drive replacements. It independently establishes a geared rotary-stage use distinction, but not a current offering or a 2025 merchant-stage transaction. ([tsapps.nist.gov](https://tsapps.nist.gov/publication/get_pdf.cfm?pub_id=xx.xx))

3. Edmund Optics - 60mm Travel, X-Axis Rack & Pinion Stage

   · Taxonomy evidence: The inspected product-specific commercial listing identifies a complete X-axis stage with dovetail guidance and rack-and-pinion drive, separately specifying movement, guide system, and drive. This establishes the seller's own offering only, not an exhaustive taxonomy, independent buyer adoption, or historical 2025 availability. ([edmundoptics.com](https://www.edmundoptics.com/p/60mm-travel-x-axis-rack-amp-pinion-stage/xx.xx?PrintPDF=true))

4. Zaber - RSM-E Motorized Rotation Stages, Built-in Motor Encoders

   · Taxonomy evidence: The inspected RSM-E product page explicitly identifies worm-gear-driven motorized rotation stages and presents a purchasable stage model. This is current own-offering corroboration of geared rotary supply, not proof of 2025 sales, market-wide prevalence, or the configured position-servo loop. ([zaber.com](https://www.zaber.com/products/rotary-stages/RSM-E))

5. Indian Institute of Science - Global Tender for Supply and Installation of Piezo Actuated Linear XYZ Stage with Full Assembly

   · Taxonomy evidence: The November xx.xx 2025 tender specifies piezoelectric actuation for X and Y and manual screw adjustment for Z, establishing different supplied actuation provisions. The requirement does not identify the powered axes' final transmission. Analytical consequence: it cannot independently verify allocation to different drive-mechanism peers merely from the actuator labels. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Global-Tender_XYZ_stage_piezo-xx.xx.pdf))

   · Taxonomy evidence: The full-assembly tender specifies XYZ positioning, with piezo actuation for X and Y and a manual screw-gauge Z adjustment.

   · Taxonomy evidence: The requested assembly combines powered piezo positioning with a separately manual positioning axis, establishing a genuine mixed-actuation purchase configuration.

   · Taxonomy evidence: Piezo positioning elements and a screw-gauge positioning element are specified within the same complete stage assembly, supporting a mixed-mechanism allocation rather than separate finished-stage counts.

6. Indian Institute of Science - Request for Quote for Supply of Closed-Loop Cryogenic Nanopositioning System

   · Taxonomy evidence: The June xx.xx 2025 RFQ requests a cryogenic positioning system and lists ultrahigh-vacuum compatibility as an option and a nonmagnetic construction variant. It establishes selectable combined environmental requirements, not the exact variant ultimately ordered, completed qualification, or delivery. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

   · Taxonomy evidence: The requested cryogenic nanopositioning system includes vacuum and nonmagnetic compatibility requirements or options. This supports preserving combined profiles, while not establishing which options were ultimately ordered or delivered. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

   · Taxonomy evidence: The procurement explicitly permits quotations from an Indian original equipment manufacturer or its authorized Indian distributor. This provides dated 2025 demand-side corroboration of manufacturer and distributor selling roles, without establishing an awarded channel or title-taking terms. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

   · Taxonomy evidence: The June xx.xx 2025 buyer RFQ specifies cryogenic-stage compatibility, an ultrahigh-vacuum option, and a nonmagnetic variant within one procurement, demonstrating that environmental requirements can coexist. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

7. U. R. Rao Satellite Centre - Tender for 6-Axis Positioning System, URSC/CE/IS202500012301

   · Taxonomy evidence: The October xx.xx 2025 public tender identifies a six-axis Stewart-platform/hexapod positioning system and separately lists the platform, controller and accessories, and installation-related supply. This corroborates procurement of an integrated multi-axis stage offering rather than treating each constituent axis as a separate finished-stage purchase. The tender is not an award record. ([eproc.isro.gov.in](https://eproc.isro.gov.in/viewDocumentPT?tenderId=IS202500012301))

8. ISO 230-2:2014 - Test Code for Machine Tools - Part 2: Determination of Accuracy and Repeatability of Positioning of Numerically Controlled Axes

   · Taxonomy evidence: The official record identifies ISO xx.xx-xx.xx:2014 as confirmed in 2025 and describes its scope as positioning accuracy and repeatability evaluation for numerically controlled machine-tool axes. Analytical implication: these measurement concepts do not classify engineering customization and do not, by themselves, establish commercial price or quality tiers. ([iso.org](https://www.iso.org/standard/xx.xx.html))

   · Taxonomy evidence: The standard's stated scope concerns accuracy and repeatability evaluation of numerically controlled machine-tool axes. Analytical implication: those measurements are distinct from customization level and do not establish the omitted market-wide commercial performance tiers. ([iso.org](https://www.iso.org/standard/xx.xx.html))

9. IIT Hyderabad - Supply of Linear Stage, Single Tender IITH/PHY/YOGESH/2023/S/T090

   · Taxonomy evidence: The February xx.xx 2024 procurement separately specifies single-X-axis linear stages, electric stepper motors, metric lead screws, and a recirculating-ball guide, supporting separation of configuration, actuation, transmission, and guidance.

   · Taxonomy evidence: The purchase requirements identify linear stages with X as the active positioning axis.

   · Taxonomy evidence: The requested linear stages specify two-phase stepper-motor actuation.

   · Taxonomy evidence: Metric lead screws are explicitly identified separately from the stepper motors.

   · Taxonomy evidence: The longer-travel stage requirement explicitly identifies a recirculating-ball-bearing guide.

   · Taxonomy evidence: Separate motor, screw, and guide fields establish that motive power is not interchangeable with transmission or bearing classification.

10. IISER Berhampur - Notice Inviting Tender IISERBpr/S&P/2024-25/06
    - Taxonomy evidence: The May xx.xx 2024 requirements separately list goniometers, a manual rotation stage, a manual translation stage, and a two-axis tip-tilt platform.
    - Taxonomy evidence: The tender requests a manual rotation stage with continuous angular movement and engraved graduations.
    - Taxonomy evidence: Separate goniometer line items specify angular positioning about an elevated point of rotation.
    - Taxonomy evidence: The tip-tilt platform requirement identifies two active angular axes; its bundled mirror does not establish a separately attributable stage value.
    - Taxonomy evidence: Manual translation and manual rotation stages appear as distinct purchasable requirements.
    - Taxonomy evidence: The tip-tilt specification distinguishes open-loop and closed-loop performance, while the manual-stage line items establish non-servo positioning purchases.
    - Taxonomy evidence: The tip-tilt purchase requirement specifies integrated strain-gauge sensing and distinguishes closed-loop from open-loop positioning.
11. Indian Institute of Science - Tender Notification for the Procurement of 3-Axis Piezo Stage for Microscopy
    - Taxonomy evidence: The November xx.xx 2017 procurement requests one three-axis piezo stage with X, Y, and Z active axes.
    - Taxonomy evidence: The requested piezo stage is a complete positioning purchase with an integrated capacitive sensor and closed-loop travel requirements.
    - Taxonomy evidence: The procurement establishes demand for an electrically actuated piezo stage, without independently specifying its final transmission subtype.
12. Cost and Performance Trade-Offs for Commercially Available Linear Stages
    - Taxonomy evidence: The academic comparison classifies commercially available manual linear stages by their bearing principles; its sample is not a complete Global market partition.
    - Taxonomy evidence: Dovetail stages are identified as a commercial sliding-contact stage class.
    - Taxonomy evidence: Ball-bearing and gothic-arch ball-bearing stages are identified among the commercial stage classes studied.
    - Taxonomy evidence: Crossed-roller stages are treated separately from ball-bearing stages.
    - Taxonomy evidence: Flexure stages are identified as a distinct commercially available guidance class.
13. Dynamic Modelling of a Single-Axis Belt-Drive System
    - Taxonomy evidence: The peer-reviewed article identifies belt-driven positioning stages as an industrial positioning family and distinguishes them from lead- or ball-screw stages. It does not establish cable-stage coverage.
    - Taxonomy evidence: Its described belt-driven stage uses a geared DC motor, illustrating that the input motor and the platform transmission are different classification facts.
14. Precision Positioning Which Contains Flexible Mechanical System - Fusion of Semi-Closed and Full-Closed Loop Control
    - Taxonomy evidence: The paper distinguishes motor-angle, load-angle, and combined positioning feedback architectures.
    - Taxonomy evidence: Semi-closed positioning control is defined using motor-angle information.
    - Taxonomy evidence: Full-closed positioning control is distinguished by load-angle feedback.
    - Taxonomy evidence: The study combines motor-side and load-side position information; it establishes an engineering architecture, not a marketed complete-stage transaction.
15. MISUMI - Motorless Stages: Z-Axis Level Cross Roller Guide
    - Taxonomy evidence: The supplier catalog explicitly presents motorless Z-axis stages and distinguishes them from products supplied with motors.
    - Taxonomy evidence: The motorless product's commercial specification separately identifies its ball screw, showing that absence of a motor does not mean absence of a transmission.
    - Taxonomy evidence: The catalog identifies crossed-roller guidance for its motorless Z-axis stage.

16. Air-Hydraulics - Rotary Indexing Table
    - Taxonomy evidence: The supplier brochure advertises complete pneumatic rotary indexing tables and states that their indexing movement does not require electric motors.
    - Taxonomy evidence: The brochure lists hydraulic-powered indexing as an option for its Model xx.xx; this establishes an own-product option, not universal industrial-table inclusion.
    - Taxonomy evidence: The advertised positioning tables specify tapered-roller-bearing construction.
    - Taxonomy evidence: The brochure presents externally supplied rotary indexing tables as complete products. Their eligibility remains subject to the positioning-versus-conveyance boundary.
17. ABTech - Oil Hydrostatic Linear Stages
    - Taxonomy evidence: ABTech advertises oil-hydrostatic linear stages as standalone units or multi-axis assemblies, establishing an own-product complete-stage offering.
    - Taxonomy evidence: The stage page separately describes hydrostatic guidance and integrated linear motors, supporting independence of guidance from motive drive.
    - Taxonomy evidence: The supplier identifies linear motors and encoders integrated with controls for its hydrostatic stage offering.
18. PI - Linear Translation Stages and NanoPositioners Overview
    - Taxonomy evidence: PI's own stage overview describes magnetic linear-motor stages with air-bearing guidance.
    - Taxonomy evidence: The overview separately describes magnetic-levitation guidance. This presentation alone does not establish an external sale or distinguish every offering from a demonstrator.
    - Taxonomy evidence: PI describes its piezo-linear-motor positioning offerings as avoiding drive screws and gears, supporting an own-offering direct-piezo mechanism distinction.
    - Taxonomy evidence: The page identifies piezo linear motors separately from rotary stepper and servo motors in its positioning-stage offering.
    - Taxonomy evidence: Magnetic linear motors are identified as a drive option for PI's translation stages, separately from their guidance.
19. Six Degree of Freedom Fine Motion Positioning Stage Based on Magnetic Levitation
    - Taxonomy evidence: The NASA-hosted 1994 paper describes a magnetically suspended six-degree-of-freedom positioning platform. It establishes the named technical family, not current commercial availability.
20. Investigation of the Microscopic Performance of an Aerostatic Precision Positioning Stage Driven by the Air-Lubricated Friction Drive
    - Taxonomy evidence: The engineering paper explicitly studies a precision positioning stage driven by a friction drive; it does not establish a merchant-stage transaction.
    - Taxonomy evidence: The same stage is identified as aerostatic, demonstrating that the guidance principle is distinct from its friction-drive mechanism.
21. Progress of Mechanical Design of Nanopositioning Stages at the Advanced Photon Source
    - Taxonomy evidence: The institutional manuscript describes a flexure rotation stage mounted on a bearing rotation stage, establishing a mixed-guidance architecture. The research implementation does not independently establish external commercial supply.
22. Global tender for a manual waveguide alignment rig
    - Taxonomy evidence: The October xx.xx 2022 institutional tender requests an integrated manual waveguide-alignment assembly containing input, central, and output positioning stages for optical coupling. This establishes an alignment-stage procurement category, not an award or realized sale. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2022/xx.xx/waveguide-allignment-rig.pdf))
    - Taxonomy evidence: The procurement is issued by an educational institution for its own optics work, providing buyer-side evidence relevant to Education rather than inferring the buyer sector from a supplier's customer list. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2022/xx.xx/waveguide-allignment-rig.pdf))

23. JPL Robotics: The Computer Vision Laboratory

- Taxonomy evidence: The institutional facility description identifies an optical bench with translation stages used to acquire image sequences with controlled camera or object motion. It establishes imaging use, without establishing a stage purchase date, merchant-stage value, or deployment volume. ([robotics.jpl.nasa.gov](https://robotics.jpl.nasa.gov/how-we-do-it/facilities/the-computer-vision-laboratory/))

24. Dimensional nano and sub nanometrology

- Taxonomy evidence: The national metrology institution describes stage metrology and high-precision scanning stages used in metrological atomic force microscopy, establishing a dimensional-metrology use distinct from image acquisition alone. ([npl.co.uk](https://www.npl.co.uk/research/dimensional/nano-and-sub-nanometrology))
- Taxonomy evidence: The page documents an institution performing research and measurement activities involving positioning stages. This supports research-and-technical-service use, but not a particular establishment code, procurement amount, or sector share. ([npl.co.uk](https://www.npl.co.uk/research/dimensional/nano-and-sub-nanometrology))

25. Multi-Probe Micro-Assembly

- Taxonomy evidence: The 2007 institutional study identifies commercial nanopositioning stages within microassembly equipment. It establishes assembly and manipulation as stage-use categories, not a newly commercialized stage product, present deployment prevalence, or 2025 sales. ([tsapps.nist.gov](https://tsapps.nist.gov/publication/get_pdf.cfm?pub_id=xx.xx))

26. Facility Equipment - MIRIAM/B22

- Taxonomy evidence: The operational infrared imaging and microspectroscopy facility lists sample-positioning stages in its analytical end stations. This establishes stage-enabled analytical characterization, while the complete instruments and facility value remain outside stage revenue. ([diamond.ac.uk](https://www.diamond.ac.uk/Instruments/Soft-Condensed-Matter/B22/status.html))
- Taxonomy evidence: The facility's own equipment inventory provides operator-side evidence of positioning-stage use in a dedicated scientific setting. It does not disclose a separate stage transaction or establish an official establishment classification. ([diamond.ac.uk](https://www.diamond.ac.uk/Instruments/Soft-Condensed-Matter/B22/status.html))

27. UNSD Classification Detail - ISIC Rev.4, Section C: Manufacturing

- Taxonomy evidence: The official manufacturing section encompasses physical or chemical transformation and assembly of manufactured products. Its listed divisions include electronic and optical products, electrical equipment, machinery, transportation equipment, chemicals, and pharmaceuticals. This supports sector definition only, not stage adoption or sales. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/C))

28. UNSD Classification Detail - ISIC Rev.4, Division 72: Scientific research and development

- Taxonomy evidence: The official scientific-R&D division distinguishes research and development activities as an economic activity, supporting classification of dedicated research establishments separately from their funding source or research subject. It does not establish stage purchasing. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

29. UNSD Classification Detail - ISIC Rev.4, Division 71: Architectural and engineering activities; technical testing and analysis

- Taxonomy evidence: The official classification identifies engineering services and technical testing and analysis as economic activities. This supports the technical-service portion of the combined sector without treating every internal industrial laboratory as an independent service establishment. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

30. UNSD Classification Detail - ISIC Rev.4, Division 86: Human health activities

- Taxonomy evidence: The official human-health division defines healthcare-service activities, including hospitals and medical practices. This supplies a sector boundary but does not establish eligible stage procurement, regulatory authorization of a stage, or current healthcare adoption. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

31. UNSD Classification Detail - ISIC Rev.4, Section O: Public administration and defence; compulsory social security

· Taxonomy evidence: The official classification states that institutional or legal status alone does not determine public-administration classification: publicly operated activities classified elsewhere remain in their respective sectors. This supports activity-based end-user allocation rather than assigning every public buyer to government. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/O))

· Taxonomy evidence: The section includes public administration, national defense, and public-order functions, while distinguishing teaching and healthcare activities. This establishes the proposed sector boundary, not a verified stage purchase by that sector.
([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/O))

32. Berkeley Lights, Inc. - 2022 Annual Report

· Taxonomy evidence: The 2022 annual report identifies motion stages among third-party-supplied components used to manufacture the company's systems. This is buyer-side evidence of equipment-manufacturer incorporation; it does not establish the ultimate operating sector of its customers or purchases in 2025.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/phenomexfkaberkeleylights_.pdf))

33. KAP Consulting - Automation and Controls Integration & Programming

· Taxonomy evidence: The business identifies itself as a system integrator and describes positioning-stage integration, customer-machine retrofits, and support for equipment builders. This supports a distinct integration role but does not demonstrate that it purchases complete stages or establish transaction volumes.
([kapconsultingllc.com](https://kapconsultingllc.com/automation.html))

34. TIFR/PD/IC23-47/232777 - Notice Inviting Tender, March 19, 2024

· Taxonomy evidence: The March xx.xx 2024 procurement separately identifies stages with built-in controllers, a joystick, a power supply, and accessories, supporting distinction between stage-control packaging and ancillary equipment.
([tifr.res.in](https://www.tifr.res.in/maincampus/viewNoticeFile.php?f=VTNVU21UaFBybGJuRDJwakJmdXdVUT09&s=WFdXaTkwL1ZDTGdxaHp6eHA1bkh1QT09))

· Taxonomy evidence: The buyer explicitly requests motorized rotation and linear stages with built-in controllers and a vertical stage with an integrated controller.
([tifr.res.in](https://www.tifr.res.in/maincampus/viewNoticeFile.php?f=VTNVU21UaFBybGJuRDJwakJmdXdVUT09&s=WFdXaTkwL1ZDTGdxaHp6eHA1bkh1QT09))

· Taxonomy evidence: The procurement requests named stage model numbers, providing buyer-side evidence of purchasing predefined commercial stage offerings rather than commissioning an unspecified new design.
([tifr.res.in](https://www.tifr.res.in/maincampus/viewNoticeFile.php?f=VTNVU21UaFBybGJuRDJwakJmdXdVUT09&s=WFdXaTkwL1ZDTGdxaHp6eHA1bkh1QT09))

· Taxonomy evidence: The single-quote invitation is addressed directly to the stage manufacturer, establishing a solicited direct-manufacturer procurement relationship, not proof of a completed sale.
([tifr.res.in](https://www.tifr.res.in/maincampus/viewNoticeFile.php?f=VTNVU21UaFBybGJuRDJwakJmdXdVUT09&s=WFdXaTkwL1ZDTGdxaHp6eHA1bkh1QT09))

35. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1

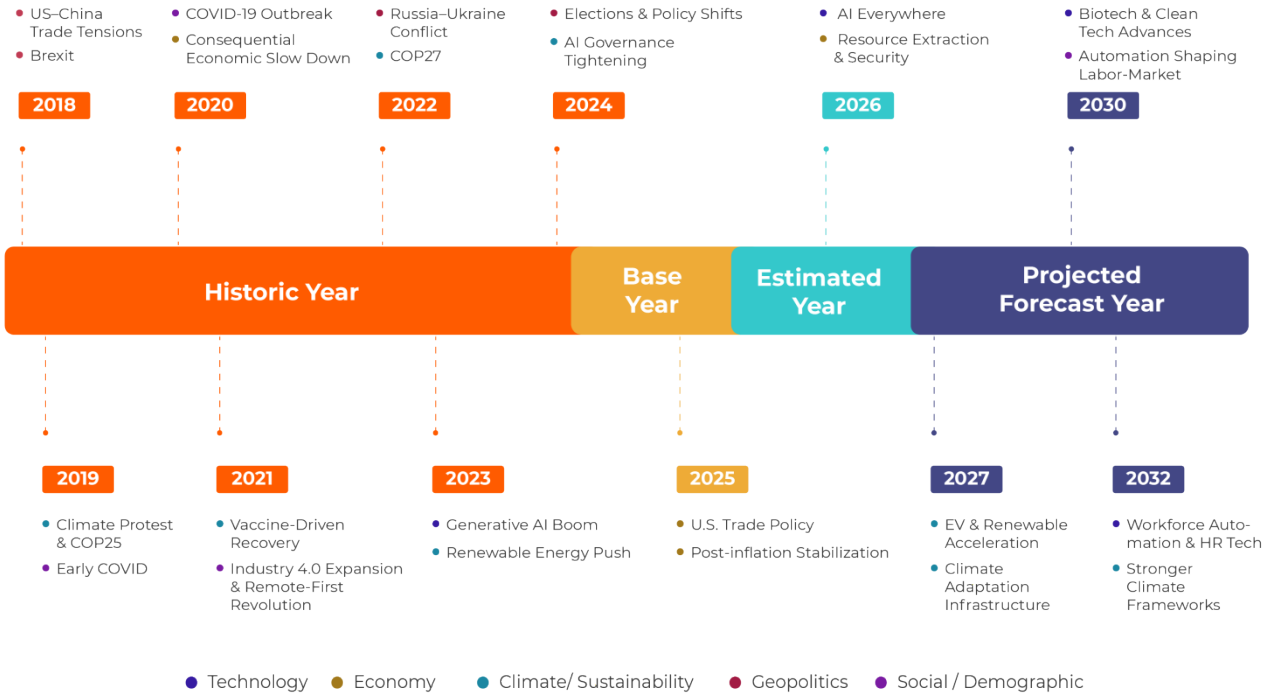
- Taxonomy evidence: The September xx.xx 2023 RFQ requires a compatible controller and power supply with the high-precision linear stage. It establishes control-inclusive supply, but does not explicitly establish controller housing location.
([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))
- Taxonomy evidence: The stage RFQ expressly accepts responses from the original equipment manufacturer or its authorized Indian distributor, independently establishing the two contractual selling roles used in this axis.
([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))
- Taxonomy evidence: Original equipment manufacturers are explicitly eligible to supply the requested complete linear stage directly to the institutional purchaser.
([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))
- Taxonomy evidence: An authorized distributor is explicitly eligible to supply the same complete-stage procurement. This establishes a reseller route, not a channel share or awarded transaction.
([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))

36. Standard and Custom Motion Solutions: 7 Factors to Consider During the Buying Process

- Taxonomy evidence: The manufacturer-authored paper distinguishes standard off-the-shelf, standard configured-to-order, and custom-engineered motion solutions. This supports commercial terminology, not a verified global allocation.
([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))
- Taxonomy evidence: Preconfigured positioning stages illustrate the author's standard off-the-shelf offering format.
([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))
- Taxonomy evidence: The paper identifies the manufacturer's PlanarDL XY stage as a standard configured-to-order product.
([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))
- Taxonomy evidence: A custom-engineered goniometer illustrates a stage designed to meet unique customer requirements.
([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

37. Loan Service for Nanopositioners

- Taxonomy evidence: The manufacturer explicitly describes its EC*xx.xx positioner product line as intended for ambient conditions. The inspected page concerns loan kits; loan activity is not counted as new-stage market revenue.
([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))



38. Positioning Stages and Systems - Motionlink Ltd

- Taxonomy evidence: Motionlink explicitly identifies positioning tables distributed by its business, providing an independently retrieved example of a stage-distribution operation outside the Indian procurement records.
([motionlink.co.uk](https://motionlink.co.uk/motionlink/positioning-stages-and-systems/))
- Taxonomy evidence: The company's marketed stage range distinguishes standard-environment offerings from demanding-environment options, including vacuum, cryogenic, radiation-tolerant, and nonmagnetic positioning. This is evidence of its own commercial offering, not global category shares or exclusive single-environment purchases.
([motionlink.co.uk](https://motionlink.co.uk/motionlink/positioning-stages-and-systems/))

1.4. Years Considered for the Study

The study designates 2024 as the historical year, 2025 as the base year, 2026 as the estimated year, and 2032 as the forecast endpoint. These period roles distinguish historical context, base-year interpretation, estimated conditions, and the forward-looking outlook through 2032.

Figure 1. Global Motion Positioning Stages Market, Years Considered for the Study

1.5. Currency Considered for the Study

Monetary reporting is in United States dollars (USD), expressed as absolute values.

1.6. Language Considered for the Study

The study is published in American English.

1.7. Key Stakeholders

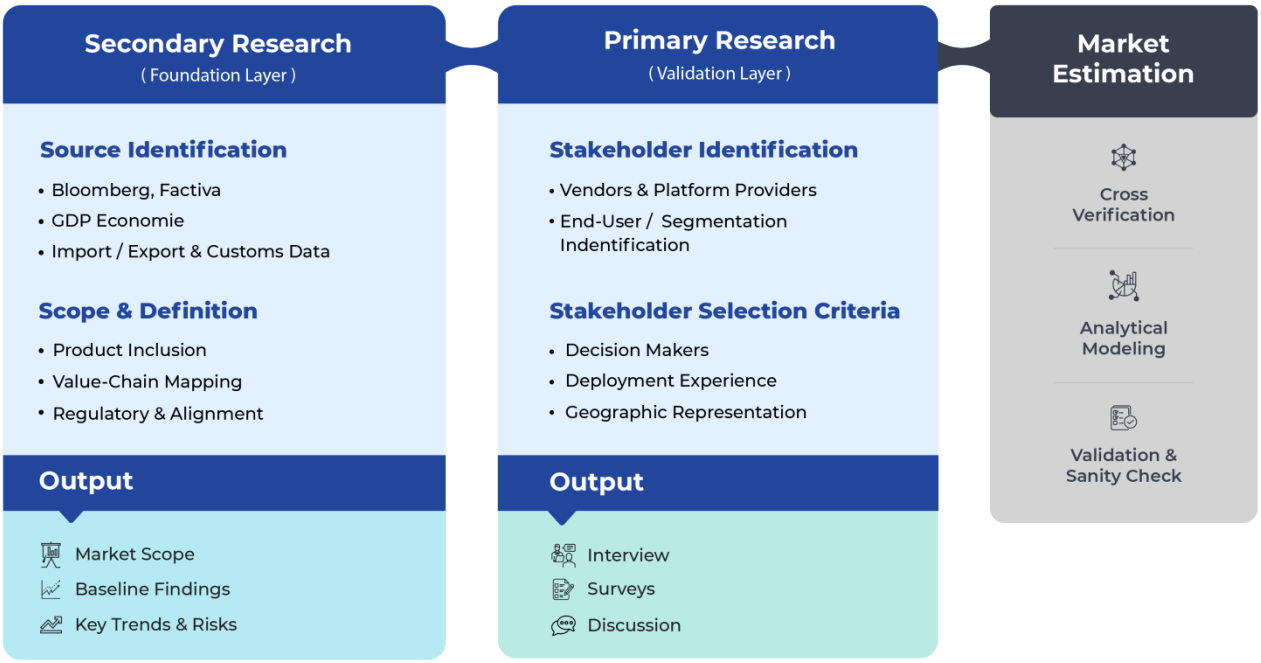
- Stage manufacturers and stage-subsystem suppliers: portfolio positioning, configuration coverage, customization commitments, qualification evidence, and choices between direct and intermediary customer access.
- Equipment OEMs: stage selection for equipment integration, allocation of drive and control responsibilities, supplier qualification, substitution requirements, and continuity of product support.
- Independent System Integrators: compatibility and responsibility across stage, drive, control, and downstream equipment interfaces, including the contractual scope of integration and support.

- Direct Operators across the included end-user sectors: fit to the intended application and environment, procurement acceptance, maintainability, support obligations, and the consequences of changing suppliers.
- Distributors and resellers: authorized product and territory coverage, customer-support responsibilities, manufacturer coordination, and the limits of commitments made through the channel.
- Drive, guidance, feedback, and control-component suppliers: relationships with stage manufacturers and integrators, interface responsibilities, and differentiation between upstream component participation and supply of an in-scope stage.
- Investors and corporate strategy teams: offering-specific commercial participation, defensible competitive comparisons, customer-access conditions, and the prerequisites for partnership, acquisition, or entry decisions.

2. Research Methodology

2.1. Introduction

The Global Motion Positioning Stages study frames commercial decisions around stage offerings, their purchasers, and the responsibilities attached to supplying and integrating them. Its approach separates documented business facts from economic interpretation and keeps the accepted product hierarchy consistent across supplier, buyer, channel, and geographic analysis.



Analyst-led primary research provides a qualitative challenge layer alongside secondary evidence. Market explanations and subsequent quantitative interpretation must remain within the same stage-only boundary and distinguish historical observations, estimated conditions, and forward-looking assumptions.

2.2. Research Design

The design centers on identifiable stage offerings and the commercial relationships through which they reach Equipment OEMs, Independent System Integrators, and Direct Operators. An individual stage configuration, a product family, a supplier's broader business, and downstream equipment are distinct units of interpretation.

Evidence should establish only the fact within its authority: an advertised offering, a disclosed business relationship, a buyer requirement, or a jurisdiction-specific access condition. Commercial explanations then connect those facts to procurement, integration responsibility, substitution, and competitive choice without treating a proposed objective as a completed finding.

Figure 2. Global Motion Positioning Stages Market, Research Design

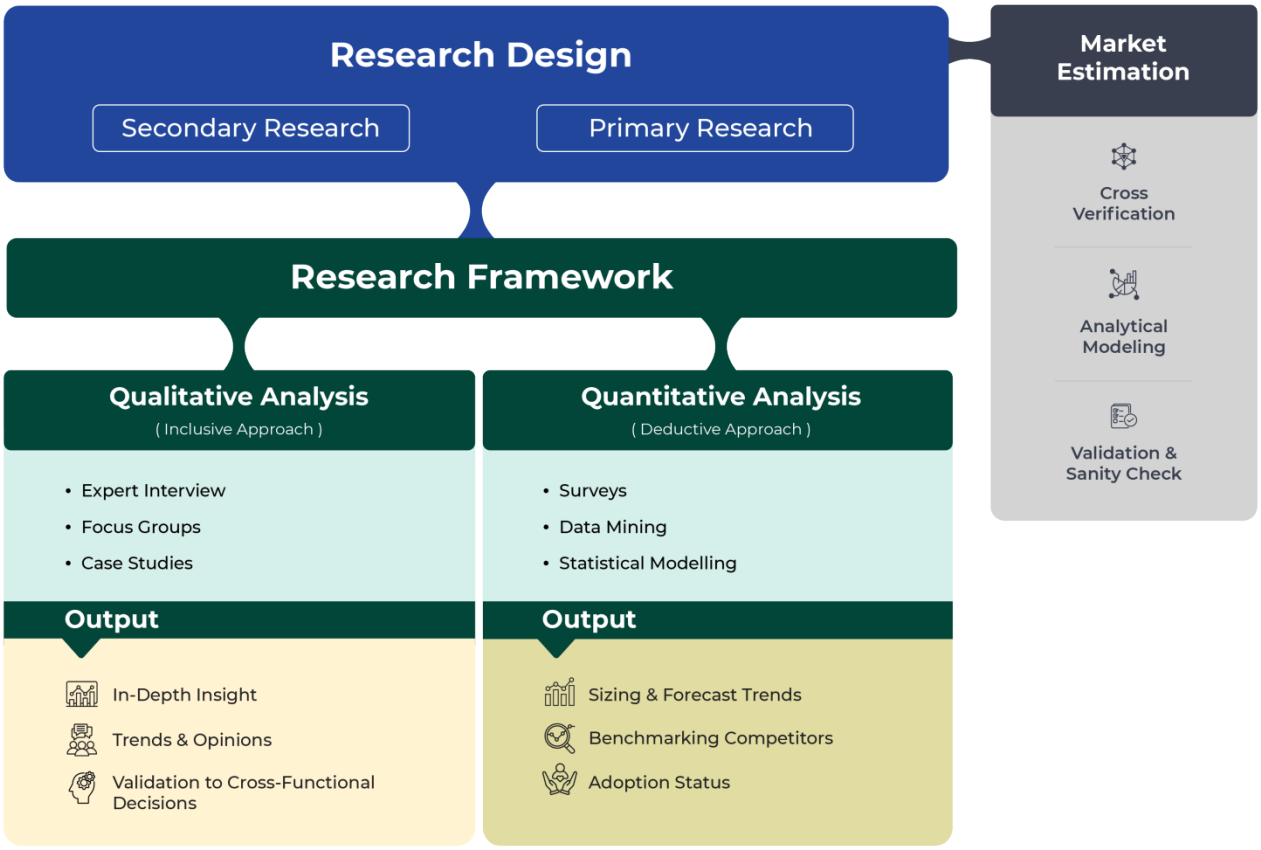
2.2.1. Primary Research

The analyst team conducted primary research as a qualitative challenge layer for market definition, segmentation, demand conditions, adoption barriers, and competitive interpretation. This work tested analytical assumptions and sharpened explanations of market mechanisms without serving as standalone support for numerical estimates.

The qualitative challenge layer is evaluated alongside secondary evidence within the accepted market scope. It informs conditional market explanations and hypotheses for subsequent quantitative analysis. Numerical estimates require their own supporting evidence, and a forecast derived from a qualitative assumption does not independently validate that assumption. Final interpretation must reconcile the qualitative findings with the completed quantitative results.

2.2.2. Secondary Research

Secondary commercial evidence has distinct roles. Official portfolios can establish how a supplier advertises its own stages and configurations; filings can establish disclosed business and ownership facts; buyer policies and public awards can establish particular purchasing requirements or relationships; and applicable official legal or regulatory records can establish jurisdiction-specific conditions.



Each claim must retain the source's product coverage, effective period, business-entity boundary, and underlying authority. An announcement does not by itself establish delivery availability, a portfolio entry does not establish buyer acceptance, and a distributor relationship does not establish unrestricted rights across all territories. Independent support is required where the commercial conclusion exceeds what a single record establishes.

2.3. Research Framework

The framework links the accepted stage definition to its segmentation, then connects documented supplier participation with buyer requirements and commercial access. Offering identity comes before comparison: a stage assembly must not be confused with an upstream component, a controller sold independently, or the complete equipment incorporating it.

Competitive interpretation follows the responsibilities attached to the offering, including integration, customization, qualification, distribution, and support. Quantitative interpretation must retain the same boundaries rather than using broader company or end-use activity to bypass an unresolved stage-specific question.

Figure 3. Global Motion Positioning Stages Market, Research Framework

2.3.1. Qualitative Analysis

The qualitative framework addresses how purchasing decisions differ among Equipment OEMs, Independent System Integrators, and Direct Operators. Relevant questions include buyer qualification, switching requirements, responsibility for drives and controls, customization commitments, channel support, and the documentation supporting an operating-environment claim.

Comparison concerns the supplied stage and its commercial relationship, rather than the technology label alone. The qualitative challenge layer can test explanations of buyer behavior

and competitive differentiation, but it does not establish that every configuration is interchangeable or that a supplier's broader capabilities apply to a particular offering.

2.3.2. Quantitative Analysis

Quantitative interpretation is bounded by the Global Motion Positioning Stages definition, the designated study periods, and absolute monetary reporting in USD. Product, business-entity, geographic, and period boundaries must remain aligned when evidence is compared.

The segmentation axes describe different characteristics of the same in-scope activity. Configuration, actuation, drive, guidance, feedback, application, sector, purchasing role, control integration, customization, channel, and environment therefore cannot be added together as separate opportunities. Category breadth, expert participation, and the existence of a supplier offering do not independently establish economic weight.

2.4. Market Size Estimation

Market-value interpretation concerns economic activity attributable to in-scope Motion Positioning Stages, rather than the full equipment, instrument, or automation ecosystems in which stages are used. Included drive-ready and control-free offerings remain within the stage boundary, while upstream components and downstream equipment retain their separate commercial identities.

Numerical conclusions require supporting evidence that matches the relevant offering and study period. Qualitative interpretation can identify attribution questions and challenge assumptions, but it cannot supply an unsupported numerical allocation or establish the economic importance of an included category.

2.4.1. Top-Down Approach

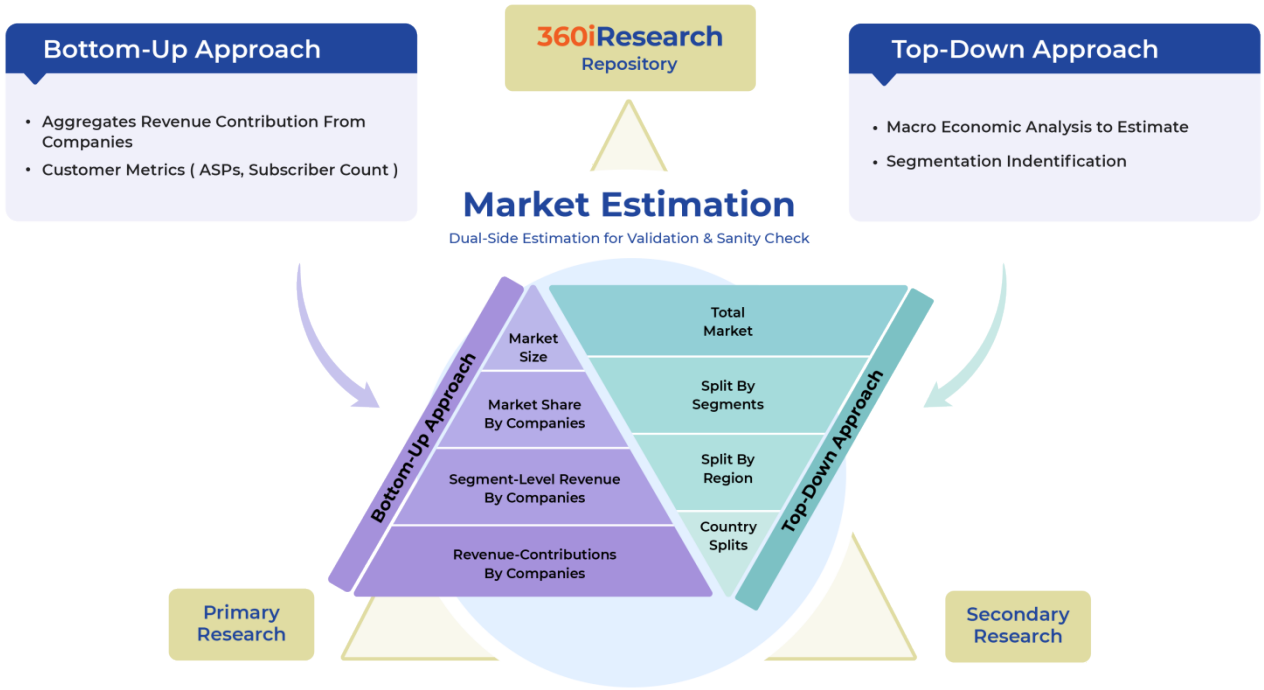
The top-down analytical role is to check whether broader equipment, automation, and end-use context is compatible with the stage-only definition. Such context can identify demand questions and boundary inconsistencies, but it is not equivalent to activity attributable to Motion Positioning Stages.

No mechanical allocation from an adjacent industry is justified by category overlap alone. Any proposed relationship must preserve the distinction between the positioning stage, other equipment content, and the downstream activity that the equipment supports.

2.4.2. Bottom-Up Approach

The bottom-up analytical role is to connect economic evidence to identifiable in-scope stage offerings and supplier relationships. Catalog, configured-to-order, custom-engineered, and equipment-integrated stage offerings require a consistent stage-only boundary, even when their commercial descriptions differ.

Manufacturer supply, incorporated components, distributor resale, and the downstream machine must not become separate additive descriptions of the same stage activity. A



supplier's wider automation or instrumentation portfolio cannot substitute for evidence attributable to its stage business.

2.5. Data Triangulation

For Motion Positioning Stages, triangulation concerns whether different evidence refers to the same offering, supplied configuration, commercial relationship, geography, and period. Agreement in terminology is insufficient when one description includes controls or customization obligations and another does not.

Offering descriptions, business disclosures, buyer requirements, and qualitative interpretation serve different evidentiary purposes. Conflicts in availability, qualification, or responsibility should remain explicit until resolved; they should not be averaged away or settled by repetition of claims with the same underlying origin. Qualitative findings challenge interpretation rather than independently settling numerical conclusions.

Figure 4. Global Motion Positioning Stages Market, Data Triangulation

2.6. Research Outcomes

The study is intended to support defensible comparisons of stage offerings, supplier participation, purchasing requirements, and routes to customers. Its decision outputs concern which offerings address a buyer's positioning requirement, what qualification and integration responsibilities accompany them, and which commercial conditions must be verified before procurement, supplier substitution, partnership, or market entry.

Strategic interpretation should distinguish an included category from demonstrated demand, an advertised capability from an applicable commercial commitment, and an attractive

application from accessible business. Conclusions remain conditional where product-specific availability, contractual rights, buyer acceptance, or delivery obligations are not established.

2.7. Research Assumptions

- Different segmentation axes describe the same underlying stage activity. Cross-axis combinations support comparison, but must not be treated as additive opportunities.
- A stage comparison applies to the documented configuration and scope of supply, not automatically to every variant in a product family. Procurement decisions require confirmation of the selected offering.
- Purchasing Role and End-User Sector remain distinct. An Equipment OEM or Independent System Integrator does not by itself identify the sector of the eventual operator, so demand interpretation must preserve that distinction.
- An operating-environment classification applies to the documented qualification scope of the offering. It does not establish suitability for an unstated environment or combination of conditions.
- Comparisons of catalog, configured, and custom-engineered stages require explicit treatment of integration, control, support, and contractual responsibilities. Apparent product similarity does not establish equivalent supplier obligations or switching requirements.

2.8. Research Limitations

- A broader corporate disclosure cannot establish a stage-specific conclusion unless its product and business boundaries are separable. Where that distinction is unresolved, the wider company's activity must not be attributed to Motion Positioning Stages.
- Advertised configurations do not alone establish local commercial availability, buyer acceptance, or enforceable service obligations. Supplier-selection conclusions remain conditional on the applicable offering, territory, and commercial agreement.
- Feedback, guidance, actuation, and control labels do not independently establish equivalent delivered performance or substitutability. Comparisons require the buyer's requirement and the documented scope of the complete stage offering.
- Where a custom or embedded stage is documented only within a larger equipment arrangement, standalone product comparisons and responsibility allocation remain conditional until the stage's commercial boundary is established.
- Inclusion of an application, sector, or operating-environment category establishes study coverage, not demonstrated adoption or accessible demand. Opportunity conclusions require separate commercial evidence for the relevant buyer and offering.

3. Executive Summary

3.1. Introduction

The Global Motion Positioning Stages market is differentiated by the assembly and responsibility a buyer can accept rather than by a single preferred architecture. Manual, drive-ready and controlled stages remain distinct purchasing propositions across catalog, configured and custom supply. Zaber's ASR family illustrates alternative motor-only and built-in-controller packages; ETEL's Full Forward Integration extends the possible contract to selected surrounding system elements. These offerings address different amounts of OEM-retained work and are not automatically interchangeable.

The decisive choice for Equipment OEMs, Independent System Integrators and Direct Operators is the narrowest delivery scope that meets the requirement, with controls, application acceptance and continuing support assigned explicitly. Broader integration can consolidate coordination, but a product description alone does not establish complete-equipment responsibility or an executable order.

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber
   · The ASR family distinguishes motor-only and built-in-controller series, supporting comparison of different supplied control packages rather than automatic interchangeability.
   ([zaber.com](https://www.zaber.com/products/families/ASR))
2. Full forward integration - ETEL SA
   · ETEL's Full Forward Integration can comprise part or all of listed positioning platforms, frames, isolation and electronics, establishing a broader but variable delivery boundary.
   ([etel.ch](https://www.etel.ch/motion-systems/full-forward-integration/))

3.2. CXO Perspective

Supplier executives should link dedicated engineering commitments to approved equipment programs and funded milestones rather than application interest alone. HOERBIGER attributes part of PI's below-expectation 2025 performance to weak automation demand and reduced publicly funded U.S. projects. This company-specific experience supports selective account investment, not a uniform market conclusion; earlier engagement retains influence but increases exposure to deferral or cancellation.

Equipment OEMs should distinguish supplied-part conformity from finished-instrument acceptance: New Scale Technologies' terms use its written part-number specifications unless different requirements are agreed in writing and exclude fitness-for-purpose warranties. Direct Operators also have a retain-versus-replace choice through Aerotech's published repair route and Zaber's X-NA micrometer-replacement accessory. Retention can preserve interfaces but also preserve limitations. Any broader acceptance, repair and replacement-support obligations should be settled before commitment.

Sources & Evidence

1. X-NA Micro, Motorized Linear Actuators, Built-in Controllers - Zaber
   · Zaber markets X-NA actuators as replacements for standard micrometer heads on manual translation stages, establishing an accessory-led retention route rather than another complete-stage offering. ([zaber.com](https://www.zaber.com/products/linear-actuators/X-NA))
2. New Scale Technologies, Inc. - Terms and Conditions, Revision 05.06.2025
   · New Scale's terms default to written specifications for its assigned part number unless different specifications are agreed in writing, and exclude fitness-for-purpose warranties. These provisions distinguish supplied-part conformity from broader instrument acceptance. ([newscaletech.com](https://newscaletech.com/wp-content/uploads/NewScale-Terms-Conditions_2025.pdf))
3. Positioning 2026 Business Report - HOERBIGER
   · HOERBIGER attributes PI's below-expectation 2025 performance partly to weak automation demand and reduced publicly funded U.S. projects, while also identifying favorable ACS activity. The observations are company-specific. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
4. Warranty and Service Policy - Aerotech
   · Aerotech's published policy provides authorized repair routes and makes expedited and field service conditional. It supports evaluating retention without assuming an uninterrupted or unrestricted service outcome. ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/aerotech-warranty-policy.pdf))

3.3. New Revenue Opportunities

Conditional revenue routes include embedded modules for Equipment OEMs, instrument-compatible microscopy packages through appointed channels, environment-matched catalog variants for research buyers, and institutional supply with installation and continuing support. New Scale Technologies' M3-LS, Zaber's ASR family and AVR Optics appointment, PI's vacuum-ready variants, and IISc's historical purchasing requirements illustrate these themes. Capture depends on an approved need, accepted configuration, eligible contracting route and defined support; historical solicitations establish neither open opportunities nor awards. The Opportunity Mapping section provides the detailed assessment of these buyer-specific routes.

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber
   · ASR advertises microscopy software and mounting support with series-specific features, supporting a configuration-dependent microscopy proposition. ([zaber.com](https://www.zaber.com/products/families/ASR))
2. Vacuum / UHV Compatible Stages - Linear & Rotary Positioners for Vacuum, Wide Temperature Ranges | PI USA
   · PI distinguishes vacuum-ready standard products for selected series from modifications available on request, supporting a configuration-specific environmental supply proposition. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))
3. Locations and Contact - Zaber
   · Zaber lists AVR Optics for microscopy products and support in Canada, Mexico and the United States, establishing a geographically bounded appointment. ([zaber.com](https://www.zaber.com/contact/))

4. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1
   · IISc's September xx.xx 2023 stage solicitation required installation, institutional acceptance and continuing support. It establishes historical purchasing requirements, not an open opportunity or award. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))
5. Request for Quote for the Supply of Closed-Loop Cryogenic Nanopositioning System
   · IISc's June xx.xx 2025 RFQ imposed domestic-supplier conditions and did not accept local installation or related services as sufficient local value addition for imported products. These were solicitation-specific eligibility conditions. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))
6. Linear Micro Stages - New Scale Technologies
   · M3-LS embeds controller and drive electronics in the stage housing and is advertised for OEM incorporation, establishing an identifiable module proposition rather than customer approval. ([newscaletech.com](https://newscaletech.com/micro-motion-modules/m3-ls-linear-smart-stages/))

3.4. Next-Generation Business Models

The assessed business-model options change the responsibility sold with a stage: a bounded module such as M3-LS, or a negotiated integration package such as ETEL's Full Forward Integration. These are documented offering formats, not an established market-wide shift to complete-machine responsibility. Suppliers should distinguish assembly delivery, commissioned engineering and continuing support in the agreement. Consolidation can reduce separately managed supplier interfaces, while narrower supply preserves component choice and leaves coordination with the buyer.

Independent integration services and appointed distribution provide different routes to the customer. KAP Consulting advertises positioning-stage integration and retrofits without establishing stage-purchase authority. Zaber's territorial and selected-product appointments likewise constrain channel scope. An arrangement must identify who orders the stage, contracts the integration work and owns escalation. Separate operator purchasing and integration-service agreements remain an option where the integrator lacks a purchasing mandate; direct manufacturer access is an alternative only where offered.

Sources & Evidence

1. Locations and Contact - Zaber
   · Zaber documents territorial exclusivity, selected-product appointments and regions offering direct support alongside local channels; these distinctions constrain route selection without establishing order-specific service allocation. ([zaber.com](https://www.zaber.com/contact/))
2. KAP Consulting - Automation and Controls Integration & Programming
   · KAP Consulting advertises positioning-stage integration, machinery retrofits and assistance to equipment builders. Its service description does not establish project-specific stage purchasing or reseller authority. ([kapconsultingllc.com](https://kapconsultingllc.com/automation.html))
3. Full forward integration - ETEL SA
   · ETEL offers an integrated procurement route combining motion and selected surrounding system elements; the selected scope remains distinct from a uniform complete-machine commitment. ([etel.ch](https://www.etel.ch/motion-systems/full-forward-integration/))
4. Linear Micro Stages - New Scale Technologies
   · M3-LS consolidates stage and control selection within a bounded module, supporting comparison with separately procured or broader integration packages. ([newscaletech.com](https://newscaletech.com/micro-motion-modules/m3-ls-linear-smart-stages/))

5. Single Axis Stages | HIWIN
   · HIWIN advertises SDXK compatibility with its own and third-party servo and stepper motors, establishing a narrower sourcing alternative. ([hiwin.com](https://hiwin.com/products/single-axis-stages/))

3.5. Industry Roadmap

For 2026-2027, EU suppliers and integrators face a defined commercial milestone: the Machinery Regulation becomes mandatory on January xx.xx 2027 for covered products. Classification, placement timing and documentation responsibility should be agreed before accepting affected delivery obligations. The transition does not establish a replacement requirement for installed stages or identical treatment of every included category; unsettled classification warrants deferring the affected commitment.

For 2028-2029 sourcing decisions, monitor whether announced investment becomes an accepted delivery route. MISUMI's January xx.xx 2026 announcement describes planned positioning-stage production expansion in China and Vietnam, not confirmation of completion or a buyer-specific supply commitment. A named configuration, identified manufacturing and selling entities, procurement eligibility and agreed delivery are the relevant triggers. Retaining an established route is preferable where a proposed alternative has not resolved the actual supply or responsibility gap.

For 2030-2032 planning, long-lived equipment programs should secure replacement configurations, documentation access and support ownership rather than assume convergence on one control package. HIWIN's third-party-motor offering supports retaining alternative purchasing boundaries, subject to accepted interfaces and future supplier commitments. Separately, PI explicitly describes its presented magnetic-levitation platforms as technology demonstrators. Their offering-specific delivery, acceptance and continuing support remain unresolved; commercial agreement, not a presumed launch date, is the milestone for treating these examples as purchasing alternatives.

Sources & Evidence

1. Machinery - European Commission
   · The European Commission states that the Machinery Regulation applies mandatorily from January xx.xx 2027 and distinguishes the preceding Machinery Directive regime. Application concerns covered products rather than every stage category automatically. ([single-market-economy.ec.europa.eu](https://single-market-economy.ec.europa.eu/sectors/mechanical-engineering/machinery_en))
2. Magnetic Levitation Nanopositioning Stages: 6-DOF Comes Naturally - PI USA
   · PI explicitly labels its presented magnetic-levitation platforms as technology demonstrators and offers application discussions. That status does not establish standardized delivery, application acceptance or continuing-support commitments. ([pi-usa.us](https://www.pi-usa.us/en/tech-blog/picopositioning-maglev-6dof-linear-rotary-stages))
3. MISUMI Expands Automated Positioning Stage Production for Data Centers
   · MISUMI's January xx.xx 2026 announcement describes planned automated-positioning-stage production investment in China and Vietnam. The announcement does not establish completion or an individual buyer's accepted delivery commitment. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
4. Single Axis Stages | HIWIN
   · The documented third-party-motor alternative supports preserving distinct purchasing boundaries, but does not establish future replacement commitments. ([hiwin.com](https://hiwin.com/products/single-axis-stages/))

4. Market Overview

4.1. Introduction

The Global Motion Positioning Stages market combines standardized assemblies with configured and custom-engineered supply. ■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■ These examples illustrate different supplied packages, not equivalent products or relative supplier standing.

■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ Equipment OEMs, Independent System Integrators, and Direct Operators can purchase different portions of the integration package. Upstream components and complete downstream machines provide context but are not interchangeable with the stage being procured.

Figure 5. Global Motion Positioning Stages Market Size, 2017-2040 (USD Million, Growth %)

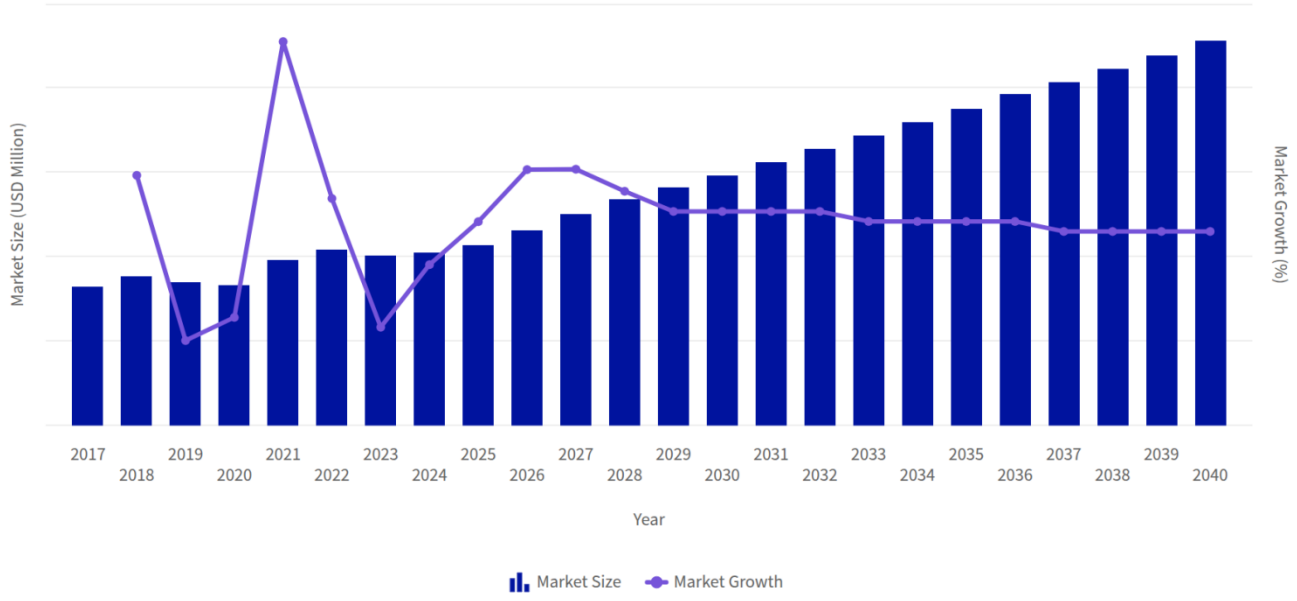


Table 2. Global Motion Positioning Stages Market Size, 2017-2040 (USD Million, Growth %)

Metric	2017	2024	2025	2026	2027	2032	2040
Market Size (USD Million)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Market Growth (%)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Custom Stages & Actuators | Aerotech
   - Aerotech publishes custom stages and actuators as an offering alongside catalog-based technologies. ([aerotech.com](https://www.aerotech.com/product/custom-stages-actuators/))

2. X-LDQ-AE Features - Zaber
   · X-LDQ-AE is described as a linear-stage series with built-in controllers and linear encoders. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE/features))
3. X-RST-AE Features - Zaber
   · X-RST-AE is described as a motorized rotary-stage series with built-in controllers and direct encoders. ([zaber.com](https://www.zaber.com/products/rotary-stages/X-RST-AE/features))
4. Positioning 2026 Business Report - HOERBIGER
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
5. MKS Inc. Annual Report 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
6. SIGMAKOKI Integrated Report 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
7. MISUMI Integrated Report 2025 - Business Portfolio
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
8. Festo Sustainability Report 2025 - Festo at a Glance
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
9. Festo startet optimistisch ins Jubiläumsjahr
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
10. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
11. Aerotech Recruiting FAQs
    · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.

12. Novanta Announces Agreement to Acquire Motion Solutions
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

13. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

14. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.

15. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

16. World Robotics 2025 Industrial Robots - Executive Summary
- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.

17. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

18. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.

19. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
- Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.

20. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.

21. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
· Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
· Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
22. MISUMI Expands Automated Positioning Stage Production for Data Centers
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
· Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
23. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
· Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

4.2. Key Growth Contribution

OEM incorporation can translate a larger equipment program into a stage purchase. Dover Motion reports Cellerate selecting SmartStage XY with onboard controls, illustrating adoption through a bounded motion subsystem rather than independently sourced mechanics and electronics. Serving that need requires agreed interfaces and an accepted division of equipment responsibility. The mechanism is conditional: packaged controls are useful only where they fit the buyer's retained architecture, and a named incorporation example establishes neither continuing orders nor universal preference for integration.

Figure 6. Global Motion Positioning Stages Market, Key Growth Contribution, by Region, 2025-2032 (USD Million)

Figure 7. Global Motion Positioning Stages Market, Key Growth Contribution, by Country, 2025-2032 (CAGR %)

Table 3. Global Motion Positioning Stages Market, Key Growth Contribution, 2025-2032

Scope	Leading Category	Added Market Size (USD Million)	Growth Share (%)	CAGR (%)
Actuation Mode	xx.xx	xx.xx	xx.xx	xx.xx
Application	xx.xx	xx.xx	xx.xx	xx.xx
Control Integration	xx.xx	xx.xx	xx.xx	xx.xx
Country	xx.xx	xx.xx	xx.xx	xx.xx
Customization Level	xx.xx	xx.xx	xx.xx	xx.xx
Drive Mechanism	xx.xx	xx.xx	xx.xx	xx.xx
End-User Sector	xx.xx	xx.xx	xx.xx	xx.xx
Feedback Architecture	xx.xx	xx.xx	xx.xx	xx.xx
Guidance Technology	xx.xx	xx.xx	xx.xx	xx.xx
Operating Environment	xx.xx	xx.xx	xx.xx	xx.xx
Purchasing Role	xx.xx	xx.xx	xx.xx	xx.xx
Region	xx.xx	xx.xx	xx.xx	xx.xx
Sales Channel	xx.xx	xx.xx	xx.xx	xx.xx
Stage Configuration	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Automating Precision Assembly with the SmartStage XY

- Dover Motion reports Cellerate's selection of SmartStage XY and describes onboard controls as reducing separately accommodated electronics; this is a supplier-reported incorporation example, not evidence of continuing orders. ([dovermotion.com](https://dovermotion.com/case-studies/automating-precision-assembly-with-the-smartstage-xy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The incorporated-stage case spans research through production quality control, challenging automatic Manufacturing attribution from equipment application alone.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The incorporated-stage case spans research through production quality control, challenging automatic Manufacturing attribution from equipment application alone.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The case establishes a possible research destination but supplies no operator-level sales split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The case establishes a possible research destination but supplies no operator-level sales split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment application does not identify institutional ownership; educational attribution requires a separate operator bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment application does not identify institutional ownership; educational attribution requires a separate operator bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial case identifies a Dover stage incorporated into Cellerate's larger module, supporting OEM attribution without disclosing a purchasing amount.

2. Positioning 2026 Business Report - HOERBIGER

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI reported EUR xx.xx sales in 2025 versus EUR xx.xx in 2024. This constrains the inherited PI stage pool and challenges rapid uniform growth; it does not disclose screw-stage revenue. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same company-level revenue is a scale constraint for the modeled electromagnetic allocation, not a reported mechanism share. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company total bounds the assumed finished piezo-stage contribution after inherited non-stage exclusions; no piezo-stage split is reported. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI's company revenue constrains the modeled hybrid contribution within its scoped stage pool; the hybrid fraction remains assumed. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI reported EUR xx.xx corporate sales in 2025 versus EUR xx.xx in 2024, constraining the inherited PI revenue pool but not directly verifying stage attribution or guidance mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI reported EUR xx.xx corporate sales in 2025 versus EUR xx.xx in 2024, constraining the inherited PI revenue pool but not directly verifying stage attribution or guidance mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Weak 2025 supplier performance and a high-single-digit corporate growth objective for 2026 temper uniform transmission of equipment-cycle growth into the modeled precision-stage mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 sales versus EUR xx.xx in 2024 and reported automation weakness challenge uniform equipment-cycle pass-through.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 sales versus EUR xx.xx in 2024 and reported automation weakness challenge uniform equipment-cycle pass-through.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported reductions in publicly funded projects qualify assumptions of rapid research-related demand growth; no stage-only sector split is disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported public-project weakness supports a restrained scientific-demand trajectory rather than an automatic institutional purchasing uplift.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 corporate sales constrain the inherited specialty-supplier value pool, not a disclosed catalog-stage share. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 corporate sales constrain the inherited specialty-supplier value pool, not a disclosed catalog-stage share. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024-2025 corporate sales comparison provides a restraint on assuming uniform rapid conversion of equipment demand into configured-stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024-2025 corporate sales comparison provides a restraint on assuming uniform rapid conversion of equipment demand into configured-stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sales increased from EUR xx.xx to EUR xx.xx; this counterforce tempers the modeled custom-stage growth assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sales increased from EUR xx.xx to EUR xx.xx; this counterforce tempers the modeled custom-stage growth assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx

3. MKS Inc. Annual Report 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY-May-2025 optical-basic-equipment sales of JPY xx.xx and automatic-applied-product sales of JPY xx.xx support the scoped manual/automatic monetary proxy after explicit stage-attribution assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The corresponding FY2024 amounts, JPY xx.xx and JPY xx.xx, provide counterevidence to uniform electrical substitution; they do not directly establish future shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY-May-2025 optical-basic-equipment sales of JPY xx.xx and automatic-applied-product sales of JPY xx.xx support the scoped manual/automatic monetary proxy after explicit stage-attribution assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The corresponding FY2024 amounts, JPY xx.xx and JPY xx.xx, provide counterevidence to uniform electrical substitution; they do not directly establish future shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automatic-applied-product revenue supplies the electrical side of the scoped optical-catalog value proxy, subject to inherited exclusions for controls and unrelated products.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The fiscal decline in the automatic product pool qualifies the forecast's electrical-growth assumption rather than directly verifying it.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automatic-applied-product revenue supplies the electrical side of the scoped optical-catalog value proxy, subject to inherited exclusions for controls and unrelated products.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The fiscal decline in the automatic product pool qualifies the forecast's electrical-growth assumption rather than directly verifying it.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May-2025 report identifies JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. Inherited stage exclusions and currency conversion constrain the optical/catalog pool, not an observed screw mix. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual/basic and automated product revenue pools provide monetary context for optical-stage demand; the rotary-gear attribution remains a modeled portion. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The FY2025 report's xx.xx% standalone-company special-product share informs, but does not directly establish, the stage-specific catalog complement. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The FY2025 report's xx.xx% standalone-company special-product share informs, but does not directly establish, the stage-specific catalog complement. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The special-product disclosure is a calibration input requiring an assumed split between predefined configuration and new engineering.

5. MISUMI Integrated Report 2025 - Business Portfolio

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024 FA manufacturing sales were JPY xx.xx; the report distinguishes manufacturing from VONA distribution. The frozen scoped stage contribution enters the industrial monetary pool, not the entire FA turnover. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturing/distribution distinction supports excluding resale duplication from the common industrial-stage pool used for the modeled belt allocation. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024 FA manufacturing sales of JPY xx.xx constrain an inherited supplier pool; VONA distribution is separately identified and excluded from additive resale value. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024 FA manufacturing sales of JPY xx.xx constrain an inherited supplier pool; VONA distribution is separately identified and excluded from additive resale value. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports the value-chain boundary of the configurable industrial supplier pool, not a customization percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports the value-chain boundary of the configurable industrial supplier pool, not a customization percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The financial pool requires inherited stage attribution before customization allocation; total FA sales are not treated as custom-stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The financial pool requires inherited stage attribution before customization allocation; total FA sales are not treated as custom-stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies JPY xx.xx FA manufacturing revenue and distinguishes manufacturing from VONA distribution. This supports the manufacturing-only weight used in the joint channel model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies JPY xx.xx FA manufacturing revenue and distinguishes manufacturing from VONA distribution. This supports the manufacturing-only weight used in the joint channel model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports excluding third-party resale turnover from the market denominator while attributing independently manufactured stages to their actual selling route.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports excluding third-party resale turnover from the market denominator while attributing independently manufactured stages to their actual selling route.

6. Festo Sustainability Report 2025 - Festo at a Glance
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Festo reported EUR xx.xx revenue in 2025 and identifies pneumatic and electric automation businesses. Only the inherited scoped stage contribution enters the model; the fluid-pressure fraction of that pool is assumed. ([festo.com](https://www.festo.com/PDF_Flip/corp/Festo_Sustainability_Report_2025/en/xx.xx-xx.xx/index.html))
7. Festo startet optimistisch ins Jubiläumsjahr
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Association-reported 2025 semiconductor-equipment billings of USD xx.xx anchor the shared semiconductor purchasing proxy; modeled stage content and configuration attribution are separate assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Association-reported 2025 semiconductor-equipment billings of USD xx.xx anchor the shared semiconductor purchasing proxy; modeled stage content and configuration attribution are separate assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The semiconductor-equipment activity anchor constrains the common pool from which the rotary value weight is modeled; it does not disclose rotary-stage sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The semiconductor-equipment activity anchor constrains the common pool from which the rotary value weight is modeled; it does not disclose rotary-stage sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The common semiconductor purchasing proxy supports the denominator bridge for modeled goniometer/tilt allocation, not a directly observed configuration percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The common semiconductor purchasing proxy supports the denominator bridge for modeled goniometer/tilt allocation, not a directly observed configuration percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment billings constrain semiconductor-related merchant-stage demand used in the translation-package model; complete-machine value is not counted as stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment billings constrain semiconductor-related merchant-stage demand used in the translation-package model; complete-machine value is not counted as stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared equipment-activity anchor supports the semiconductor pool underlying the modeled angular-package allocation, with incidence and realization left explicitly assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The shared equipment-activity anchor supports the semiconductor pool underlying the modeled angular-package allocation, with incidence and realization left explicitly assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The

13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 support the inherited general-automation activity benchmark, not a count of linear stages.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 support the inherited general-automation activity benchmark, not a count of linear stages.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The automation activity benchmark constrains the industrial purchasing pool used for modeled rotary-stage value attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The automation activity benchmark constrains the industrial purchasing pool used for modeled rotary-stage value attribution.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The industrial pool uses installation activity only as a commercial proxy; the goniometer/tilt incidence is an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The industrial pool uses installation activity only as a commercial proxy; the goniometer/tilt incidence is an explicit assumption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial automation activity supports the common purchasing-pool bridge for translation packages, without equating robot purchases to stage shipments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial automation activity supports the common purchasing-pool bridge for translation packages, without equating robot purchases to stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The industrial activity benchmark constrains the purchasing pool, while angular-package incidence and realizations remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The industrial activity benchmark constrains the purchasing pool, while angular-package incidence and realizations remain modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Installation activity supports the general-industrial demand bridge, not an observed combined-stage attachment rate or future configuration share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Installation activity supports the general-industrial demand bridge, not an observed combined-stage attachment rate or future configuration share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 support the rounded automation-activity benchmark, not observed stage shipments.
([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installations benchmark constrains industrial activity; stage attachment, price and actuator-feedback purchasing mix are modeled. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared industrial-demand input is an activity proxy, with load-side package attribution applied separately.
([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial installations support the common demand-scale bridge, not an observed dual-position stage penetration rate.
([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The activity benchmark supports the industrial cohort; complete mixed-stage package counts remain assumption-led.
([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx robot installations in 2025 constrain the industrial activity scale; alignment attachments are assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx robot installations in 2025 constrain the industrial activity scale; alignment attachments are assumed.

14. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
15. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
16. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
17. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

18. MISUMI Expands Automated Positioning Stage Production for Data Centers

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 automated-stage investment announcement supports a conditional supply response and cautions against assigning all automation expansion to integrated multi-axis packages.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately JPY xx.xx planned investment and intended capacity doubling support available automated-stage supply, not realized translation-package sales or a measured adoption increment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported optical-transceiver equipment demand is a conditional commercial signal for alignment-stage purchasing; the announcement does not identify the combined-stage revenue share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement describes approximately JPY xx.xx planned investment to double automated-stage supply capacity. It supports an expansion premise, not a screw-specific sales forecast. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announcement is a common automated-stage demand and supply signal; the electromagnetic relative-growth assumption is separately modeled and is not disclosed by the source. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned capacity is not counted as realized revenue or allocated automatically to piezoelectric stages; it supplies only a shared conditional expansion premise. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stage-capacity announcement supports the broader equipment-expansion scenario but does not verify hybrid adoption, utilization or the modeled hybrid share increase. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment, doubled automated-stage supply capacity and rising optical-transceiver-related orders. This supports a conditional OEM-stage demand premise, not realized guidance-specific revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stage-specific capacity and order announcement supports the forecast's rolling-stage purchasing premise when combined with independently documented crossed-roller offerings; it does not disclose the roller share of that expansion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced automated-stage capacity expansion supports an automation supply-response scenario, but does not prove displacement of open/non-servo purchases. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately JPY xx.xx planned investment and intended capacity doubling support commercial expansion, not actuator-feedback-specific adoption or realized sales. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier announcement supports the conditional automation-demand premise; it does not disclose load-feedback orders or validate the modeled mix shift. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Capacity plans constrain the commercial supply-response premise, while dual-position configuration prevalence remains an explicit forecast assumption. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The investment announcement supports broader automated-stage activity, not observed mixed-feedback package revenue or future utilization. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies approximately JPY xx.xx investment and planned doubling of automated-stage supply capacity; it supports a conditional adoption premise, not realized revenue.

19. Locations and Contact - Zaber

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Territorial and selected-product distributor appointments establish channel boundaries, not whether the underlying purchaser is an equipment OEM.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Territorial and selected-product distributor appointments establish channel boundaries, not whether the underlying purchaser is an equipment OEM.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distributor appointment alone does not establish integrator procurement; pure resale is looked through without counting its markup.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distributor appointment alone does not establish integrator procurement; pure resale is looked through without counting its markup.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected-product and microscopy-support channels can serve own-use buyers without changing their purchasing-role classification; no channel sales weights are disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected-product and microscopy-support channels can serve own-use buyers without changing their purchasing-role classification; no channel sales weights are disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated contact page distinguishes manufacturer offices from exclusive and non-exclusive distributors. It constrains direct-access assumptions; historical continuity into 2025 remains unverified.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated contact page distinguishes manufacturer offices from exclusive and non-exclusive distributors. It constrains direct-access assumptions; historical continuity into 2025 remains unverified.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusive territorial appointments and selected-product coverage establish bounded reseller access, not channel revenue. The model retains indirect activity without deriving weights from distributor counts.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusive territorial appointments and selected-product coverage establish bounded reseller access, not channel revenue. The model retains indirect activity without deriving weights from distributor counts.

20. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

21. LSM Family - Compact, Screw Drive Linear Stage - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current North American direct X-LSM prices of USD xx.xx-xx.xx constrain standard controlled linear-stage realizations; they are relative-price proxies, not observed global 2025 ASPs or future sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current North American direct X-LSM prices of USD xx.xx-xx.xx constrain standard controlled linear-stage realizations; they are relative-price proxies, not observed global 2025 ASPs or future sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Public direct stage prices constrain package-price plausibility, not alignment purchasing volumes.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Single-axis and multi-axis list prices provide a commercial range for the assumed processing-stage package realization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standard LSM direct prices include USD xx.xx-xx.xx with multi-axis packages priced higher; global manufacturer realizations remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Higher-priced multi-axis offerings constrain the scientific-testing package assumption without establishing its frequency.
22. RSM Family - Rotary Stages, Vacuum Compatible Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current X-RSM prices of USD xx.xx-xx.xx and higher-priced vacuum variants constrain the rotary realization range. Controller and environmental variants prevent assuming one universal rotary ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current X-RSM prices of USD xx.xx-xx.xx and higher-priced vacuum variants constrain the rotary realization range. Controller and environmental variants prevent assuming one universal rotary ASP.
23. X-GSM-E Motorized Goniometer and Tilting Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: X-GSM-E goniometers are listed at USD xx.xx with built-in controls, providing a standard motorized goniometer price anchor rather than a global sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: X-GSM-E goniometers are listed at USD xx.xx with built-in controls, providing a standard motorized goniometer price anchor rather than a global sales weight.

24. ASR Family - Motorized XY Microscope Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The XY microscope-stage family offers motor-only and controlled packages; X-ASR prices are USD xx.xx-xx.xx. This supports the integrated translation-package category and its relative realization assumptions, not observed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The XY microscope-stage family offers motor-only and controlled packages; X-ASR prices are USD xx.xx-xx.xx. This supports the integrated translation-package category and its relative realization assumptions, not observed adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASR motor-only and built-in-controller packages both contain stepper motors, supporting electrical classification regardless of controller inclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current North American direct entry prices distinguish package scope but are not used as 2025 realized prices or a universal controller premium.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A motor-only package is not motorless; the family provides a commercial counterexample to equating absent control electronics with Drive-Ready stages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Microscopy-stage direct prices span USD xx.xx-xx.xx across the family; controller alternatives and software support establish package differences, not observed buyer mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current microscopy-stage packages and North American direct prices provide a limited price-scale check for the industrial pool's relative-value bridge, not observed sector prices.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current microscopy-stage packages and North American direct prices provide a limited price-scale check for the industrial pool's relative-value bridge, not observed sector prices.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Microscopy-stage price ranges and alternative control packages inform a bounded non-manufacturing relative-price assumption, not research sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Microscopy-stage price ranges and alternative control packages inform a bounded non-manufacturing relative-price assumption, not research sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Catalog packages provide a commercial price reference, not measured institutional preferences or academic purchasing volumes.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Catalog packages provide a commercial price reference, not measured institutional preferences or academic purchasing volumes.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Microscopy compatibility establishes an offering context, not provider adoption, clinical acceptance or healthcare-stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Microscopy compatibility establishes an offering context, not provider adoption, clinical acceptance or healthcare-stage revenue.
25. G-RST Family - Two-Axis Gimbal Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Two-axis gimbal stages have current direct price ranges of USD xx.xx-xx.xx and USD xx.xx-xx.xx constraining the higher-value angular-package range without establishing shipment incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Two-axis gimbal stages have current direct price ranges of USD xx.xx-xx.xx and USD xx.xx-xx.xx constraining the higher-value angular-package range without establishing shipment incidence.

26. 40mm, English Micrometer Tilt Stage - Edmund Optics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual two-axis tip-tilt stage is listed at USD xx.xx for quantities one to two and USD xx.xx for three or more, demonstrating lower-cost angular packages and quantity-price variation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual two-axis tip-tilt stage is listed at USD xx.xx for quantities one to two and USD xx.xx for three or more, demonstrating lower-cost angular packages and quantity-price variation.
27. H-840 Hexapod 6-Axis Positioning System - Physik Instrumente
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The H-xx.xx is a marketed positioning assembly combining three translational and three rotational axes. It supports combined-stage classification and package scope, but publishes neither attributable category revenue nor a realized price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The H-xx.xx is a marketed positioning assembly combining three translational and three rotational axes. It supports combined-stage classification and package scope, but publishes neither attributable category revenue nor a realized price.
28. Global Tender for a Manual Waveguide Alignment Rig - Indian Institute of Science
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 tender requests a manual common-base arrangement containing XYZ units and central linear/rotational positioning. It supports inclusion of manual combined offerings, not an award, current revenue or a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 tender requests a manual common-base arrangement containing XYZ units and central linear/rotational positioning. It supports inclusion of manual combined offerings, not an award, current revenue or a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 manual-stage procurement specification includes digital position readout, supporting classification without equating readout with servo control. No award value is disclosed. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2022/xx.xx/waveguide-allignment-rig.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated institutional tender establishes manual alignment-stage procurement eligibility and support obligations; it supplies no award value or global sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated institutional tender establishes manual alignment-stage procurement eligibility and support obligations; it supplies no award value or global sales weight.
29. DMA - XYZ Stage Configurator - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx XYZ configuration includes individually packaged stages requiring assembly, supporting the distinction between separately supplied axes and a delivered multi-axis assembly.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD xx.xx XYZ configuration includes individually packaged stages requiring assembly, supporting the distinction between separately supplied axes and a delivered multi-axis assembly.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The configurator is counterevidence to treating every multi-axis catalog bundle as an assembled translation-stage sale; its price is not used as an observed complete-assembly realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The configurator is counterevidence to treating every multi-axis catalog bundle as an assembled translation-stage sale; its price is not used as an observed complete-assembly realization.

30. Linear Stages - High Accuracy Motorized Translation Stages - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI identifies motor-driven precision stages and electrically driven air-bearing stages, supporting the precision-pool classification premise but not its assumed sales fractions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Air-bearing guidance on a motor-driven stage does not establish pneumatic actuation, preventing high-value precision stages from being allocated solely by bearing terminology.
31. Electric Actuators - Controllers/Drivers, P-E20-1 - SMC
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC lists motor-driven slide and rotary tables, supporting electrical-stage participation within its scoped stage budget; the document does not disclose sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The catalog separately identifies motorless slider variants, supporting Drive-Ready classification even when the supplier places them within an electric-actuator catalog.
32. Air Slide Table MXQ Series - SMC
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC's MXQ commercial page identifies an air slide table, supporting a qualifying complete-stage product category within the modeled pneumatic supplier pool, not a published revenue percentage.
33. Electromechanical Actuators - Festo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Festo distinguishes electric axes and complete units including motors and servo drives, supporting configuration-sensitive electrical attribution rather than counting every mechanical axis as motor-equipped.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distinction between mechanical-axis offerings and integrated complete solutions supports a separate modeled Drive-Ready exposure; no shipment split is disclosed.
34. Simple Electric Automation Solution - Festo USA
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Festo describes integrated electric motion offerings and their commercial positioning against pneumatic alternatives, supporting a conditional substitution mechanism rather than a measured adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Festo retains pneumatic positioning for simple movements and identifies upfront-cost trade-offs, supporting continued pneumatic activity rather than complete displacement.
35. Motorless Stages: Z-Axis Level Cross Roller Guide - MISUMI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The motorless-stage catalog establishes a complete stage offered without an installed motor and states catalog-specific customer-installation guarantee limitations; it supports classification and integration-risk context, not the modeled global share.
36. Global Tender for Supply and Installation of Piezo Actuated Linear XYZ Stage with Full Assembly - Indian Institute of Science
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 tender requests two multi-axis assemblies combining powered and manual positioning, supporting the existence of a mixed-actuation purchasing configuration; no award or realized purchase value is established.
37. Rotary Indexing Table - Air-Hydraulics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer brochure identifies pneumatic rotary indexing tables and electrical sensing, supporting motive-power classification independently of sensing electronics.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The brochure lists hydraulic-powered indexing for Model xx.xx supporting a commercially identified hydraulic-stage option but not its realized sales or global penetration.

38. Increased Production of Automated Stages for Data Centers and Components for Growth Industries - MISUMI, July 31, 2026

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2026 announcement describes JPY xx.xx of broader expansion investment and planned automatic-stage capacity approximately three times FY2025, supporting a conditional automation supply-response premise, not realized revenue or the forecast percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expansion of automatic-stage supply supports the broader industrial positioning activity premise, while its motor-installed versus motorless revenue attribution remains an explicit forecast assumption.

39. Linear Translation Stages and NanoPositioners Overview - PI USA

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI identifies ball-screw stage offerings, supporting installed screw-drive classification rather than classification solely by the motor. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The portfolio separately identifies piezo-actuator and piezo-motor stages; it establishes category mapping, not their sales weights. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: M-xx.xx is identified as a hybrid piezo/servo-motor stage, supporting the mixed-actuation attribution premise. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI identifies crossed-roller-guided stages separately from their servo, stepper, screw and piezo drive options, supporting the model's roller-guidance mapping independently of actuation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI identifies crossed-roller-guided stages separately from their servo, stepper, screw and piezo drive options, supporting the model's roller-guidance mapping independently of actuation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI explicitly identifies flexure-guided NanoCube and other nanopositioning products, supporting flexure exposure in precision and scientific-stage pools without providing a sales fraction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI explicitly identifies flexure-guided NanoCube and other nanopositioning products, supporting flexure exposure in precision and scientific-stage pools without providing a sales fraction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI separately describes magnetic-linear-motor stages with air-bearing guidance, supporting air-guidance classification without equating guidance with motive drive.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI separately describes magnetic-linear-motor stages with air-bearing guidance, supporting air-guidance classification without equating guidance with motive drive.

40. X-LSQ-E Closed-Loop Motorized Linear Stages - Zaber

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The X-LSQ-E page identifies lead-screw variants and a current USD xx.xx starting price for xx.xx-mm models. It supplies a direct North American asking-price comparison, not a 2025 realized global average. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LSQ-E))

41. X-LDQ-AE Precision Linear Motor Stages - Zaber

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: X-LDQ-AE is identified as a linear-motor stage; the current xx.xx-mm model starts at USD xx.xx. Its comparison with the screw-stage price challenges unit-weighted allocation but does not establish a universal premium. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The linear-encoder servo family lists USD xx.xx for its xx.xx mm package, anchoring the load-side reference before explicitly assumed forecast price compression. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The linear-encoder servo family lists USD xx.xx for its xx.xx mm package, anchoring the load-side reference before explicitly assumed forecast price compression. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The load-side package price supplies a commercial baseline for the dual-position basket; its additional USD xx.xx increment is an assumption, not this product's quote. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The load-side package price supplies a commercial baseline for the dual-position basket; its additional USD xx.xx increment is an assumption, not this product's quote. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies the load-feedback constituent reference in the modeled mixed basket; the source does not establish mixed-package sales. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies the load-feedback constituent reference in the modeled mixed basket; the source does not establish mixed-package sales. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

42. 60mm Travel, X-Axis Rack & Pinion Stage - Edmund Optics

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete stage listing explicitly specifies rack-and-pinion drive and a current USD xx.xx single-unit asking price. It supports commercial mapping and low-priced catalog exposure, not market prevalence. ([edmundoptics.com](https://www.edmundoptics.com/p/60mm-travel-x-axis-rack-amp-pinion-stage/xx.xx?PrintPDF=true))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The named dovetail rack-and-pinion stage is listed at USD xx.xx for quantities xx.xx-xx.xx. This current package price supplies an illustrative relative-value check, not a 2025 factory realization or observed category share.

43. RSM-E Motorized Rotation Stages - Zaber

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: RSM-E explicitly identifies worm gearing and a current complete-stage starting price of USD 2123. This supports geared rotary-stage classification, not a reported revenue share. ([zaber.com](https://www.zaber.com/products/rotary-stages/RSM-E))

44. LC40 Features - Zaber

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: LC40 distinguishes a synchronous belt-equipped offering from a passive guide option. It supports the belt-led category proxy but does not establish cable-stage sales. ([zaber.com](https://www.zaber.com/products/linear-stages/LC40/features))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The passive option demonstrates why drive installation must be checked separately; a rail-only transaction is not automatically a complete unactuated stage in the modeled numerator. ([zaber.com](https://www.zaber.com/products/linear-stages/LC40/features))

45. Precision Slide Table with Recirculating Bearings - MXQ - SMC

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC identifies MXQ as a complete pneumatic precision slide table, supporting direct fluid-pressure stage classification. The page does not disclose stage revenue or the modeled supplier-pool mix. ([smcusa.com](https://www.smcusa.com/products/pneumatic-actuators/guided-actuators/slide-table/precision-slide-table-mxq-mxs/mxq~xx.xx))

46. IDL280-Z20 Industrial Vertical Stage - Newport, January 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2026 description identifies a finished vertical stage with a wedge arrangement and ball-screw drive. It supports compound-mechanism attribution, not 2025 sales or a published category share. ([newport.com](https://www.newport.com/mam/celum/celum_assets/resources/IDL280-Z20_-_User_s_Manual.pdf?xx.xx=))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The compound arrangement supports excluding a single serial screw/wedge chain from an automatic hybrid classification; mixed independently actuated assemblies use a separate convention. ([newport.com](https://www.newport.com/mam/celum/celum_assets/resources/IDL280-Z20_-_User_s_Manual.pdf?xx.xx=))

47. Newport RSP Series Rotation Stages - Manufacturer Catalog Pages Hosted by Artisan Technology Group

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identifiable Newport-authored interior catalog pages document friction-driven finished rotation stages. Only this historical manufacturer material is used; reseller inventory and used-equipment prices are excluded. Current roller-specific revenue remains unverified. ([artisantg.com](https://www.artisantg.com/info/Newport_RSP_2_Datasheet_20166231641l3.pdf))

48. New Focus/Newport Vacuum-Compatible Stainless-Steel Crossed-Roller-Bearing Translation Stages

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer catalog presents complete xx.xx/xx.xx translation-stage assemblies with actuators expressly excluded. This supports the complete-assembly boundary, not current availability or 2025 revenue volume. ([newport-japan.jp](https://www.newport-japan.jp/pdf/xx.xx.pdf))

49. Linear Actuator - THK Official Web Site

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: THK identifies KR/SKR as integrated LM-guide and ball-screw assemblies with ball-guided structures, supporting complete-stage mapping to the ball-bearing exposure of the automation cohort. The page does not disclose sales weights.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: THK identifies KR/SKR as integrated LM-guide and ball-screw assemblies with ball-guided structures, supporting complete-stage mapping to the ball-bearing exposure of the automation cohort. The page does not disclose sales weights.

50. Mini slide DGST - Festo

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The DGST commercial datasheet distinguishes pneumatic actuation from ball-bearing guidance, supporting guidance-versus-drive independence and the automation cohort's ball-guided stage premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The DGST commercial datasheet distinguishes pneumatic actuation from ball-bearing guidance, supporting guidance-versus-drive independence and the automation cohort's ball-guided stage premise.

51. WEB Catalog - SMC CORPORATION
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC separately lists slide-bearing-guided offerings, supporting a sliding-guidance commercial exposure within automation rather than equating pneumatic actuation with one bearing class.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SMC separately lists slide-bearing-guided offerings, supporting a sliding-guidance commercial exposure within automation rather than equating pneumatic actuation with one bearing class.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC lists recirculating-linear-guided compact slides separately from crossed-roller products; this supports distinct guidance exposures, not their modeled sales percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SMC lists recirculating-linear-guided compact slides separately from crossed-roller products; this supports distinct guidance exposures, not their modeled sales percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MXS and MXF listings explicitly identify cross-roller guidance, supporting roller-stage exposure within the automation commercial pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MXS and MXF listings explicitly identify cross-roller guidance, supporting roller-stage exposure within the automation commercial pool.
52. 25mm Travel, Metric Micrometer, Solid-Top Ball Bearing Stage - Edmund Optics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The named ball-bearing micrometer stage is listed at USD xx.xx. Compared with the separately documented USD xx.xx dovetail package, it supplies a price-order check while differing size and configuration prevent treating the ratio as a guidance-only premium.
53. Oil Hydrostatic Linear Stages - ABTech
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ABTech advertises complete oil-hydrostatic linear stages as standalone or multi-axis offerings and separately describes pump units and integrated linear motors. This supports the niche's commercial boundary and package-valuation treatment, not its estimated revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ABTech advertises complete oil-hydrostatic linear stages as standalone or multi-axis offerings and separately describes pump units and integrated linear motors. This supports the niche's commercial boundary and package-valuation treatment, not its estimated revenue.
54. Magnetic Levitation Nanopositioning Stages: 6-DOF Comes Naturally - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI explicitly labels its rotary, long-travel linear and AFM maglev platforms as technology demonstrators. This constrains the model against inferring PI standard-product revenue or automatic future commercialization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI explicitly labels its rotary, long-travel linear and AFM maglev platforms as technology demonstrators. This constrains the model against inferring PI standard-product revenue or automatic future commercialization.
55. Advanced Customized Motion Stages - Beijing U-Precision Tech Co., Ltd.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: U-Precision advertises advanced customized motion stages, distinguishes air-bearing and magnetic-bearing configurations, and describes application experience. This supplies a merchant custom-stage commercial lead, while current-year sales and complete-stage attribution remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: U-Precision advertises advanced customized motion stages, distinguishes air-bearing and magnetic-bearing configurations, and describes application experience. This supplies a merchant custom-stage commercial lead, while current-year sales and complete-stage attribution remain unmeasured.

56. XYZ Stages - Multi-Axis Motorized 3-Axis Stage - PI USA

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI advertises the A-xx.xx hybrid gantry with air and mechanical linear bearings and an XYZ assembly combining air-bearing XY motion with mechanical Z motion. These complete-assembly examples support mixed-guidance classification, not a portfolio-count sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI advertises the A-xx.xx hybrid gantry with air and mechanical linear bearings and an XYZ assembly combining air-bearing XY motion with mechanical Z motion. These complete-assembly examples support mixed-guidance classification, not a portfolio-count sales weight.

57. X-Axis Motorized Positioning Stages, Cross Roller Type - MISUMI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: MISUMI's own named motorized positioning-stage listing identifies crossed-roller guidance, supporting the separate roller exposure assigned to its manufacturing-stage pool. The listing is not a revenue or shipment weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MISUMI's own named motorized positioning-stage listing identifies crossed-roller guidance, supporting the separate roller exposure assigned to its manufacturing-stage pool. The listing is not a revenue or shipment weight.

58. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SEMI's July xx.xx 2026 supplier-input forecast projects wafer-fab-equipment growth of xx.xx%, xx.xx% and xx.xx% in 2026-2028, constraining the precision-equipment demand premise. The modeled roller-stage rate is separate and substantially attenuated.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association's equipment outlook provides an external downstream demand signal for precision alignment and inspection purchases, not a published flexure-stage share or adoption rate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment expansion forecast constrains the high-precision purchasing premise used for air-bearing stages; equipment sales are not substituted for externally sold stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected 2026-2028 wafer-fab-equipment growth constrains the faster semiconductor-exposed forecast component; the merchant-stage response is assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment growth informs the semiconductor-exposed portion of the research-sector forecast, not an observed future sector share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment growth informs the semiconductor-exposed portion of the education forecast, not an observed future purchasing mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2026 association forecast projects wafer-fab-equipment growth of xx.xx%, xx.xx% and xx.xx% in 2026-2028, supporting the inherited attenuated semiconductor demand driver rather than directly forecasting environmental shares. ([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-sales-forecast-to-reach-a-record-xx.xx-billion-dollars-in-2028-semi-reports?trk=article-ssr-frontend-pulse_little-text-block))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Differential semiconductor demand growth changes the forecast allocation through the base environmental model; its stage-response coefficient remains assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The forecast activity signal supports the relative-demand bridge, not a measured increase in combined-environment adoption or pricing.

59. X-LSQ075A Specifications - Zaber

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: X-LSQ075A lists USD xx.xx a built-in controller and no encoder. It anchors the powered non-servo package reference carried into the forecast model.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LSQ/specs?part=X-LSQ075A))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: X-LSQ075A lists USD xx.xx a built-in controller and no encoder. It anchors the powered non-servo package reference carried into the forecast model.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LSQ/specs?part=X-LSQ075A))

60. X-LRQ-E Motorized Linear Stages, Built-in Controllers & Motor Encoders - Zaber

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The motor-encoder closed-loop family lists USD xx.xx for xx.xx mm configurations, anchoring the actuator-side relative-price reference; future prices remain modeled.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The motor-encoder closed-loop family lists USD xx.xx for xx.xx mm configurations, anchoring the actuator-side relative-price reference; future prices remain modeled.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies one constituent reference in the modeled mixed-package basket, not a disclosed complete mixed-system price or sales share. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies one constituent reference in the modeled mixed-package basket, not a disclosed complete mixed-system price or sales share. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

61. PRO-SV Long-Travel Lift Stages - Aerotech

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordering distinguishes rotary-only feedback and component/system integration scopes, supporting configuration attribution rather than an assumed universal controller purchase.
([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordering distinguishes rotary-only feedback and component/system integration scopes, supporting configuration attribution rather than an assumed universal controller purchase.
([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five ordering options explicitly combine linear and rotary position feedback as dual-loop; option counts are not used as sales weights.
([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five ordering options explicitly combine linear and rotary position feedback as dual-loop; option counts are not used as sales weights.
([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))

62. 3-Axis NanoMax Flexure Stages - Thorlabs, archived October 31, 2018

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The archived commercial package distinguishes manual differential positioning and internal closed-loop piezo positioning. It supports a historical heterogeneous-package precedent, not observed 2025 revenue.
([punchout.thorlabs.com](https://punchout.thorlabs.com/catalogpages/Obsolete/2018/MAX343_M.pdf))

63. P-737 PIFOC Specimen Z Positioners - PI

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The P-xx.xx portfolio specifies indirect position sensing, qualifying the assumption that every sensor-equipped piezo stage measures load position directly. ([pi-usa.us](https://www.pi-usa.us/en/products/piezo-flexure-nanopositioners/z-ztiptilt-piezo-nanopositioning-stages/p-xx.xx-pifoc-specimen-focusing-z-stage-xx.xx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Directly measuring capacitive versions are offered on request, supporting configuration-specific separation from indirect-sensing packages rather than a sales-weight inference. ([pi-usa.us](https://www.pi-usa.us/en/products/piezo-flexure-nanopositioners/z-ztiptilt-piezo-nanopositioning-stages/p-xx.xx-pifoc-specimen-focusing-z-stage-xx.xx))

64. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment outlook constrains semiconductor-related forecast demand; the alignment adoption increment remains an assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the common semiconductor forecast driver, not a future imaging-stage share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the USD xx.xx historical WFE proxy and USD xx.xx 2028 projection used in the content and relative-growth model.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the USD xx.xx historical WFE proxy and USD xx.xx 2028 projection used in the content and relative-growth model.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: WFE monetary anchors constrain processing exposure; merchant content and captive-sourcing exclusions are assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: WFE monetary anchors constrain processing exposure; merchant content and captive-sourcing exclusions are assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Packaging values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Packaging values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Test-equipment values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Test-equipment values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 forecast projects wafer-fab-equipment growth of xx.xx%, xx.xx% and xx.xx% for 2026-2028, constraining the inherited damped growth assumptions for the OEM-exposed cohort.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Differentiated equipment-growth forecasts constrain relative cohort weights used to calculate the integrator share; no future purchasing-role split is directly reported.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment outlook constrains relative cohort growth and therefore the operator share under unchanged within-cohort routing assumptions.

65. KLA Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 wafer-inspection revenue of USD xx.xx and patterning revenue of USD xx.xx anchor a modeled process-control equipment pool; neither is stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 wafer-inspection revenue of USD xx.xx and patterning revenue of USD xx.xx anchor a modeled process-control equipment pool; neither is stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The modeled peer-expanded process-control pool is excluded from the equipment base receiving the processing-stage content fraction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the scope adjustment to the WFE proxy used for separate handling-stage content.

66. ZEISS concludes fiscal year 2024/25 with solid growth
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial Quality & Research revenue declined from EUR xx.xx to EUR xx.xx in FY2024/xx.xx qualifying assumptions of uniformly strong scientific-equipment demand.

67. TRUMPF Annual Report 2024/25
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx Machine Tools revenue fell xx.xx% and Laser Technology revenue fell xx.xx%; this counterevidence supports withholding an additional industrial-processing attachment uplift.

68. Dimensional nano and sub nanometrology - National Physical Laboratory
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports separating metrological displacement and stage-measurement uses from imaging compatibility; it does not measure stage sales or documentation premiums.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports separating metrological displacement and stage-measurement uses from imaging compatibility; it does not measure stage sales or documentation premiums.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: NPL documents stage-metrology activity, supporting a dedicated research-and-technical-services use context without disclosing annual stage expenditure.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NPL documents stage-metrology activity, supporting a dedicated research-and-technical-services use context without disclosing annual stage expenditure.

69. H-811.I2 • H-811.I2HS Miniature Hexapod - Physik Instrumente
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public precision-assembly offering supports category attribution and the requirement to classify a multipurpose stage once; it is not a sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public precision-assembly offering supports category attribution and the requirement to classify a multipurpose stage once; it is not a sales weight.

70. Facility Equipment - MIRIAM/B22 - Diamond Light Source
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operational analytical end stations contain identifiable sample-positioning stages; installed equipment establishes use, not annual procurement or facility-attributable stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operational analytical end stations contain identifiable sample-positioning stages; installed equipment establishes use, not annual procurement or facility-attributable stage revenue.

71. Stages & Actuators - Aerotech
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes stage offerings used in laser processing from complete automation systems, supporting stage-only processing attribution rather than whole-machine value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes stage offerings used in laser processing from complete automation systems, supporting stage-only processing attribution rather than whole-machine value.
72. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 customer-industry counts constrain the manufacturing versus non-manufacturing industrial-pool bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 customer-industry counts constrain the manufacturing versus non-manufacturing industrial-pool bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed technical-service routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed technical-service routing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed educational routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed educational routing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed healthcare routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed healthcare routing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed government routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed government routing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed utility routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed utility routing.
73. Higher Education Research and Development: Fiscal Year 2024, NSF 26-304
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024 U.S. academic capitalized-equipment expenditure of USD xx.xx provides a budget-scale check. Stage content, global expansion and period adjustments are assumptions; this does not directly verify either share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024 U.S. academic capitalized-equipment expenditure of USD xx.xx provides a budget-scale check. Stage content, global expansion and period adjustments are assumptions; this does not directly verify either share.

74. International Standard Industrial Classification of All Economic Activities (ISIC), Revision 4
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Research activities are distinguished from defense administration, supporting separate research-establishment attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Research activities are distinguished from defense administration, supporting separate research-establishment attribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military educational institutions are classified by educational activity rather than being automatically assigned to defense.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military educational institutions are classified by educational activity rather than being automatically assigned to defense.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military hospitals are assigned to healthcare, preventing public ownership from inflating government-sector allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military hospitals are assigned to healthcare, preventing public ownership from inflating government-sector allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense administration excludes separately classified research, education and hospital activities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense administration excludes separately classified research, education and hospital activities.
75. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2023 institutional stage RFQ supports educational-operator attribution and procurement obligations, but not a completed purchase or global sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2023 institutional stage RFQ supports educational-operator attribution and procurement obligations, but not a completed purchase or global sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2023 institution-owned procurement includes supplier installation and post-installation payment, supporting Direct Operator classification regardless of manufacturer or distributor supply. It is a tender, not realized expenditure.
76. Orders, Shipping & Warranties
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Zaber's military and law-enforcement application restriction is supplier-specific; it qualifies accessible supply without proving market-wide zero demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Zaber's military and law-enforcement application restriction is supplier-specific; it qualifies accessible supply without proving market-wide zero demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional xx.xx-day standard-product guarantee supports a commercial reversibility distinction, not a measured catalog adoption rate. ([zaber.com](https://www.zaber.com/ordering))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published payment-term adjustments are financing charges, not evidence of a configured-stage price premium or annual inflation rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nonstandard custom guarantees are case-specific; the model retains this uncertainty without inventing a quantified conversion penalty.

77. AlgaPro TE300 AI Phytoplankton Monitoring
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current water-monitoring instrument offering identifies an incorporated motorized stage. It supports the commercial attribution premise, not 2025 volume, attributable stage revenue or a standalone utility contract.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current water-monitoring instrument offering identifies an incorporated motorized stage. It supports the commercial attribution premise, not 2025 volume, attributable stage revenue or a standalone utility contract.
78. Novanta Inc. - 2024 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Motion Solutions contributed USD xx.xx in 2024 revenue and is described as mainly serving life-science OEMs. This corroborates commercial OEM participation, not stage-only revenue or global role shares.
79. KAP Consulting - Motion Control Sales & Integration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KAP identifies motion-control distribution and integration activities but discloses no complete-stage purchasing amount. This supports separating service influence from the modeled procurement numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KAP identifies motion-control distribution and integration activities but discloses no complete-stage purchasing amount. This supports separating service influence from the modeled procurement numerator.
80. ASR-E Motorized Closed-Loop Scanning Stages, XY, Built-in Motor Encoders - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ASR050B050B-E03T3A is listed at USD xx.xx without a built-in controller. This is the mechanically comparable reference for the package-price bridge, not observed 2025 global realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ASR050B050B-E03T3A is listed at USD xx.xx without a built-in controller. This is the mechanically comparable reference for the package-price bridge, not observed 2025 global realization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The motor-only ASR-E offering establishes an alternative to onboard-control supply and supplies the denominator of the comparable package-price ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The motor-only ASR-E offering establishes an alternative to onboard-control supply and supplies the denominator of the comparable package-price ratio.
81. X-ASR-E XY Closed-Loop Scanning Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The X-ASR050B050B-SE03D12 has built-in controllers and a listed direct North American price of USD xx.xx. Compared with the same-size motor-only reference, it calibrates the assumed onboard-package value premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The X-ASR050B050B-SE03D12 has built-in controllers and a listed direct North American price of USD xx.xx. Compared with the same-size motor-only reference, it calibrates the assumed onboard-package value premium.
82. X-MCC Multi-axis Universal Motor Controller - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The X-MCC2 two-axis external controller is listed at USD xx.xx. Its price calibrates an external-control package increment; separately sold controller revenue is not added to the market.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The X-MCC2 two-axis external controller is listed at USD xx.xx. Its price calibrates an external-control package increment; separately sold controller revenue is not added to the market.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The external-controller price anchors the scale of the explicitly assumed shared supervisory-control allowance. The source does not establish a combined-package price or sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The external-controller price anchors the scale of the explicitly assumed shared supervisory-control allowance. The source does not establish a combined-package price or sales share.

83. Item # A-828.21x00, A-8xx Precision Motion Controllers for 4, 6 or 8 Axes - PI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI describes a separately housed rack controller and offers a complete positioning system when it is purchased together with a stage. This supports external-control package attribution, not the modeled purchase frequency.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI describes a separately housed rack controller and offers a complete positioning system when it is purchased together with a stage. This supports external-control package attribution, not the modeled purchase frequency.
84. Manual Positioning Stages - MISUMI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MISUMI identifies its manufactured manual-stage range. Dated March 2022 examples at USD xx.xx and USD xx.xx illustrate price heterogeneity and support value-equivalent rather than raw-unit weighting; they are not used as 2025 global ASPs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MISUMI identifies its manufactured manual-stage range. Dated March 2022 examples at USD xx.xx and USD xx.xx illustrate price heterogeneity and support value-equivalent rather than raw-unit weighting; they are not used as 2025 global ASPs.
85. Motorized Stage Control for the Electron Ion Collider's Detection of Internally Reflected Cherenkov Light Detector's Quartz Bar Quality Assurance Data Acquisition Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 equipment record identifies four linear stages with integrated controllers. This independently tests package classification but is not a representative market-sales sample.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same installation identifies two rotary stages using one external benchtop controller, demonstrating shared external-control hardware without establishing its original invoicing basis.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexistence of onboard-controlled linear stages and externally controlled rotary stages does not establish dual-location control electronics within an individual stage package.
86. RCP6 Next-generation ROBO Cylinder - IAI America
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IAI offers built-in-controller RCP6S slider and table versions and external gateway arrangements serving up to xx.xx axes. This supports a conditional distributed-control commercial architecture, not package-inclusion rates or category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: IAI offers built-in-controller RCP6S slider and table versions and external gateway arrangements serving up to xx.xx axes. This supports a conditional distributed-control commercial architecture, not package-inclusion rates or category revenue.
87. Simplified Motion Series - Festo USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Festo's offering includes guided slide and axis products with integrated electronics. This supports commercial availability underlying the bounded onboard-adoption assumption, without measuring its growth or sales penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Festo's offering includes guided slide and axis products with integrated electronics. This supports commercial availability underlying the bounded onboard-adoption assumption, without measuring its growth or sales penetration.
88. TIFR/PD/IC23-47/232777 - Notice Inviting Tender, March 19, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2024 tender requests one rotation stage, two linear stages and one vertical stage with built-in or integrated controllers. These four requested stages provide a historical purchasing example, not realized global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The tender separately lists a joystick and accessories; their presence does not automatically convert the onboard-controller stages into combined motion-control packages.

89. Standard and Custom Motion Solutions: 7 Factors to Consider During the Buying Process
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer-authored guide identifies predesigned, documented off-the-shelf stages as a distinct purchasing format, not a measured sales fraction. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer-authored guide identifies predesigned, documented off-the-shelf stages as a distinct purchasing format, not a measured sales fraction. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Predefined configured-to-order supply is distinguished from new engineering, establishing the modeled invoice-scope boundary.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Predefined configured-to-order supply is distinguished from new engineering, establishing the modeled invoice-scope boundary.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Custom-engineered stage components are distinguished from complete automation systems; only attributable stage assembly value enters this allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Custom-engineered stage components are distinguished from complete automation systems; only attributable stage assembly value enters this allocation.
90. PlanarDL Two Axis, Mechanical Bearing, Direct-Drive Linear Stage
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Nine predefined PlanarDL models and documented ordering options support configured-stage classification, not catalog-count sales weighting. ([aerotech.com](https://www.aerotech.com/product/planardl-two-axis-mechanical-bearing-direct-drive-linear-stage/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine predefined PlanarDL models and documented ordering options support configured-stage classification, not catalog-count sales weighting. ([aerotech.com](https://www.aerotech.com/product/planardl-two-axis-mechanical-bearing-direct-drive-linear-stage/))
91. Meeting the Demands of the Most Critical OEMs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI describes standard offerings as a starting route for OEM purchasing; OEM status alone does not imply a custom stage. ([pi-usa.us](https://www.pi-usa.us/en/customers/meeting-the-demands-of-oems))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI describes standard offerings as a starting route for OEM purchasing; OEM status alone does not imply a custom stage. ([pi-usa.us](https://www.pi-usa.us/en/customers/meeting-the-demands-of-oems))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM portfolio supports distinguishing existing-product purchasing from requirements needing additional engineering, without disclosing revenue proportions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM portfolio supports distinguishing existing-product purchasing from requirements needing additional engineering, without disclosing revenue proportions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI publicly offers fully customized OEM positioning products, supporting the specialty-cohort exposure assumption but not its numerical incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI publicly offers fully customized OEM positioning products, supporting the specialty-cohort exposure assumption but not its numerical incidence.

92. Zaber Technologies Gimbal - March 19, 2022
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The example combines two named RST rotary stages with surrounding custom parts, supporting stage-level rather than system-label attribution. ([zaber.com](https://www.zaber.com/products/rotary-stages/X-RST-AE/multi-media/zaber-technologies-gimbal))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The example combines two named RST rotary stages with surrounding custom parts, supporting stage-level rather than system-label attribution. ([zaber.com](https://www.zaber.com/products/rotary-stages/X-RST-AE/multi-media/zaber-technologies-gimbal))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alternative published packages do not by themselves demonstrate newly engineered stages; configuration remains distinct from surrounding integration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alternative published packages do not by themselves demonstrate newly engineered stages; configuration remains distinct from surrounding integration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Custom-sized brackets and a custom system label do not establish that every incorporated stage belongs to the custom-engineered numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Custom-sized brackets and a custom system label do not establish that every incorporated stage belongs to the custom-engineered numerator.
93. MKS Inc. Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 report discloses USD xx.xx Photonics product revenue and direct, distributor and representative selling routes. These constrain a manufacturer-value cohort carried through both anchors; no stage-specific channel percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 report discloses USD xx.xx Photonics product revenue and direct, distributor and representative selling routes. These constrain a manufacturer-value cohort carried through both anchors; no stage-specific channel percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors are an expressly identified selling route. The financial pool supports inherited cohort weighting, not the modeled distributor percentage or a future observed split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors are an expressly identified selling route. The financial pool supports inherited cohort weighting, not the modeled distributor percentage or a future observed split.
94. Parker Hannifin Fiscal 2024 Second Quarter Earnings Release and Presentation - February 1, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately half of diversified industrial revenue was through distribution, with regional differences. This is an adjacent-market calibration for the assumed industrial direct rate, not a positioning-stage observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately half of diversified industrial revenue was through distribution, with regional differences. This is an adjacent-market calibration for the assumed industrial direct rate, not a positioning-stage observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports approximately xx.xx% North American and xx.xx% international distribution penetration and an international expansion objective. Partial realization of that historical objective is an explicit forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports approximately xx.xx% North American and xx.xx% international distribution penetration and an international expansion objective. Partial realization of that historical objective is an explicit forecast assumption.

95. Parker-Hannifin Corporation Form 10-K - Fiscal Year Ended June 30, 2025

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 international industrial revenue of USD xx.xx and total industrial revenue of USD xx.xx provide the regional exposure ratio used to attenuate the modeled distribution-expansion effect.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The industrial international-to-total revenue ratio calibrates the forecast channel-transfer scenario; it is not a stage revenue or future channel-share disclosure.

96. Laurent Melin is PI Group's New Head of Global Sales - December 19, 2023

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2023 announcement describes owned sales/service subsidiaries and an OEM-business focus, supporting direct-sales capability before the base year. Subsidiary counts are not used as sales weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2023 announcement describes owned sales/service subsidiaries and an OEM-business focus, supporting direct-sales capability before the base year. Subsidiary counts are not used as sales weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announcement also identifies a distributor network, supporting continued indirect participation in the specialist cohort rather than an all-direct classification.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announcement also identifies a distributor network, supporting continued indirect participation in the specialist cohort rather than an all-direct classification.

97. Indian Institute of Science - Request for Quote for the Supply of Closed-Loop Cryogenic Nanopositioning System

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June 2025 RFQ permits eligible Indian manufacturers and imposes quantitative domestic-content thresholds. It establishes purchasing constraints, not direct-sales value or an awarded transaction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2025 RFQ permits eligible Indian manufacturers and imposes quantitative domestic-content thresholds. It establishes purchasing constraints, not direct-sales value or an awarded transaction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized Indian distributors are eligible subject to the same origin conditions; local services do not qualify imported products. This constrains assumptions that a reseller automatically unlocks restricted demand.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized Indian distributors are eligible subject to the same origin conditions; local services do not qualify imported products. This constrains assumptions that a reseller automatically unlocks restricted demand.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 RFQ combines cryogenic positioning with an ultrahigh-vacuum option and a nonmagnetic variant. It establishes buyer-side coexistence of requirements, not an award, selected combination, delivery or market share. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

98. 1" (25 mm) Travel Dovetail Translation Stages
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The retrieved catalog lists DTS25 at USD xx.xx and DTS25V at USD xx.xx with matched motion and mounting features, supplying the base comparator for the relative-realization model, not a sales weight. ([punchout.thorlabs.com](https://punchout.thorlabs.com/newgrouppage9.cfm?objectgroup_id=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The retrieved catalog lists DTS25 at USD xx.xx and DTS25V at USD xx.xx with matched motion and mounting features, supplying the base comparator for the relative-realization model, not a sales weight. ([punchout.thorlabs.com](https://punchout.thorlabs.com/newgrouppage9.cfm?objectgroup_id=xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The catalog price ratio xx.xx/xx.xx is used as a modeled single-environment relative realization; global transaction representativeness and stability through 2032 are assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The catalog price ratio xx.xx/xx.xx is used as a modeled single-environment relative realization; global transaction representativeness and stability through 2032 are assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The single-profile price input affects the common sibling denominator. This source does not establish a combined-environment premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The single-profile price input affects the common sibling denominator. This source does not establish a combined-environment premium.
99. RSW Family - Rotary Stages, Vacuum Compatible Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct North American motor-only family prices provide a sensitivity check: RSW USD 1962, low-vacuum RSW-V1 USD xx.xx and high-vacuum RSW-V2 USD xx.xx. Baseline cleanroom suitability prevents treating this as a verified ambient-to-specialized category comparison. ([zaber.com](https://www.zaber.com/products/families/RSW))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct North American motor-only family prices provide a sensitivity check: RSW USD 1962, low-vacuum RSW-V1 USD xx.xx and high-vacuum RSW-V2 USD xx.xx. Baseline cleanroom suitability prevents treating this as a verified ambient-to-specialized category comparison. ([zaber.com](https://www.zaber.com/products/families/RSW))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Family price comparisons qualify the transferability of the manual-stage premium and support broad realization sensitivity rather than a universal observed premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Family price comparisons qualify the transferability of the manual-stage premium and support broad realization sensitivity rather than a universal observed premium.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Higher-scope catalog pricing provides a commercial scale check only; the combined-profile realization of xx.xx remains assumed and is not disclosed by this source.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Higher-scope catalog pricing provides a commercial scale check only; the combined-profile realization of xx.xx remains assumed and is not disclosed by this source.
100. Vacuum / UHV Compatible Stages - Linear & Rotary Positioners for Vacuum, Wide Temperature Ranges | PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI offers vacuum-ready standard products and request-based modifications. This supports separating environmental qualification from catalog/custom status, but supplies no environmental revenue share. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI offers vacuum-ready standard products and request-based modifications. This supports separating environmental qualification from catalog/custom status, but supplies no environmental revenue share. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))

101. Loan Service for Nanopositioners

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The EC*xx.xx loan-kit product line is explicitly described as intended for ambient conditions, independently supporting the standard-environment category mapping. Loan activity is not counted as stage-sales revenue. ([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The EC*xx.xx loan-kit product line is explicitly described as intended for ambient conditions, independently supporting the standard-environment category mapping. Loan activity is not counted as stage-sales revenue. ([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))

102. Low Temperature Nanopositioners

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets low-temperature nanopositioners for demanding combinations including cryogenic, vacuum and magnetic-field environments. This supports commercial category availability, not annual sales quantities or the selected coverage of every configuration. ([attocube.com](https://www.attocube.com/en/products/nanopositioners/low-temperature-nanopositioners))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets low-temperature nanopositioners for demanding combinations including cryogenic, vacuum and magnetic-field environments. This supports commercial category availability, not annual sales quantities or the selected coverage of every configuration. ([attocube.com](https://www.attocube.com/en/products/nanopositioners/low-temperature-nanopositioners))

103. Cleanroom | Festo USA

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Broad cleanroom-classified automation offerings qualify any assumption that industrial catalog products are necessarily ambient-only; their availability is not a stage-sales weight. ([festo.com](https://www.festo.com/us/en/e/solutions/industries/electronics-industry/cleanroom-id_7016))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Broad cleanroom-classified automation offerings qualify any assumption that industrial catalog products are necessarily ambient-only; their availability is not a stage-sales weight. ([festo.com](https://www.festo.com/us/en/e/solutions/industries/electronics-industry/cleanroom-id_7016))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's documented cleanroom offering supports retaining single-environment activity in industrial demand, while stage-specific configuration and shipment incidence remain unmeasured.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's documented cleanroom offering supports retaining single-environment activity in industrial demand, while stage-specific configuration and shipment incidence remain unmeasured.

4.3. Industry Ecosystem & Value Chain Analysis

Value capture depends on the responsibility supplied with the assembly. ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ Equipment OEMs and Independent System Integrators should compare the defined deliverables and acceptance boundary, rather than stage descriptions alone.

▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ Hardware ownership therefore should not be confused with unrestricted redesign rights or a guaranteed service outcome. Consolidated supply may

simplify escalation, but the buyer should establish the applicable agreement, change permissions, and service owner before relying on that benefit.

Sources & Evidence

1. Custom Stages & Actuators | Aerotech
   · Custom stage supply addresses requirements not fully met by standard catalog products; complete-machine accountability is not established. ([aerotech.com](https://www.aerotech.com/product/custom-stages-actuators/))
2. Global Technical Support | Aerotech
   · Aerotech advertises repair services and remote and on-site support, establishing a continuing-support offering. ([aerotech.com](https://www.aerotech.com/services/global-technical-support/))
3. X-LDQ-AE Features - Zaber
   · The controller is included in the described stage package, supporting a distinct delivery boundary. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE/features))
4. Terms & Conditions of Sale
   · Published terms restrict copying and modification, supporting separation of hardware possession from unrestricted change rights. ([newport.com.cn](https://www.newport.com.cn/terms-and-conditions-of-sale))

4.3.1. Supply-Side Analysis

[redacted] That relationship supports a potential stage-and-control procurement route, but does not establish that every PI stage includes ACS controls or that an independent control arrangement is unavailable. Buyers should distinguish group capability from the quoted offering.

Upstream participation is also relationship-gated. PI's published onboarding requires supplier assessment, document review, and an initial order and quality check before supplier-pool admission. [redacted]

Sources & Evidence

1. About PI US: Custom Design & Service / Export Controlled Applications & ITAR Registered
   · PI states that it acquired majority shares of ACS Motion Control in January 2017. ([pi-usa.us](https://www.pi-usa.us/en/about-pi))
2. Purchasing & Suppliers
   · PI describes assessment, review, and an initial order and quality check before supplier-pool admission. ([pi-usa.us](https://www.pi-usa.us/en/about-pi/becoming-a-supplier))

4.3.2. Demand-Side Analysis

Purchasing Role changes the integration problem being purchased. Zaber's ASR family includes built-in-controller and motor-only alternatives alongside microscopy software support. [redacted]

[redacted]

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber
   · ASR includes built-in-controller and motor-only models, Nucleus modules, µManager support, and microscope mounting options. ([zaber.com](https://www.zaber.com/products/families/ASR))

4.3.3. Stakeholder Analysis

The operator, contracting buyer, stage manufacturer, and channel intermediary can carry different risks. [redacted] A reseller's purchasing convenience does not itself establish manufacturer-backed service obligations.

Regulatory responsibility adds a separate division of duties. [redacted] Application or sector membership alone does not establish regulatory acceptance.

Sources & Evidence

1. Global Technical Support | Aerotech
   · The published support offer includes repairs and remote and on-site assistance, rather than a buyer-specific service agreement. ([aerotech.com](https://www.aerotech.com/services/global-technical-support/))
2. Terms & Conditions of Sale
   · The published warranty provisions exclude on-site warranty repair unless otherwise agreed; applicability depends on the accepted agreement. ([newport.com.cn](https://www.newport.com.cn/terms-and-conditions-of-sale))
3. Regulation (EU) 2023/1230 - Consolidated Text, May 29, 2026
   · The regulation distinguishes machinery and partly completed machinery and assigns economic-operator obligations for covered products. ([eur-lex.europa.eu](https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX%3A02023R1230-xx.xx))

4.4. Market Dynamics

Integration convenience and asset retention act in opposite directions. A packaged-control stage can simplify a new purchase, while a compatible actuator upgrade or repair can preserve the installed assembly instead. [redacted]

Sources & Evidence

1. Global Technical Support | Aerotech
   · Repair is a documented alternative relevant to the conditional distinction between retention and replacement. ([aerotech.com](https://www.aerotech.com/services/global-technical-support/))
2. X-LDQ-AE Features - Zaber
   · The integrated package supplies the premise for contrasting new-package procurement with asset retention. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE/features))
3. X-NA Micro, Motorized Linear Actuators, Built-in Controllers - Zaber
   · Micrometer-head replacement is a documented accessory route; adequacy for a particular retained assembly is unverified. ([zaber.com](https://www.zaber.com/products/linear-actuators/X-NA))

4.4.1. Key Drivers

4.4.1.1. Software-supported microscopy creates configuration-specific purchase triggers

Zaber's ASR microscope-stage family advertises Nucleus modules, µManager support, and microscope mounting options. Such compatibility can create a purchase trigger when an operator needs automated positioning within an existing imaging platform. ■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber
   · Advertised ASR software and mounting support provides a product-specific premise for conditional microscopy purchasing incentives. ([zaber.com](https://www.zaber.com/products/families/ASR))

4.4.1.2. Packaged control can simplify the purchasing interface

Zaber's X-LDQ-AE stages include controllers and linear encoders. ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■ The benefit is conditional: Equipment OEMs retaining their own control platform may prefer a less integrated offering rather than duplicate existing responsibilities.

Sources & Evidence

1. X-LDQ-AE Features - Zaber
   · Included controllers and encoders support the conditional inference of fewer separately procured interfaces. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE/features))

4.4.1.3. Environmental requirements create variant-specific demand

PI publishes standard vacuum-compatible stages and request-based modifications. ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■ ■■■■■■■■ ■■■■■■■ Access remains conditional on the selected configuration's documented coverage; an environmental label alone does not establish buyer acceptance or suitability for combined conditions.

Sources & Evidence

1. Vacuum / UHV Compatible Stages - Linear & Rotary Positioners for Vacuum, Wide Temperature Ranges | PI USA
   · PI publishes standard vacuum-compatible products and modifications available on request, establishing different commercial offering routes. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))

4.4.2. Key Restraints

4.4.2.1. Installed integration requirements restrict practical switching

Zaber's RSM-E documentation supports third-party controller use but requires configuration-specific compatibility review. Switching is therefore neither frictionless nor universally blocked. ■■■■■ ■ ■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. RSM-E Series User's Manual
   · RSM-E documentation contemplates third-party controllers and calls for compatibility review; it does not establish universal lock-in. ([zaber.com](https://www.zaber.com/manuals/RSM-E))

4.4.2.2. Equipment-program timing separates interest from commitment

MKS's 2024 filing describes cyclical end markets and lengthy prospective-customer qualification across its broader business. These disclosures caution against treating OEM interest as a purchase commitment, but do not establish stage-specific approval durations. ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■

Sources & Evidence

1. Form 10-K for MKS Instruments Inc. for the Year Ended December 31, 2024
   · The 2024 filing describes cyclical markets and lengthy prospective-customer qualification across MKS's broader business, not stages alone. ([investor.mks.com](https://investor.mks.com/static-files/a8a62959-dcbb-4d70-8db7-dafdd9784afe))

4.4.2.3. Repair and accessory upgrades compete with stage replacement

■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ These routes can preserve an existing stage and defer replacement where it remains suitable. The actuator is an upstream accessory, not an additional stage offering; buyer-specific adequacy remains a separate decision.

Sources & Evidence

1. Global Technical Support | Aerotech
   · Aerotech offers repair services for its products, supporting repair as a possible retention route. ([aerotech.com](https://www.aerotech.com/services/global-technical-support/))
2. X-NA Micro, Motorized Linear Actuators, Built-in Controllers - Zaber
   · X-NA actuators are marketed as replacements for standard micrometer heads on manual translation stages. ([zaber.com](https://www.zaber.com/products/linear-actuators/X-NA))

4.4.3. Key Opportunities

4.4.3.1. Bounded motion modules for OEM incorporation

Equipment OEMs can purchase a defined stage-and-control module rather than coordinate those elements separately. New Scale Technologies' M3-LS establishes this offering route. ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■

Sources & Evidence

1. Linear Micro Stages - New Scale Technologies
   · New Scale advertises M3-LS stages with embedded controller and drive electronics, establishing a bounded stage-and-control offering. ([newscaletech.com](https://newscaletech.com/micro-motion-modules/m3-ls-linear-smart-stages/))

4.4.3.2. Environment-matched catalog and modification routes

Specialized buyers can compare an existing environmental variant with a requested modification before commissioning new scope. ■■ ■■■■■■■■■ ■■■■ ■■■■■■■ Capture depends on coverage of the selected requirement and an accountable supply commitment, not on an environmental label alone.

Sources & Evidence

1. Vacuum / UHV Compatible Stages - Linear & Rotary Positioners for Vacuum, Wide Temperature Ranges | PI USA
   · PI distinguishes selected vacuum-ready standard products from modifications offered on request. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))

4.4.3.3. Institutional delivery with continuing support

■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ Suppliers able to contract those obligations can address a broader need than assembly delivery, provided they satisfy the actual procurement's eligibility conditions.

Sources & Evidence

1. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1
   · IISc's September 2023 stage solicitation required continuing spares support and linked supply to satisfactory installation and institutional acceptance. It is a historical solicitation, not an award. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))

4.4.4. Key Challenges

4.4.4.1. Comparable quotations require a common delivery boundary

Aerotech's custom-stage offering and Zaber's packaged-control products allocate different work to the supplier. ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ A more integrated description does not by itself establish complete-machine accountability or buyer acceptance.

Sources & Evidence

1. Custom Stages & Actuators | Aerotech
   · The custom-stage offering supports distinguishing negotiated engineering scope from a standard package. ([aerotech.com](https://www.aerotech.com/product/custom-stages-actuators/))
2. X-LDQ-AE Features - Zaber
   · The packaged-control offering supports comparison of included responsibilities, not complete-machine accountability. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE/features))

4.4.4.2. Channel access does not establish service accountability

[redacted] Support availability and an enforceable service obligation are different propositions. For Distributor and Reseller Sales, buyers must establish appointment scope, escalation authority, and the responsible contracting party rather than presume equivalence to Direct Manufacturer Sales.

Sources & Evidence

1. Global Technical Support | Aerotech
   · Advertised support assistance does not itself establish a particular channel's enforceable service obligations. ([aerotech.com](https://www.aerotech.com/services/global-technical-support/))
2. Terms & Conditions of Sale
   · The on-site warranty provision supports verifying contractual coverage rather than assuming channel service equivalence. ([newport.com.cn](https://www.newport.com.cn/terms-and-conditions-of-sale))

4.4.4.3. Environmental coverage must remain aligned with the selected configuration

[redacted] Buyers of Single-Environment Qualified Stages and Combined-Environment Qualified Stages need written coverage for the selected configuration. Vacuum compatibility alone does not establish combined-environment acceptance; the execution challenge is keeping the quotation, allowed changes, and buyer acceptance scope aligned.

Sources & Evidence

1. Vacuum / UHV Compatible Stages - Linear & Rotary Positioners for Vacuum, Wide Temperature Ranges | PI USA
   · Standard vacuum offerings and requested modifications support configuration-specific coverage; combined-environment buyer acceptance is not established. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))

4.5. Porter’s Five Forces Analysis

[redacted] A new entrant can compete for a defined assembly requirement, but an existing catalog does not establish equivalence to an engineered package. Buyer bargaining is stronger when acceptance requirements permit alternative configurations and weaker when the purchase preserves a particular integration arrangement.

Supplier power is similarly configuration-specific. ■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ Upstream access also depends on the stage manufacturer's purchasing requirements, rather than technical category membership alone.

■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ Manual Stages themselves remain within the studied market; the external competitive alternative is the accessory-led retention decision. Its attractiveness depends on whether the retained assembly meets the buyer's requirement and support expectations.

Sources & Evidence

1. Custom Stages & Actuators | Aerotech
   · Custom-stage supply is a documented competitive route, not proof of equivalence to another supplier's package. ([aerotech.com](https://www.aerotech.com/product/custom-stages-actuators/))
2. About PI US: Custom Design & Service / Export Controlled Applications & ITAR Registered
   · The documented ownership relationship establishes affiliated control capability, not mandatory controller inclusion in every stage. ([pi-usa.us](https://www.pi-usa.us/en/about-pi))
3. Purchasing & Suppliers
   · Supplier-pool entry depends on PI's purchasing process rather than component category membership alone. ([pi-usa.us](https://www.pi-usa.us/en/about-pi/becoming-a-supplier))
4. X-LDQ-AE Features - Zaber
   · Integrated control is an observed supply model relevant to configuration-specific rivalry. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE/features))
5. X-NA Micro, Motorized Linear Actuators, Built-in Controllers - Zaber
   · The accessory offering supports retention as a conditional alternative to another stage purchase. ([zaber.com](https://www.zaber.com/products/linear-actuators/X-NA))
6. RSM-E Series User's Manual
   · The documented third-party controller route is counterevidence to an assumption of unavoidable single-supplier control dependence. ([zaber.com](https://www.zaber.com/manuals/RSM-E))

4.6. PESTLE Analysis

Cross-border access depends on the transaction, not simply on a supplier's international presence. ■■■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■ ■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ Before committing to an imported assembly, the buyer should resolve product classification, origin, destination, and contractual responsibility for border-related costs.

European machinery requirements create a defined transition for covered offerings. Regulation (EU) 2023/xx.xx generally applies from January xx.xx 2027, and distinguishes machinery from partly completed machinery. ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■

RESEARCH SAMPLE REPORT

[redacted]

Intellectual-property and supplier-governance conditions also affect commercial freedom. MKS describes portfolio-level patent and trade-secret protection, but this does not establish exclusivity over an individual stage configuration. [redacted]

Sources & Evidence

1. Purchasing & Suppliers
   - PI's published purchasing process establishes a supplier-governance gate, without proving admission or future orders. ([pi-usa.us](https://www.pi-usa.us/en/about-pi/becoming-a-supplier))
2. Form 10-K for MKS Instruments Inc. for the Year Ended December 31, 2024
   - MKS identifies tariff and export-restriction risks and portfolio-level patent and trade-secret protection. ([investor.mks.com](https://investor.mks.com/static-files/a8a62959-dcbb-4d70-8db7-dafdd9784afe))
3. Terms & Conditions of Sale
   - Contractual restrictions on copying and modification are distinct from any unverified stage-specific patent exclusivity. ([newport.com.cn](https://www.newport.com.cn/terms-and-conditions-of-sale))
4. Regulation (EU) 2023/1230 - Consolidated Text, May 29, 2026
   - The consolidated regulation specifies general application from January xx.xx 2027; individual stage classification remains a separate question. ([eur-lex.europa.eu](https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX%3A02023R1230-xx.xx))

4.7. Market Outlook

The Global Motion Positioning Stages outlook depends on conversion of application interest into buyer-approved supply commitments. [redacted]

The counterforce is uneven purchasing commitment. [redacted] Suppliers should distinguish approved programs from inquiries, while buyers should monitor accepted delivery, configuration and support commitments rather than infer commercial access from investment announcements.

Sources & Evidence

1. MISUMI Expands Automated Positioning Stage Production for Data Centers
   - MISUMI's January xx.xx 2026 announcement describes planned positioning-stage production investment in China and Vietnam associated with optical-transceiver equipment; it does not establish completion or an individual delivery commitment. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))

2. Positioning 2026 Business Report - HOERBIGER
   · HOERBIGER attributes PI's below-expectation 2025 performance partly to weak automation demand and reduced publicly funded U.S. projects; this is a company-level observation. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

4.7.1. Near-Term Market Outlook (0-2 Years)

For 2026-2027, a concrete turning point is the EU machinery transition. ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■ ■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ Where these remain unsettled, defer the affected commitment rather than assume that a familiar catalog configuration resolves the access question.

Sources & Evidence

1. Machinery - European Commission
   · The European Commission states that the Machinery Regulation becomes mandatory on January xx.xx 2027, and distinguishes the preceding Machinery Directive regime. Applicability depends on the covered product. ([single-market-economy.ec.europa.eu](https://single-market-economy.ec.europa.eu/sectors/mechanical-engineering/machinery_en))

4.7.2. Medium-Term Market Outlook (3-5 Years)

For 2028-2029, the outlook hinges partly on whether announced supply investments become usable sourcing alternatives. MISUMI's January 2026 China and Vietnam plans provide a specific monitoring case, not assurance of completed expansion or transferable purchasing eligibility. ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■ ■ ■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■ ■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■

Sources & Evidence

1. MISUMI Expands Automated Positioning Stage Production for Data Centers
   · The announced investment supports monitoring configuration-specific delivery commitments rather than assuming that additional executable sourcing routes have already resulted. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))

4.7.3. Long-Term Market Outlook (5-10 Years)

For 2030-2032, lifecycle substitutability is a more defensible planning issue than assuming universal migration to one control package. ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■

[redacted] Standardizing a broader supplier package remains an alternative where it delivers an accepted responsibility transfer; neither mixed packaging nor integration guarantees future replacement availability.

Novel architecture remains a conditional commercial option. PI identifies its presented magnetic-levitation platforms as technology demonstrators. [redacted]

Sources & Evidence

1. Magnetic Levitation Nanopositioning Stages: 6-DOF Comes Naturally - PI USA
   · PI explicitly identifies its presented magnetic-levitation platforms as technology demonstrators, not standardized delivery and continuing-support commitments. ([pi-usa.us](https://www.pi-usa.us/en/tech-blog/picopositioning-maglev-6dof-linear-rotary-stages))
2. Motorized Stage Control for the Electron Ion Collider's Detection of Internally Reflected Cherenkov Light Detector's Quartz Bar Quality Assurance Data Acquisition Program
   · Jefferson Lab's May 2025 record documents integrated-controller linear stages alongside externally controlled rotary stages, providing a bounded institutional example of mixed packaging. ([jlab.org](https://www.jlab.org/sites/default/files/dsg/notes/2025-xx.xx.pdf))
3. Single Axis Stages | HIWIN
   · The documented third-party-motor route is counterevidence to assuming that future stage procurement must use a fully affiliated package. ([hiwin.com](https://hiwin.com/products/single-axis-stages/))

4.8. Go-to-Market Strategy

New entrants should pursue a defined assembly requirement from Equipment OEMs retaining an established motor or control platform, rather than claim equivalence to turnkey supply. [redacted] The choice should follow the responsibilities the customer will transfer; broader supply increases coordination and support obligations rather than automatically improving the proposition.

An Independent System Integrator route requires a service agreement, not merely a partnership label. [redacted] If the Direct Operator retains purchasing authority, separate stage and integration agreements may be preferable to treating the integrator as a reseller.

Channel selection should follow the manufacturer's country and product mandate. [redacted]

[redacted] A channel's sales access should not be represented as an unrestricted manufacturer-backed repair obligation.

[redacted] Separate standard assembly, commissioned engineering and continuing support obligations rather than absorb unspecified machine-level work into a hardware offer. Zaber's written-amendment requirements and adjusted quotations for extended credit illustrate why application acceptance and financing must be reconciled with the seller's agreement before commitment.

Sources & Evidence

1. Zaber's General Terms and Conditions of Sale
   · Zaber's terms require written amendments, prevail over buyer purchase terms and distinguish published-specification conformity from fitness for a particular purpose. ([zaber.com](https://www.zaber.com/documents/Zaber-General-Terms-and-Conditions-of-Sale.pdf))
2. Orders, Shipping & Warranties
   · Zaber states that extended payment terms can require an adjusted quotation, supporting separate agreement of financing and delivered scope. ([zaber.com](https://www.zaber.com/ordering))
3. Locations and Contact - Zaber
   · Zaber lists Laser 2000 (UK) as exclusive for Ireland and the United Kingdom and describes regions with direct and selected-product distributor alternatives. ([zaber.com](https://www.zaber.com/contact/))
4. KAP Consulting - Automation and Controls Integration & Programming
   · KAP Consulting advertises positioning-stage integration and machinery retrofits; its service description does not establish purchase-order ownership or reseller authority. ([kapconsultingllc.com](https://kapconsultingllc.com/automation.html))
5. Full forward integration - ETEL SA
   · ETEL's Full Forward Integration can include part or all of its listed positioning platforms, frames, isolation, electronics and software, establishing a negotiable broader delivery route rather than uniform complete-equipment responsibility. ([etel.ch](https://www.etel.ch/motion-systems/full-forward-integration/))
6. Single Axis Stages | HIWIN
   · HIWIN advertises SDXK compatibility with its own and third-party servo and stepper motors, establishing a narrower stage-supply alternative. ([hiwin.com](https://hiwin.com/products/single-axis-stages/))

5. Market Insights

5.1. Consumer Insights & End-User Perspective

For Imaging & Microscopy, an important purchasing choice is how much control and software integration the buyer retains. ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ These are conditional incentives implied by the packages, not established preferences across all buyers; the selected model and contracting buyer's requirements remain decisive.

▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ An OEM or integrator should agree any broader instrument-level acceptance in writing. Adding requirements to its own purchase order does not itself amend the seller's terms, so procurement approval should reconcile the intended application with the accepted commercial commitment.

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber
   · Zaber's ASR family offers motor-only and built-in-controller models and advertises microscopy software support, establishing alternative purchasing packages rather than observed buyer preferences. ([zaber.com](https://www.zaber.com/products/families/ASR))
2. Zaber's General Terms and Conditions of Sale
   · Zaber's terms distinguish shipment nonconformity from its published-specification warranty, disclaim fitness for a particular purpose, and require written agreement for amendments. ([zaber.com](https://www.zaber.com/documents/Zaber-General-Terms-and-Conditions-of-Sale.pdf))

5.2. Consumer Experience Benchmarking

Delivered control responsibility provides a defensible experience proxy without implying a performance league table. Zaber's X-LDQ-AE linear stages include controllers and linear encoders and offer optional local knob control. ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪

Commercial reversibility is a separate benchmark. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Buyers should confirm eligibility before commitment rather than extend a catalog return policy to every environment-qualified or custom stage.

Sources & Evidence

1. X-LDQ-AE Features - Zaber
   · X-LDQ-AE stages include controllers and linear encoders and offer optional local knob control; these features support a delivery-scope benchmark, not comparative satisfaction or complete-machine responsibility. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE/features))
2. Orders, Shipping & Warranties
   · Zaber distinguishes standard-product returns, an opened high-vacuum-stage exclusion, and case-specific custom-product guarantees. ([zaber.com](https://www.zaber.com/ordering))

5.3. Opportunity Mapping

Qualitative priority should follow an identifiable purchasing requirement, accessible contracting party and achievable responsibility boundary. For Equipment OEMs, New Scale Technologies' M3-LS establishes an embedded stage-and-control proposition. ■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■ ■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■ ■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■ ■■■■■■■■

Imaging & Microscopy offers a more specifically documented access route. Zaber's ASR family separates motor-only and built-in-controller packages with series-specific microscopy support, while AVR Optics has a stated microscopy appointment in Canada, Mexico and the United States. ■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■ ■■ ■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■

■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ attocube's ambient loan service is a separate engagement route, not acceptance of a specialized purchase. An established variant is preferable when it closes the requirement; modification remains conditional on an agreed configuration and support commitment.

■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ These historical solicitations demonstrate purchasing gates, not open opportunities or awards. A bidder should verify the actual solicitation before funding representation or a bespoke offer; an authorized channel cannot repair an ineligible product-origin proposition.

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber
   · Zaber's ASR family separates motor-only and built-in-controller series and advertises microscopy software and mounting support, with features differing across series.
   ([zaber.com](https://www.zaber.com/products/families/ASR))
2. Vacuum / UHV Compatible Stages - Linear & Rotary Positioners for Vacuum, Wide Temperature Ranges | PI USA
   · PI's documented catalog-variant and requested-modification routes support considering an existing environmental offering before commissioning additional scope.
   ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))
3. Locations and Contact - Zaber
   · Zaber lists AVR Optics for microscopy products and support in Canada, Mexico and the United States.
   ([zaber.com](https://www.zaber.com/contact/))
4. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1
   · The solicitation demonstrates an institutional purchasing requirement extending beyond assembly delivery to installation, acceptance and support.
   ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))
5. Request for Quote for the Supply of Closed-Loop Cryogenic Nanopositioning System
   · IISc's June 2025 RFQ restricted bidder eligibility and expressly rejected treating local installation and related services as sufficient local value addition for imported products.
   ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))
6. Loan Service for Nanopositioners
   · attocube identifies its EC*xx.xx loan packages as ambient-condition offerings; loan engagement does not establish specialized-environment purchasing coverage.
   ([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))
7. Linear Micro Stages - New Scale Technologies
   · The embedded M3-LS package provides an identifiable OEM subsystem proposition; its description does not transfer finished-instrument responsibility.
   ([newscaletech.com](https://newscaletech.com/micro-motion-modules/m3-ls-linear-smart-stages/))
8. New Scale Technologies, Inc. - Terms and Conditions, Revision 05.06.2025
   · New Scale's terms default to its assigned part-number specifications unless different requirements are agreed in writing and exclude fitness-for-purpose warranties.
   ([newscaletech.com](https://newscaletech.com/wp-content/uploads/NewScale-Terms-Conditions_2025.pdf))

5.4. Distribution Channel Analysis

Territory and portfolio rights determine channel reach. Zaber lists Laser 2000 (UK) Ltd. as exclusive for Ireland and the United Kingdom, while Edmund Optics and Digi-Key have non-exclusive, selected-product coverage in listed territories. ■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■

Where offered, direct supply provides an alternative with broader catalog access. ■■■■■■■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ Before awarding an order, buyers should identify the seller of record, service allocation and manufacturer escalation route; direct purchasing is not a presumed bypass of exclusive territorial arrangements.

Sources & Evidence

1. Locations and Contact - Zaber
   · Zaber identifies exclusive and non-exclusive territorial appointments, selected-product distributors, microscopy-specific support, and regions offering a direct-supply alternative. ([zaber.com](https://www.zaber.com/contact/))

5.5. Pricing Trend Analysis

Contract scope and risk allocation shape stage pricing beyond the selected hardware. MKS terms published on Newport's website permit adjustments for changed scope and specified manufacturing, shipping or service cost pressures, while allocating excluded charges to the purchaser. ■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■ ■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■

Financing and trade terms create another distinction. ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■ Procurement should therefore align payment obligations with budget approval and establish transaction-specific border treatment rather than assume equivalent economics across purchasing routes.

Sources & Evidence

1. Terms & Conditions of Sale
   · The published MKS terms permit scope-related adjustments and specified cost surcharges, allocate excluded charges to the buyer, and distinguish product payment from additional intellectual-property rights. A signed agreement can supersede these terms. ([newport.com.cn](https://www.newport.com.cn/terms-and-conditions-of-sale))
2. Orders, Shipping & Warranties
   · Zaber links extended payment terms to adjusted quotations and states that applicable import tariffs are assessed through the carrier or broker. ([zaber.com](https://www.zaber.com/ordering))

5.6. Regulatory Compliance & Standards Framework

EU commercial access depends on the applicable product classification and placement date. The European Commission states that covered machinery placed on the market before January xx.xx 2027 must comply with the Machinery Directive; the Machinery Regulation becomes mandatory on that date. ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■

Substance-compliance documentation also requires a configuration and jurisdiction boundary. ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■ Manual,

fluid-actuated and electrically controlled offerings should not automatically receive identical classifications, and distributor participation does not itself establish compliance.

Sources & Evidence

1. Machinery - European Commission
   · The Commission states that the Machinery Regulation applies mandatorily from January xx.xx 2027, and distinguishes mandatory essential requirements from voluntary harmonized standards. ([single-market-economy.ec.europa.eu](https://single-market-economy.ec.europa.eu/sectors/mechanical-engineering/machinery_en))
2. Compliance FAQs: RoHS
   · NIST describes EU RoHS documentation obligations for covered electrical and electronic equipment and explicitly states that EU RoHS compliance does not confer China RoHS compliance. ([nist.gov](https://www.nist.gov/standardsgov/compliance-faqs-rohs))

5.7. ESG & Sustainability Analysis

ESG is documented as a supplier-governance issue at PI, rather than a demonstrated end-user preference for a stage architecture. ■■ ■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ For stage buyers, corporate monitoring does not establish an assembly's environmental footprint: configuration-specific evidence is needed before preferring manual, electric or fluid-actuated alternatives on sustainability grounds.

Sources & Evidence

1. Purchasing & Suppliers - Physik Instrumente
   · PI reports using IntegrityNext for supplier sustainability monitoring, encourages supplier registration, and identifies environmental, working-condition and anti-corruption objectives. This is supplier-governance evidence, not an assembly-level environmental comparison. ([physikinstrumente.com](https://www.physikinstrumente.com/en/about/purchasing-and-suppliers))

5.8. Disruption & Risk Scenarios

■ ■■■■■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ Suppliers exposed to such accounts should link dedicated engineering and commercial commitments to funded milestones and agreed cancellation provisions. Observable warning signs are deferred approvals, revised delivery requests and withdrawn purchasing authority; continued funded orders would weaken this scenario.

A change of destination or application could disrupt an otherwise acceptable supply relationship through warranty coverage rather than physical product incompatibility. ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■

[redacted]
Written coverage for the actual transaction can mitigate the risk; the published restrictions are not proof of a sales prohibition or of inferior service.

Sources & Evidence

1. WARRANTY | SURUGA SEIKI CO., LTD.
   · Suruga's published warranty ties applicability to the order-confirmed delivery territory and contains application exclusions; special orders and superseding manufacturer warranties require separate consideration. ([eng.surugaseiki.com](https://eng.surugaseiki.com/warranty/))
2. Positioning 2026 Business Report - HOERBIGER
   · PI's reported public-project pressure provides a commercial counterexample to treating application interest as assured purchasing commitment. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
3. MKS Inc. Annual Report 2025
   · MKS's 2025 annual report describes capital-approval constraints, order rescheduling and cancellation, and government-funding exposure across its broader business; these are not stage-specific purchasing measurements. ([investor.mks.com](https://investor.mks.com/static-files/b9811017-fb6a-xx.xx-a2a7-c14e8fe4c97c))

5.9. Return on Investment & Cost-Benefit Analysis

From an equipment buyer's perspective, integrated supply can justify commitment when it removes separately contracted electronics and coordination responsibilities that the buyer would otherwise retain. [redacted] Where the buyer already owns the control platform, duplication and reduced selection freedom can outweigh procurement convenience.

Retention is a credible alternative to another stage purchase. Aerotech's repair policy and Zaber's X-NA micrometer-replacement actuator establish different ways to preserve an installed assembly. [redacted]

[redacted]
Custom supply can justify a firmer commitment only where the unmet need and acceptance obligations are explicit. The relevant sensitivities are retained integration work, repair exposure and contractual reversibility, rather than an assumed universal return from automation.

Sources & Evidence

1. X-NA Micro, Motorized Linear Actuators, Built-in Controllers - Zaber

   · Zaber markets X-NA actuators as replacements for standard micrometer heads on manual translation stages, establishing an accessory-led retention alternative rather than another complete-stage offering. ([zaber.com](https://www.zaber.com/products/linear-actuators/X-NA))

2. Orders, Shipping & Warranties

   · Zaber distinguishes standard-product returns, an exclusion for unpackaged high-vacuum stages and case-specific guarantees for custom products. ([zaber.com](https://www.zaber.com/ordering))

3. Linear Micro Stages - New Scale Technologies

   · M3-LS combines stage and control selection, supporting a conditional comparison between consolidated procurement and buyer-retained integration. ([newscaletech.com](https://newscaletech.com/micro-motion-modules/m3-ls-linear-smart-stages/))

4. New Scale Technologies, Inc. - Terms and Conditions, Revision 05.06.2025

   · The contractual distinction between supplied-part conformity and application fitness limits the responsibility transfer that can be assumed in an integrated-module investment case. ([newscaletech.com](https://newscaletech.com/wp-content/uploads/NewScale-Terms-Conditions_2025.pdf))

5. Warranty and Service Policy - Aerotech

   · Aerotech's published policy provides repair routes subject to authorization and makes field attendance and expedited service conditional, supporting assessment of retention without assuming uninterrupted operation. ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/aerotech-warranty-policy.pdf))

6. Cumulative Impact of Artificial Intelligence 2026

AI has an evidenced indirect commercial connection to positioning stages through photonics equipment. Aerotech markets precision-alignment expertise around optical transceivers, silicon photonics and co-packaged optics associated with AI and high-performance computing. ■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■ ■ ■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■

Within electrically controlled systems, Aerotech describes APIs as a possible connection to AI analytics and predictive maintenance. That establishes integration potential, not a deployed AI service or demonstrated outcome. ■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■

Governance changes with the function purchased. ■■■■■■ ■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ Connectivity alone establishes neither AI deployment nor regulatory acceptance.

Sources & Evidence

1. Machinery - European Commission
   · The Machinery Regulation addresses AI-powered safety functions and cyber-safety, making the deployed function relevant to commercial responsibility. ([single-market-economy.ec.europa.eu](https://single-market-economy.ec.europa.eu/sectors/mechanical-engineering/machinery_en))
2. How Motion Control Enables Modern Datacom Technologies
   · Aerotech connects its precision-alignment commercial positioning with optical transceivers, silicon photonics and co-packaged optics serving AI and high-performance computing. The webinar description does not establish stage orders or embedded AI deployment. ([aerotech.com](https://www.aerotech.com/how-motion-control-enables-modern-datacom-technologies/))
3. What Is Motion Control Software?
   · Aerotech describes APIs as a potential connection for AI analytics and predictive maintenance, alongside deterministic control and conventional interface tools. This supports integration potential, not verified AI deployment outcomes. ([go.aerotech.com](https://go.aerotech.com/in-motion/understanding-motion-control-software-a-comprehensive-guide))

4. AI Risk Management Framework

· NIST identifies its AI Risk Management Framework as voluntary guidance for incorporating trustworthiness considerations into AI products, services and systems.
([nist.gov](https://www.nist.gov/itl/ai-risk-management-framework))

7. Motion Positioning Stages Market, by Stage Configuration

[illegible] For Single-Axis Goniometer and Tilt Stages, Zaber's X-GSM-E offering includes rotation-center options intended to support common-center angular combinations. Modular procurement preserves selection flexibility, but the specifications of individual axes do not establish acceptance of the assembled arrangement.

[illegible] Multi-Axis Angular Stages present a different purchasing requirement, such as the common-center goniometer arrangement advertised by Zaber. Buyers should identify the delivered assembly and responsibility for its combined operation rather than assume that individually acceptable axes constitute an accepted multi-axis system.

Combined Translation-Angular Stages are not limited to automated hexapods. PI's H-xx.xx offers translational and rotational positioning with associated coordinate-system software, while the Indian Institute of Science's 2022 manual waveguide-alignment tender requested integrated linear and rotational positioning on a common base. [illegible]

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber
   - ASR is an XY microscope-stage family with built-in-controller or motor-only models and microscope mounting options.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The XY microscope-stage family offers motor-only and controlled packages; X-ASR prices are USD xx.xx-xx.xx. This supports the integrated translation-package category and its relative realization assumptions, not observed adoption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The XY microscope-stage family offers motor-only and controlled packages; X-ASR prices are USD xx.xx-xx.xx. This supports the integrated translation-package category and its relative realization assumptions, not observed adoption.
2. X-GSM-E Motorized Goniometer & Tilting Stages - Zaber
   - Zaber offers X-GSM-E goniometers with rotation-center options intended to allow angular motion about a common center.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: X-GSM-E goniometers are listed at USD xx.xx with built-in controls, providing a standard motorized goniometer price anchor rather than a global sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: X-GSM-E goniometers are listed at USD xx.xx with built-in controls, providing a standard motorized goniometer price anchor rather than a global sales weight.
3. RSM-E Motorized Rotation Stages, Built-in Motor Encoders - Zaber
   - RSM-E is an official motorized rotation-stage offering.
4. H-811.I2 • H-811.I2HS Miniature Hexapod - Physik Instrumente
   - H-xx.xx specifies translational and rotational active axes and describes coordinate-system software associated with the hexapod controller.

5. Global tender for a manual waveguide alignment rig - Indian Institute of Science
   - The October xx.xx 2022 tender requests input and output XYZ positioning and central linear/rotational positioning integrated on a common base.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 tender requests a manual common-base arrangement containing XYZ units and central linear/rotational positioning. It supports inclusion of manual combined offerings, not an award, current revenue or a sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 tender requests a manual common-base arrangement containing XYZ units and central linear/rotational positioning. It supports inclusion of manual combined offerings, not an award, current revenue or a sales weight.
6. 60mm Travel, X-Axis Rack & Pinion Stage - Edmund Optics
   - The product listing identifies a linear X-axis positioning stage.
7. U. R. Rao Satellite Centre - Tender for 6-Axis Positioning System, URSC/CE/IS202500012301
   - Taxonomy evidence: The October xx.xx 2025 public tender identifies a six-axis Stewart-platform/hexapod positioning system and separately lists the platform, controller and accessories, and installation-related supply. This corroborates procurement of an integrated multi-axis stage offering rather than treating each constituent axis as a separate finished-stage purchase. The tender is not an award record. ([eproc.isro.gov.in](https://eproc.isro.gov.in/viewDocumentPT?tenderId=IS202500012301))
8. IIT Hyderabad - Supply of Linear Stage, Single Tender IITH/PHY/YOGESH/2023/S/T090
   - Taxonomy evidence: The February xx.xx 2024 procurement separately specifies single-X-axis linear stages, electric stepper motors, metric lead screws, and a recirculating-ball guide, supporting separation of configuration, actuation, transmission, and guidance.
9. IISER Berhampur - Notice Inviting Tender IISERBpr/S&P/2024-25/06
   - Taxonomy evidence: The May xx.xx 2024 requirements separately list goniometers, a manual rotation stage, a manual translation stage, and a two-axis tip-tilt platform.
10. Positioning 2026 Business Report - HOERBIGER
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
11. MKS Inc. Annual Report 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
12. SIGMAKOKI Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
13. MISUMI Integrated Report 2025 - Business Portfolio
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.

14. Festo Sustainability Report 2025 - Festo at a Glance
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
15. Festo startet optimistisch ins Jubiläumsjahr
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
16. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
17. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
18. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
19. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

20. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Association-reported 2025 semiconductor-equipment billings of USD xx.xx anchor the shared semiconductor purchasing proxy; modeled stage content and configuration attribution are separate assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Association-reported 2025 semiconductor-equipment billings of USD xx.xx anchor the shared semiconductor purchasing proxy; modeled stage content and configuration attribution are separate assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The semiconductor-equipment activity anchor constrains the common pool from which the rotary value weight is modeled; it does not disclose rotary-stage sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The semiconductor-equipment activity anchor constrains the common pool from which the rotary value weight is modeled; it does not disclose rotary-stage sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The common semiconductor purchasing proxy supports the denominator bridge for modeled goniometer/tilt allocation, not a directly observed configuration percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The common semiconductor purchasing proxy supports the denominator bridge for modeled goniometer/tilt allocation, not a directly observed configuration percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment billings constrain semiconductor-related merchant-stage demand used in the translation-package model; complete-machine value is not counted as stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment billings constrain semiconductor-related merchant-stage demand used in the translation-package model; complete-machine value is not counted as stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared equipment-activity anchor supports the semiconductor pool underlying the modeled angular-package allocation, with incidence and realization left explicitly assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The shared equipment-activity anchor supports the semiconductor pool underlying the modeled angular-package allocation, with incidence and realization left explicitly assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The semiconductor activity pool constrains combined-stage demand attribution; externally purchased stage content and combined-package incidence are modeled rather than disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The semiconductor activity pool constrains combined-stage demand attribution; externally purchased stage content and combined-package incidence are modeled rather than disclosed.

21. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 support the inherited general-automation activity benchmark, not a count of linear stages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 support the inherited general-automation activity benchmark, not a count of linear stages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The automation activity benchmark constrains the industrial purchasing pool used for modeled rotary-stage value attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The automation activity benchmark constrains the industrial purchasing pool used for modeled rotary-stage value attribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The industrial pool uses installation activity only as a commercial proxy; the goniometer/tilt incidence is an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The industrial pool uses installation activity only as a commercial proxy; the goniometer/tilt incidence is an explicit assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial automation activity supports the common purchasing-pool bridge for translation packages, without equating robot purchases to stage shipments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial automation activity supports the common purchasing-pool bridge for translation packages, without equating robot purchases to stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The industrial activity benchmark constrains the purchasing pool, while angular-package incidence and realizations remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The industrial activity benchmark constrains the purchasing pool, while angular-package incidence and realizations remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Installation activity supports the general-industrial demand bridge, not an observed combined-stage attachment rate or future configuration share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Installation activity supports the general-industrial demand bridge, not an observed combined-stage attachment rate or future configuration share.
22. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.

23. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
24. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
25. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
26. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
27. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
28. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 automated-stage investment announcement supports a conditional supply response and cautions against assigning all automation expansion to integrated multi-axis packages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately JPY xx.xx planned investment and intended capacity doubling support available automated-stage supply, not realized translation-package sales or a measured adoption increment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported optical-transceiver equipment demand is a conditional commercial signal for alignment-stage purchasing; the announcement does not identify the combined-stage revenue share.
29. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

30. LSM Family - Compact, Screw Drive Linear Stage - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current North American direct X-LSM prices of USD xx.xx-xx.xx constrain standard controlled linear-stage realizations; they are relative-price proxies, not observed global 2025 ASPs or future sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current North American direct X-LSM prices of USD xx.xx-xx.xx constrain standard controlled linear-stage realizations; they are relative-price proxies, not observed global 2025 ASPs or future sales.
31. RSM Family - Rotary Stages, Vacuum Compatible Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current X-RSM prices of USD xx.xx-xx.xx and higher-priced vacuum variants constrain the rotary realization range. Controller and environmental variants prevent assuming one universal rotary ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current X-RSM prices of USD xx.xx-xx.xx and higher-priced vacuum variants constrain the rotary realization range. Controller and environmental variants prevent assuming one universal rotary ASP.
32. G-RST Family - Two-Axis Gimbal Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Two-axis gimbal stages have current direct price ranges of USD xx.xx-xx.xx and USD xx.xx-xx.xx constraining the higher-value angular-package range without establishing shipment incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Two-axis gimbal stages have current direct price ranges of USD xx.xx-xx.xx and USD xx.xx-xx.xx constraining the higher-value angular-package range without establishing shipment incidence.
33. 40mm, English Micrometer Tilt Stage - Edmund Optics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual two-axis tip-tilt stage is listed at USD xx.xx for quantities one to two and USD xx.xx for three or more, demonstrating lower-cost angular packages and quantity-price variation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual two-axis tip-tilt stage is listed at USD xx.xx for quantities one to two and USD xx.xx for three or more, demonstrating lower-cost angular packages and quantity-price variation.
34. H-840 Hexapod 6-Axis Positioning System - Physik Instrumente
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The H-xx.xx is a marketed positioning assembly combining three translational and three rotational axes. It supports combined-stage classification and package scope, but publishes neither attributable category revenue nor a realized price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The H-xx.xx is a marketed positioning assembly combining three translational and three rotational axes. It supports combined-stage classification and package scope, but publishes neither attributable category revenue nor a realized price.
35. DMA - XYZ Stage Configurator - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx XYZ configuration includes individually packaged stages requiring assembly, supporting the distinction between separately supplied axes and a delivered multi-axis assembly.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD xx.xx XYZ configuration includes individually packaged stages requiring assembly, supporting the distinction between separately supplied axes and a delivered multi-axis assembly.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The configurator is counterevidence to treating every multi-axis catalog bundle as an assembled translation-stage sale; its price is not used as an observed complete-assembly realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The configurator is counterevidence to treating every multi-axis catalog bundle as an assembled translation-stage sale; its price is not used as an observed complete-assembly realization.

7.1. Single-Axis Linear Stages

Table 6. Global Motion Positioning Stages Market Size, by Single-Axis Linear Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 7. Global Motion Positioning Stages Market Size, by Single-Axis Linear Stages, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IIT Hyderabad - Supply of Linear Stage, Single Tender IITH/PHY/YOGESH/2023/S/T090
   - Taxonomy evidence: The purchase requirements identify linear stages with X as the active positioning axis.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Association-reported 2025 semiconductor-equipment billings of USD xx.xx anchor the shared semiconductor purchasing proxy; modeled stage content and configuration attribution are separate assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Association-reported 2025 semiconductor-equipment billings of USD xx.xx anchor the shared semiconductor purchasing proxy; modeled stage content and configuration attribution are separate assumptions.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 support the inherited general-automation activity benchmark, not a count of linear stages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 support the inherited general-automation activity benchmark, not a count of linear stages.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 automated-stage investment announcement supports a conditional supply response and cautions against assigning all automation expansion to integrated multi-axis packages.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. LSM Family - Compact, Screw Drive Linear Stage - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current North American direct X-LSM prices of USD xx.xx-xx.xx constrain standard controlled linear-stage realizations; they are relative-price proxies, not observed global 2025 ASPs or future sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current North American direct X-LSM prices of USD xx.xx-xx.xx constrain standard controlled linear-stage realizations; they are relative-price proxies, not observed global 2025 ASPs or future sales.
29. DMA - XYZ Stage Configurator - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The USD xx.xx XYZ configuration includes individually packaged stages requiring assembly, supporting the distinction between separately supplied axes and a delivered multi-axis assembly.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The USD xx.xx XYZ configuration includes individually packaged stages requiring assembly, supporting the distinction between separately supplied axes and a delivered multi-axis assembly.

7.2. Multi-Axis Translation Stages

Table 9. Global Motion Positioning Stages Market Size, by Multi-Axis Translation Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 10. Global Motion Positioning Stages Market Size, by Multi-Axis Translation Stages, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Indian Institute of Science - Global Tender for Supply and Installation of Piezo Actuated Linear XYZ Stage with Full Assembly
   - Taxonomy evidence: The full-assembly tender specifies XYZ positioning, with piezo actuation for X and Y and a manual screw-gauge Z adjustment.

2. Indian Institute of Science - Tender Notification for the Procurement of 3-Axis Piezo Stage for Microscopy
   · Taxonomy evidence: The November xx.xx 2017 procurement requests one three-axis piezo stage with X, Y, and Z active axes.
3. Positioning 2026 Business Report - HOERBIGER
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
4. MKS Inc. Annual Report 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
6. MISUMI Integrated Report 2025 - Business Portfolio
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
7. Festo Sustainability Report 2025 - Festo at a Glance
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment billings constrain semiconductor-related merchant-stage demand used in the translation-package model; complete-machine value is not counted as stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment billings constrain semiconductor-related merchant-stage demand used in the translation-package model; complete-machine value is not counted as stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial automation activity supports the common purchasing-pool bridge for translation packages, without equating robot purchases to stage shipments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial automation activity supports the common purchasing-pool bridge for translation packages, without equating robot purchases to stage shipments.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately JPY xx.xx planned investment and intended capacity doubling support available automated-stage supply, not realized translation-package sales or a measured adoption increment.

22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
29. ASR Family - Motorized XY Microscope Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The XY microscope-stage family offers motor-only and controlled packages; X-ASR prices are USD xx.xx-xx.xx. This supports the integrated translation-package category and its relative realization assumptions, not observed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The XY microscope-stage family offers motor-only and controlled packages; X-ASR prices are USD xx.xx-xx.xx. This supports the integrated translation-package category and its relative realization assumptions, not observed adoption.
30. DMA - XYZ Stage Configurator - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The configurator is counterevidence to treating every multi-axis catalog bundle as an assembled translation-stage sale; its price is not used as an observed complete-assembly realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The configurator is counterevidence to treating every multi-axis catalog bundle as an assembled translation-stage sale; its price is not used as an observed complete-assembly realization.

7.3. Combined Translation-Angular Stages

Table 12. Global Motion Positioning Stages Market Size, by Combined Translation-Angular Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IIT Delhi - Multiaxes Precision CNC Stage for Femtosecond Laser Micromachining System

   · Taxonomy evidence: The institutional tender published August xx.xx 2024 requests one integrated stage system containing X, Y, and Z positioning plus a rotary B axis. This directly supports combined translation-angular complete-stage demand, not an awarded contract or realized sale. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The semiconductor activity pool constrains combined-stage demand attribution; externally purchased stage content and combined-package incidence are modeled rather than disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The semiconductor activity pool constrains combined-stage demand attribution; externally purchased stage content and combined-package incidence are modeled rather than disclosed.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Installation activity supports the general-industrial demand bridge, not an observed combined-stage attachment rate or future configuration share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Installation activity supports the general-industrial demand bridge, not an observed combined-stage attachment rate or future configuration share.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported optical-transceiver equipment demand is a conditional commercial signal for alignment-stage purchasing; the announcement does not identify the combined-stage revenue share.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. H-840 Hexapod 6-Axis Positioning System - Physik Instrumente
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The H-xx.xx is a marketed positioning assembly combining three translational and three rotational axes. It supports combined-stage classification and package scope, but publishes neither attributable category revenue nor a realized price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The H-xx.xx is a marketed positioning assembly combining three translational and three rotational axes. It supports combined-stage classification and package scope, but publishes neither attributable category revenue nor a realized price.
29. Global Tender for a Manual Waveguide Alignment Rig - Indian Institute of Science
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 tender requests a manual common-base arrangement containing XYZ units and central linear/rotational positioning. It supports inclusion of manual combined offerings, not an award, current revenue or a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 tender requests a manual common-base arrangement containing XYZ units and central linear/rotational positioning. It supports inclusion of manual combined offerings, not an award, current revenue or a sales weight.

7.4. Single-Axis Rotary Stages

Table 15. Global Motion Positioning Stages Market Size, by Single-Axis Rotary Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 16. Global Motion Positioning Stages Market Size, by Single-Axis Rotary Stages, by Group, 2017-2040 (USD Million)

Sources & Evidence

1. IISER Berhampur - Notice Inviting Tender IISERBpr/S&P/2024-25/06

   · Taxonomy evidence: The tender requests a manual rotation stage with continuous angular movement and engraved graduations.

2. Air-Hydraulics - Rotary Indexing Table
   - Taxonomy evidence: The brochure presents externally supplied rotary indexing tables as complete products. Their eligibility remains subject to the positioning-versus-conveyance boundary.
3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The semiconductor-equipment activity anchor constrains the common pool from which the rotary value weight is modeled; it does not disclose rotary-stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The semiconductor-equipment activity anchor constrains the common pool from which the rotary value weight is modeled; it does not disclose rotary-stage sales.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The automation activity benchmark constrains the industrial purchasing pool used for modeled rotary-stage value attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The automation activity benchmark constrains the industrial purchasing pool used for modeled rotary-stage value attribution.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
29. RSM Family - Rotary Stages, Vacuum Compatible Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current X-RSM prices of USD xx.xx-xx.xx and higher-priced vacuum variants constrain the rotary realization range. Controller and environmental variants prevent assuming one universal rotary ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current X-RSM prices of USD xx.xx-xx.xx and higher-priced vacuum variants constrain the rotary realization range. Controller and environmental variants prevent assuming one universal rotary ASP.

7.5. Multi-Axis Angular Stages

Table 18. Global Motion Positioning Stages Market Size, by Multi-Axis Angular Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IISER Berhampur - Notice Inviting Tender IISERBpr/S&P/2024-25/06
   - Taxonomy evidence: The tip-tilt platform requirement identifies two active angular axes; its bundled mirror does not establish a separately attributable stage value.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared equipment-activity anchor supports the semiconductor pool underlying the modeled angular-package allocation, with incidence and realization left explicitly assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The shared equipment-activity anchor supports the semiconductor pool underlying the modeled angular-package allocation, with incidence and realization left explicitly assumed.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The industrial activity benchmark constrains the purchasing pool, while angular-package incidence and realizations remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The industrial activity benchmark constrains the purchasing pool, while angular-package incidence and realizations remain modeled.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. G-RST Family - Two-Axis Gimbal Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Two-axis gimbal stages have current direct price ranges of USD xx.xx-xx.xx and USD xx.xx-xx.xx constraining the higher-value angular-package range without establishing shipment incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Two-axis gimbal stages have current direct price ranges of USD xx.xx-xx.xx and USD xx.xx-xx.xx constraining the higher-value angular-package range without establishing shipment incidence.
29. 40mm, English Micrometer Tilt Stage - Edmund Optics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual two-axis tip-tilt stage is listed at USD xx.xx for quantities one to two and USD xx.xx for three or more, demonstrating lower-cost angular packages and quantity-price variation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual two-axis tip-tilt stage is listed at USD xx.xx for quantities one to two and USD xx.xx for three or more, demonstrating lower-cost angular packages and quantity-price variation.

7.6. Single-Axis Goniometer and Tilt Stages

Table 21. Global Motion Positioning Stages Market Size, by Single-Axis Goniometer and Tilt Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. IISER Berhampur - Notice Inviting Tender IISERBpr/S&P/2024-25/06
   - Taxonomy evidence: Separate goniometer line items specify angular positioning about an elevated point of rotation.

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The common semiconductor purchasing proxy supports the denominator bridge for modeled goniometer/tilt allocation, not a directly observed configuration percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The common semiconductor purchasing proxy supports the denominator bridge for modeled goniometer/tilt allocation, not a directly observed configuration percentage.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The industrial pool uses installation activity only as a commercial proxy; the goniometer/tilt incidence is an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The industrial pool uses installation activity only as a commercial proxy; the goniometer/tilt incidence is an explicit assumption.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

28. X-GSM-E Motorized Goniometer and Tilting Stages - Zaber

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: X-GSM-E goniometers are listed at USD xx.xx with built-in controls, providing a standard motorized goniometer price anchor rather than a global sales weight.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: X-GSM-E goniometers are listed at USD xx.xx with built-in controls, providing a standard motorized goniometer price anchor rather than a global sales weight.

8. Motion Positioning Stages Market, by Actuation Mode

Mixed-Actuation Stages can reflect an explicit purchasing choice rather than incomplete automation. The Indian Institute of Science's November xx.xx 2025 tender requested powered piezo positioning in X and Y alongside manual screw adjustment in Z, with controller and automation compatibility required for the powered portion. ■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■ ■■■■■■■■ ■■■■■■■■■■

Drive-Ready Stages preserve buyer control over motor selection but can transfer integration risk. MISUMI's published motorless-stage catalog retains a ball-screw transmission while excluding motor-installation-related problems and accuracy after customer motor installation from its stated guarantee. ■■ ■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■

Pneumatically Actuated Stages and Hydraulically Actuated Stages require a separate assessment of utility and package scope. ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ The brochure does not establish equivalence to every electrically actuated positioning package or the configuration available for an individual order.

Sources & Evidence

1. Global tender for the supply and installation of piezo actuated Linear XYZ stage with full assembly - Indian Institute of Science
   - The November xx.xx 2025 full-assembly tender specifies piezo-actuated X/Y positioning and manual screw-gauge Z positioning, with controller and automation compatibility for the powered portion. This establishes requested mixed actuation, not an award.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 tender requests two multi-axis assemblies combining powered and manual positioning, supporting the existence of a mixed-actuation purchasing configuration; no award or realized purchase value is established.
2. Motorless Stages: Z-Axis Level Cross Roller Guide - MISUMI
   - MISUMI's motorless Z-axis stage catalog identifies an installed ball screw and limits guarantees concerning customer motor installation and accuracy afterward. These are published catalog provisions, not verified terms for a new order.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The motorless-stage catalog establishes a complete stage offered without an installed motor and states catalog-specific customer-installation guarantee limitations; it supports classification and integration-risk context, not the modeled global share.
3. Rotary Indexing Table - Air-Hydraulics
   - Air-Hydraulics describes pneumatic indexing tables, a separate power-system option, electrical sensing, and hydraulic-powered indexing for Model xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer brochure identifies pneumatic rotary indexing tables and electrical sensing, supporting motive-power classification independently of sensing electronics.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The brochure lists hydraulic-powered indexing for Model xx.xx supporting a commercially identified hydraulic-stage option but not its realized sales or global penetration.
4. IIT Hyderabad - Supply of Linear Stage, Single Tender IITH/PHY/YOGESH/2023/S/T090
   - Taxonomy evidence: Separate motor, screw, and guide fields establish that motive power is not interchangeable with transmission or bearing classification.

5. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
6. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
7. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY-May-2025 optical-basic-equipment sales of JPY xx.xx and automatic-applied-product sales of JPY xx.xx support the scoped manual/automatic monetary proxy after explicit stage-attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The corresponding FY2024 amounts, JPY xx.xx and JPY xx.xx, provide counterevidence to uniform electrical substitution; they do not directly establish future shares.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY-May-2025 optical-basic-equipment sales of JPY xx.xx and automatic-applied-product sales of JPY xx.xx support the scoped manual/automatic monetary proxy after explicit stage-attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The corresponding FY2024 amounts, JPY xx.xx and JPY xx.xx, provide counterevidence to uniform electrical substitution; they do not directly establish future shares.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automatic-applied-product revenue supplies the electrical side of the scoped optical-catalog value proxy, subject to inherited exclusions for controls and unrelated products.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The fiscal decline in the automatic product pool qualifies the forecast's electrical-growth assumption rather than directly verifying it.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automatic-applied-product revenue supplies the electrical side of the scoped optical-catalog value proxy, subject to inherited exclusions for controls and unrelated products.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The fiscal decline in the automatic product pool qualifies the forecast's electrical-growth assumption rather than directly verifying it.
8. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.

9. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
10. Festo startet optimistisch ins Jubiläumsjahr
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
11. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
12. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
13. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
14. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
15. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
16. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

17. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
18. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
19. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
20. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
21. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
22. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
23. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.

24. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2026 announcement describes JPY xx.xx of broader expansion investment and planned automatic-stage capacity approximately three times FY2025, supporting a conditional automation supply-response premise, not realized revenue or the forecast percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expansion of automatic-stage supply supports the broader industrial positioning activity premise, while its motor-installed versus motorless revenue attribution remains an explicit forecast assumption.
25. ASR Family - Motorized XY Microscope Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASR motor-only and built-in-controller packages both contain stepper motors, supporting electrical classification regardless of controller inclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current North American direct entry prices distinguish package scope but are not used as 2025 realized prices or a universal controller premium.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A motor-only package is not motorless; the family provides a commercial counterexample to equating absent control electronics with Drive-Ready stages.
26. Linear Stages - High Accuracy Motorized Translation Stages - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI identifies motor-driven precision stages and electrically driven air-bearing stages, supporting the precision-pool classification premise but not its assumed sales fractions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Air-bearing guidance on a motor-driven stage does not establish pneumatic actuation, preventing high-value precision stages from being allocated solely by bearing terminology.
27. Electric Actuators - Controllers/Drivers, P-E20-1 - SMC
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC lists motor-driven slide and rotary tables, supporting electrical-stage participation within its scoped stage budget; the document does not disclose sales mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The catalog separately identifies motorless slider variants, supporting Drive-Ready classification even when the supplier places them within an electric-actuator catalog.
28. Air Slide Table MXQ Series - SMC
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC's MXQ commercial page identifies an air slide table, supporting a qualifying complete-stage product category within the modeled pneumatic supplier pool, not a published revenue percentage.
29. Electromechanical Actuators - Festo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Festo distinguishes electric axes and complete units including motors and servo drives, supporting configuration-sensitive electrical attribution rather than counting every mechanical axis as motor-equipped.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distinction between mechanical-axis offerings and integrated complete solutions supports a separate modeled Drive-Ready exposure; no shipment split is disclosed.

30. Simple Electric Automation Solution - Festo USA
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Festo describes integrated electric motion offerings and their commercial positioning against pneumatic alternatives, supporting a conditional substitution mechanism rather than a measured adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Festo retains pneumatic positioning for simple movements and identifies upfront-cost trade-offs, supporting continued pneumatic activity rather than complete displacement.

8.1. Electrically Actuated Stages

Table 26. Global Motion Positioning Stages Market Size, by Electrically Actuated Stages, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. IIT Hyderabad - Supply of Linear Stage, Single Tender IITH/PHY/YOGESH/2023/S/T090
   - Taxonomy evidence: The requested linear stages specify two-phase stepper-motor actuation.
2. Indian Institute of Science - Tender Notification for the Procurement of 3-Axis Piezo Stage for Microscopy
   - Taxonomy evidence: The procurement establishes demand for an electrically actuated piezo stage, without independently specifying its final transmission subtype.
3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Automatic-applied-product revenue supplies the electrical side of the scoped optical-catalog value proxy, subject to inherited exclusions for controls and unrelated products.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The fiscal decline in the automatic product pool qualifies the forecast's electrical-growth assumption rather than directly verifying it.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Automatic-applied-product revenue supplies the electrical side of the scoped optical-catalog value proxy, subject to inherited exclusions for controls and unrelated products.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The fiscal decline in the automatic product pool qualifies the forecast's electrical-growth assumption rather than directly verifying it.
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2026 announcement describes JPY xx.xx of broader expansion investment and planned automatic-stage capacity approximately three times FY2025, supporting a conditional automation supply-response premise, not realized revenue or the forecast percentage.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
27. Locations and Contact - Zaber
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
29. ASR Family - Motorized XY Microscope Stages - Zaber
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASR motor-only and built-in-controller packages both contain stepper motors, supporting electrical classification regardless of controller inclusion.
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current North American direct entry prices distinguish package scope but are not used as 2025 realized prices or a universal controller premium.
30. Linear Stages - High Accuracy Motorized Translation Stages - PI USA
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI identifies motor-driven precision stages and electrically driven air-bearing stages, supporting the precision-pool classification premise but not its assumed sales fractions.
31. Electric Actuators - Controllers/Drivers, P-E20-1 - SMC
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC lists motor-driven slide and rotary tables, supporting electrical-stage participation within its scoped stage budget; the document does not disclose sales mix.
32. Electromechanical Actuators - Festo
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Festo distinguishes electric axes and complete units including motors and servo drives, supporting configuration-sensitive electrical attribution rather than counting every mechanical axis as motor-equipped.
33. Simple Electric Automation Solution - Festo USA
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Festo describes integrated electric motion offerings and their commercial positioning against pneumatic alternatives, supporting a conditional substitution mechanism rather than a measured adoption rate.

8.2. Drive-Ready Stages

Table 29. Global Motion Positioning Stages Market Size, by Drive-Ready Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. MISUMI - Motorless Stages: Z-Axis Level Cross Roller Guide
   - Taxonomy evidence: The supplier catalog explicitly presents motorless Z-axis stages and distinguishes them from products supplied with motors.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The motorless-stage catalog establishes a complete stage offered without an installed motor and states catalog-specific customer-installation guarantee limitations; it supports classification and integration-risk context, not the modeled global share.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Expansion of automatic-stage supply supports the broader industrial positioning activity premise, while its motor-installed versus motorless revenue attribution remains an explicit forecast assumption.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. ASR Family - Motorized XY Microscope Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A motor-only package is not motorless; the family provides a commercial counterexample to equating absent control electronics with Drive-Ready stages.
29. Electric Actuators - Controllers/Drivers, P-E20-1 - SMC
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The catalog separately identifies motorless slider variants, supporting Drive-Ready classification even when the supplier places them within an electric-actuator catalog.
30. Electromechanical Actuators - Festo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The distinction between mechanical-axis offerings and integrated complete solutions supports a separate modeled Drive-Ready exposure; no shipment split is disclosed.

8.3. Manual Stages

Table 32. Global Motion Positioning Stages Market Size, by Manual Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IISER Berhampur - Notice Inviting Tender IISERBpr/S&P/2024-25/06
   - Taxonomy evidence: Manual translation and manual rotation stages appear as distinct purchasable requirements.

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY-May-2025 optical-basic-equipment sales of JPY xx.xx and automatic-applied-product sales of JPY xx.xx support the scoped manual/automatic monetary proxy after explicit stage-attribution assumptions.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The corresponding FY2024 amounts, JPY xx.xx and JPY xx.xx, provide counterevidence to uniform electrical substitution; they do not directly establish future shares.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY-May-2025 optical-basic-equipment sales of JPY xx.xx and automatic-applied-product sales of JPY xx.xx support the scoped manual/automatic monetary proxy after explicit stage-attribution assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The corresponding FY2024 amounts, JPY xx.xx and JPY xx.xx, provide counterevidence to uniform electrical substitution; they do not directly establish future shares.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.

7. Festo startet optimistisch ins Jubiläumsjahr
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

8.4. Pneumatically Actuated Stages

Table 35. Global Motion Positioning Stages Market Size, by Pneumatically Actuated Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Air-Hydraulics - Rotary Indexing Table
   - Taxonomy evidence: The supplier brochure advertises complete pneumatic rotary indexing tables and states that their indexing movement does not require electric motors.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer brochure identifies pneumatic rotary indexing tables and electrical sensing, supporting motive-power classification independently of sensing electronics.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. Linear Stages - High Accuracy Motorized Translation Stages - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Air-bearing guidance on a motor-driven stage does not establish pneumatic actuation, preventing high-value precision stages from being allocated solely by bearing terminology.
29. Air Slide Table MXQ Series - SMC
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC's MXQ commercial page identifies an air slide table, supporting a qualifying complete-stage product category within the modeled pneumatic supplier pool, not a published revenue percentage.
30. Simple Electric Automation Solution - Festo USA
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Festo retains pneumatic positioning for simple movements and identifies upfront-cost trade-offs, supporting continued pneumatic activity rather than complete displacement.

8.5. Mixed-Actuation Stages

Table 38. Global Motion Positioning Stages Market Size, by Mixed-Actuation Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Indian Institute of Science - Global Tender for Supply and Installation of Piezo Actuated Linear XYZ Stage with Full Assembly

   · Taxonomy evidence: The requested assembly combines powered piezo positioning with a separately manual positioning axis, establishing a genuine mixed-actuation purchase configuration.

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. Global Tender for Supply and Installation of Piezo Actuated Linear XYZ Stage with Full Assembly - Indian Institute of Science
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The November xx.xx 2025 tender requests two multi-axis assemblies combining powered and manual positioning, supporting the existence of a mixed-actuation purchasing configuration; no award or realized purchase value is established.

8.6. Hydraulically Actuated Stages

Table 41. Global Motion Positioning Stages Market Size, by Hydraulically Actuated Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Air-Hydraulics - Rotary Indexing Table
   - Taxonomy evidence: The brochure lists hydraulic-powered indexing as an option for its Model xx.xx; this establishes an own-product option, not universal industrial-table inclusion.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The brochure lists hydraulic-powered indexing for Model xx.xx supporting a commercially identified hydraulic-stage option but not its realized sales or global penetration.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

9. Motion Positioning Stages Market, by Drive Mechanism

[illegible] Edmund Optics separately specifies Rack-and-Pinion Drives in its translation-stage offering, Zaber identifies worm gearing in RSM-E stages relevant to Rotary Gear Drives, and PI's linear-stage overview identifies lead-screw and ball-screw offerings relevant to Screw Drives. These are documented supply alternatives, not interchangeable packages.

[illegible] Within Direct Piezoelectric Drives, buyers should preserve the distinction between Piezoelectric Deformation Drives and Piezoelectric Motor Drives in the quotation rather than treat a piezo actuation label as a complete mechanism specification. A replacement decision still depends on the supplied stage, controls, and accepted application requirements.

Compound descriptions make procurement documentation important for Cam, Wedge, and Linkage Drives and Hybrid and Mixed Drives. Newport's published IDL280-Z20 description identifies both a ball screw and a wedge arrangement; PI describes M-xx.xx as a hybrid piezo-and-servo-motor stage. [illegible]

[illegible] For cable-driven variants, Friction-Roller Drives, and direct Fluid-Pressure Drives, a defensible supplier shortlist still requires a named complete-stage offering and delivery commitment. Neighboring belt-drive or fluid-actuation examples do not establish those commercial alternatives.

Figure 12. Global Motion Positioning Stages Market Size, by Drive Mechanism, 2025 (%)

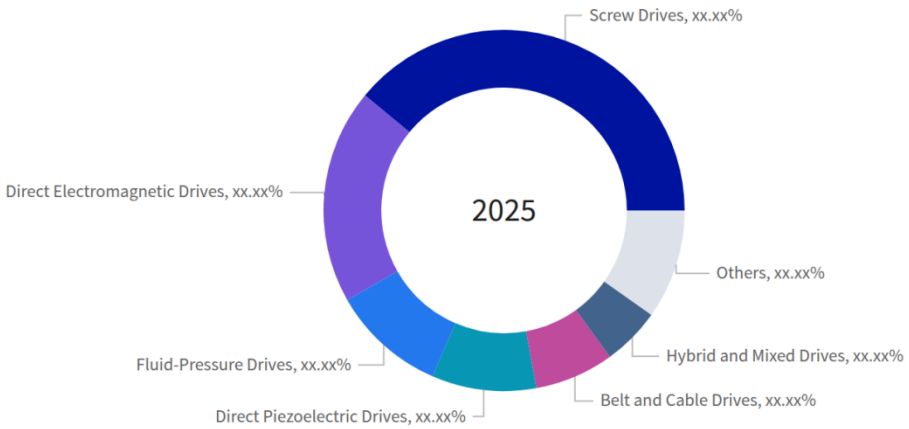

Figure 13. Global Motion Positioning Stages Market, by Drive Mechanism, 2032 (USD Million)

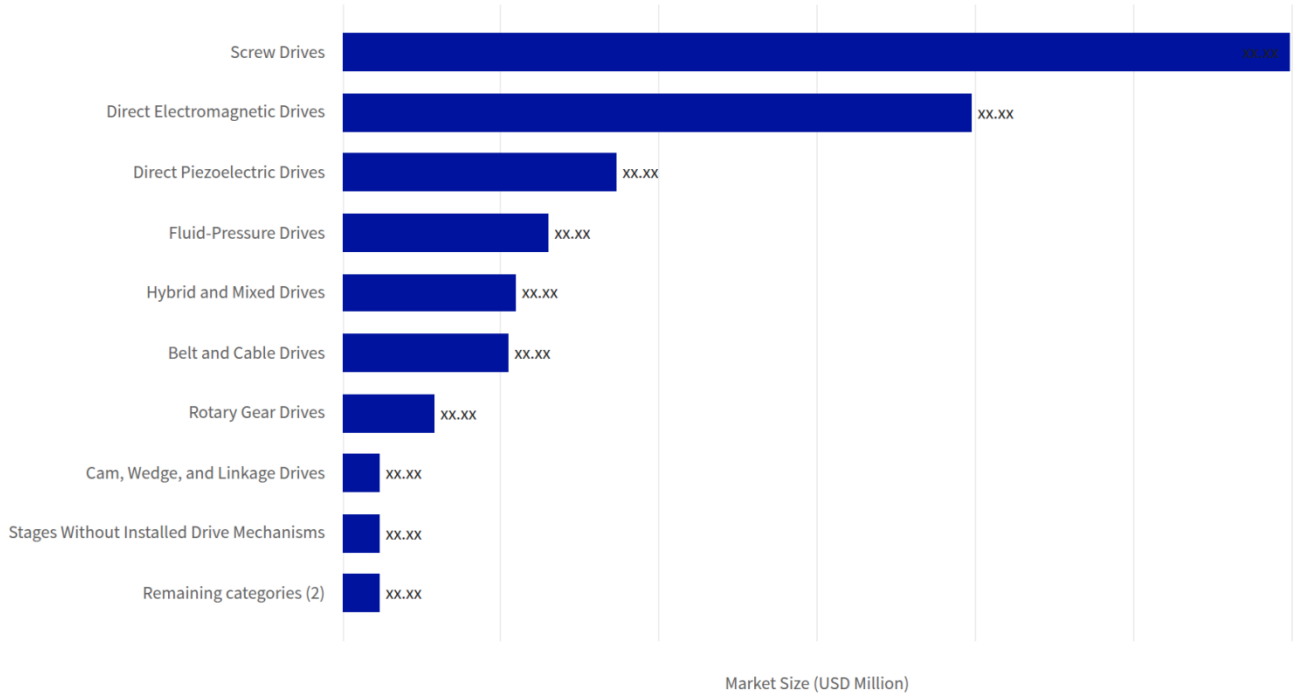

Table 44. Global Motion Positioning Stages Market, by Drive Mechanism growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Stages Without Installed Drive Mechanisms	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 45. Global Motion Positioning Stages Market Size, by Drive Mechanism, 2017-2040 (USD Million)

Drive Mechanism	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Belt and Cable Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cam, Wedge, and Linkage Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct Electromagnetic Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct Piezoelectric Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Fluid-Pressure Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Friction-Roller Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hybrid and Mixed Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Rack-and-Pinion Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Rotary Gear Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Screw Drives	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Stages Without Installed Drive Mechanisms	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. X-LDQ-AE Features - Zaber
   - Zaber describes X-LDQ-AE as a motorized linear-motor stage.
2. RSM-E Motorized Rotation Stages, Built-in Motor Encoders - Zaber
   - Zaber identifies worm gearing in its RSM-E rotation-stage offering, supporting a product-specific rotary-gear distinction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: RSM-E explicitly identifies worm gearing and a current complete-stage starting price of USD 2123. This supports geared rotary-stage classification, not a reported revenue share. ([zaber.com](https://www.zaber.com/products/rotary-stages/RSM-E))
3. Rotary Indexing Table - Air-Hydraulics
   - The brochure establishes fluid-actuated indexing offerings but does not independently identify a direct fluid-pressure drive mechanism; this limits inference to neighboring drive categories.
4. LC40 Features - Zaber
   - LC40 is offered with a synchronous belt drive or as a passive guide; motor-ready and all-in-one supply are distinguished. The passive-guide description requires a transaction-specific complete-assembly boundary.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LC40 distinguishes a synchronous belt-equipped offering from a passive guide option. It supports the belt-led category proxy but does not establish cable-stage sales. ([zaber.com](https://www.zaber.com/products/linear-stages/LC40/features))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The passive option demonstrates why drive installation must be checked separately; a rail-only transaction is not automatically a complete unactuated stage in the modeled numerator. ([zaber.com](https://www.zaber.com/products/linear-stages/LC40/features))

5. 60mm Travel, X-Axis Rack & Pinion Stage - Edmund Optics
   - The seller specifies rack-and-pinion drive for the complete listed stage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete stage listing explicitly specifies rack-and-pinion drive and a current USD xx.xx single-unit asking price. It supports commercial mapping and low-priced catalog exposure, not market prevalence. ([edmundoptics.com](https://www.edmundoptics.com/p/60mm-travel-x-axis-rack-amp-pinion-stage/xx.xx?PrintPDF=true))
6. Linear Translation Stages and NanoPositioners Overview - PI USA
   - PI identifies lead-screw and ball-screw stage offerings, direct-drive piezo-actuator stages, ultrasonic piezo-motor stages, and the M-xx.xx hybrid piezo/servo-motor stage. The overview establishes documented configurations, not transaction-specific availability.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI identifies ball-screw stage offerings, supporting installed screw-drive classification rather than classification solely by the motor. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The portfolio separately identifies piezo-actuator and piezo-motor stages; it establishes category mapping, not their sales weights. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: M-xx.xx is identified as a hybrid piezo/servo-motor stage, supporting the mixed-actuation attribution premise. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))
7. IDL280-Z20 Industrial Vertical Stage - Newport
   - Newport's published IDL280-Z20 description identifies a wedge arrangement together with a ball-screw drive, illustrating compound mechanism terminology without establishing new-order availability.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2026 description identifies a finished vertical stage with a wedge arrangement and ball-screw drive. It supports compound-mechanism attribution, not 2025 sales or a published category share. ([newport.com](https://www.newport.com/mam/celum/celum_assets/resources/IDL280-Z20_-_User_s_Manual.pdf?xx.xx=))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The compound arrangement supports excluding a single serial screw/wedge chain from an automatic hybrid classification; mixed independently actuated assemblies use a separate convention. ([newport.com](https://www.newport.com/mam/celum/celum_assets/resources/IDL280-Z20_-_User_s_Manual.pdf?xx.xx=))
8. Indian Institute of Science - Global Tender for Supply and Installation of Piezo Actuated Linear XYZ Stage with Full Assembly
   - Taxonomy evidence: The November xx.xx 2025 tender specifies piezoelectric actuation for X and Y and manual screw adjustment for Z, establishing different supplied actuation provisions. The requirement does not identify the powered axes' final transmission. Analytical consequence: it cannot independently verify allocation to different drive-mechanism peers merely from the actuator labels. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Global-Tender_XYZ_stage_piezo-xx.xx.pdf))
9. Dynamic Modelling of a Single-Axis Belt-Drive System
   - Taxonomy evidence: Its described belt-driven stage uses a geared DC motor, illustrating that the input motor and the platform transmission are different classification facts.

10. Positioning 2026 Business Report - HOERBIGER

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI reported EUR xx.xx sales in 2025 versus EUR xx.xx in 2024. This constrains the inherited PI stage pool and challenges rapid uniform growth; it does not disclose screw-stage revenue. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same company-level revenue is a scale constraint for the modeled electromagnetic allocation, not a reported mechanism share. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company total bounds the assumed finished piezo-stage contribution after inherited non-stage exclusions; no piezo-stage split is reported. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI's company revenue constrains the modeled hybrid contribution within its scoped stage pool; the hybrid fraction remains assumed. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

11. MKS Inc. Annual Report 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

12. SIGMAKOKI Integrated Report 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May-2025 report identifies JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. Inherited stage exclusions and currency conversion constrain the optical/catalog pool, not an observed screw mix. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual/basic and automated product revenue pools provide monetary context for optical-stage demand; the rotary-gear attribution remains a modeled portion. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))

13. MISUMI Integrated Report 2025 - Business Portfolio
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024 FA manufacturing sales were JPY xx.xx; the report distinguishes manufacturing from VONA distribution. The frozen scoped stage contribution enters the industrial monetary pool, not the entire FA turnover. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturing/distribution distinction supports excluding resale duplication from the common industrial-stage pool used for the modeled belt allocation. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
14. Festo Sustainability Report 2025 - Festo at a Glance
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Festo reported EUR xx.xx revenue in 2025 and identifies pneumatic and electric automation businesses. Only the inherited scoped stage contribution enters the model; the fluid-pressure fraction of that pool is assumed. ([festo.com](https://www.festo.com/PDF_Flip/corp/Festo_Sustainability_Report_2025/en/xx.xx-xx.xx/index.html))
15. Festo startet optimistisch ins Jubiläumsjahr
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
16. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
17. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
18. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
19. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

20. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
21. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
22. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
23. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
24. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
25. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
26. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
27. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

28. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement describes approximately JPY xx.xx planned investment to double automated-stage supply capacity. It supports an expansion premise, not a screw-specific sales forecast. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announcement is a common automated-stage demand and supply signal; the electromagnetic relative-growth assumption is separately modeled and is not disclosed by the source. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned capacity is not counted as realized revenue or allocated automatically to piezoelectric stages; it supplies only a shared conditional expansion premise. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stage-capacity announcement supports the broader equipment-expansion scenario but does not verify hybrid adoption, utilization or the modeled hybrid share increase. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
29. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
30. X-LSQ-E Closed-Loop Motorized Linear Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The X-LSQ-E page identifies lead-screw variants and a current USD xx.xx starting price for xx.xx-mm models. It supplies a direct North American asking-price comparison, not a 2025 realized global average. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LSQ-E))
31. X-LDQ-AE Precision Linear Motor Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: X-LDQ-AE is identified as a linear-motor stage; the current xx.xx-mm model starts at USD xx.xx. Its comparison with the screw-stage price challenges unit-weighted allocation but does not establish a universal premium. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
32. Precision Slide Table with Recirculating Bearings - MXQ - SMC
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC identifies MXQ as a complete pneumatic precision slide table, supporting direct fluid-pressure stage classification. The page does not disclose stage revenue or the modeled supplier-pool mix. ([smcusa.com](https://www.smcusa.com/products/pneumatic-actuators/guided-actuators/slide-table/precision-slide-table-mxq-mxs/mxq~xx.xx))

33. Newport RSP Series Rotation Stages - Manufacturer Catalog Pages Hosted by Artisan Technology Group
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identifiable Newport-authored interior catalog pages document friction-driven finished rotation stages. Only this historical manufacturer material is used; reseller inventory and used-equipment prices are excluded. Current roller-specific revenue remains unverified.
    ([artisantg.com](https://www.artisantg.com/info/Newport_RSP_2_Datasheet_20166231641113.pdf))
34. New Focus/Newport Vacuum-Compatible Stainless-Steel Crossed-Roller-Bearing Translation Stages
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer catalog presents complete xx.xx/xx.xx translation-stage assemblies with actuators expressly excluded. This supports the complete-assembly boundary, not current availability or 2025 revenue volume.
    ([newport-japan.jp](https://www.newport-japan.jp/pdf/xx.xx.pdf))

9.1. Screw Drives

Table 46. Global Motion Positioning Stages Market Size, by Screw Drives, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IIT Hyderabad - Supply of Linear Stage, Single Tender IITH/PHY/YOGESH/2023/S/T090
   · Taxonomy evidence: Metric lead screws are explicitly identified separately from the stepper motors.
2. MISUMI - Motorless Stages: Z-Axis Level Cross Roller Guide
   · Taxonomy evidence: The motorless product's commercial specification separately identifies its ball screw, showing that absence of a motor does not mean absence of a transmission.
3. Positioning 2026 Business Report - HOERBIGER
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI reported EUR xx.xx sales in 2025 versus EUR xx.xx in 2024. This constrains the inherited PI stage pool and challenges rapid uniform growth; it does not disclose screw-stage revenue.
   ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May-2025 report identifies JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. Inherited stage exclusions and currency conversion constrain the optical/catalog pool, not an observed screw mix. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024 FA manufacturing sales were JPY xx.xx; the report distinguishes manufacturing from VONA distribution. The frozen scoped stage contribution enters the industrial monetary pool, not the entire FA turnover. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement describes approximately JPY xx.xx planned investment to double automated-stage supply capacity. It supports an expansion premise, not a screw-specific sales forecast. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
29. Linear Translation Stages and NanoPositioners Overview - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI identifies ball-screw stage offerings, supporting installed screw-drive classification rather than classification solely by the motor. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))
30. X-LSQ-E Closed-Loop Motorized Linear Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The X-LSQ-E page identifies lead-screw variants and a current USD xx.xx starting price for xx.xx-mm models. It supplies a direct North American asking-price comparison, not a 2025 realized global average. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LSQ-E))

9.2. Direct Electromagnetic Drives

Table 49. Global Motion Positioning Stages Market Size, by Direct Electromagnetic Drives, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ABTech - Oil Hydrostatic Linear Stages
   - Taxonomy evidence: The supplier identifies linear motors and encoders integrated with controls for its hydrostatic stage offering.
2. PI - Linear Translation Stages and NanoPositioners Overview
   - Taxonomy evidence: Magnetic linear motors are identified as a drive option for PI's translation stages, separately from their guidance.
3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same company-level revenue is a scale constraint for the modeled electromagnetic allocation, not a reported mechanism share. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announcement is a common automated-stage demand and supply signal; the electromagnetic relative-growth assumption is separately modeled and is not disclosed by the source. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
29. X-LDQ-AE Precision Linear Motor Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: X-LDQ-AE is identified as a linear-motor stage; the current xx.xx-mm model starts at USD xx.xx. Its comparison with the screw-stage price challenges unit-weighted allocation but does not establish a universal premium. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

Sources & Evidence

1. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
2. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
3. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
4. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
5. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Festo reported EUR xx.xx revenue in 2025 and identifies pneumatic and electric automation businesses. Only the inherited scoped stage contribution enters the model; the fluid-pressure fraction of that pool is assumed. ([festo.com](https://www.festo.com/PDF_Flip/corp/Festo_Sustainability_Report_2025/en/xx.xx-xx.xx/index.html))
6. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.

7. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
8. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
9. Novanta Announces Agreement to Acquire Motion Solutions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
10. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
11. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.

12. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
13. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
14. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
15. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
16. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
17. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
18. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

19. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
20. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
21. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
22. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

25. Locations and Contact - Zaber
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

26. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

27. Precision Slide Table with Recirculating Bearings - MXQ - SMC
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC identifies MXQ as a complete pneumatic precision slide table, supporting direct fluid-pressure stage classification. The page does not disclose stage revenue or the modeled supplier-pool mix. ([smcusa.com](https://www.smcusa.com/products/pneumatic-actuators/guided-actuators/slide-table/precision-slide-table-mxq-mxs/mxq~xx.xx))

9.4. Direct Piezoelectric Drives

Table 55. Global Motion Positioning Stages Market, by Direct Piezoelectric Drives growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. PI - Linear Translation Stages and NanoPositioners Overview

   · Taxonomy evidence: PI describes its piezo-linear-motor positioning offerings as avoiding drive screws and gears, supporting an own-offering direct-piezo mechanism distinction.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The portfolio separately identifies piezo-actuator and piezo-motor stages; it establishes category mapping, not their sales weights. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Actuator-driven flexure-stage offerings support the deformation subtype boundary. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named piezo-motor stages support a separate motor subtype without measuring its conditional share. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))

2. Positioning 2026 Business Report - HOERBIGER
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company total bounds the assumed finished piezo-stage contribution after inherited non-stage exclusions; no piezo-stage split is reported.
   ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
3. MKS Inc. Annual Report 2025
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.

8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.

13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.

· Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned capacity is not counted as realized revenue or allocated automatically to piezoelectric stages; it supplies only a shared conditional expansion premise.
([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.

· Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

9.4.1. Piezoelectric Deformation Drives

Table 59. Global Motion Positioning Stages Market Size, by Piezoelectric Deformation Drives, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
2. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
3. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
4. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
5. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
6. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
7. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

8. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
9. Novanta Announces Agreement to Acquire Motion Solutions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
10. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
11. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
12. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

13. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
14. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
15. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
16. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
17. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
18. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
19. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

20. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
21. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
22. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

25. Locations and Contact - Zaber
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
26. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
27. Linear Translation Stages and NanoPositioners Overview - PI USA
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Actuator-driven flexure-stage offerings support the deformation subtype boundary. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))

9.4.2. Piezoelectric Motor Drives

Table 62. Global Motion Positioning Stages Market Size, by Piezoelectric Motor Drives, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. PI - Linear Translation Stages and NanoPositioners Overview

   · Taxonomy evidence: The page identifies piezo linear motors separately from rotary stepper and servo motors in its positioning-stage offering.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Named piezo-motor stages support a separate motor subtype without measuring its conditional share. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

9.5. Belt and Cable Drives

Table 65. Global Motion Positioning Stages Market Size, by Belt and Cable Drives, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Dynamic Modelling of a Single-Axis Belt-Drive System
   - Taxonomy evidence: The peer-reviewed article identifies belt-driven positioning stages as an industrial positioning family and distinguishes them from lead- or ball-screw stages. It does not establish cable-stage coverage.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturing/distribution distinction supports excluding resale duplication from the common industrial-stage pool used for the modeled belt allocation. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. LC40 Features - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LC40 distinguishes a synchronous belt-equipped offering from a passive guide option. It supports the belt-led category proxy but does not establish cable-stage sales. ([zaber.com](https://www.zaber.com/products/linear-stages/LC40/features))

9.6. Hybrid and Mixed Drives

Table 68. Global Motion Positioning Stages Market Size, by Hybrid and Mixed Drives, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Indian Institute of Science - Global Tender for Supply and Installation of Piezo Actuated Linear XYZ Stage with Full Assembly

   · Taxonomy evidence: Piezo positioning elements and a screw-gauge positioning element are specified within the same complete stage assembly, supporting a mixed-mechanism allocation rather than separate finished-stage counts.

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI's company revenue constrains the modeled hybrid contribution within its scoped stage pool; the hybrid fraction remains assumed. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.

· Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stage-capacity announcement supports the broader equipment-expansion scenario but does not verify hybrid adoption, utilization or the modeled hybrid share increase.
([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.

· Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

28. Linear Translation Stages and NanoPositioners Overview - PI USA
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: M-xx.xx is identified as a hybrid piezo/servo-motor stage, supporting the mixed-actuation attribution premise. ([pi-usa.us](https://www.pi-usa.us/en/products/linear-stage-precision-positioners-overview))

29. IDL280-Z20 Industrial Vertical Stage - Newport, January 2026
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The compound arrangement supports excluding a single serial screw/wedge chain from an automatic hybrid classification; mixed independently actuated assemblies use a separate convention. ([newport.com](https://www.newport.com/mam/celum/celum_assets/resources/IDL280-Z20_-_User_s_Manual.pdf?xx.xx=))

9.7. Rotary Gear Drives

Table 71. Global Motion Positioning Stages Market Size, by Rotary Gear Drives, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Development of Combined Microstructure and Structure Characterization Facility for In Situ and Operando Studies at the Advanced Photon Source

   · Taxonomy evidence: The 2018 institutional research paper describes an angularly encoded rotation stage coupled through worm gearing to a stepping motor, separately from later direct-drive replacements. It independently establishes a geared rotary-stage use distinction, but not a current offering or a 2025 merchant-stage transaction. ([tsapps.nist.gov](https://tsapps.nist.gov/publication/get_pdf.cfm?pub_id=xx.xx))

2. Zaber - RSM-E Motorized Rotation Stages, Built-in Motor Encoders

   · Taxonomy evidence: The inspected RSM-E product page explicitly identifies worm-gear-driven motorized rotation stages and presents a purchasable stage model. This is current own-offering corroboration of geared rotary supply, not proof of 2025 sales, market-wide prevalence, or the configured position-servo loop. ([zaber.com](https://www.zaber.com/products/rotary-stages/RSM-E))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: RSM-E explicitly identifies worm gearing and a current complete-stage starting price of USD 2123. This supports geared rotary-stage classification, not a reported revenue share. ([zaber.com](https://www.zaber.com/products/rotary-stages/RSM-E))

3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual/basic and automated product revenue pools provide monetary context for optical-stage demand; the rotary-gear attribution remains a modeled portion.
   ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.

9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.

14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

9.8. Stages Without Installed Drive Mechanisms

Table 74. Global Motion Positioning Stages Market Size, by Stages Without Installed Drive Mechanisms, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
2. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
3. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
4. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
5. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
6. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
7. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

8. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
9. Novanta Announces Agreement to Acquire Motion Solutions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
10. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
11. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
12. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

13. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
14. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
15. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
16. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
17. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
18. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
19. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

20. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
21. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
22. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

25. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
26. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
27. LC40 Features - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The passive option demonstrates why drive installation must be checked separately; a rail-only transaction is not automatically a complete unactuated stage in the modeled numerator. ([zaber.com](https://www.zaber.com/products/linear-stages/LC40/features))
28. New Focus/Newport Vacuum-Compatible Stainless-Steel Crossed-Roller-Bearing Translation Stages
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer catalog presents complete xx.xx/xx.xx translation-stage assemblies with actuators expressly excluded. This supports the complete-assembly boundary, not current availability or 2025 revenue volume. ([newport-japan.jp](https://www.newport-japan.jp/pdf/xx.xx.pdf))

9.9. Cam, Wedge, and Linkage Drives

Table 77. Global Motion Positioning Stages Market Size, by Cam, Wedge, and Linkage Drives, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
2. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

3. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
4. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
5. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
6. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
7. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
8. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
9. Novanta Announces Agreement to Acquire Motion Solutions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
10. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

11. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
12. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
13. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
14. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

15. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
16. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
17. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
18. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
19. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
20. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
21. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

22. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
25. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
26. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
27. IDL280-Z20 Industrial Vertical Stage - Newport, January 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January 2026 description identifies a finished vertical stage with a wedge arrangement and ball-screw drive. It supports compound-mechanism attribution, not 2025 sales or a published category share. ([newport.com](https://www.newport.com/mam/celum/celum_assets/resources/IDL280-Z20_-_User_s_Manual.pdf?xx.xx=))

9.10. Rack-and-Pinion Drives

Table 80. Global Motion Positioning Stages Market Size, by Rack-and-Pinion Drives, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. Edmund Optics - 60mm Travel, X-Axis Rack & Pinion Stage

   · Taxonomy evidence: The inspected product-specific commercial listing identifies a complete X-axis stage with dovetail guidance and rack-and-pinion drive, separately specifying movement, guide system, and drive. This establishes the seller's own offering only, not an exhaustive taxonomy, independent buyer adoption, or historical 2025 availability. ([edmundoptics.com](https://www.edmundoptics.com/p/60mm-travel-x-axis-rack-amp-pinion-stage/xx.xx?PrintPDF=true))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The complete stage listing explicitly specifies rack-and-pinion drive and a current USD xx.xx single-unit asking price. It supports commercial mapping and low-priced catalog exposure, not market prevalence. ([edmundoptics.com](https://www.edmundoptics.com/p/60mm-travel-x-axis-rack-amp-pinion-stage/xx.xx?PrintPDF=true))

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

9.11. Friction-Roller Drives

Table 83. Global Motion Positioning Stages Market Size, by Friction-Roller Drives, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Investigation of the Microscopic Performance of an Aerostatic Precision Positioning Stage Driven by the Air-Lubricated Friction Drive
   - Taxonomy evidence: The engineering paper explicitly studies a precision positioning stage driven by a friction drive; it does not establish a merchant-stage transaction.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. Newport RSP Series Rotation Stages - Manufacturer Catalog Pages Hosted by Artisan Technology Group
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The identifiable Newport-authored interior catalog pages document friction-driven finished rotation stages. Only this historical manufacturer material is used; reseller inventory and used-equipment prices are excluded. Current roller-specific revenue remains unverified.
      ([artisantg.com](https://www.artisantg.com/info/Newport_RSP_2_Datasheet_20166231641l3.pdf))

10. Motion Positioning Stages Market, by Guidance Technology

[illegible] Matching the drive mechanism therefore does not establish an acceptable replacement. An OEM preserving an existing equipment interface should compare the documented complete-stage configuration rather than use guidance or drive labels as proxies for interchangeability.

Flexure-Guided Stages and fluid-supported guidance create different purchasing boundaries. [illegible] Buyers should establish whether supporting utility equipment and its service obligations are included before treating these packages as alternatives to an existing mechanically guided stage.

Magnetically Levitated Stages require particular care when distinguishing demonstrated capability from purchasable delivery scope. [illegible] This limitation concerns the documented PI examples, not the existence of the category elsewhere.

[illegible] PI's F-xx.xx description combines a flexure-guided NanoCube and a hexapod, but those product labels alone do not establish every constituent's guidance classification. Buyers should obtain the quoted guidance configuration and an accountable service boundary before relying on a mixed-guidance designation.

Figure 14. Global Motion Positioning Stages Market Size, by Guidance Technology, 2025 (%)

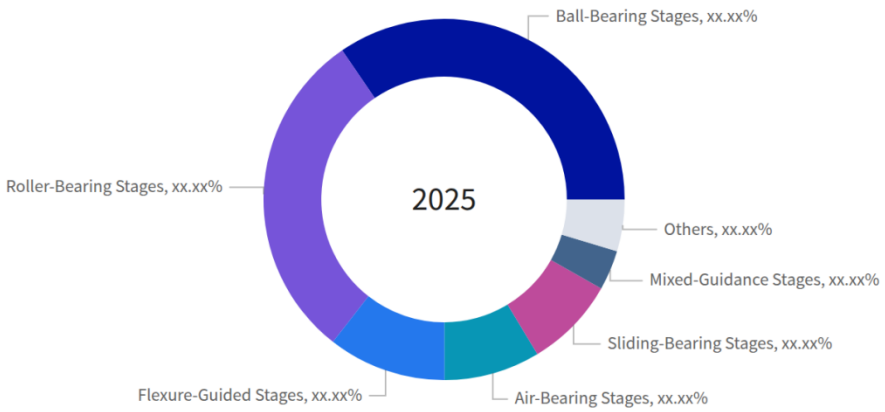

Figure 15. Global Motion Positioning Stages Market, by Guidance Technology, 2032 (USD Million)

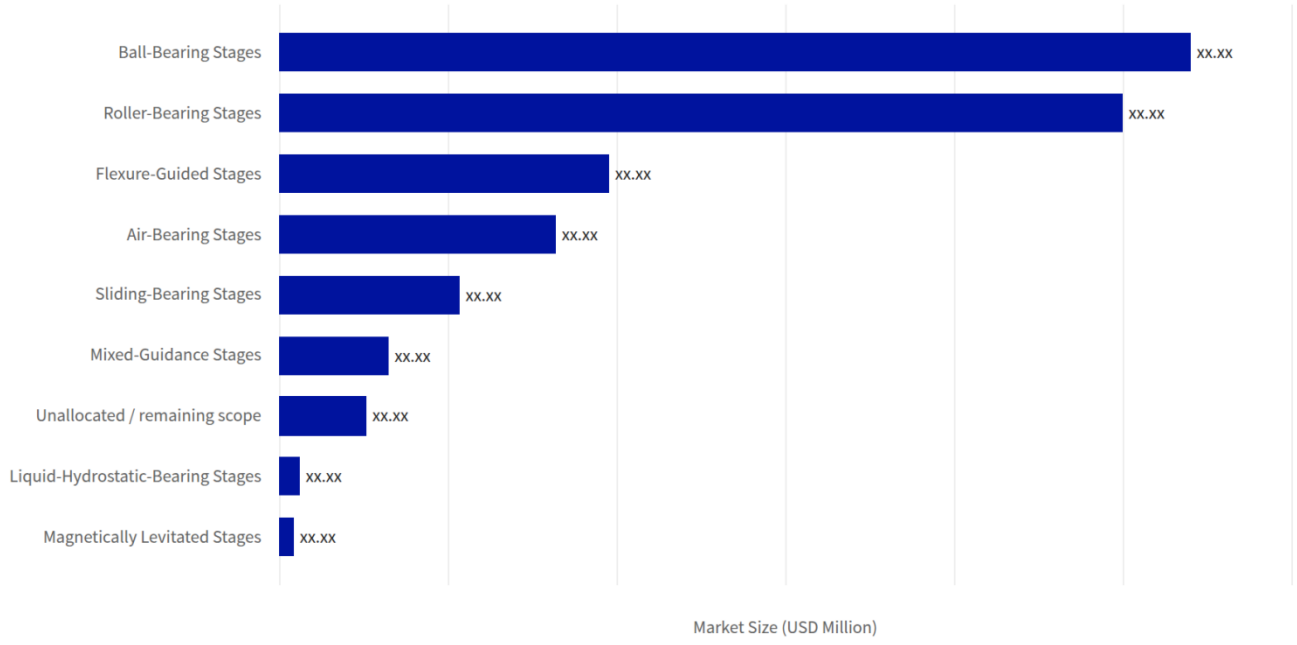

Table 86. Global Motion Positioning Stages Market, by Guidance Technology growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. LC40 Features - Zaber
   - Zaber specifies recirculating-ball guidance for LC40, separately from the optional belt drive.
2. 60mm Travel, X-Axis Rack & Pinion Stage - Edmund Optics
   - The listing separately specifies dovetail guidance and rack-and-pinion drive, supporting guidance/drive independence.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The named dovetail rack-and-pinion stage is listed at USD xx.xx for quantities xx.xx-xx.xx. This current package price supplies an illustrative relative-value check, not a 2025 factory realization or observed category share.
3. Linear Translation Stages and NanoPositioners Overview - PI USA
   - PI separately identifies crossed-roller guidance within its translation-stage offering.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI identifies crossed-roller-guided stages separately from their servo, stepper, screw and piezo drive options, supporting the model's roller-guidance mapping independently of actuation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI identifies crossed-roller-guided stages separately from their servo, stepper, screw and piezo drive options, supporting the model's roller-guidance mapping independently of actuation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI explicitly identifies flexure-guided NanoCube and other nanopositioning products, supporting flexure exposure in precision and scientific-stage pools without providing a sales fraction.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI explicitly identifies flexure-guided NanoCube and other nanopositioning products, supporting flexure exposure in precision and scientific-stage pools without providing a sales fraction.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI separately describes magnetic-linear-motor stages with air-bearing guidance, supporting air-guidance classification without equating guidance with motive drive.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI separately describes magnetic-linear-motor stages with air-bearing guidance, supporting air-guidance classification without equating guidance with motive drive.
4. Oil Hydrostatic Linear Stages - ABTech
   - ABTech describes oil-hydrostatic stages, associated hydrostatic pump units, and integrated linear motors, encoders, and application-specific controls. Guidance and actuation are separately identified; quotation inclusions remain to be agreed.
   - Taxonomy evidence: The stage page separately describes hydrostatic guidance and integrated linear motors, supporting independence of guidance from motive drive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ABTech advertises complete oil-hydrostatic linear stages as standalone or multi-axis offerings and separately describes pump units and integrated linear motors. This supports the niche's commercial boundary and package-valuation treatment, not its estimated revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ABTech advertises complete oil-hydrostatic linear stages as standalone or multi-axis offerings and separately describes pump units and integrated linear motors. This supports the niche's commercial boundary and package-valuation treatment, not its estimated revenue.
5. ABL9000 Series - Aerotech
   - Aerotech's published ABL9000 specification includes an air-supply requirement, supporting verification of utility scope without reproducing operating parameters.

6. Magnetic Levitation Nanopositioning Stages: 6-DOF Comes Naturally - PI USA
   - PI explicitly labels its named magnetic-levitation positioning platforms as technology demonstrators and invites application discussions. This does not establish a standard delivery or support agreement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI explicitly labels its rotary, long-travel linear and AFM maglev platforms as technology demonstrators. This constrains the model against inferring PI standard-product revenue or automatic future commercialization.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI explicitly labels its rotary, long-travel linear and AFM maglev platforms as technology demonstrators. This constrains the model against inferring PI standard-product revenue or automatic future commercialization.
7. F-712.Hxx Compact, High-Speed 6-DOF Photonics Alignment Systems - PI
   - F-xx.xx combines a hexapod and a flexure-guided NanoCube; those labels alone are insufficient to establish every constituent's guidance classification.
8. Cost and Performance Trade-Offs for Commercially Available Linear Stages
   - Taxonomy evidence: The academic comparison classifies commercially available manual linear stages by their bearing principles; its sample is not a complete Global market partition.
9. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI reported EUR xx.xx corporate sales in 2025 versus EUR xx.xx in 2024, constraining the inherited PI revenue pool but not directly verifying stage attribution or guidance mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI reported EUR xx.xx corporate sales in 2025 versus EUR xx.xx in 2024, constraining the inherited PI revenue pool but not directly verifying stage attribution or guidance mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Weak 2025 supplier performance and a high-single-digit corporate growth objective for 2026 temper uniform transmission of equipment-cycle growth into the modeled precision-stage mix.
10. MKS Inc. Annual Report 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
11. SIGMAKOKI Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
12. MISUMI Integrated Report 2025 - Business Portfolio
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.

13. Festo Sustainability Report 2025 - Festo at a Glance
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
14. Festo startet optimistisch ins Jubiläumsjahr
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
15. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
16. Aerotech Recruiting FAQs
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
17. Novanta Announces Agreement to Acquire Motion Solutions
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
18. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
19. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
· Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
20. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
· Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

21. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
22. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
23. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
24. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
25. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
26. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SEMI's July xx.xx 2026 supplier-input forecast projects wafer-fab-equipment growth of xx.xx%, xx.xx% and xx.xx% in 2026-2028, constraining the precision-equipment demand premise. The modeled roller-stage rate is separate and substantially attenuated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association's equipment outlook provides an external downstream demand signal for precision alignment and inspection purchases, not a published flexure-stage share or adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment expansion forecast constrains the high-precision purchasing premise used for air-bearing stages; equipment sales are not substituted for externally sold stage revenue.

27. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment, doubled automated-stage supply capacity and rising optical-transceiver-related orders. This supports a conditional OEM-stage demand premise, not realized guidance-specific revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stage-specific capacity and order announcement supports the forecast's rolling-stage purchasing premise when combined with independently documented crossed-roller offerings; it does not disclose the roller share of that expansion.
28. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
29. Linear Actuator - THK Official Web Site
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: THK identifies KR/SKR as integrated LM-guide and ball-screw assemblies with ball-guided structures, supporting complete-stage mapping to the ball-bearing exposure of the automation cohort. The page does not disclose sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: THK identifies KR/SKR as integrated LM-guide and ball-screw assemblies with ball-guided structures, supporting complete-stage mapping to the ball-bearing exposure of the automation cohort. The page does not disclose sales weights.
30. Mini slide DGST - Festo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The DGST commercial datasheet distinguishes pneumatic actuation from ball-bearing guidance, supporting guidance-versus-drive independence and the automation cohort's ball-guided stage premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The DGST commercial datasheet distinguishes pneumatic actuation from ball-bearing guidance, supporting guidance-versus-drive independence and the automation cohort's ball-guided stage premise.

31. WEB Catalog - SMC CORPORATION
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC separately lists slide-bearing-guided offerings, supporting a sliding-guidance commercial exposure within automation rather than equating pneumatic actuation with one bearing class.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SMC separately lists slide-bearing-guided offerings, supporting a sliding-guidance commercial exposure within automation rather than equating pneumatic actuation with one bearing class.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC lists recirculating-linear-guided compact slides separately from crossed-roller products; this supports distinct guidance exposures, not their modeled sales percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SMC lists recirculating-linear-guided compact slides separately from crossed-roller products; this supports distinct guidance exposures, not their modeled sales percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MXS and MXF listings explicitly identify cross-roller guidance, supporting roller-stage exposure within the automation commercial pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MXS and MXF listings explicitly identify cross-roller guidance, supporting roller-stage exposure within the automation commercial pool.
32. 25mm Travel, Metric Micrometer, Solid-Top Ball Bearing Stage - Edmund Optics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The named ball-bearing micrometer stage is listed at USD xx.xx. Compared with the separately documented USD xx.xx dovetail package, it supplies a price-order check while differing size and configuration prevent treating the ratio as a guidance-only premium.
33. Advanced Customized Motion Stages - Beijing U-Precision Tech Co., Ltd.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: U-Precision advertises advanced customized motion stages, distinguishes air-bearing and magnetic-bearing configurations, and describes application experience. This supplies a merchant custom-stage commercial lead, while current-year sales and complete-stage attribution remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: U-Precision advertises advanced customized motion stages, distinguishes air-bearing and magnetic-bearing configurations, and describes application experience. This supplies a merchant custom-stage commercial lead, while current-year sales and complete-stage attribution remain unmeasured.
34. XYZ Stages - Multi-Axis Motorized 3-Axis Stage - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI advertises the A-xx.xx hybrid gantry with air and mechanical linear bearings and an XYZ assembly combining air-bearing XY motion with mechanical Z motion. These complete-assembly examples support mixed-guidance classification, not a portfolio-count sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI advertises the A-xx.xx hybrid gantry with air and mechanical linear bearings and an XYZ assembly combining air-bearing XY motion with mechanical Z motion. These complete-assembly examples support mixed-guidance classification, not a portfolio-count sales weight.
35. X-Axis Motorized Positioning Stages, Cross Roller Type - MISUMI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MISUMI's own named motorized positioning-stage listing identifies crossed-roller guidance, supporting the separate roller exposure assigned to its manufacturing-stage pool. The listing is not a revenue or shipment weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MISUMI's own named motorized positioning-stage listing identifies crossed-roller guidance, supporting the separate roller exposure assigned to its manufacturing-stage pool. The listing is not a revenue or shipment weight.

10.1. Ball-Bearing Stages

Table 88. Global Motion Positioning Stages Market Size, by Ball-Bearing Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IIT Hyderabad - Supply of Linear Stage, Single Tender IITH/PHY/YOGESH/2023/S/T090
   - Taxonomy evidence: The longer-travel stage requirement explicitly identifies a recirculating-ball-bearing guide.
2. Cost and Performance Trade-Offs for Commercially Available Linear Stages
   - Taxonomy evidence: Ball-bearing and gothic-arch ball-bearing stages are identified among the commercial stage classes studied.
3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment, doubled automated-stage supply capacity and rising optical-transceiver-related orders. This supports a conditional OEM-stage demand premise, not realized guidance-specific revenue.
22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
29. Linear Actuator - THK Official Web Site
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: THK identifies KR/SKR as integrated LM-guide and ball-screw assemblies with ball-guided structures, supporting complete-stage mapping to the ball-bearing exposure of the automation cohort. The page does not disclose sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: THK identifies KR/SKR as integrated LM-guide and ball-screw assemblies with ball-guided structures, supporting complete-stage mapping to the ball-bearing exposure of the automation cohort. The page does not disclose sales weights.
30. Mini slide DGST - Festo
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The DGST commercial datasheet distinguishes pneumatic actuation from ball-bearing guidance, supporting guidance-versus-drive independence and the automation cohort's ball-guided stage premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The DGST commercial datasheet distinguishes pneumatic actuation from ball-bearing guidance, supporting guidance-versus-drive independence and the automation cohort's ball-guided stage premise.
31. WEB Catalog - SMC CORPORATION
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC lists recirculating-linear-guided compact slides separately from crossed-roller products; this supports distinct guidance exposures, not their modeled sales percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SMC lists recirculating-linear-guided compact slides separately from crossed-roller products; this supports distinct guidance exposures, not their modeled sales percentages.

32. 25mm Travel, Metric Micrometer, Solid-Top Ball Bearing Stage - Edmund Optics
    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The named ball-bearing micrometer stage is listed at USD xx.xx. Compared with the separately documented USD xx.xx dovetail package, it supplies a price-order check while differing size and configuration prevent treating the ratio as a guidance-only premium.

10.2. Roller-Bearing Stages

Table 91. Global Motion Positioning Stages Market Size, by Roller-Bearing Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Cost and Performance Trade-Offs for Commercially Available Linear Stages
   - Taxonomy evidence: Crossed-roller stages are treated separately from ball-bearing stages.
2. MISUMI - Motorless Stages: Z-Axis Level Cross Roller Guide
   - Taxonomy evidence: The catalog identifies crossed-roller guidance for its motorless Z-axis stage.
3. Air-Hydraulics - Rotary Indexing Table
   - Taxonomy evidence: The advertised positioning tables specify tapered-roller-bearing construction.
4. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

5. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
6. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
7. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
8. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
9. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
10. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
11. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
12. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

13. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
14. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
15. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

16. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
17. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
18. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
19. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
20. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
21. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SEMI's July xx.xx 2026 supplier-input forecast projects wafer-fab-equipment growth of xx.xx%, xx.xx% and xx.xx% in 2026-2028, constraining the precision-equipment demand premise. The modeled roller-stage rate is separate and substantially attenuated.

22. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stage-specific capacity and order announcement supports the forecast's rolling-stage purchasing premise when combined with independently documented crossed-roller offerings; it does not disclose the roller share of that expansion.
23. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
24. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

26. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
27. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
28. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
29. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
30. Linear Translation Stages and NanoPositioners Overview - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI identifies crossed-roller-guided stages separately from their servo, stepper, screw and piezo drive options, supporting the model's roller-guidance mapping independently of actuation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI identifies crossed-roller-guided stages separately from their servo, stepper, screw and piezo drive options, supporting the model's roller-guidance mapping independently of actuation.
31. WEB Catalog - SMC CORPORATION
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MXS and MXF listings explicitly identify cross-roller guidance, supporting roller-stage exposure within the automation commercial pool.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MXS and MXF listings explicitly identify cross-roller guidance, supporting roller-stage exposure within the automation commercial pool.
32. X-Axis Motorized Positioning Stages, Cross Roller Type - MISUMI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MISUMI's own named motorized positioning-stage listing identifies crossed-roller guidance, supporting the separate roller exposure assigned to its manufacturing-stage pool. The listing is not a revenue or shipment weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MISUMI's own named motorized positioning-stage listing identifies crossed-roller guidance, supporting the separate roller exposure assigned to its manufacturing-stage pool. The listing is not a revenue or shipment weight.

10.3. Flexure-Guided Stages

Table 94. Global Motion Positioning Stages Market Size, by Flexure-Guided Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Cost and Performance Trade-Offs for Commercially Available Linear Stages
   - Taxonomy evidence: Flexure stages are identified as a distinct commercially available guidance class.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI reported EUR xx.xx corporate sales in 2025 versus EUR xx.xx in 2024, constraining the inherited PI revenue pool but not directly verifying stage attribution or guidance mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI reported EUR xx.xx corporate sales in 2025 versus EUR xx.xx in 2024, constraining the inherited PI revenue pool but not directly verifying stage attribution or guidance mix.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The association's equipment outlook provides an external downstream demand signal for precision alignment and inspection purchases, not a published flexure-stage share or adoption rate.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. Linear Translation Stages and NanoPositioners Overview - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI explicitly identifies flexure-guided NanoCube and other nanopositioning products, supporting flexure exposure in precision and scientific-stage pools without providing a sales fraction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI explicitly identifies flexure-guided NanoCube and other nanopositioning products, supporting flexure exposure in precision and scientific-stage pools without providing a sales fraction.

10.4. Air-Bearing Stages

Table 97. Global Motion Positioning Stages Market Size, by Air-Bearing Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. PI - Linear Translation Stages and NanoPositioners Overview
   - Taxonomy evidence: PI's own stage overview describes magnetic linear-motor stages with air-bearing guidance.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI separately describes magnetic-linear-motor stages with air-bearing guidance, supporting air-guidance classification without equating guidance with motive drive.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI separately describes magnetic-linear-motor stages with air-bearing guidance, supporting air-guidance classification without equating guidance with motive drive.
2. Investigation of the Microscopic Performance of an Aerostatic Precision Positioning Stage Driven by the Air-Lubricated Friction Drive
   - Taxonomy evidence: The same stage is identified as aerostatic, demonstrating that the guidance principle is distinct from its friction-drive mechanism.

3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Weak 2025 supplier performance and a high-single-digit corporate growth objective for 2026 temper uniform transmission of equipment-cycle growth into the modeled precision-stage mix.
4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment expansion forecast constrains the high-precision purchasing premise used for air-bearing stages; equipment sales are not substituted for externally sold stage revenue.
21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

27. Locations and Contact - Zaber

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

10.5. Sliding-Bearing Stages

Table 100. Global Motion Positioning Stages Market Size, by Sliding-Bearing Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Cost and Performance Trade-Offs for Commercially Available Linear Stages
   - Taxonomy evidence: Dovetail stages are identified as a commercial sliding-contact stage class.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. 60mm Travel, X-Axis Rack & Pinion Stage - Edmund Optics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The named dovetail rack-and-pinion stage is listed at USD xx.xx for quantities xx.xx-xx.xx. This current package price supplies an illustrative relative-value check, not a 2025 factory realization or observed category share.
29. WEB Catalog - SMC CORPORATION
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SMC separately lists slide-bearing-guided offerings, supporting a sliding-guidance commercial exposure within automation rather than equating pneumatic actuation with one bearing class.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SMC separately lists slide-bearing-guided offerings, supporting a sliding-guidance commercial exposure within automation rather than equating pneumatic actuation with one bearing class.

10.6. Mixed-Guidance Stages

Table 103. Global Motion Positioning Stages Market Size, by Mixed-Guidance Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Progress of Mechanical Design of Nanopositioning Stages at the Advanced Photon Source
   - Taxonomy evidence: The institutional manuscript describes a flexure rotation stage mounted on a bearing rotation stage, establishing a mixed-guidance architecture. The research implementation does not independently establish external commercial supply.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. XYZ Stages - Multi-Axis Motorized 3-Axis Stage - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI advertises the A-xx.xx hybrid gantry with air and mechanical linear bearings and an XYZ assembly combining air-bearing XY motion with mechanical Z motion. These complete-assembly examples support mixed-guidance classification, not a portfolio-count sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI advertises the A-xx.xx hybrid gantry with air and mechanical linear bearings and an XYZ assembly combining air-bearing XY motion with mechanical Z motion. These complete-assembly examples support mixed-guidance classification, not a portfolio-count sales weight.

10.7. Liquid-Hydrostatic-Bearing Stages

Table 106. Global Motion Positioning Stages Market Size, by Liquid-Hydrostatic-Bearing Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ABTech - Oil Hydrostatic Linear Stages
   - Taxonomy evidence: ABTech advertises oil-hydrostatic linear stages as standalone units or multi-axis assemblies, establishing an own-product complete-stage offering.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ABTech advertises complete oil-hydrostatic linear stages as standalone or multi-axis offerings and separately describes pump units and integrated linear motors. This supports the niche's commercial boundary and package-valuation treatment, not its estimated revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ABTech advertises complete oil-hydrostatic linear stages as standalone or multi-axis offerings and separately describes pump units and integrated linear motors. This supports the niche's commercial boundary and package-valuation treatment, not its estimated revenue.

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

10.8. Magnetically Levitated Stages

Table 109. Global Motion Positioning Stages Market Size, by Magnetically Levitated Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. PI - Linear Translation Stages and NanoPositioners Overview
   - Taxonomy evidence: The overview separately describes magnetic-levitation guidance. This presentation alone does not establish an external sale or distinguish every offering from a demonstrator.
2. Six Degree of Freedom Fine Motion Positioning Stage Based on Magnetic Levitation
   - Taxonomy evidence: The NASA-hosted 1994 paper describes a magnetically suspended six-degree-of-freedom positioning platform. It establishes the named technical family, not current commercial availability.
3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
29. Magnetic Levitation Nanopositioning Stages: 6-DOF Comes Naturally - PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI explicitly labels its rotary, long-travel linear and AFM maglev platforms as technology demonstrators. This constrains the model against inferring PI standard-product revenue or automatic future commercialization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI explicitly labels its rotary, long-travel linear and AFM maglev platforms as technology demonstrators. This constrains the model against inferring PI standard-product revenue or automatic future commercialization.
30. Advanced Customized Motion Stages - Beijing U-Precision Tech Co., Ltd.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: U-Precision advertises advanced customized motion stages, distinguishes air-bearing and magnetic-bearing configurations, and describes application experience. This supplies a merchant custom-stage commercial lead, while current-year sales and complete-stage attribution remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: U-Precision advertises advanced customized motion stages, distinguishes air-bearing and magnetic-bearing configurations, and describes application experience. This supplies a merchant custom-stage commercial lead, while current-year sales and complete-stage attribution remain unmeasured.

11. Motion Positioning Stages Market, by Feedback Architecture

[redacted] Readout availability therefore does not establish a position-servo commitment. Buyers should distinguish the information displayed from the closed-loop behavior included in the accepted package.

Actuator-Side Closed-Loop Stages and Dual-Position-Feedback Stages should be distinguished at the configuration level. [redacted] The selected controller and feedback package must remain part of the purchasing commitment.

Integration scope is a further commercial choice. Aerotech distinguishes component-level from complete-system integration in the PRO-SV ordering documentation, allowing the buyer to retain an existing control arrangement or purchase a defined system scope. [redacted]

Figure 16. Global Motion Positioning Stages Market Size, by Feedback Architecture, 2025 (%)

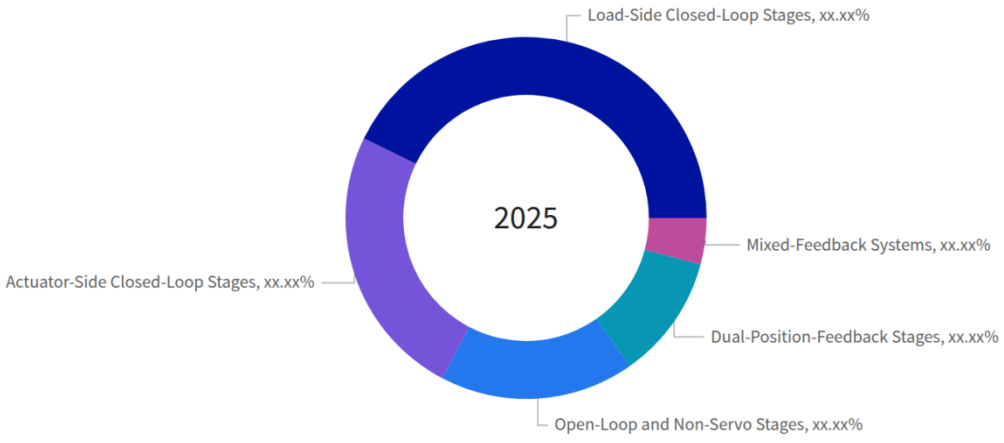

Figure 17. Global Motion Positioning Stages Market, by Feedback Architecture, 2032 (USD Million)

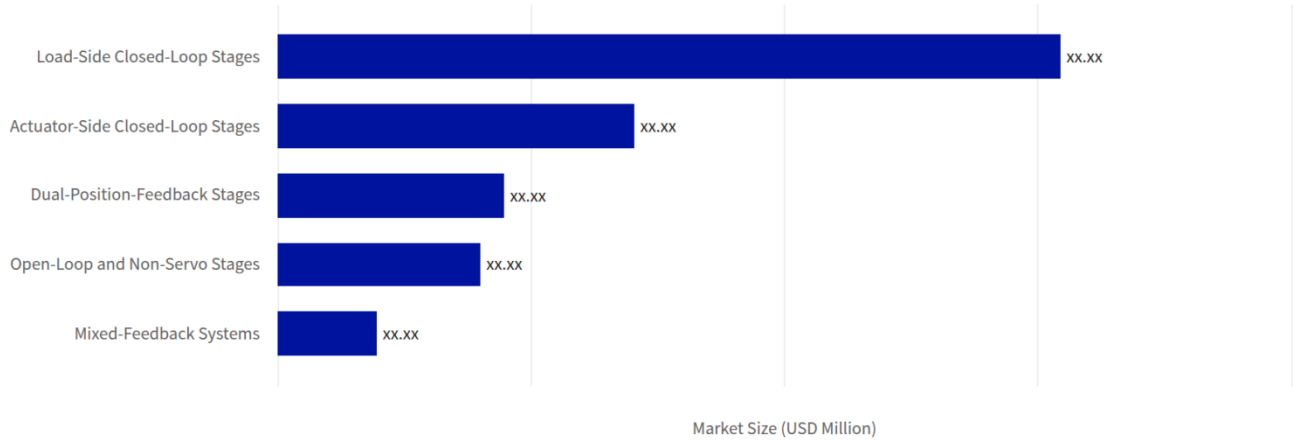

Table 112. Global Motion Positioning Stages Market, by Feedback Architecture growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Actuator-Side Closed-Loop Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Dual-Position-Feedback Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Load-Side Closed-Loop Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mixed-Feedback Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open-Loop and Non-Servo Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 113. Global Motion Positioning Stages Market Size, by Feedback Architecture, 2017-2040 (USD Million)

Feedback Architecture	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Actuator-Side Closed-Loop Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Dual-Position-Feedback Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Load-Side Closed-Loop Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mixed-Feedback Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open-Loop and Non-Servo Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. X-LDQ-AE Features - Zaber
   - X-LDQ-AE includes a linear encoder and built-in controller providing pre-tuned closed-loop servo positioning; this establishes the described package, not other families' architecture.
2. Global tender for a manual waveguide alignment rig - Indian Institute of Science
   - The manual alignment procurement requires a digital position readout, supporting the distinction between readout and a position-servo commitment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 manual-stage procurement specification includes digital position readout, supporting classification without equating readout with servo control. No award value is disclosed. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2022/xx.xx/waveguide-allignment-rig.pdf))
3. F-712.Hxx Compact, High-Speed 6-DOF Photonics Alignment Systems - PI
   - F-xx.xx documents combined coarse/fine positioning. That arrangement alone does not establish different constituent position-feedback architectures.

4. PRO-SV Long-Travel Lift Stages - Aerotech
   - PRO-SV ordering options distinguish rotary-only feedback from direct-linear-plus-rotary feedback explicitly labeled dual-loop, and separately distinguish component-level from complete-system integration. These options do not establish a particular multi-axis mixed-feedback configuration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordering distinguishes rotary-only feedback and component/system integration scopes, supporting configuration attribution rather than an assumed universal controller purchase. ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordering distinguishes rotary-only feedback and component/system integration scopes, supporting configuration attribution rather than an assumed universal controller purchase. ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five ordering options explicitly combine linear and rotary position feedback as dual-loop; option counts are not used as sales weights. ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five ordering options explicitly combine linear and rotary position feedback as dual-loop; option counts are not used as sales weights. ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))
5. IISER Berhampur - Notice Inviting Tender IISERBpr/S&P/2024-25/06
   - Taxonomy evidence: The tip-tilt purchase requirement specifies integrated strain-gauge sensing and distinguishes closed-loop from open-loop positioning.
6. Indian Institute of Science - Tender Notification for the Procurement of 3-Axis Piezo Stage for Microscopy
   - Taxonomy evidence: The requested piezo stage is a complete positioning purchase with an integrated capacitive sensor and closed-loop travel requirements.
7. Precision Positioning Which Contains Flexible Mechanical System - Fusion of Semi-Closed and Full-Closed Loop Control
   - Taxonomy evidence: The paper distinguishes motor-angle, load-angle, and combined positioning feedback architectures.
8. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
9. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

10. SIGMAKOKI Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
11. MISUMI Integrated Report 2025 - Business Portfolio
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
12. Festo Sustainability Report 2025 - Festo at a Glance
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
13. Festo startet optimistisch ins Jubiläumsjahr
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
14. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
15. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
16. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
17. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

18. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx of 2025 semiconductor-equipment billings anchors the semiconductor-demand proxy, subject to the explicitly assumed merchant-stage content. It is not stage revenue. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed equipment-billings pool constrains the common semiconductor-demand weight; actuator-side attribution is modeled separately. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-billings anchor supports the common demand denominator, not a directly reported load-side stage share. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The common semiconductor-demand proxy uses association member billings; dual-position package prevalence and realization remain assumptions. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed demand-scale input constrains the semiconductor portion of the allocation; mixed-system attribution is not disclosed. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

19. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 support the rounded automation-activity benchmark, not observed stage shipments. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installations benchmark constrains industrial activity; stage attachment, price and actuator-feedback purchasing mix are modeled. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared industrial-demand input is an activity proxy, with load-side package attribution applied separately. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial installations support the common demand-scale bridge, not an observed dual-position stage penetration rate. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The activity benchmark supports the industrial cohort; complete mixed-stage package counts remain assumption-led. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))

20. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
21. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
22. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
23. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
24. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
25. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

26. MISUMI Expands Automated Positioning Stage Production for Data Centers

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced automated-stage capacity expansion supports an automation supply-response scenario, but does not prove displacement of open/non-servo purchases. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately JPY xx.xx planned investment and intended capacity doubling support commercial expansion, not actuator-feedback-specific adoption or realized sales. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier announcement supports the conditional automation-demand premise; it does not disclose load-feedback orders or validate the modeled mix shift. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Capacity plans constrain the commercial supply-response premise, while dual-position configuration prevalence remains an explicit forecast assumption. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The investment announcement supports broader automated-stage activity, not observed mixed-feedback package revenue or future utilization. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))

27. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

28. X-LDQ-AE Precision Linear Motor Stages - Zaber

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The linear-encoder servo family lists USD xx.xx for its xx.xx mm package, anchoring the load-side reference before explicitly assumed forecast price compression.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The linear-encoder servo family lists USD xx.xx for its xx.xx mm package, anchoring the load-side reference before explicitly assumed forecast price compression.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The load-side package price supplies a commercial baseline for the dual-position basket; its additional USD xx.xx increment is an assumption, not this product's quote.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The load-side package price supplies a commercial baseline for the dual-position basket; its additional USD xx.xx increment is an assumption, not this product's quote.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies the load-feedback constituent reference in the modeled mixed basket; the source does not establish mixed-package sales. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies the load-feedback constituent reference in the modeled mixed basket; the source does not establish mixed-package sales. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

29. X-LSQ075A Specifications - Zaber

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: X-LSQ075A lists USD xx.xx a built-in controller and no encoder. It anchors the powered non-servo package reference carried into the forecast model.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LSQ/specs?part=X-LSQ075A))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: X-LSQ075A lists USD xx.xx a built-in controller and no encoder. It anchors the powered non-servo package reference carried into the forecast model.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LSQ/specs?part=X-LSQ075A))

30. X-LRQ-E Motorized Linear Stages, Built-in Controllers & Motor Encoders - Zaber

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The motor-encoder closed-loop family lists USD xx.xx for xx.xx mm configurations, anchoring the actuator-side relative-price reference; future prices remain modeled.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The motor-encoder closed-loop family lists USD xx.xx for xx.xx mm configurations, anchoring the actuator-side relative-price reference; future prices remain modeled.
([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies one constituent reference in the modeled mixed-package basket, not a disclosed complete mixed-system price or sales share. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies one constituent reference in the modeled mixed-package basket, not a disclosed complete mixed-system price or sales share. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

31. 3-Axis NanoMax Flexure Stages - Thorlabs, archived October 31, 2018

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The archived commercial package distinguishes manual differential positioning and internal closed-loop piezo positioning. It supports a historical heterogeneous-package precedent, not observed 2025 revenue.
([punchout.thorlabs.com](https://punchout.thorlabs.com/catalogpages/Obsolete/2018/MAX343_M.pdf))

32. P-737 PIFOC Specimen Z Positioners - PI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The P-xx.xx portfolio specifies indirect position sensing, qualifying the assumption that every sensor-equipped piezo stage measures load position directly. ([pi-usa.us](https://www.pi-usa.us/en/products/piezo-flexure-nanopositioners/z-ztiptilt-piezo-nanopositioning-stages/p-xx.xx-pifoc-specimen-focusing-z-stage-xx.xx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Directly measuring capacitive versions are offered on request, supporting configuration-specific separation from indirect-sensing packages rather than a sales-weight inference. ([pi-usa.us](https://www.pi-usa.us/en/products/piezo-flexure-nanopositioners/z-ztiptilt-piezo-nanopositioning-stages/p-xx.xx-pifoc-specimen-focusing-z-stage-xx.xx))

11.1. Load-Side Closed-Loop Stages

Table 114. Global Motion Positioning Stages Market Size, by Load-Side Closed-Loop Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Precision Positioning Which Contains Flexible Mechanical System - Fusion of Semi-Closed and Full-Closed Loop Control
   - Taxonomy evidence: Full-closed positioning control is distinguished by load-angle feedback.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment-billings anchor supports the common demand denominator, not a directly reported load-side stage share.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The shared industrial-demand input is an activity proxy, with load-side package attribution applied separately.
([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier announcement supports the conditional automation-demand premise; it does not disclose load-feedback orders or validate the modeled mix shift.
    ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

28. X-LDQ-AE Precision Linear Motor Stages - Zaber
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The linear-encoder servo family lists USD xx.xx for its xx.xx mm package, anchoring the load-side reference before explicitly assumed forecast price compression. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The linear-encoder servo family lists USD xx.xx for its xx.xx mm package, anchoring the load-side reference before explicitly assumed forecast price compression. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

29. P-737 PIFOC Specimen Z Positioners - PI
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Directly measuring capacitive versions are offered on request, supporting configuration-specific separation from indirect-sensing packages rather than a sales-weight inference. ([pi-usa.us](https://www.pi-usa.us/en/products/piezo-flexure-nanopositioners/z-ztiptilt-piezo-nanopositioning-stages/p-xx.xx-pifoc-specimen-focusing-z-stage-xx.xx))

11.2. Actuator-Side Closed-Loop Stages

Table 117. Global Motion Positioning Stages Market Size, by Actuator-Side Closed-Loop Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Precision Positioning Which Contains Flexible Mechanical System - Fusion of Semi-Closed and Full-Closed Loop Control
   - Taxonomy evidence: Semi-closed positioning control is defined using motor-angle information.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed equipment-billings pool constrains the common semiconductor-demand weight; actuator-side attribution is modeled separately.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installations benchmark constrains industrial activity; stage attachment, price and actuator-feedback purchasing mix are modeled. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately JPY xx.xx planned investment and intended capacity doubling support commercial expansion, not actuator-feedback-specific adoption or realized sales.
    ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. X-LRQ-E Motorized Linear Stages, Built-in Controllers & Motor Encoders - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The motor-encoder closed-loop family lists USD xx.xx for xx.xx mm configurations, anchoring the actuator-side relative-price reference; future prices remain modeled. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The motor-encoder closed-loop family lists USD xx.xx for xx.xx mm configurations, anchoring the actuator-side relative-price reference; future prices remain modeled. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))
29. PRO-SV Long-Travel Lift Stages - Aerotech
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordering distinguishes rotary-only feedback and component/system integration scopes, supporting configuration attribution rather than an assumed universal controller purchase. ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordering distinguishes rotary-only feedback and component/system integration scopes, supporting configuration attribution rather than an assumed universal controller purchase. ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))
30. P-737 PIFOC Specimen Z Positioners - PI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The P-xx.xx portfolio specifies indirect position sensing, qualifying the assumption that every sensor-equipped piezo stage measures load position directly. ([pi-usa.us](https://www.pi-usa.us/en/products/piezo-flexure-nanopositioners/z-ztiptilt-piezo-nanopositioning-stages/p-xx.xx-pifoc-specimen-focusing-z-stage-xx.xx))

11.3. Open-Loop and Non-Servo Stages

Table 120. Global Motion Positioning Stages Market Size, by Open-Loop and Non-Servo Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IISER Berhampur - Notice Inviting Tender IISERBpr/S&P/2024-25/06
   - Taxonomy evidence: The tip-tilt specification distinguishes open-loop and closed-loop performance, while the manual-stage line items establish non-servo positioning purchases.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx of 2025 semiconductor-equipment billings anchors the semiconductor-demand proxy, subject to the explicitly assumed merchant-stage content. It is not stage revenue.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 support the rounded automation-activity benchmark, not observed stage shipments.
([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))

14. World Robotics 2025 Industrial Robots - Executive Summary
- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.

15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.

17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
- Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.

18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.

19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.

· Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announced automated-stage capacity expansion supports an automation supply-response scenario, but does not prove displacement of open/non-servo purchases.
([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.

· Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. Global Tender for a Manual Waveguide Alignment Rig - Indian Institute of Science
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The October xx.xx 2022 manual-stage procurement specification includes digital position readout, supporting classification without equating readout with servo control. No award value is disclosed. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2022/xx.xx/waveguide-allignment-rig.pdf))
29. X-LSQ075A Specifications - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: X-LSQ075A lists USD xx.xx a built-in controller and no encoder. It anchors the powered non-servo package reference carried into the forecast model. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LSQ/specs?part=X-LSQ075A))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: X-LSQ075A lists USD xx.xx a built-in controller and no encoder. It anchors the powered non-servo package reference carried into the forecast model. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LSQ/specs?part=X-LSQ075A))

11.4. Dual-Position-Feedback Stages

Table 123. Global Motion Positioning Stages Market Size, by Dual-Position-Feedback Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Precision Positioning Which Contains Flexible Mechanical System - Fusion of Semi-Closed and Full-Closed Loop Control
   - Taxonomy evidence: The study combines motor-side and load-side position information; it establishes an engineering architecture, not a marketed complete-stage transaction.
2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The common semiconductor-demand proxy uses association member billings; dual-position package prevalence and realization remain assumptions.
([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial installations support the common demand-scale bridge, not an observed dual-position stage penetration rate.
([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))

14. World Robotics 2025 Industrial Robots - Executive Summary
- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.

15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.

17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
- Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.

18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.

19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Capacity plans constrain the commercial supply-response premise, while dual-position configuration prevalence remains an explicit forecast assumption.
    ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. X-LDQ-AE Precision Linear Motor Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The load-side package price supplies a commercial baseline for the dual-position basket; its additional USD xx.xx increment is an assumption, not this product's quote.
      ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The load-side package price supplies a commercial baseline for the dual-position basket; its additional USD xx.xx increment is an assumption, not this product's quote.
      ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))
29. PRO-SV Long-Travel Lift Stages - Aerotech
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five ordering options explicitly combine linear and rotary position feedback as dual-loop; option counts are not used as sales weights.
      ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five ordering options explicitly combine linear and rotary position feedback as dual-loop; option counts are not used as sales weights.
      ([aerotech.com](https://www.aerotech.com/wp-content/uploads/2020/xx.xx/PRO-SV-Data-Sheet-D20240219.pdf))

11.5. Mixed-Feedback Systems

Table 126. Global Motion Positioning Stages Market Size, by Mixed-Feedback Systems, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
2. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

3. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
4. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
5. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
6. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
7. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
8. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
9. Novanta Announces Agreement to Acquire Motion Solutions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
10. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

11. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025

- Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
- Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The observed demand-scale input constrains the semiconductor portion of the allocation; mixed-system attribution is not disclosed.

([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))

12. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The activity benchmark supports the industrial cohort; complete mixed-stage package counts remain assumption-led.

([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))

13. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
14. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
15. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
16. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
17. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
18. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
19. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The investment announcement supports broader automated-stage activity, not observed mixed-feedback package revenue or future utilization. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))

20. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
21. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
22. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

25. Locations and Contact - Zaber

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

26. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

27. X-LDQ-AE Precision Linear Motor Stages - Zaber

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies the load-feedback constituent reference in the modeled mixed basket; the source does not establish mixed-package sales. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies the load-feedback constituent reference in the modeled mixed basket; the source does not establish mixed-package sales. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE))

28. X-LRQ-E Motorized Linear Stages, Built-in Controllers & Motor Encoders - Zaber

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies one constituent reference in the modeled mixed-package basket, not a disclosed complete mixed-system price or sales share. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: USD xx.xx supplies one constituent reference in the modeled mixed-package basket, not a disclosed complete mixed-system price or sales share. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LRQ-E))

29. 3-Axis NanoMax Flexure Stages - Thorlabs, archived October 31, 2018

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The archived commercial package distinguishes manual differential positioning and internal closed-loop piezo positioning. It supports a historical heterogeneous-package precedent, not observed 2025 revenue. ([punchout.thorlabs.com](https://punchout.thorlabs.com/catalogpages/Obsolete/2018/MAX343_M.pdf))

12. Motion Positioning Stages Market, by Application

Alignment & Coupling supports both manual and automated purchasing routes. The Indian Institute of Science's 2022 manual waveguide-alignment tender required compatible stages and holders together with after-sales support in India. ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Buyers should request the documentation appropriate to the task being purchased.

An equipment builder needs agreement on the stage's role in the larger assembly, while a facility operator evaluating replacement must confirm compatibility with its retained instrument and service arrangement. Suppliers should contract for the identifiable stage and associated responsibilities rather than presume responsibility for the entire processing machine, assembly station, or analytical instrument.

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber
   - ASR advertises Nucleus microscopy modules, µManager support, and mounting options for popular microscopes; these establish advertised compatibility, not buyer acceptance.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Microscopy-stage direct prices span USD xx.xx-xx.xx across the family; controller alternatives and software support establish package differences, not observed buyer mix.

2. H-811.I2 • H-811.I2HS Miniature Hexapod - Physik Instrumente
   - PI positions H-xx.xx for photonics and precision assembly; the application description does not establish a customer purchase or complete assembly-station responsibility.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public precision-assembly offering supports category attribution and the requirement to classify a multipurpose stage once; it is not a sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public precision-assembly offering supports category attribution and the requirement to classify a multipurpose stage once; it is not a sales weight.
3. Global tender for a manual waveguide alignment rig - Indian Institute of Science
   - The tender requires compatible stages and accessories and after-sales service, support, and repair through the vendor or its associate in India; it is not an award record.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated institutional tender establishes manual alignment-stage procurement eligibility and support obligations; it supplies no award value or global sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated institutional tender establishes manual alignment-stage procurement eligibility and support obligations; it supplies no award value or global sales weight.
4. F-712.Hxx Compact, High-Speed 6-DOF Photonics Alignment Systems - PI
   - PI describes integrated alignment routines and software support for F-xx.xx establishing an automated offering rather than independently verified customer outcomes.
5. Dimensional nano and sub nanometrology - National Physical Laboratory
   - NPL describes traceable displacement measurement, stage metrology, and investigation of high-precision scanning-stage errors. This supports distinguishing metrological documentation from imaging-software compatibility.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports separating metrological displacement and stage-measurement uses from imaging compatibility; it does not measure stage sales or documentation premiums.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports separating metrological displacement and stage-measurement uses from imaging compatibility; it does not measure stage sales or documentation premiums.
6. Tenders Archive - Indian Institute of Technology Delhi
   - IIT Delhi's official archive records the August xx.xx 2024 advertisement for a multiaxes precision CNC stage for a femtosecond laser micromachining system. The archive establishes a procurement advertisement, not an award.
7. Facility Equipment - MIRIAM/B22 - Diamond Light Source
   - Diamond Light Source's B22 facility page lists operational sample-positioning stages within infrared imaging and microspectroscopy end stations, establishing an institutional characterization-use context rather than a new procurement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operational analytical end stations contain identifiable sample-positioning stages; installed equipment establishes use, not annual procurement or facility-attributable stage revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operational analytical end stations contain identifiable sample-positioning stages; installed equipment establishes use, not annual procurement or facility-attributable stage revenue.

8. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
9. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
10. SIGMAKOKI Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
11. MISUMI Integrated Report 2025 - Business Portfolio
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
12. Festo Sustainability Report 2025 - Festo at a Glance
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
13. Festo startet optimistisch ins Jubiläumsjahr
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
14. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
15. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
16. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

17. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
18. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported USD xx.xx of 2025 semiconductor-equipment billings anchors the shared semiconductor activity pool, not alignment-stage sales directly.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the common semiconductor activity denominator used with an explicitly assumed dedicated-imaging stage-content rate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the semiconductor pool scale; metrology-specific revenue attribution remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports semiconductor equipment demand without substituting complete-equipment value for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the common equipment-activity anchor for the modeled assembly and handling contribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports strong test-equipment growth, supporting a distinct testing demand context rather than observed stage shipments.
19. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx robot installations in 2025 constrain the industrial activity scale; alignment attachments are assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx robot installations in 2025 constrain the industrial activity scale; alignment attachments are assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial automation activity is a purchasing proxy, not material-processing stage shipments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial automation activity is a purchasing proxy, not material-processing stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 installation benchmark and forecast of xx.xx installations in 2029 constrain the handling-demand scenario without establishing stage attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 installation benchmark and forecast of xx.xx installations in 2029 constrain the handling-demand scenario without establishing stage attachment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the shared industrial activity pool from which functional-testing package demand is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the shared industrial activity pool from which functional-testing package demand is modeled.

20. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
21. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
22. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
23. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
24. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
25. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
26. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies approximately JPY xx.xx investment and planned doubling of automated-stage supply capacity; it supports a conditional adoption premise, not realized revenue.

27. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
28. LSM Family - Compact, Screw Drive Linear Stage - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Public direct stage prices constrain package-price plausibility, not alignment purchasing volumes.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Single-axis and multi-axis list prices provide a commercial range for the assumed processing-stage package realization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standard LSM direct prices include USD xx.xx-xx.xx with multi-axis packages priced higher; global manufacturer realizations remain modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Higher-priced multi-axis offerings constrain the scientific-testing package assumption without establishing its frequency.
29. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment outlook constrains semiconductor-related forecast demand; the alignment adoption increment remains an assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the common semiconductor forecast driver, not a future imaging-stage share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the USD xx.xx historical WFE proxy and USD xx.xx 2028 projection used in the content and relative-growth model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the USD xx.xx historical WFE proxy and USD xx.xx 2028 projection used in the content and relative-growth model.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: WFE monetary anchors constrain processing exposure; merchant content and captive-sourcing exclusions are assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: WFE monetary anchors constrain processing exposure; merchant content and captive-sourcing exclusions are assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Packaging values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Packaging values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Test-equipment values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Test-equipment values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.

30. KLA Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 wafer-inspection revenue of USD xx.xx and patterning revenue of USD xx.xx anchor a modeled process-control equipment pool; neither is stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 wafer-inspection revenue of USD xx.xx and patterning revenue of USD xx.xx anchor a modeled process-control equipment pool; neither is stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The modeled peer-expanded process-control pool is excluded from the equipment base receiving the processing-stage content fraction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the scope adjustment to the WFE proxy used for separate handling-stage content.
31. ZEISS concludes fiscal year 2024/25 with solid growth
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial Quality & Research revenue declined from EUR xx.xx to EUR xx.xx in FY2024/xx.xx qualifying assumptions of uniformly strong scientific-equipment demand.
32. TRUMPF Annual Report 2024/25
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx Machine Tools revenue fell xx.xx% and Laser Technology revenue fell xx.xx%; this counterevidence supports withholding an additional industrial-processing attachment uplift.
33. Stages & Actuators - Aerotech
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes stage offerings used in laser processing from complete automation systems, supporting stage-only processing attribution rather than whole-machine value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes stage offerings used in laser processing from complete automation systems, supporting stage-only processing attribution rather than whole-machine value.

12.1. Material Processing & Patterning

Table 131. Global Motion Positioning Stages Market Size, by Material Processing & Patterning, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. IIT Delhi - Multiaxes Precision CNC Stage for Femtosecond Laser Micromachining System

   · Taxonomy evidence: The institutional tender specifies supply and integration of a complete positioning-stage system for laser micromachining and expressly excludes the laser source and beam-delivery system. This directly supports stage-attributable material-processing demand rather than whole-machine revenue. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports semiconductor equipment demand without substituting complete-equipment value for stage revenue.

13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial automation activity is a purchasing proxy, not material-processing stage shipments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial automation activity is a purchasing proxy, not material-processing stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. LSM Family - Compact, Screw Drive Linear Stage - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Single-axis and multi-axis list prices provide a commercial range for the assumed processing-stage package realization.
29. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: WFE monetary anchors constrain processing exposure; merchant content and captive-sourcing exclusions are assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: WFE monetary anchors constrain processing exposure; merchant content and captive-sourcing exclusions are assumptions.
30. KLA Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The modeled peer-expanded process-control pool is excluded from the equipment base receiving the processing-stage content fraction.
31. TRUMPF Annual Report 2024/25
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024/xx.xx Machine Tools revenue fell xx.xx% and Laser Technology revenue fell xx.xx%; this counterevidence supports withholding an additional industrial-processing attachment uplift.
32. Stages & Actuators - Aerotech
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes stage offerings used in laser processing from complete automation systems, supporting stage-only processing attribution rather than whole-machine value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer distinguishes stage offerings used in laser processing from complete automation systems, supporting stage-only processing attribution rather than whole-machine value.

12.2. Assembly & Precision Handling

Table 134. Global Motion Positioning Stages Market Size, by Assembly & Precision Handling, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Multi-Probe Micro-Assembly

   · Taxonomy evidence: The 2007 institutional study identifies commercial nanopositioning stages within microassembly equipment. It establishes assembly and manipulation as stage-use categories, not a newly commercialized stage product, present deployment prevalence, or 2025 sales. ([tsapps.nist.gov](https://tsapps.nist.gov/publication/get_pdf.cfm?pub_id=xx.xx))

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides the common equipment-activity anchor for the modeled assembly and handling contribution.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 installation benchmark and forecast of xx.xx installations in 2029 constrain the handling-demand scenario without establishing stage attachment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 installation benchmark and forecast of xx.xx installations in 2029 constrain the handling-demand scenario without establishing stage attachment.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. LSM Family - Compact, Screw Drive Linear Stage - Zaber
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Standard LSM direct prices include USD xx.xx-xx.xx with multi-axis packages priced higher; global manufacturer realizations remain modeled.
29. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Packaging values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Packaging values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
30. KLA Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the scope adjustment to the WFE proxy used for separate handling-stage content.
31. H-811.I2 · H-811.I2HS Miniature Hexapod - Physik Instrumente
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The public precision-assembly offering supports category attribution and the requirement to classify a multipurpose stage once; it is not a sales weight.
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The public precision-assembly offering supports category attribution and the requirement to classify a multipurpose stage once; it is not a sales weight.

12.3. Metrology, Calibration & Inspection

Table 137. Global Motion Positioning Stages Market Size, by Metrology, Calibration & Inspection, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Dimensional nano and sub nanometrology

   · Taxonomy evidence: The national metrology institution describes stage metrology and high-precision scanning stages used in metrological atomic force microscopy, establishing a dimensional-metrology use distinct from image acquisition alone. ([npl.co.uk](https://www.npl.co.uk/research/dimensional/nano-and-sub-nanometrology))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports separating metrological displacement and stage-measurement uses from imaging compatibility; it does not measure stage sales or documentation premiums.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports separating metrological displacement and stage-measurement uses from imaging compatibility; it does not measure stage sales or documentation premiums.

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.

5. MISUMI Integrated Report 2025 - Business Portfolio

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.

6. Festo Sustainability Report 2025 - Festo at a Glance

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.

7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the semiconductor pool scale; metrology-specific revenue attribution remains modeled.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.

15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

28. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the USD xx.xx historical WFE proxy and USD xx.xx 2028 projection used in the content and relative-growth model.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the USD xx.xx historical WFE proxy and USD xx.xx 2028 projection used in the content and relative-growth model.
29. KLA Corporation - Form 10-K for the Fiscal Year Ended June 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2025 wafer-inspection revenue of USD xx.xx and patterning revenue of USD xx.xx anchor a modeled process-control equipment pool; neither is stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 wafer-inspection revenue of USD xx.xx and patterning revenue of USD xx.xx anchor a modeled process-control equipment pool; neither is stage revenue.

12.4. Testing & Characterization

Table 140. Global Motion Positioning Stages Market Size, by Testing & Characterization, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Facility Equipment - MIRIAM/B22

   · Taxonomy evidence: The operational infrared imaging and microspectroscopy facility lists sample-positioning stages in its analytical end stations. This establishes stage-enabled analytical characterization, while the complete instruments and facility value remain outside stage revenue. ([diamond.ac.uk](https://www.diamond.ac.uk/Instruments/Soft-Condensed-Matter/B22/status.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Operational analytical end stations contain identifiable sample-positioning stages; installed equipment establishes use, not annual procurement or facility-attributable stage revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Operational analytical end stations contain identifiable sample-positioning stages; installed equipment establishes use, not annual procurement or facility-attributable stage revenue.

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports strong test-equipment growth, supporting a distinct testing demand context rather than observed stage shipments.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the shared industrial activity pool from which functional-testing package demand is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the shared industrial activity pool from which functional-testing package demand is modeled.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. LSM Family - Compact, Screw Drive Linear Stage - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Higher-priced multi-axis offerings constrain the scientific-testing package assumption without establishing its frequency.
29. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Test-equipment values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Test-equipment values support the approximately USD xx.xx historical proxy and USD xx.xx 2028 forecast.

Sources & Evidence

1. JPL Robotics: The Computer Vision Laboratory

   · Taxonomy evidence: The institutional facility description identifies an optical bench with translation stages used to acquire image sequences with controlled camera or object motion. It establishes imaging use, without establishing a stage purchase date, merchant-stage value, or deployment volume. ([robotics.jpl.nasa.gov](https://robotics.jpl.nasa.gov/how-we-do-it/facilities/the-computer-vision-laboratory/))

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports the common semiconductor activity denominator used with an explicitly assumed dedicated-imaging stage-content rate.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.

15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

28. ASR Family - Motorized XY Microscope Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Microscopy-stage direct prices span USD xx.xx-xx.xx across the family; controller alternatives and software support establish package differences, not observed buyer mix.
29. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports the common semiconductor forecast driver, not a future imaging-stage share.
30. ZEISS concludes fiscal year 2024/25 with solid growth
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial Quality & Research revenue declined from EUR xx.xx to EUR xx.xx in FY2024/xx.xx qualifying assumptions of uniformly strong scientific-equipment demand.

12.6. Alignment & Coupling

Table 146. Global Motion Positioning Stages Market Size, by Alignment & Coupling, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Global tender for a manual waveguide alignment rig

   · Taxonomy evidence: The October xx.xx 2022 institutional tender requests an integrated manual waveguide-alignment assembly containing input, central, and output positioning stages for optical coupling. This establishes an alignment-stage procurement category, not an award or realized sale. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2022/xx.xx/waveguide-allignment-rig.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated institutional tender establishes manual alignment-stage procurement eligibility and support obligations; it supplies no award value or global sales weight.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated institutional tender establishes manual alignment-stage procurement eligibility and support obligations; it supplies no award value or global sales weight.

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported USD xx.xx of 2025 semiconductor-equipment billings anchors the shared semiconductor activity pool, not alignment-stage sales directly.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx robot installations in 2025 constrain the industrial activity scale; alignment attachments are assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx robot installations in 2025 constrain the industrial activity scale; alignment attachments are assumed.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies approximately JPY xx.xx investment and planned doubling of automated-stage supply capacity; it supports a conditional adoption premise, not realized revenue.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. LSM Family - Compact, Screw Drive Linear Stage - Zaber
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Public direct stage prices constrain package-price plausibility, not alignment purchasing volumes.
29. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment outlook constrains semiconductor-related forecast demand; the alignment adoption increment remains an assumption.

13. Motion Positioning Stages Market, by End-User Sector

[redacted] Research & Technical Services has a different documented commercial context: NPL describes stage metrology and displacement-measurement work. Suppliers addressing that activity should establish the required measurement documentation rather than assume that an industrial equipment specification answers the purchasing need.

[redacted] For comparable institutional opportunities, the commercial commitment extends beyond delivering the assembly. These are requirements of that procurement, not universal university purchasing rules or proof of a completed delivery.

Within Healthcare Services, microscopy compatibility must be separated from provider purchasing and application acceptance. [redacted] Zaber states that its products are neither designed nor intended for military or law-enforcement applications; that supplier-specific position should be checked before pursuing such an account, without generalizing it to other manufacturers.

[redacted] The complete instrument offering does not establish a separate utility-stage contract. Account development should follow that purchasing relationship rather than assume that every instrument operator is an accessible standalone-stage buyer.

Figure 20. Global Motion Positioning Stages Market Size, by End-User Sector, 2025 (%)

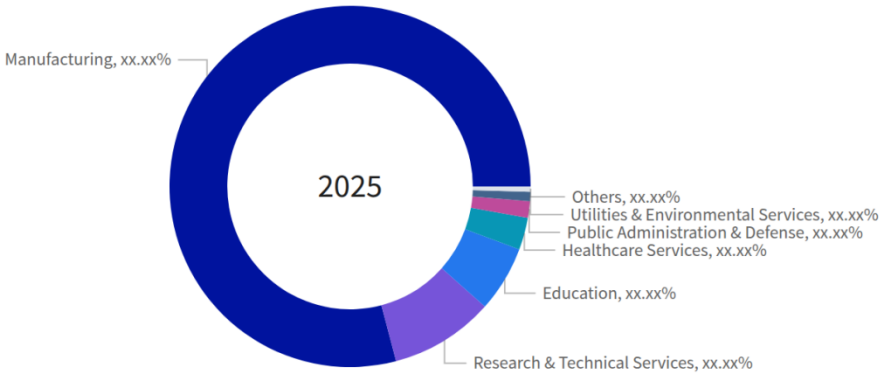

Figure 21. Global Motion Positioning Stages Market, by End-User Sector, 2032 (USD Million)

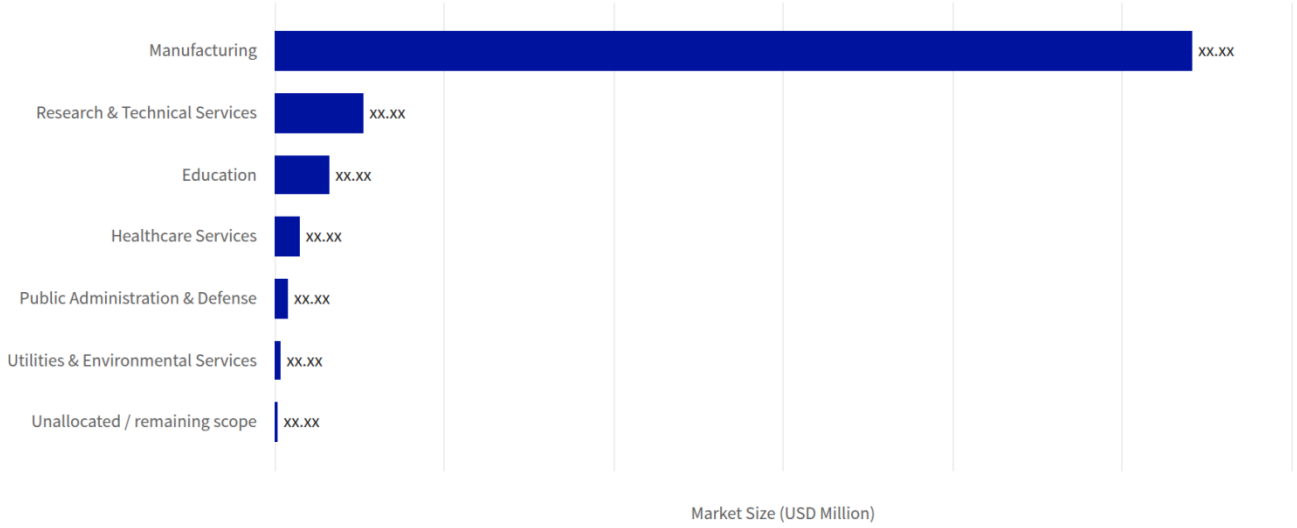

Table 149. Global Motion Positioning Stages Market, by End-User Sector growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber

   · ASR advertises microscopy software support. That offering statement does not establish healthcare-provider purchasing or application acceptance. ([zaber.com](https://www.zaber.com/products/families/ASR))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current microscopy-stage packages and North American direct prices provide a limited price-scale check for the industrial pool's relative-value bridge, not observed sector prices.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current microscopy-stage packages and North American direct prices provide a limited price-scale check for the industrial pool's relative-value bridge, not observed sector prices.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Microscopy-stage price ranges and alternative control packages inform a bounded non-manufacturing relative-price assumption, not research sales.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Microscopy-stage price ranges and alternative control packages inform a bounded non-manufacturing relative-price assumption, not research sales.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Catalog packages provide a commercial price reference, not measured institutional preferences or academic purchasing volumes.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Catalog packages provide a commercial price reference, not measured institutional preferences or academic purchasing volumes.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Microscopy compatibility establishes an offering context, not provider adoption, clinical acceptance or healthcare-stage revenue.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Microscopy compatibility establishes an offering context, not provider adoption, clinical acceptance or healthcare-stage revenue.

2. Orders, Shipping & Warranties

   · Zaber states that its products are neither designed nor intended for military or law-enforcement applications. This is a supplier-specific application policy. ([zaber.com](https://www.zaber.com/ordering))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Zaber's military and law-enforcement application restriction is supplier-specific; it qualifies accessible supply without proving market-wide zero demand.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Zaber's military and law-enforcement application restriction is supplier-specific; it qualifies accessible supply without proving market-wide zero demand.

3. Dimensional nano and sub nanometrology - National Physical Laboratory

   · NPL describes displacement measurement and stage metrology within its research activities, supporting a research-and-technical-services context without establishing a stage purchase. ([npl.co.uk](https://www.npl.co.uk/research/dimensional/nano-and-sub-nanometrology))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NPL documents stage-metrology activity, supporting a dedicated research-and-technical-services use context without disclosing annual stage expenditure.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NPL documents stage-metrology activity, supporting a dedicated research-and-technical-services use context without disclosing annual stage expenditure.

4. Automating Precision Assembly with the SmartStage XY
   - Dover Motion describes SmartStage XY selection for Cellerate equipment and positions the equipment across research and production quality-control settings; this does not identify every eventual operator. ([dovermotion.com](https://dovermotion.com/case-studies/automating-precision-assembly-with-the-smartstage-xy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The incorporated-stage case spans research through production quality control, challenging automatic Manufacturing attribution from equipment application alone.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The incorporated-stage case spans research through production quality control, challenging automatic Manufacturing attribution from equipment application alone.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The case establishes a possible research destination but supplies no operator-level sales split.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The case establishes a possible research destination but supplies no operator-level sales split.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment application does not identify institutional ownership; educational attribution requires a separate operator bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment application does not identify institutional ownership; educational attribution requires a separate operator bridge.
5. UNSD Classification Detail - ISIC Rev.4, Section O: Public administration and defence; compulsory social security
   - The United Nations classification states that institutional status alone does not determine public-administration classification and explicitly assigns military hospitals to healthcare. It establishes classification boundaries, not stage adoption. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/O))
   - Taxonomy evidence: The official classification states that institutional or legal status alone does not determine public-administration classification: publicly operated activities classified elsewhere remain in their respective sectors. This supports activity-based end-user allocation rather than assigning every public buyer to government. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/O))
6. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1
   - IISc's September 2023 linear-stage RFQ identifies its own department as the destination and requires support, spares and installation acceptance. It is an invitation, not delivery evidence. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2023 institutional stage RFQ supports educational-operator attribution and procurement obligations, but not a completed purchase or global sales weight.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2023 institutional stage RFQ supports educational-operator attribution and procurement obligations, but not a completed purchase or global sales weight.
7. AlgaPro AI-Powered Phytoplankton Monitoring
   - AGS Scientific markets AlgaPro TE300 for water-monitoring applications, identifies an incorporated motorized stage, and offers installation and continuing support. The page does not establish a separate utility-stage contract. ([agssci.com](https://agssci.com/product/algapro-te300/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current water-monitoring instrument offering identifies an incorporated motorized stage. It supports the commercial attribution premise, not 2025 volume, attributable stage revenue or a standalone utility contract.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current water-monitoring instrument offering identifies an incorporated motorized stage. It supports the commercial attribution premise, not 2025 volume, attributable stage revenue or a standalone utility contract.

8. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 sales versus EUR xx.xx in 2024 and reported automation weakness challenge uniform equipment-cycle pass-through.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 sales versus EUR xx.xx in 2024 and reported automation weakness challenge uniform equipment-cycle pass-through.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported reductions in publicly funded projects qualify assumptions of rapid research-related demand growth; no stage-only sector split is disclosed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported public-project weakness supports a restrained scientific-demand trajectory rather than an automatic institutional purchasing uplift.
9. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
10. SIGMAKOKI Integrated Report 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
11. MISUMI Integrated Report 2025 - Business Portfolio
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
12. Festo Sustainability Report 2025 - Festo at a Glance
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
13. Festo startet optimistisch ins Jubiläumsjahr
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
14. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

15. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
16. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
17. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
18. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported global 2025 semiconductor-equipment sales of USD xx.xx anchor the semiconductor-related activity pool; merchant-stage content and Manufacturing attribution are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported global 2025 semiconductor-equipment sales of USD xx.xx anchor the semiconductor-related activity pool; merchant-stage content and Manufacturing attribution are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment total initializes the shared semiconductor pool; research-establishment routing is an explicit assumption, not a reported customer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment total initializes the shared semiconductor pool; research-establishment routing is an explicit assumption, not a reported customer share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment total initializes the shared semiconductor pool; academic-facility routing is modeled rather than observed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment total initializes the shared semiconductor pool; academic-facility routing is modeled rather than observed.

19. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally

- Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 provide the observed industrial-activity benchmark, not stage shipments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 provide the observed industrial-activity benchmark, not stage shipments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; technical-service attribution remains modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; technical-service attribution remains modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; educational attribution remains modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; educational attribution remains modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; healthcare attribution remains modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; healthcare attribution remains modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; public-sector attribution remains modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; public-sector attribution remains modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; utility attribution remains modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; utility attribution remains modeled.

20. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 customer-industry counts constrain the manufacturing versus non-manufacturing industrial-pool bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 customer-industry counts constrain the manufacturing versus non-manufacturing industrial-pool bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed technical-service routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed technical-service routing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed educational routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed educational routing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed healthcare routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed healthcare routing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed government routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed government routing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed utility routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed utility routing.
21. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
22. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
23. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.

24. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
25. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected 2026-2028 wafer-fab-equipment growth constrains the faster semiconductor-exposed forecast component; the merchant-stage response is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment growth informs the semiconductor-exposed portion of the research-sector forecast, not an observed future sector share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment growth informs the semiconductor-exposed portion of the education forecast, not an observed future purchasing mix.
26. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
27. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
28. Higher Education Research and Development: Fiscal Year 2024, NSF 26-304
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024 U.S. academic capitalized-equipment expenditure of USD xx.xx provides a budget-scale check. Stage content, global expansion and period adjustments are assumptions; this does not directly verify either share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024 U.S. academic capitalized-equipment expenditure of USD xx.xx provides a budget-scale check. Stage content, global expansion and period adjustments are assumptions; this does not directly verify either share.

29. International Standard Industrial Classification of All Economic Activities (ISIC), Revision 4
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Research activities are distinguished from defense administration, supporting separate research-establishment attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Research activities are distinguished from defense administration, supporting separate research-establishment attribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military educational institutions are classified by educational activity rather than being automatically assigned to defense.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military educational institutions are classified by educational activity rather than being automatically assigned to defense.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military hospitals are assigned to healthcare, preventing public ownership from inflating government-sector allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military hospitals are assigned to healthcare, preventing public ownership from inflating government-sector allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense administration excludes separately classified research, education and hospital activities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense administration excludes separately classified research, education and hospital activities.

13.1. Manufacturing

Table 151. Global Motion Positioning Stages Market Size, by Manufacturing, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. UNSD Classification Detail - ISIC Rev.4, Section C: Manufacturing

   · Taxonomy evidence: The official manufacturing section encompasses physical or chemical transformation and assembly of manufactured products. Its listed divisions include electronic and optical products, electrical equipment, machinery, transportation equipment, chemicals, and pharmaceuticals. This supports sector definition only, not stage adoption or sales.
   ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/C))

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 sales versus EUR xx.xx in 2024 and reported automation weakness challenge uniform equipment-cycle pass-through.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 sales versus EUR xx.xx in 2024 and reported automation weakness challenge uniform equipment-cycle pass-through.

3. MKS Inc. Annual Report 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.

5. MISUMI Integrated Report 2025 - Business Portfolio

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.

6. Festo Sustainability Report 2025 - Festo at a Glance
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported global 2025 semiconductor-equipment sales of USD xx.xx anchor the semiconductor-related activity pool; merchant-stage content and Manufacturing attribution are modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported global 2025 semiconductor-equipment sales of USD xx.xx anchor the semiconductor-related activity pool; merchant-stage content and Manufacturing attribution are modeled.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 provide the observed industrial-activity benchmark, not stage shipments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 provide the observed industrial-activity benchmark, not stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2024 customer-industry counts constrain the manufacturing versus non-manufacturing industrial-pool bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2024 customer-industry counts constrain the manufacturing versus non-manufacturing industrial-pool bridge.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected 2026-2028 wafer-fab-equipment growth constrains the faster semiconductor-exposed forecast component; the merchant-stage response is assumed.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. ASR Family - Motorized XY Microscope Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current microscopy-stage packages and North American direct prices provide a limited price-scale check for the industrial pool's relative-value bridge, not observed sector prices.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Current microscopy-stage packages and North American direct prices provide a limited price-scale check for the industrial pool's relative-value bridge, not observed sector prices.
29. Automating Precision Assembly with the SmartStage XY
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The incorporated-stage case spans research through production quality control, challenging automatic Manufacturing attribution from equipment application alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The incorporated-stage case spans research through production quality control, challenging automatic Manufacturing attribution from equipment application alone.

13.2. Research & Technical Services

Table 154. Global Motion Positioning Stages Market Size, by Research & Technical Services, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Dimensional nano and sub nanometrology

   · Taxonomy evidence: The page documents an institution performing research and measurement activities involving positioning stages. This supports research-and-technical-service use, but not a particular establishment code, procurement amount, or sector share. ([npl.co.uk](https://www.npl.co.uk/research/dimensional/nano-and-sub-nanometrology))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NPL documents stage-metrology activity, supporting a dedicated research-and-technical-services use context without disclosing annual stage expenditure.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NPL documents stage-metrology activity, supporting a dedicated research-and-technical-services use context without disclosing annual stage expenditure.

2. Facility Equipment - MIRIAM/B22

   · Taxonomy evidence: The facility's own equipment inventory provides operator-side evidence of positioning-stage use in a dedicated scientific setting. It does not disclose a separate stage transaction or establish an official establishment classification. ([diamond.ac.uk](https://www.diamond.ac.uk/Instruments/Soft-Condensed-Matter/B22/status.html))

3. UNSD Classification Detail - ISIC Rev.4, Division 72: Scientific research and development

· Taxonomy evidence: The official scientific-R&D division distinguishes research and development activities as an economic activity, supporting classification of dedicated research establishments separately from their funding source or research subject. It does not establish stage purchasing. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

4. UNSD Classification Detail - ISIC Rev.4, Division 71: Architectural and engineering activities; technical testing and analysis

· Taxonomy evidence: The official classification identifies engineering services and technical testing and analysis as economic activities. This supports the technical-service portion of the combined sector without treating every internal industrial laboratory as an independent service establishment. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

5. Positioning 2026 Business Report - HOERBIGER

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported reductions in publicly funded projects qualify assumptions of rapid research-related demand growth; no stage-only sector split is disclosed.

6. MKS Inc. Annual Report 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

7. SIGMAKOKI Integrated Report 2025

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.

8. MISUMI Integrated Report 2025 - Business Portfolio

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.

9. Festo Sustainability Report 2025 - Festo at a Glance
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
10. Festo startet optimistisch ins Jubiläumsjahr
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
11. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
12. Aerotech Recruiting FAQs
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
13. Novanta Announces Agreement to Acquire Motion Solutions
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
14. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

15. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment total initializes the shared semiconductor pool; research-establishment routing is an explicit assumption, not a reported customer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment total initializes the shared semiconductor pool; research-establishment routing is an explicit assumption, not a reported customer share.
16. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; technical-service attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; technical-service attribution remains modeled.

17. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed technical-service routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed technical-service routing.
18. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
19. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
20. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
21. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
22. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment growth informs the semiconductor-exposed portion of the research-sector forecast, not an observed future sector share.

23. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
24. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
25. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

27. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
28. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
29. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
30. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
31. ASR Family - Motorized XY Microscope Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Microscopy-stage price ranges and alternative control packages inform a bounded non-manufacturing relative-price assumption, not research sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Microscopy-stage price ranges and alternative control packages inform a bounded non-manufacturing relative-price assumption, not research sales.
32. International Standard Industrial Classification of All Economic Activities (ISIC), Revision 4
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Research activities are distinguished from defense administration, supporting separate research-establishment attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Research activities are distinguished from defense administration, supporting separate research-establishment attribution.
33. Automating Precision Assembly with the SmartStage XY
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The case establishes a possible research destination but supplies no operator-level sales split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The case establishes a possible research destination but supplies no operator-level sales split.

13.3. Education

Table 157. Global Motion Positioning Stages Market Size, by Education, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. IIT Delhi - Multiaxes Precision CNC Stage for Femtosecond Laser Micromachining System
   · Taxonomy evidence: The specified installation and institutional-use destination establish an educational purchaser and intended operator; the tender does not prove completed delivery. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))
2. Global tender for a manual waveguide alignment rig
   · Taxonomy evidence: The procurement is issued by an educational institution for its own optics work, providing buyer-side evidence relevant to Education rather than inferring the buyer sector from a supplier's customer list. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2022/xx.xx/waveguide-allignment-rig.pdf))

3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported public-project weakness supports a restrained scientific-demand trajectory rather than an automatic institutional purchasing uplift.
4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The equipment total initializes the shared semiconductor pool; academic-facility routing is modeled rather than observed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment total initializes the shared semiconductor pool; academic-facility routing is modeled rather than observed.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; educational attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; educational attribution remains modeled.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed educational routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed educational routing.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment growth informs the semiconductor-exposed portion of the education forecast, not an observed future purchasing mix.

21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
29. ASR Family - Motorized XY Microscope Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Catalog packages provide a commercial price reference, not measured institutional preferences or academic purchasing volumes.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Catalog packages provide a commercial price reference, not measured institutional preferences or academic purchasing volumes.
30. Higher Education Research and Development: Fiscal Year 2024, NSF 26-304
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024 U.S. academic capitalized-equipment expenditure of USD xx.xx provides a budget-scale check. Stage content, global expansion and period adjustments are assumptions; this does not directly verify either share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024 U.S. academic capitalized-equipment expenditure of USD xx.xx provides a budget-scale check. Stage content, global expansion and period adjustments are assumptions; this does not directly verify either share.
31. International Standard Industrial Classification of All Economic Activities (ISIC), Revision 4
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military educational institutions are classified by educational activity rather than being automatically assigned to defense.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military educational institutions are classified by educational activity rather than being automatically assigned to defense.

32. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2023 institutional stage RFQ supports educational-operator attribution and procurement obligations, but not a completed purchase or global sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September 2023 institutional stage RFQ supports educational-operator attribution and procurement obligations, but not a completed purchase or global sales weight.
33. Automating Precision Assembly with the SmartStage XY
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment application does not identify institutional ownership; educational attribution requires a separate operator bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Equipment application does not identify institutional ownership; educational attribution requires a separate operator bridge.

13.4. Healthcare Services

Table 160. Global Motion Positioning Stages Market Size, by Healthcare Services, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. UNSD Classification Detail - ISIC Rev.4, Division 86: Human health activities

   · Taxonomy evidence: The official human-health division defines healthcare-service activities, including hospitals and medical practices. This supplies a sector boundary but does not establish eligible stage procurement, regulatory authorization of a stage, or current healthcare adoption. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/xx.xx))

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; healthcare attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; healthcare attribution remains modeled.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed healthcare routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed healthcare routing.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

28. ASR Family - Motorized XY Microscope Stages - Zaber
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Microscopy compatibility establishes an offering context, not provider adoption, clinical acceptance or healthcare-stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Microscopy compatibility establishes an offering context, not provider adoption, clinical acceptance or healthcare-stage revenue.

29. International Standard Industrial Classification of All Economic Activities (ISIC), Revision 4
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military hospitals are assigned to healthcare, preventing public ownership from inflating government-sector allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military hospitals are assigned to healthcare, preventing public ownership from inflating government-sector allocation.

13.5. Public Administration & Defense

Table 163. Global Motion Positioning Stages Market Size, by Public Administration & Defense, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. UNSD Classification Detail - ISIC Rev.4, Section O: Public administration and defence; compulsory social security

   · Taxonomy evidence: The section includes public administration, national defense, and public-order functions, while distinguishing teaching and healthcare activities. This establishes the proposed sector boundary, not a verified stage purchase by that sector. ([unstats.un.org](https://unstats.un.org/unsd/classifications/Econ/Detail/EN/xx.xx/O))

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; public-sector attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; public-sector attribution remains modeled.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed government routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed government routing.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. International Standard Industrial Classification of All Economic Activities (ISIC), Revision 4
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense administration excludes separately classified research, education and hospital activities.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defense administration excludes separately classified research, education and hospital activities.
29. Orders, Shipping & Warranties
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Zaber's military and law-enforcement application restriction is supplier-specific; it qualifies accessible supply without proving market-wide zero demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Zaber's military and law-enforcement application restriction is supplier-specific; it qualifies accessible supply without proving market-wide zero demand.

13.6. Utilities & Environmental Services

Table 166. Global Motion Positioning Stages Market Size, by Utilities & Environmental Services, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
2. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

3. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
4. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
5. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
6. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
7. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
8. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
9. Novanta Announces Agreement to Acquire Motion Solutions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
10. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

11. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
12. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; utility attribution remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The installation benchmark initializes the industrial pool; utility attribution remains modeled.

13. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed utility routing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-industry counts constrain the non-manufacturing portion before assumed utility routing.
14. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
15. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
16. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
17. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
18. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

19. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
20. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
21. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
22. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
25. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
26. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
27. AlgaPro TE300 AI Phytoplankton Monitoring
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The current water-monitoring instrument offering identifies an incorporated motorized stage. It supports the commercial attribution premise, not 2025 volume, attributable stage revenue or a standalone utility contract.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current water-monitoring instrument offering identifies an incorporated motorized stage. It supports the commercial attribution premise, not 2025 volume, attributable stage revenue or a standalone utility contract.

14. Motion Positioning Stages Market, by Purchasing Role

Purchasing Role distinguishes stage incorporation, integration services and ownership of the operating asset. ■■■ ■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■ ■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■ ■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ An OEM agreement should identify the accepted stage package and responsibility for subsequent changes; incorporation alone does not transfer accountability for the complete equipment to the stage manufacturer.

Independent System Integrators may influence selection without issuing the stage purchase order. KAP Consulting advertises positioning-stage integration, machine retrofits and assistance to equipment builders. ■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■ ■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■ ■ ■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■

■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■ ■ ■■■■■ ■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ Direct operation therefore does not imply self-integration or Direct Manufacturer Sales. The decisive questions are who signs the order, who accepts the installed package and who remains responsible for service-not whether an intermediary contributes engineering work.

Figure 22. Global Motion Positioning Stages Market Size, by Purchasing Role, 2025 (%)

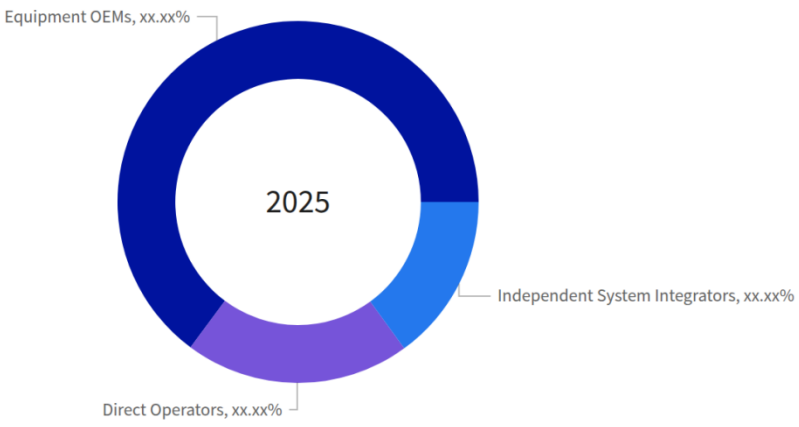

Figure 23. Global Motion Positioning Stages Market, by Purchasing Role, 2032 (USD Million)

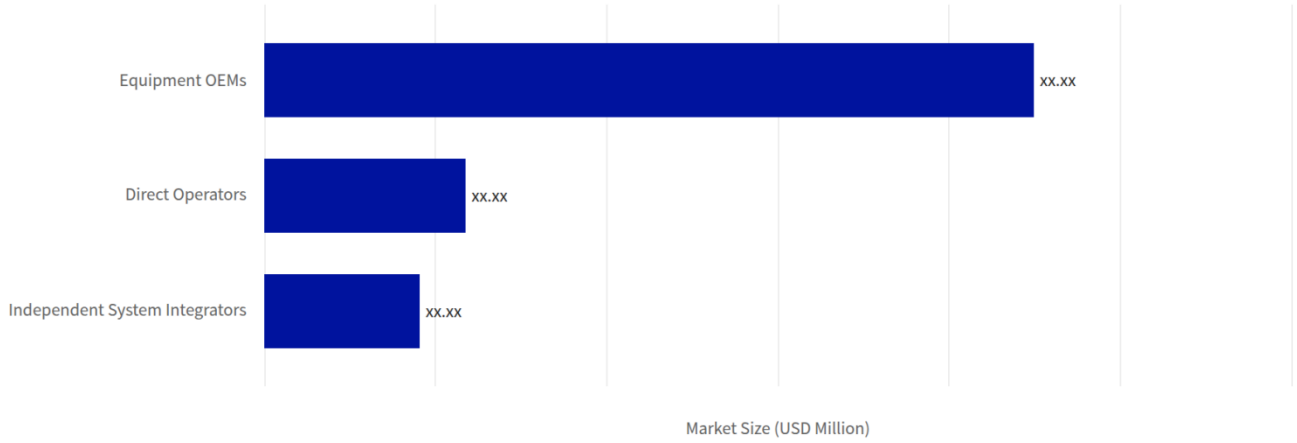

Table 169. Global Motion Positioning Stages Market, by Purchasing Role growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Direct Operators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Equipment OEMs	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Independent System Integrators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 170. Global Motion Positioning Stages Market Size, by Purchasing Role, 2017-2040 (USD Million)

Purchasing Role	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Operators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Equipment OEMs	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Independent System Integrators	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Automating Precision Assembly with the SmartStage XY

   · The case documents stage incorporation into Cellerate's larger module, supporting an Equipment OEM sourcing relationship rather than complete-equipment responsibility by the stage supplier. ([dovermotion.com](https://dovermotion.com/case-studies/automating-precision-assembly-with-the-smartstage-xy/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial case identifies a Dover stage incorporated into Cellerate's larger module, supporting OEM attribution without disclosing a purchasing amount.

2. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1
   - The RFQ permits manufacturer or authorized-distributor responses and purchases supplier installation for an institution-owned stage, separating operator role from channel and integration scope. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2023 institution-owned procurement includes supplier installation and post-installation payment, supporting Direct Operator classification regardless of manufacturer or distributor supply. It is a tender, not realized expenditure.
3. KAP Consulting - Automation and Controls Integration & Programming
   - KAP Consulting advertises positioning-stage integration, machine retrofits and assistance to equipment builders. Its service description does not establish complete-stage procurement on every project. ([kapconsultingllc.com](https://kapconsultingllc.com/automation.html))
4. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
5. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
6. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
7. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
8. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
9. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.

10. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
11. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
12. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
13. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
14. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 semiconductor-equipment sales of USD xx.xx anchor the semiconductor activity pool; assumed merchant-stage content and OEM routing are separate model inputs.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The semiconductor activity pool constrains the value weight receiving the assumed integrator fraction; equipment sales do not measure integrator stage purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same semiconductor activity anchor constrains the cohort receiving the assumed operator fraction, without equating equipment buyers with stage buyers.
15. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 anchor industrial activity; stage attachment, realization and purchasing-role fractions remain assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Installation activity constrains the industrial-stage pool allocated partly to integrator procurement, not integration-service revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Installation activity constrains the industrial pool allocated partly to own-use purchasing; it is not a direct stage-shipment count.

16. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
17. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
18. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
19. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
20. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
21. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
22. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-stage supply capacity for manufacturing equipment. It supports an incorporation-demand premise, not realized sales or purchasing-role percentages.

23. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

24. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 forecast projects wafer-fab-equipment growth of xx.xx%, xx.xx% and xx.xx% for 2026-2028, constraining the inherited damped growth assumptions for the OEM-exposed cohort.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Differentiated equipment-growth forecasts constrain relative cohort weights used to calculate the integrator share; no future purchasing-role split is directly reported.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment outlook constrains relative cohort growth and therefore the operator share under unchanged within-cohort routing assumptions.

25. Novanta Inc. - 2024 Annual Report
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Motion Solutions contributed USD xx.xx in 2024 revenue and is described as mainly serving life-science OEMs. This corroborates commercial OEM participation, not stage-only revenue or global role shares.

26. KAP Consulting - Motion Control Sales & Integration
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KAP identifies motion-control distribution and integration activities but discloses no complete-stage purchasing amount. This supports separating service influence from the modeled procurement numerator.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KAP identifies motion-control distribution and integration activities but discloses no complete-stage purchasing amount. This supports separating service influence from the modeled procurement numerator.

27. Locations and Contact - Zaber
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Territorial and selected-product distributor appointments establish channel boundaries, not whether the underlying purchaser is an equipment OEM.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Territorial and selected-product distributor appointments establish channel boundaries, not whether the underlying purchaser is an equipment OEM.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distributor appointment alone does not establish integrator procurement; pure resale is looked through without counting its markup.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distributor appointment alone does not establish integrator procurement; pure resale is looked through without counting its markup.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected-product and microscopy-support channels can serve own-use buyers without changing their purchasing-role classification; no channel sales weights are disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected-product and microscopy-support channels can serve own-use buyers without changing their purchasing-role classification; no channel sales weights are disclosed.

14.1. Equipment OEMs

Table 171. Global Motion Positioning Stages Market Size, by Equipment OEMs, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Berkeley Lights, Inc. - 2022 Annual Report

   · Taxonomy evidence: The 2022 annual report identifies motion stages among third-party-supplied components used to manufacture the company's systems. This is buyer-side evidence of equipment-manufacturer incorporation; it does not establish the ultimate operating sector of its customers or purchases in 2025.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/phenomexfkaberkeleylights_.pdf))

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 semiconductor-equipment sales of USD xx.xx anchor the semiconductor activity pool; assumed merchant-stage content and OEM routing are separate model inputs.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: More than xx.xx industrial-robot installations in 2025 anchor industrial activity; stage attachment, realization and purchasing-role fractions remain assumptions.

14. World Robotics 2025 Industrial Robots - Executive Summary
- Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
- Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
- Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.

15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
- Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.

17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
- Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.

18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.

19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-stage supply capacity for manufacturing equipment. It supports an incorporation-demand premise, not realized sales or purchasing-role percentages.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Territorial and selected-product distributor appointments establish channel boundaries, not whether the underlying purchaser is an equipment OEM.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Territorial and selected-product distributor appointments establish channel boundaries, not whether the underlying purchaser is an equipment OEM.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 forecast projects wafer-fab-equipment growth of xx.xx%, xx.xx% and xx.xx% for 2026-2028, constraining the inherited damped growth assumptions for the OEM-exposed cohort.
29. Automating Precision Assembly with the SmartStage XY
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial case identifies a Dover stage incorporated into Cellerate's larger module, supporting OEM attribution without disclosing a purchasing amount.
30. Novanta Inc. - 2024 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Motion Solutions contributed USD xx.xx in 2024 revenue and is described as mainly serving life-science OEMs. This corroborates commercial OEM participation, not stage-only revenue or global role shares.

14.2. Direct Operators

Table 174. Global Motion Positioning Stages Market Size, by Direct Operators, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IIT Delhi - Multiaxes Precision CNC Stage for Femtosecond Laser Micromachining System

   · Taxonomy evidence: The institution seeks a stage for integration into equipment at its own site. This demonstrates direct-operator procurement even though the supply contract includes integration responsibilities. OEMs and authorized dealers mentioned as bidders are suppliers, not the buyer role. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same semiconductor activity anchor constrains the cohort receiving the assumed operator fraction, without equating equipment buyers with stage buyers.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Installation activity constrains the industrial pool allocated partly to own-use purchasing; it is not a direct stage-shipment count.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Selected-product and microscopy-support channels can serve own-use buyers without changing their purchasing-role classification; no channel sales weights are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Selected-product and microscopy-support channels can serve own-use buyers without changing their purchasing-role classification; no channel sales weights are disclosed.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The equipment outlook constrains relative cohort growth and therefore the operator share under unchanged within-cohort routing assumptions.
29. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September 2023 institution-owned procurement includes supplier installation and post-installation payment, supporting Direct Operator classification regardless of manufacturer or distributor supply. It is a tender, not realized expenditure.

14.3. Independent System Integrators

Table 177. Global Motion Positioning Stages Market Size, by Independent System Integrators, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. KAP Consulting - Automation and Controls Integration & Programming

   · Taxonomy evidence: The business identifies itself as a system integrator and describes positioning-stage integration, customer-machine retrofits, and support for equipment builders. This supports a distinct integration role but does not demonstrate that it purchases complete stages or establish transaction volumes. ([kapconsultingllc.com](https://kapconsultingllc.com/automation.html))

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The semiconductor activity pool constrains the value weight receiving the assumed integrator fraction; equipment sales do not measure integrator stage purchases.

13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Installation activity constrains the industrial-stage pool allocated partly to integrator procurement, not integration-service revenue.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Distributor appointment alone does not establish integrator procurement; pure resale is looked through without counting its markup.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Distributor appointment alone does not establish integrator procurement; pure resale is looked through without counting its markup.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. Global Semiconductor Equipment Sales Forecast to Reach a Record $229 Billion in 2028, SEMI Reports
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Differentiated equipment-growth forecasts constrain relative cohort weights used to calculate the integrator share; no future purchasing-role split is directly reported.
29. KAP Consulting - Motion Control Sales & Integration
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KAP identifies motion-control distribution and integration activities but discloses no complete-stage purchasing amount. This supports separating service influence from the modeled procurement numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KAP identifies motion-control distribution and integration activities but discloses no complete-stage purchasing amount. This supports separating service influence from the modeled procurement numerator.

15. Motion Positioning Stages Market, by Control Integration

[illegible] This can consolidate the stage-control package, but an OEM already committed to another control platform may prefer to retain that responsibility. Included control should be compared with the buyer's accepted architecture, not treated as an automatic advantage or complete-equipment commitment.

External Control Electronics remains a distinct supply arrangement. Jefferson Lab's May 2025 equipment record distinguishes Thorlabs linear stages with integrated controllers from rotary stages requiring a separate benchtop controller. [illegible]

Stages Without Control Electronics preserve a different purchasing boundary. [illegible] A less integrated package preserves architectural choice but leaves more integration responsibility with the buyer.

Figure 24. Global Motion Positioning Stages Market Size, by Control Integration, 2025 (%)

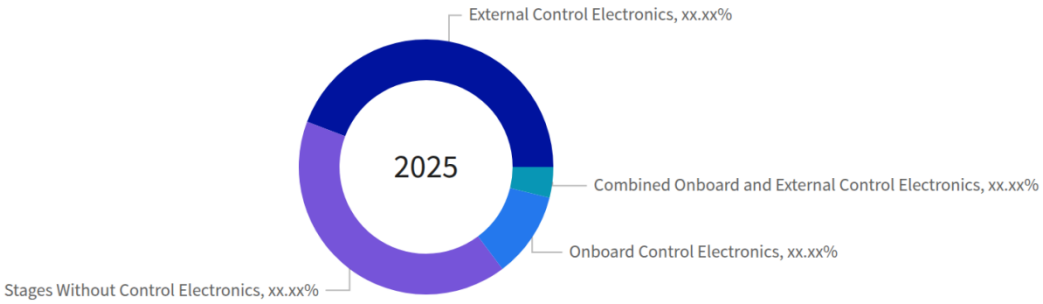

Figure 25. Global Motion Positioning Stages Market, by Control Integration, 2032 (USD Million)

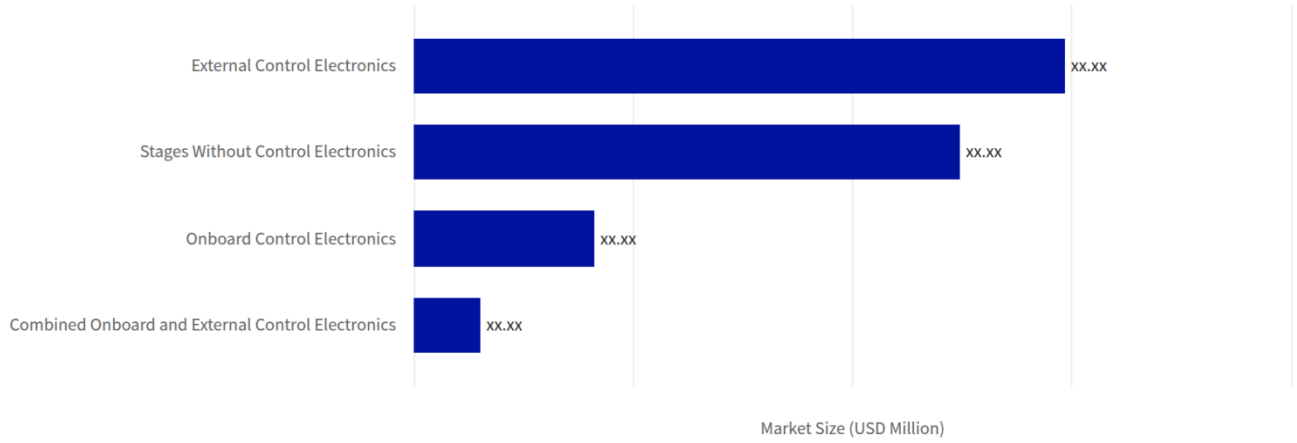

Table 180. Global Motion Positioning Stages Market, by Control Integration growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. ASR Family - OEM Components XY XYZ Motorized Microscope Stages - Zaber

   · The ASR family offers built-in-controller and motor-only models, supporting different control-supply boundaries while leaving selected bill-of-material exclusions to confirmation. ([zaber.com](https://www.zaber.com/products/families/ASR))

2. X-LDQ-AE Features - Zaber

   · X-LDQ-AE includes a built-in controller and linear encoder and provides computer interfaces. Computer connectivity alone does not establish a separately supplied external motion controller. ([zaber.com](https://www.zaber.com/products/linear-stages/X-LDQ-AE/features))

3. Motorized Stage Control for the Electron Ion Collider's Detection of Internally Reflected Cherenkov Light Detector's Quartz Bar Quality Assurance Data Acquisition Program

   · Jefferson Lab's May xx.xx 2025 record identifies integrated-controller Thorlabs linear stages and rotary stages requiring a separate benchtop controller within one installation. This establishes mixed equipment packaging, not a single combined-control stage sale. ([jlab.org](https://www.jlab.org/sites/default/files/dsg/notes/2025-xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 equipment record identifies four linear stages with integrated controllers. This independently tests package classification but is not a representative market-sales sample.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same installation identifies two rotary stages using one external benchtop controller, demonstrating shared external-control hardware without establishing its original invoicing basis.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexistence of onboard-controlled linear stages and externally controlled rotary stages does not establish dual-location control electronics within an individual stage package.

4. TIFR/PD/IC23-47/232777 - Notice Inviting Tender, March 19, 2024

   · Taxonomy evidence: The March xx.xx 2024 procurement separately identifies stages with built-in controllers, a joystick, a power supply, and accessories, supporting distinction between stage-control packaging and ancillary equipment. ([tifr.res.in](https://www.tifr.res.in/maincampus/viewNoticeFile.php?f=VTNVU21UaFBybGJuRDJwakJmdXdVUT09&s=WFdXaTkwL1ZDTGdxaHp6eHA1bkh1QT09))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2024 tender requests one rotation stage, two linear stages and one vertical stage with built-in or integrated controllers. These four requested stages provide a historical purchasing example, not realized global sales.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The tender separately lists a joystick and accessories; their presence does not automatically convert the onboard-controller stages into combined motion-control packages.

5. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1

   · Taxonomy evidence: The September xx.xx 2023 RFQ requires a compatible controller and power supply with the high-precision linear stage. It establishes control-inclusive supply, but does not explicitly establish controller housing location. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))

6. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

7. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
8. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
9. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
10. Festo Sustainability Report 2025 - Festo at a Glance
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
11. Festo startet optimistisch ins Jubiläumsjahr
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
12. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
13. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
14. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
15. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

16. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
17. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
18. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
19. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
20. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
21. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
22. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
23. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

24. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
25. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
26. ASR-E Motorized Closed-Loop Scanning Stages, XY, Built-in Motor Encoders - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ASR050B050B-E03T3A is listed at USD xx.xx without a built-in controller. This is the mechanically comparable reference for the package-price bridge, not observed 2025 global realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ASR050B050B-E03T3A is listed at USD xx.xx without a built-in controller. This is the mechanically comparable reference for the package-price bridge, not observed 2025 global realization.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The motor-only ASR-E offering establishes an alternative to onboard-control supply and supplies the denominator of the comparable package-price ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The motor-only ASR-E offering establishes an alternative to onboard-control supply and supplies the denominator of the comparable package-price ratio.
27. X-ASR-E XY Closed-Loop Scanning Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The X-ASR050B050B-SE03D12 has built-in controllers and a listed direct North American price of USD xx.xx. Compared with the same-size motor-only reference, it calibrates the assumed onboard-package value premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The X-ASR050B050B-SE03D12 has built-in controllers and a listed direct North American price of USD xx.xx. Compared with the same-size motor-only reference, it calibrates the assumed onboard-package value premium.
28. X-MCC Multi-axis Universal Motor Controller - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The X-MCC2 two-axis external controller is listed at USD xx.xx. Its price calibrates an external-control package increment; separately sold controller revenue is not added to the market.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The X-MCC2 two-axis external controller is listed at USD xx.xx. Its price calibrates an external-control package increment; separately sold controller revenue is not added to the market.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The external-controller price anchors the scale of the explicitly assumed shared supervisory-control allowance. The source does not establish a combined-package price or sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The external-controller price anchors the scale of the explicitly assumed shared supervisory-control allowance. The source does not establish a combined-package price or sales share.

29. Item # A-828.21x00, A-8xx Precision Motion Controllers for 4, 6 or 8 Axes - PI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI describes a separately housed rack controller and offers a complete positioning system when it is purchased together with a stage. This supports external-control package attribution, not the modeled purchase frequency.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI describes a separately housed rack controller and offers a complete positioning system when it is purchased together with a stage. This supports external-control package attribution, not the modeled purchase frequency.
30. Manual Positioning Stages - MISUMI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MISUMI identifies its manufactured manual-stage range. Dated March 2022 examples at USD xx.xx and USD xx.xx illustrate price heterogeneity and support value-equivalent rather than raw-unit weighting; they are not used as 2025 global ASPs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MISUMI identifies its manufactured manual-stage range. Dated March 2022 examples at USD xx.xx and USD xx.xx illustrate price heterogeneity and support value-equivalent rather than raw-unit weighting; they are not used as 2025 global ASPs.
31. RCP6 Next-generation ROBO Cylinder - IAI America
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IAI offers built-in-controller RCP6S slider and table versions and external gateway arrangements serving up to xx.xx axes. This supports a conditional distributed-control commercial architecture, not package-inclusion rates or category revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: IAI offers built-in-controller RCP6S slider and table versions and external gateway arrangements serving up to xx.xx axes. This supports a conditional distributed-control commercial architecture, not package-inclusion rates or category revenue.
32. Simplified Motion Series - Festo USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Festo's offering includes guided slide and axis products with integrated electronics. This supports commercial availability underlying the bounded onboard-adoption assumption, without measuring its growth or sales penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Festo's offering includes guided slide and axis products with integrated electronics. This supports commercial availability underlying the bounded onboard-adoption assumption, without measuring its growth or sales penetration.

15.1. External Control Electronics

Table 182. Global Motion Positioning Stages Market Size, by External Control Electronics, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. IIT Delhi - Multiaxes Precision CNC Stage for Femtosecond Laser Micromachining System

   · Taxonomy evidence: The same procurement requires a control panel separate from the CNC stages and places all automation components except motors, including servo drives and the controller, in that panel. This establishes expressly external control-electronics packaging for the requested stage system. ([home.iitd.ac.in](https://home.iitd.ac.in/public/storage/tenders_archives/4720_1722505635.pdf))

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. X-MCC Multi-axis Universal Motor Controller - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The X-MCC2 two-axis external controller is listed at USD xx.xx. Its price calibrates an external-control package increment; separately sold controller revenue is not added to the market.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The X-MCC2 two-axis external controller is listed at USD xx.xx. Its price calibrates an external-control package increment; separately sold controller revenue is not added to the market.
29. Item # A-828.21x00, A-8xx Precision Motion Controllers for 4, 6 or 8 Axes - PI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI describes a separately housed rack controller and offers a complete positioning system when it is purchased together with a stage. This supports external-control package attribution, not the modeled purchase frequency.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI describes a separately housed rack controller and offers a complete positioning system when it is purchased together with a stage. This supports external-control package attribution, not the modeled purchase frequency.
30. Motorized Stage Control for the Electron Ion Collider's Detection of Internally Reflected Cherenkov Light Detector's Quartz Bar Quality Assurance Data Acquisition Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same installation identifies two rotary stages using one external benchtop controller, demonstrating shared external-control hardware without establishing its original invoicing basis.

15.2. Stages Without Control Electronics

Table 185. Global Motion Positioning Stages Market Size, by Stages Without Control Electronics, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
2. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
3. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
4. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
5. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
6. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
7. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

8. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
9. Novanta Announces Agreement to Acquire Motion Solutions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
10. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
11. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
12. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

13. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
14. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
15. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
16. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
17. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
18. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
19. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

20. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
21. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
22. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

25. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
26. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
27. ASR-E Motorized Closed-Loop Scanning Stages, XY, Built-in Motor Encoders - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The ASR050B050B-E03T3A is listed at USD xx.xx without a built-in controller. This is the mechanically comparable reference for the package-price bridge, not observed 2025 global realization.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The ASR050B050B-E03T3A is listed at USD xx.xx without a built-in controller. This is the mechanically comparable reference for the package-price bridge, not observed 2025 global realization.
28. Manual Positioning Stages - MISUMI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MISUMI identifies its manufactured manual-stage range. Dated March 2022 examples at USD xx.xx and USD xx.xx illustrate price heterogeneity and support value-equivalent rather than raw-unit weighting; they are not used as 2025 global ASPs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MISUMI identifies its manufactured manual-stage range. Dated March 2022 examples at USD xx.xx and USD xx.xx illustrate price heterogeneity and support value-equivalent rather than raw-unit weighting; they are not used as 2025 global ASPs.

15.3. Onboard Control Electronics

Table 188. Global Motion Positioning Stages Market Size, by Onboard Control Electronics, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. TIFR/PD/IC23-47/232777 - Notice Inviting Tender, March 19, 2024

   · Taxonomy evidence: The buyer explicitly requests motorized rotation and linear stages with built-in controllers and a vertical stage with an integrated controller. ([tifr.res.in](https://www.tifr.res.in/maincampus/viewNoticeFile.php?f=VTNVU21UaFBybGJuRDJwakJmdXdVUT09&s=WFdXaTkwL1ZDTGdxaHp6eHA1bkh1QT09))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The March xx.xx 2024 tender requests one rotation stage, two linear stages and one vertical stage with built-in or integrated controllers. These four requested stages provide a historical purchasing example, not realized global sales.

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

3. MKS Inc. Annual Report 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.

5. MISUMI Integrated Report 2025 - Business Portfolio

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.

6. Festo Sustainability Report 2025 - Festo at a Glance

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.

7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. ASR-E Motorized Closed-Loop Scanning Stages, XY, Built-in Motor Encoders - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The motor-only ASR-E offering establishes an alternative to onboard-control supply and supplies the denominator of the comparable package-price ratio.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The motor-only ASR-E offering establishes an alternative to onboard-control supply and supplies the denominator of the comparable package-price ratio.

29. X-ASR-E XY Closed-Loop Scanning Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The X-ASR050B050B-SE03D12 has built-in controllers and a listed direct North American price of USD xx.xx. Compared with the same-size motor-only reference, it calibrates the assumed onboard-package value premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The X-ASR050B050B-SE03D12 has built-in controllers and a listed direct North American price of USD xx.xx. Compared with the same-size motor-only reference, it calibrates the assumed onboard-package value premium.
30. Motorized Stage Control for the Electron Ion Collider's Detection of Internally Reflected Cherenkov Light Detector's Quartz Bar Quality Assurance Data Acquisition Program
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The May xx.xx 2025 equipment record identifies four linear stages with integrated controllers. This independently tests package classification but is not a representative market-sales sample.
31. Simplified Motion Series - Festo USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Festo's offering includes guided slide and axis products with integrated electronics. This supports commercial availability underlying the bounded onboard-adoption assumption, without measuring its growth or sales penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Festo's offering includes guided slide and axis products with integrated electronics. This supports commercial availability underlying the bounded onboard-adoption assumption, without measuring its growth or sales penetration.

15.4. Combined Onboard and External Control Electronics

Table 191. Global Motion Positioning Stages Market Size, by Combined Onboard and External Control Electronics, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 192. Global Motion Positioning Stages Market Size, by Combined Onboard and External Control Electronics, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
2. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
3. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
4. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
5. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
6. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
7. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

8. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
9. Novanta Announces Agreement to Acquire Motion Solutions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
10. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
11. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
12. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

13. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
14. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
15. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
16. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
17. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
18. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
19. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

20. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
21. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
22. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

25. Locations and Contact - Zaber

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.

26. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

27. X-MCC Multi-axis Universal Motor Controller - Zaber

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The external-controller price anchors the scale of the explicitly assumed shared supervisory-control allowance. The source does not establish a combined-package price or sales share.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The external-controller price anchors the scale of the explicitly assumed shared supervisory-control allowance. The source does not establish a combined-package price or sales share.

28. Motorized Stage Control for the Electron Ion Collider's Detection of Internally Reflected Cherenkov Light Detector's Quartz Bar Quality Assurance Data Acquisition Program

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Coexistence of onboard-controlled linear stages and externally controlled rotary stages does not establish dual-location control electronics within an individual stage package.

29. RCP6 Next-generation ROBO Cylinder - IAI America

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: IAI offers built-in-controller RCP6S slider and table versions and external gateway arrangements serving up to xx.xx axes. This supports a conditional distributed-control commercial architecture, not package-inclusion rates or category revenue.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: IAI offers built-in-controller RCP6S slider and table versions and external gateway arrangements serving up to xx.xx axes. This supports a conditional distributed-control commercial architecture, not package-inclusion rates or category revenue.

30. TIFR/PD/IC23-47/232777 - Notice Inviting Tender, March 19, 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The tender separately lists a joystick and accessories; their presence does not automatically convert the onboard-controller stages into combined motion-control packages.

16. Motion Positioning Stages Market, by Customization Level

Customization Level changes the engineering work being purchased rather than establishing an automatic quality hierarchy. Aerotech's buying guide distinguishes Standard Catalog Stages from Configured-to-Order Stages assembled from predefined options, illustrating the latter with PlanarDL. ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪

The object being customized matters. Zaber's published gimbal example combines RST rotary stages, an external controller and custom-sized brackets. ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪

Selection reversibility also differs. Zaber provides a standard-product satisfaction guarantee but treats guarantees for nonstandard custom products case by case. ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪

Figure 26. Global Motion Positioning Stages Market Size, by Customization Level, 2025 (%)

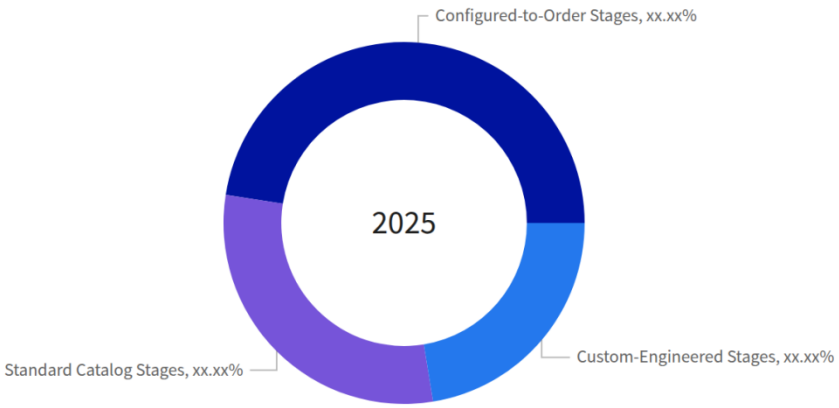

Figure 27. Global Motion Positioning Stages Market, by Customization Level, 2032 (USD Million)

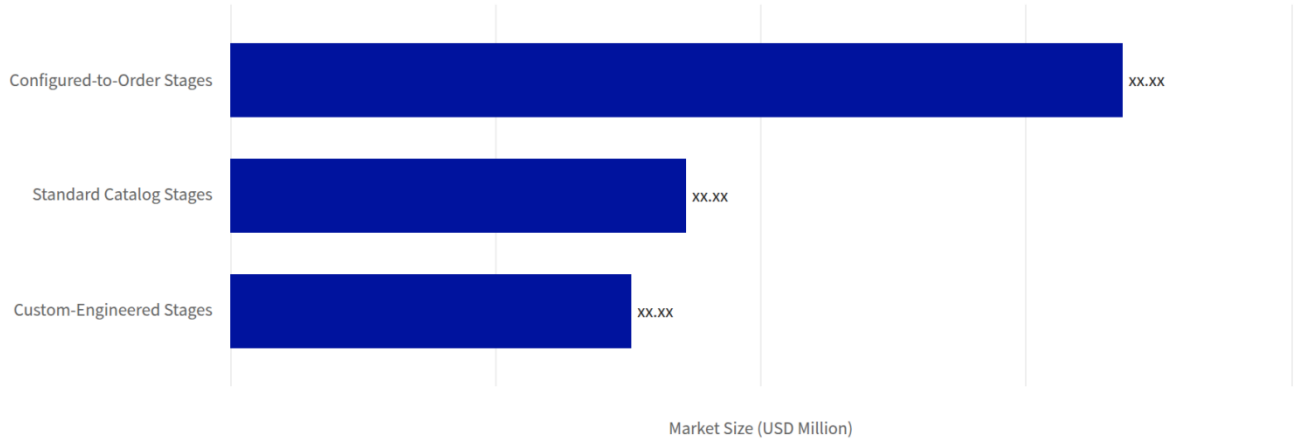

Table 194. Global Motion Positioning Stages Market, by Customization Level growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Configured-to-Order Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Custom-Engineered Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standard Catalog Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 195. Global Motion Positioning Stages Market Size, by Customization Level, 2017-2040 (USD Million)

Customization Level	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Orders, Shipping & Warranties

   · Zaber distinguishes its standard-product satisfaction guarantee from case-specific guarantees for nonstandard custom products. ([zaber.com](https://www.zaber.com/ordering))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional xx.xx-day standard-product guarantee supports a commercial reversibility distinction, not a measured catalog adoption rate. ([zaber.com](https://www.zaber.com/ordering))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published payment-term adjustments are financing charges, not evidence of a configured-stage price premium or annual inflation rate.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nonstandard custom guarantees are case-specific; the model retains this uncertainty without inventing a quantified conversion penalty.

2. Standard and Custom Motion Solutions: 7 Factors to Consider During the Buying Process

   · The Aerotech-authored guide distinguishes catalog, predefined configured-to-order and custom-engineered supply, illustrating PlanarDL and a custom goniometer. It also distinguishes stage-level work from retained system integration. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

   · Taxonomy evidence: The manufacturer-authored paper distinguishes standard off-the-shelf, standard configured-to-order, and custom-engineered motion solutions. This supports commercial terminology, not a verified global allocation. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer-authored guide identifies predesigned, documented off-the-shelf stages as a distinct purchasing format, not a measured sales fraction. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer-authored guide identifies predesigned, documented off-the-shelf stages as a distinct purchasing format, not a measured sales fraction. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Predefined configured-to-order supply is distinguished from new engineering, establishing the modeled invoice-scope boundary.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Predefined configured-to-order supply is distinguished from new engineering, establishing the modeled invoice-scope boundary.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Custom-engineered stage components are distinguished from complete automation systems; only attributable stage assembly value enters this allocation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Custom-engineered stage components are distinguished from complete automation systems; only attributable stage assembly value enters this allocation.

3. Zaber Technologies Gimbal

   · Zaber describes a custom gimbal comprising RST rotary stages, an external controller and custom-sized brackets, supporting distinction between stage engineering and surrounding assembly customization. ([zaber.com](https://www.zaber.com/products/rotary-stages/X-RST-AE/multi-media/zaber-technologies-gimbal))

4. ISO 230-2:2014 - Test Code for Machine Tools - Part 2: Determination of Accuracy and Repeatability of Positioning of Numerically Controlled Axes
   - Taxonomy evidence: The official record identifies ISO xx.xx-xx.xx:2014 as confirmed in 2025 and describes its scope as positioning accuracy and repeatability evaluation for numerically controlled machine-tool axes. Analytical implication: these measurement concepts do not classify engineering customization and do not, by themselves, establish commercial price or quality tiers. ([iso.org](https://www.iso.org/standard/xx.xx.html))
   - Taxonomy evidence: The standard's stated scope concerns accuracy and repeatability evaluation of numerically controlled machine-tool axes. Analytical implication: those measurements are distinct from customization level and do not establish the omitted market-wide commercial performance tiers. ([iso.org](https://www.iso.org/standard/xx.xx.html))
5. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 corporate sales constrain the inherited specialty-supplier value pool, not a disclosed catalog-stage share. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 corporate sales constrain the inherited specialty-supplier value pool, not a disclosed catalog-stage share. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024-2025 corporate sales comparison provides a restraint on assuming uniform rapid conversion of equipment demand into configured-stage revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024-2025 corporate sales comparison provides a restraint on assuming uniform rapid conversion of equipment demand into configured-stage revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sales increased from EUR xx.xx to EUR xx.xx; this counterforce tempers the modeled custom-stage growth assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sales increased from EUR xx.xx to EUR xx.xx; this counterforce tempers the modeled custom-stage growth assumption.
6. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

7. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The FY2025 report's xx.xx% standalone-company special-product share informs, but does not directly establish, the stage-specific catalog complement. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The FY2025 report's xx.xx% standalone-company special-product share informs, but does not directly establish, the stage-specific catalog complement. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The special-product disclosure is a calibration input requiring an assumed split between predefined configuration and new engineering.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The special-product disclosure is a calibration input requiring an assumed split between predefined configuration and new engineering.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported special-product ratio is broader than stage-only custom engineering; the modeled bridge explicitly avoids equating them.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported special-product ratio is broader than stage-only custom engineering; the modeled bridge explicitly avoids equating them.
8. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024 FA manufacturing sales of JPY xx.xx constrain an inherited supplier pool; VONA distribution is separately identified and excluded from additive resale value. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024 FA manufacturing sales of JPY xx.xx constrain an inherited supplier pool; VONA distribution is separately identified and excluded from additive resale value. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports the value-chain boundary of the configurable industrial supplier pool, not a customization percentage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports the value-chain boundary of the configurable industrial supplier pool, not a customization percentage.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The financial pool requires inherited stage attribution before customization allocation; total FA sales are not treated as custom-stage revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The financial pool requires inherited stage attribution before customization allocation; total FA sales are not treated as custom-stage revenue.

9. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
10. Festo startet optimistisch ins Jubiläumsjahr
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
11. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
12. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
13. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
14. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
15. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
16. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

17. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
18. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
19. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
20. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
21. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
22. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.

23. MISUMI Expands Automated Positioning Stage Production for Data Centers

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated automated-stage expansion informs relative demand sensitivity; it does not establish a forecast stock-catalog sales share. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately JPY xx.xx planned investment and doubled supply capacity support a conditional supply-response premise, not realized configured-stage revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announcement leaves customization mix undisclosed; the forecast does not assume all expanded capacity produces newly engineered stages.

24. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
- Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

25. PlanarDL Two Axis, Mechanical Bearing, Direct-Drive Linear Stage

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Nine predefined PlanarDL models and documented ordering options support configured-stage classification, not catalog-count sales weighting. ([aerotech.com](https://www.aerotech.com/product/planardl-two-axis-mechanical-bearing-direct-drive-linear-stage/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine predefined PlanarDL models and documented ordering options support configured-stage classification, not catalog-count sales weighting. ([aerotech.com](https://www.aerotech.com/product/planardl-two-axis-mechanical-bearing-direct-drive-linear-stage/))

26. Meeting the Demands of the Most Critical OEMs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI describes standard offerings as a starting route for OEM purchasing; OEM status alone does not imply a custom stage. ([pi-usa.us](https://www.pi-usa.us/en/customers/meeting-the-demands-of-oems))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI describes standard offerings as a starting route for OEM purchasing; OEM status alone does not imply a custom stage. ([pi-usa.us](https://www.pi-usa.us/en/customers/meeting-the-demands-of-oems))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM portfolio supports distinguishing existing-product purchasing from requirements needing additional engineering, without disclosing revenue proportions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM portfolio supports distinguishing existing-product purchasing from requirements needing additional engineering, without disclosing revenue proportions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI publicly offers fully customized OEM positioning products, supporting the specialty-cohort exposure assumption but not its numerical incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI publicly offers fully customized OEM positioning products, supporting the specialty-cohort exposure assumption but not its numerical incidence.
27. Zaber Technologies Gimbal - March 19, 2022
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The example combines two named RST rotary stages with surrounding custom parts, supporting stage-level rather than system-label attribution. ([zaber.com](https://www.zaber.com/products/rotary-stages/X-RST-AE/multi-media/zaber-technologies-gimbal))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The example combines two named RST rotary stages with surrounding custom parts, supporting stage-level rather than system-label attribution. ([zaber.com](https://www.zaber.com/products/rotary-stages/X-RST-AE/multi-media/zaber-technologies-gimbal))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alternative published packages do not by themselves demonstrate newly engineered stages; configuration remains distinct from surrounding integration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alternative published packages do not by themselves demonstrate newly engineered stages; configuration remains distinct from surrounding integration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Custom-sized brackets and a custom system label do not establish that every incorporated stage belongs to the custom-engineered numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Custom-sized brackets and a custom system label do not establish that every incorporated stage belongs to the custom-engineered numerator.

16.1. Configured-to-Order Stages

Table 196. Global Motion Positioning Stages Market Size, by Configured-to-Order Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Standard and Custom Motion Solutions: 7 Factors to Consider During the Buying Process

   · Taxonomy evidence: The paper identifies the manufacturer's PlanarDL XY stage as a standard configured-to-order product. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Predefined configured-to-order supply is distinguished from new engineering, establishing the modeled invoice-scope boundary.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Predefined configured-to-order supply is distinguished from new engineering, establishing the modeled invoice-scope boundary.

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024-2025 corporate sales comparison provides a restraint on assuming uniform rapid conversion of equipment demand into configured-stage revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024-2025 corporate sales comparison provides a restraint on assuming uniform rapid conversion of equipment demand into configured-stage revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The special-product disclosure is a calibration input requiring an assumed split between predefined configuration and new engineering.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The special-product disclosure is a calibration input requiring an assumed split between predefined configuration and new engineering.

5. MISUMI Integrated Report 2025 - Business Portfolio
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports the value-chain boundary of the configurable industrial supplier pool, not a customization percentage.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports the value-chain boundary of the configurable industrial supplier pool, not a customization percentage.
6. Festo Sustainability Report 2025 - Festo at a Glance
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately JPY xx.xx planned investment and doubled supply capacity support a conditional supply-response premise, not realized configured-stage revenue.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

28. Orders, Shipping & Warranties
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published payment-term adjustments are financing charges, not evidence of a configured-stage price premium or annual inflation rate.
29. PlanarDL Two Axis, Mechanical Bearing, Direct-Drive Linear Stage
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Nine predefined PlanarDL models and documented ordering options support configured-stage classification, not catalog-count sales weighting. ([aerotech.com](https://www.aerotech.com/product/planardl-two-axis-mechanical-bearing-direct-drive-linear-stage/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nine predefined PlanarDL models and documented ordering options support configured-stage classification, not catalog-count sales weighting. ([aerotech.com](https://www.aerotech.com/product/planardl-two-axis-mechanical-bearing-direct-drive-linear-stage/))
30. Meeting the Demands of the Most Critical OEMs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OEM portfolio supports distinguishing existing-product purchasing from requirements needing additional engineering, without disclosing revenue proportions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OEM portfolio supports distinguishing existing-product purchasing from requirements needing additional engineering, without disclosing revenue proportions.
31. Zaber Technologies Gimbal - March 19, 2022
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alternative published packages do not by themselves demonstrate newly engineered stages; configuration remains distinct from surrounding integration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alternative published packages do not by themselves demonstrate newly engineered stages; configuration remains distinct from surrounding integration.

16.2. Standard Catalog Stages

Table 199. Global Motion Positioning Stages Market Size, by Standard Catalog Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. TIFR/PD/IC23-47/232777 - Notice Inviting Tender, March 19, 2024

   · Taxonomy evidence: The procurement requests named stage model numbers, providing buyer-side evidence of purchasing predefined commercial stage offerings rather than commissioning an unspecified new design. ([tifr.res.in](https://www.tifr.res.in/maincampus/viewNoticeFile.php?f=VTNVU21UaFBybGJuRDJwakJmdXdVUT09&s=WFdXaTkwL1ZDTGdxaHp6eHA1bkh1QT09))

2. Standard and Custom Motion Solutions: 7 Factors to Consider During the Buying Process

· Taxonomy evidence: Preconfigured positioning stages illustrate the author's standard off-the-shelf offering format. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer-authored guide identifies predesigned, documented off-the-shelf stages as a distinct purchasing format, not a measured sales fraction. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer-authored guide identifies predesigned, documented off-the-shelf stages as a distinct purchasing format, not a measured sales fraction. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

3. Positioning 2026 Business Report - HOERBIGER

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 corporate sales constrain the inherited specialty-supplier value pool, not a disclosed catalog-stage share. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 corporate sales constrain the inherited specialty-supplier value pool, not a disclosed catalog-stage share. ([hoerbiger.com](https://www.hoerbiger.com/en/newsroom/yearbook/positioning-2026-business-report.html))

4. MKS Inc. Annual Report 2025

· Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.

· Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The FY2025 report's xx.xx% standalone-company special-product share informs, but does not directly establish, the stage-specific catalog complement. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The FY2025 report's xx.xx% standalone-company special-product share informs, but does not directly establish, the stage-specific catalog complement. ([sigma-koki.com](https://www.sigma-koki.com/asset/data/Integrated-Report-2025.pdf))
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2024 FA manufacturing sales of JPY xx.xx constrain an inherited supplier pool; VONA distribution is separately identified and excluded from additive resale value. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2024 FA manufacturing sales of JPY xx.xx constrain an inherited supplier pool; VONA distribution is separately identified and excluded from additive resale value. ([misumi.co.jp](https://www.misumi.co.jp/sites/default/files/2026-xx.xx/MISUMI_Integrated_Report_2025_English_16-xx.xx.pdf))
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated automated-stage expansion informs relative demand sensitivity; it does not establish a forecast stock-catalog sales share. ([misumi.co.jp](https://www.misumi.co.jp/english/news/press_260129_2))

22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
29. Orders, Shipping & Warranties
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The conditional xx.xx-day standard-product guarantee supports a commercial reversibility distinction, not a measured catalog adoption rate. ([zaber.com](https://www.zaber.com/ordering))
30. Meeting the Demands of the Most Critical OEMs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI describes standard offerings as a starting route for OEM purchasing; OEM status alone does not imply a custom stage. ([pi-usa.us](https://www.pi-usa.us/en/customers/meeting-the-demands-of-oems))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI describes standard offerings as a starting route for OEM purchasing; OEM status alone does not imply a custom stage. ([pi-usa.us](https://www.pi-usa.us/en/customers/meeting-the-demands-of-oems))
31. Zaber Technologies Gimbal - March 19, 2022
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The example combines two named RST rotary stages with surrounding custom parts, supporting stage-level rather than system-label attribution. ([zaber.com](https://www.zaber.com/products/rotary-stages/X-RST-AE/multi-media/zaber-technologies-gimbal))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The example combines two named RST rotary stages with surrounding custom parts, supporting stage-level rather than system-label attribution. ([zaber.com](https://www.zaber.com/products/rotary-stages/X-RST-AE/multi-media/zaber-technologies-gimbal))

16.3. Custom-Engineered Stages

Table 202. Global Motion Positioning Stages Market Size, by Custom-Engineered Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 203. Global Motion Positioning Stages Market Size, by Custom-Engineered Stages, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 204. Global Motion Positioning Stages Market Size, by Custom-Engineered Stages, by Country, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Mexico	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Spain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Standard and Custom Motion Solutions: 7 Factors to Consider During the Buying Process

   · Taxonomy evidence: A custom-engineered goniometer illustrates a stage designed to meet unique customer requirements. ([cdn.base.parameter1.com](https://cdn.base.parameter1.com/files/base/indm/multi/document/2022/xx.xx/White_Paper_Standard_and_Custom_Motion_Solutions_7_Factors_to_Consider.61fd5f4357353.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Custom-engineered stage components are distinguished from complete automation systems; only attributable stage assembly value enters this allocation.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Custom-engineered stage components are distinguished from complete automation systems; only attributable stage assembly value enters this allocation.

2. Positioning 2026 Business Report - HOERBIGER

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Sales increased from EUR xx.xx to EUR xx.xx; this counterforce tempers the modeled custom-stage growth assumption.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Sales increased from EUR xx.xx to EUR xx.xx; this counterforce tempers the modeled custom-stage growth assumption.

3. MKS Inc. Annual Report 2025

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.

   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported special-product ratio is broader than stage-only custom engineering; the modeled bridge explicitly avoids equating them.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported special-product ratio is broader than stage-only custom engineering; the modeled bridge explicitly avoids equating them.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The financial pool requires inherited stage attribution before customization allocation; total FA sales are not treated as custom-stage revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The financial pool requires inherited stage attribution before customization allocation; total FA sales are not treated as custom-stage revenue.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.

10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announcement leaves customization mix undisclosed; the forecast does not assume all expanded capacity produces newly engineered stages.

21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. Orders, Shipping & Warranties
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Nonstandard custom guarantees are case-specific; the model retains this uncertainty without inventing a quantified conversion penalty.
29. Meeting the Demands of the Most Critical OEMs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI publicly offers fully customized OEM positioning products, supporting the specialty-cohort exposure assumption but not its numerical incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI publicly offers fully customized OEM positioning products, supporting the specialty-cohort exposure assumption but not its numerical incidence.
30. Zaber Technologies Gimbal - March 19, 2022
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Custom-sized brackets and a custom system label do not establish that every incorporated stage belongs to the custom-engineered numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Custom-sized brackets and a custom system label do not establish that every incorporated stage belongs to the custom-engineered numerator.

17. Motion Positioning Stages Market, by Sales Channel

Sales Channel choice is constrained by appointment and portfolio rights, not merely by the presence of a local seller. Zaber identifies Laser 2000 (UK) Ltd. as exclusive for Ireland and the United Kingdom, while Edmund Optics and Digi-Key have selected-product coverage in specified territories. ■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■ ■■■■■■ ■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■■■■

Buyer eligibility can override either channel route. IISc's June 2025 cryogenic-positioning RFQ admitted Indian manufacturers or their authorized Indian distributors subject to its domestic-supplier conditions. ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■ ■ ■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■ ■ ■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■

Where both routes are eligible, the choice should follow the required portfolio and committed support responsibilities. A selected-product reseller can be unsuitable when the order depends on an unlisted configuration, while an authorized local channel may provide relevant sales and support access. ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■■■

Figure 28. Global Motion Positioning Stages Market Size, by Sales Channel, 2025 (%)

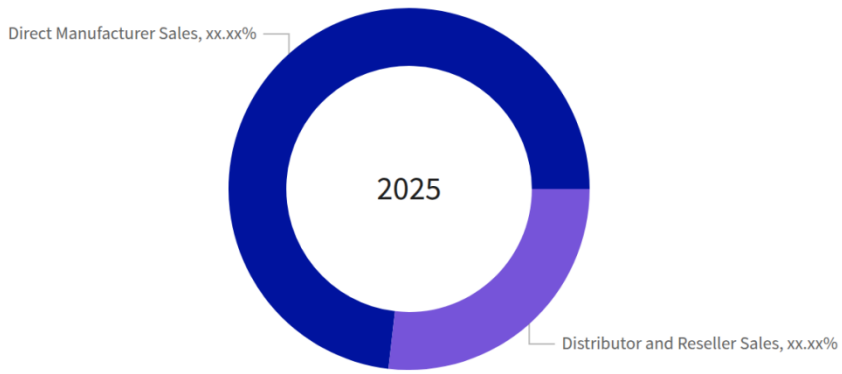

Figure 29. Global Motion Positioning Stages Market, by Sales Channel, 2032 (USD Million)

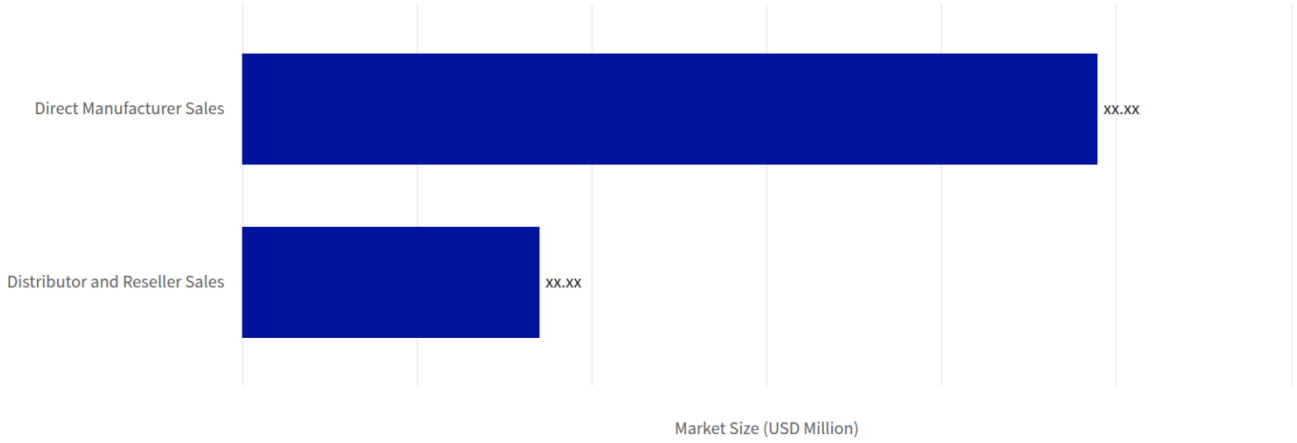

Table 205. Global Motion Positioning Stages Market, by Sales Channel growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Direct Manufacturer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Distributor and Reseller Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 206. Global Motion Positioning Stages Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Manufacturer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Distributor and Reseller Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Locations and Contact - Zaber

· Zaber identifies territorial exclusivity, selected-product distributors and regions offering direct-support alternatives. Appointment and portfolio statements do not establish transaction-specific warranty equivalence. ([zaber.com](https://www.zaber.com/contact/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated contact page distinguishes manufacturer offices from exclusive and non-exclusive distributors. It constrains direct-access assumptions; historical continuity into 2025 remains unverified.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated contact page distinguishes manufacturer offices from exclusive and non-exclusive distributors. It constrains direct-access assumptions; historical continuity into 2025 remains unverified.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusive territorial appointments and selected-product coverage establish bounded reseller access, not channel revenue. The model retains indirect activity without deriving weights from distributor counts.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusive territorial appointments and selected-product coverage establish bounded reseller access, not channel revenue. The model retains indirect activity without deriving weights from distributor counts.

2. Request for Quote for the Supply of Closed-Loop Cryogenic Nanopositioning System

· IISc's June xx.xx 2025 RFQ permits Indian manufacturers or authorized Indian distributors subject to domestic-supplier conditions, and does not treat local services as sufficient local value addition for imported products. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

· Taxonomy evidence: The procurement explicitly permits quotations from an Indian original equipment manufacturer or its authorized Indian distributor. This provides dated 2025 demand-side corroboration of manufacturer and distributor selling roles, without establishing an awarded channel or title-taking terms. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June 2025 RFQ permits eligible Indian manufacturers and imposes quantitative domestic-content thresholds. It establishes purchasing constraints, not direct-sales value or an awarded transaction.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2025 RFQ permits eligible Indian manufacturers and imposes quantitative domestic-content thresholds. It establishes purchasing constraints, not direct-sales value or an awarded transaction.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized Indian distributors are eligible subject to the same origin conditions; local services do not qualify imported products. This constrains assumptions that a reseller automatically unlocks restricted demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized Indian distributors are eligible subject to the same origin conditions; local services do not qualify imported products. This constrains assumptions that a reseller automatically unlocks restricted demand.

3. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1

· Taxonomy evidence: The stage RFQ expressly accepts responses from the original equipment manufacturer or its authorized Indian distributor, independently establishing the two contractual selling roles used in this axis.
([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))

4. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 sales versus EUR xx.xx in 2024 and reported demand weaknesses constrain assumptions of uniform precision-supplier expansion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Weak automation and publicly funded demand provide counterevidence to uniformly strong cohort growth, affecting forecast relative weights and the complementary distributor share.
5. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
6. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
7. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies JPY xx.xx FA manufacturing revenue and distinguishes manufacturing from VONA distribution. This supports the manufacturing-only weight used in the joint channel model.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies JPY xx.xx FA manufacturing revenue and distinguishes manufacturing from VONA distribution. This supports the manufacturing-only weight used in the joint channel model.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports excluding third-party resale turnover from the market denominator while attributing independently manufactured stages to their actual selling route.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports excluding third-party resale turnover from the market denominator while attributing independently manufactured stages to their actual selling route.
8. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.

9. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
10. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
11. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
12. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
13. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
14. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
15. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
16. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.

17. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
18. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
19. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
20. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
21. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
22. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2026 announcement identifies approximately JPY xx.xx investment and doubled automated-stage supply capacity. It supports a conditional precision-demand exposure, not realized sales or direct-channel penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same manufacturer-stage expansion informs relative cohort growth and therefore the complementary distributor allocation. Capacity is not added as revenue or assumed to determine the selling route.
23. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

24. MKS Inc. Annual Report 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 report discloses USD xx.xx Photonics product revenue and direct, distributor and representative selling routes. These constrain a manufacturer-value cohort carried through both anchors; no stage-specific channel percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 report discloses USD xx.xx Photonics product revenue and direct, distributor and representative selling routes. These constrain a manufacturer-value cohort carried through both anchors; no stage-specific channel percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors are an expressly identified selling route. The financial pool supports inherited cohort weighting, not the modeled distributor percentage or a future observed split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors are an expressly identified selling route. The financial pool supports inherited cohort weighting, not the modeled distributor percentage or a future observed split.
25. Parker Hannifin Fiscal 2024 Second Quarter Earnings Release and Presentation - February 1, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately half of diversified industrial revenue was through distribution, with regional differences. This is an adjacent-market calibration for the assumed industrial direct rate, not a positioning-stage observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately half of diversified industrial revenue was through distribution, with regional differences. This is an adjacent-market calibration for the assumed industrial direct rate, not a positioning-stage observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports approximately xx.xx% North American and xx.xx% international distribution penetration and an international expansion objective. Partial realization of that historical objective is an explicit forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports approximately xx.xx% North American and xx.xx% international distribution penetration and an international expansion objective. Partial realization of that historical objective is an explicit forecast assumption.
26. Parker-Hannifin Corporation Form 10-K - Fiscal Year Ended June 30, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 international industrial revenue of USD xx.xx and total industrial revenue of USD xx.xx provide the regional exposure ratio used to attenuate the modeled distribution-expansion effect.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The industrial international-to-total revenue ratio calibrates the forecast channel-transfer scenario; it is not a stage revenue or future channel-share disclosure.
27. Laurent Melin is PI Group's New Head of Global Sales - December 19, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2023 announcement describes owned sales/service subsidiaries and an OEM-business focus, supporting direct-sales capability before the base year. Subsidiary counts are not used as sales weights.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2023 announcement describes owned sales/service subsidiaries and an OEM-business focus, supporting direct-sales capability before the base year. Subsidiary counts are not used as sales weights.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announcement also identifies a distributor network, supporting continued indirect participation in the specialist cohort rather than an all-direct classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announcement also identifies a distributor network, supporting continued indirect participation in the specialist cohort rather than an all-direct classification.

17.1. Direct Manufacturer Sales

Table 207. Global Motion Positioning Stages Market Size, by Direct Manufacturer Sales, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. TIFR/PD/IC23-47/232777 - Notice Inviting Tender, March 19, 2024

   · Taxonomy evidence: The single-quote invitation is addressed directly to the stage manufacturer, establishing a solicited direct-manufacturer procurement relationship, not proof of a completed sale. ([tifr.res.in](https://www.tifr.res.in/maincampus/viewNoticeFile.php?f=VTNVU21UaFBybGJuRDJwakJmdXdVUT09&s=WFdXaTkwL1ZDTGdxaHp6eHA1bkh1QT09))

2. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1

   · Taxonomy evidence: Original equipment manufacturers are explicitly eligible to supply the requested complete linear stage directly to the institutional purchaser. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))

3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI's EUR xx.xx 2025 sales versus EUR xx.xx in 2024 and reported demand weaknesses constrain assumptions of uniform precision-supplier expansion.
4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies JPY xx.xx FA manufacturing revenue and distinguishes manufacturing from VONA distribution. This supports the manufacturing-only weight used in the joint channel model.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report identifies JPY xx.xx FA manufacturing revenue and distinguishes manufacturing from VONA distribution. This supports the manufacturing-only weight used in the joint channel model.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.

8. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
10. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January 2026 announcement identifies approximately JPY xx.xx investment and doubled automated-stage supply capacity. It supports a conditional precision-demand exposure, not realized sales or direct-channel penetration.
22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated contact page distinguishes manufacturer offices from exclusive and non-exclusive distributors. It constrains direct-access assumptions; historical continuity into 2025 remains unverified.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated contact page distinguishes manufacturer offices from exclusive and non-exclusive distributors. It constrains direct-access assumptions; historical continuity into 2025 remains unverified.

28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

29. MKS Inc. Annual Report 2025

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 report discloses USD xx.xx Photonics product revenue and direct, distributor and representative selling routes. These constrain a manufacturer-value cohort carried through both anchors; no stage-specific channel percentage is disclosed.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 report discloses USD xx.xx Photonics product revenue and direct, distributor and representative selling routes. These constrain a manufacturer-value cohort carried through both anchors; no stage-specific channel percentage is disclosed.

30. Parker Hannifin Fiscal 2024 Second Quarter Earnings Release and Presentation - February 1, 2024

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately half of diversified industrial revenue was through distribution, with regional differences. This is an adjacent-market calibration for the assumed industrial direct rate, not a positioning-stage observation.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately half of diversified industrial revenue was through distribution, with regional differences. This is an adjacent-market calibration for the assumed industrial direct rate, not a positioning-stage observation.

31. Parker-Hannifin Corporation Form 10-K - Fiscal Year Ended June 30, 2025

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FY2025 international industrial revenue of USD xx.xx and total industrial revenue of USD xx.xx provide the regional exposure ratio used to attenuate the modeled distribution-expansion effect.

32. Laurent Melin is PI Group's New Head of Global Sales - December 19, 2023

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The December 2023 announcement describes owned sales/service subsidiaries and an OEM-business focus, supporting direct-sales capability before the base year. Subsidiary counts are not used as sales weights.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The December 2023 announcement describes owned sales/service subsidiaries and an OEM-business focus, supporting direct-sales capability before the base year. Subsidiary counts are not used as sales weights.

33. Indian Institute of Science - Request for Quote for the Supply of Closed-Loop Cryogenic Nanopositioning System

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June 2025 RFQ permits eligible Indian manufacturers and imposes quantitative domestic-content thresholds. It establishes purchasing constraints, not direct-sales value or an awarded transaction.

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The June 2025 RFQ permits eligible Indian manufacturers and imposes quantitative domestic-content thresholds. It establishes purchasing constraints, not direct-sales value or an awarded transaction.

17.2. Distributor and Reseller Sales

Table 210. Global Motion Positioning Stages Market Size, by Distributor and Reseller Sales, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 211. Global Motion Positioning Stages Market Size, by Distributor and Reseller Sales, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Domestic Tender Notification of High Precision Linear Stage - IPC/SG/2023/LS-1

   · Taxonomy evidence: An authorized distributor is explicitly eligible to supply the same complete-stage procurement. This establishes a reseller route, not a channel share or awarded transaction. ([iisc.ac.in](https://iisc.ac.in/wp-content/uploads/2023/xx.xx/Domestic-Tender_High-Precision-Linear-Stage_Soumen-Ghosh_IPC.pdf))

2. Positioning Stages and Systems - Motionlink Ltd

   · Taxonomy evidence: Motionlink explicitly identifies positioning tables distributed by its business, providing an independently retrieved example of a stage-distribution operation outside the Indian procurement records. ([motionlink.co.uk](https://motionlink.co.uk/motionlink/positioning-stages-and-systems/))

3. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Weak automation and publicly funded demand provide counterevidence to uniformly strong cohort growth, affecting forecast relative weights and the complementary distributor share.
4. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
5. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
6. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports excluding third-party resale turnover from the market denominator while attributing independently manufactured stages to their actual selling route.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturing-versus-distribution distinction supports excluding third-party resale turnover from the market denominator while attributing independently manufactured stages to their actual selling route.
7. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.

8. Festo startet optimistisch ins Jubiläumsjahr
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
9. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
10. Aerotech Recruiting FAQs
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
11. Novanta Announces Agreement to Acquire Motion Solutions
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
12. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
   · Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

13. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
14. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
15. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
16. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.

17. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
18. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
19. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
20. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
21. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same manufacturer-stage expansion informs relative cohort growth and therefore the complementary distributor allocation. Capacity is not added as revenue or assumed to determine the selling route.
22. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

23. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
26. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
27. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusive territorial appointments and selected-product coverage establish bounded reseller access, not channel revenue. The model retains indirect activity without deriving weights from distributor counts.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusive territorial appointments and selected-product coverage establish bounded reseller access, not channel revenue. The model retains indirect activity without deriving weights from distributor counts.

28. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.

29. MKS Inc. Annual Report 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors are an expressly identified selling route. The financial pool supports inherited cohort weighting, not the modeled distributor percentage or a future observed split.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors are an expressly identified selling route. The financial pool supports inherited cohort weighting, not the modeled distributor percentage or a future observed split.

30. Parker Hannifin Fiscal 2024 Second Quarter Earnings Release and Presentation - February 1, 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The presentation reports approximately xx.xx% North American and xx.xx% international distribution penetration and an international expansion objective. Partial realization of that historical objective is an explicit forecast assumption.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation reports approximately xx.xx% North American and xx.xx% international distribution penetration and an international expansion objective. Partial realization of that historical objective is an explicit forecast assumption.

31. Parker-Hannifin Corporation Form 10-K - Fiscal Year Ended June 30, 2025

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The industrial international-to-total revenue ratio calibrates the forecast channel-transfer scenario; it is not a stage revenue or future channel-share disclosure.

32. Laurent Melin is PI Group's New Head of Global Sales - December 19, 2023

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The announcement also identifies a distributor network, supporting continued indirect participation in the specialist cohort rather than an all-direct classification.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The announcement also identifies a distributor network, supporting continued indirect participation in the specialist cohort rather than an all-direct classification.

33. Indian Institute of Science - Request for Quote for the Supply of Closed-Loop Cryogenic Nanopositioning System

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Authorized Indian distributors are eligible subject to the same origin conditions; local services do not qualify imported products. This constrains assumptions that a reseller automatically unlocks restricted demand.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Authorized Indian distributors are eligible subject to the same origin conditions; local services do not qualify imported products. This constrains assumptions that a reseller automatically unlocks restricted demand.

18. Motion Positioning Stages Market, by Operating Environment

[redacted] That ambient positioning does not establish suitability for a specialized environment. Buyers should compare the scope actually required rather than assume that a more specialized variant is necessary.

[redacted] Catalog status is therefore not synonymous with Standard-Environment Stages, and environmental specialization does not necessarily require wholly new engineering. The commercial choice is between an existing documented variant and an agreed modification, with responsibility for subsequent configuration changes kept explicit.

[redacted] Suppliers and buyers should settle the chosen configuration and its acceptance documentation before commitment. Adding another environmental condition is a trigger to reassess the quoted coverage; it is not evidence that an existing single-environment offering automatically remains acceptable.

Figure 30. Global Motion Positioning Stages Market Size, by Operating Environment, 2025 (%)

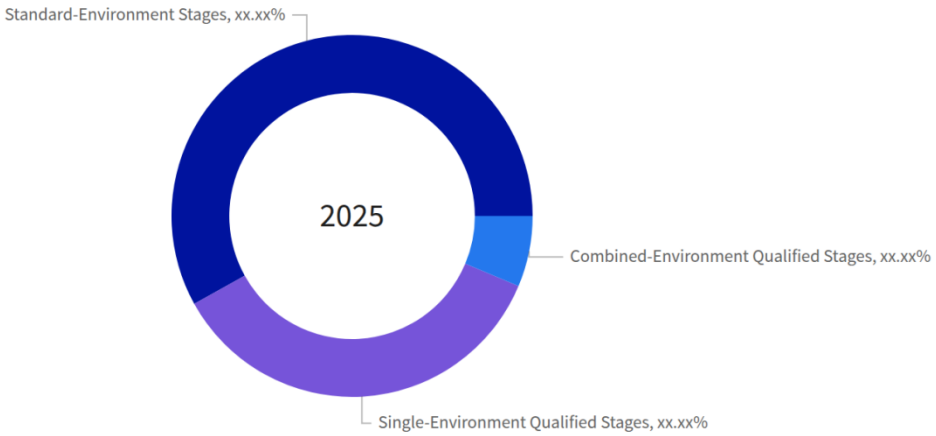

Figure 31. Global Motion Positioning Stages Market, by Operating Environment, 2032 (USD Million)

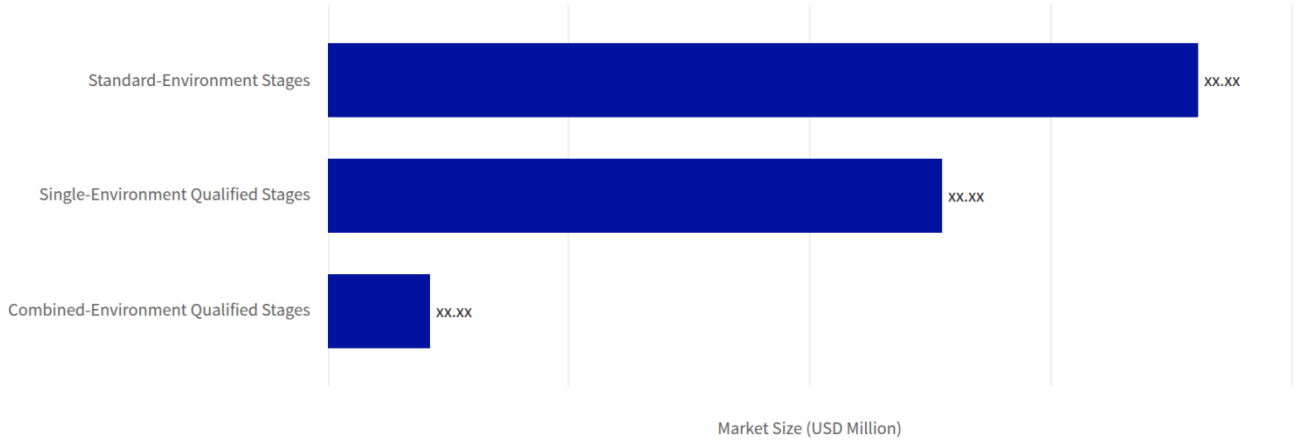

Table 213. Global Motion Positioning Stages Market, by Operating Environment growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Combined-Environment Qualified Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Single-Environment Qualified Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standard-Environment Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 214. Global Motion Positioning Stages Market Size, by Operating Environment, 2017-2040 (USD Million)

Operating Environment	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Combined-Environment Qualified Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Single-Environment Qualified Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standard-Environment Stages	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Vacuum / UHV Compatible Stages - Linear & Rotary Positioners for Vacuum, Wide Temperature Ranges | PI USA

   · PI describes vacuum-ready standard products and modifications on request, demonstrating that environmental specialization and customization level are separate commercial distinctions. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI offers vacuum-ready standard products and request-based modifications. This supports separating environmental qualification from catalog/custom status, but supplies no environmental revenue share. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI offers vacuum-ready standard products and request-based modifications. This supports separating environmental qualification from catalog/custom status, but supplies no environmental revenue share. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))

2. Request for Quote for the Supply of Closed-Loop Cryogenic Nanopositioning System

   · The RFQ requests cryogenic positioning, an ultrahigh-vacuum option and a nonmagnetic variant. These are purchasing requirements and options, not evidence of the combination delivered or accepted. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

   · Taxonomy evidence: The June xx.xx 2025 buyer RFQ specifies cryogenic-stage compatibility, an ultrahigh-vacuum option, and a nonmagnetic variant within one procurement, demonstrating that environmental requirements can coexist. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The June xx.xx 2025 RFQ combines cryogenic positioning with an ultrahigh-vacuum option and a nonmagnetic variant. It establishes buyer-side coexistence of requirements, not an award, selected combination, delivery or market share. ([iisc.ac.in](https://www.iisc.ac.in/wp-content/uploads/2025/xx.xx/Tender_-closed_loop_cryogenic_nanopositioning_system.pdf))

3. Loan Service for Nanopositioners

   · Attocube identifies the EC*xx.xx positioners used in its loan kits as intended for ambient conditions. The statement establishes offering scope, not a completed purchase or specialized-environment acceptance. ([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The EC*xx.xx loan-kit product line is explicitly described as intended for ambient conditions, independently supporting the standard-environment category mapping. Loan activity is not counted as stage-sales revenue. ([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The EC*xx.xx loan-kit product line is explicitly described as intended for ambient conditions, independently supporting the standard-environment category mapping. Loan activity is not counted as stage-sales revenue. ([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))

4. Positioning Stages and Systems - Motionlink Ltd

   · Taxonomy evidence: The company's marketed stage range distinguishes standard-environment offerings from demanding-environment options, including vacuum, cryogenic, radiation-tolerant, and nonmagnetic positioning. This is evidence of its own commercial offering, not global category shares or exclusive single-environment purchases. ([motionlink.co.uk](https://motionlink.co.uk/motionlink/positioning-stages-and-systems/))

5. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
6. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
7. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
8. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
9. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
10. Festo startet optimistisch ins Jubiläumsjahr
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
11. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
12. Aerotech Recruiting FAQs
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
13. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.

14. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.
15. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SEMI reports USD xx.xx of 2025 semiconductor-equipment billings from member and SEAJ submissions, anchoring the inherited semiconductor demand proxy after an assumed merchant-stage-content adjustment. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SEMI reports USD xx.xx of 2025 semiconductor-equipment billings from member and SEAJ submissions, anchoring the inherited semiconductor demand proxy after an assumed merchant-stage-content adjustment. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The adjusted semiconductor activity pool constrains the shared allocation weights; environmental incidence within that pool is modeled, not reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The adjusted semiconductor activity pool constrains the shared allocation weights; environmental incidence within that pool is modeled, not reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same scoped activity anchor enters the combined-profile numerator and sibling denominator without substituting complete-equipment revenue for stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same scoped activity anchor enters the combined-profile numerator and sibling denominator without substituting complete-equipment revenue for stage revenue.

16. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025. The inherited model uses xx.xx as a rounded automation-activity benchmark, not stage shipments. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025. The inherited model uses xx.xx as a rounded automation-activity benchmark, not stage shipments. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The benchmark constrains the other-industrial pool after assumed stage attachment and realization adjustments; it does not disclose qualified-stage incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The benchmark constrains the other-industrial pool after assumed stage attachment and realization adjustments; it does not disclose qualified-stage incidence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The calibrated industrial pool contributes to the common environmental denominator and a separately assumed combined-profile numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The calibrated industrial pool contributes to the common environmental denominator and a separately assumed combined-profile numerator.
17. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
18. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
19. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
20. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
21. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.

22. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2026 association forecast projects wafer-fab-equipment growth of xx.xx%, xx.xx% and xx.xx% in 2026-2028, supporting the inherited attenuated semiconductor demand driver rather than directly forecasting environmental shares. ([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-sales-forecast-to-reach-a-record-xx.xx-billion-dollars-in-2028-semi-reports?trk=article-ssr-frontend-pulse_little-text-block))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Differential semiconductor demand growth changes the forecast allocation through the base environmental model; its stage-response coefficient remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The forecast activity signal supports the relative-demand bridge, not a measured increase in combined-environment adoption or pricing.
23. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
24. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.

25. 1" (25 mm) Travel Dovetail Translation Stages
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The retrieved catalog lists DTS25 at USD xx.xx and DTS25V at USD xx.xx with matched motion and mounting features, supplying the base comparator for the relative-realization model, not a sales weight. ([punchout.thorlabs.com](https://punchout.thorlabs.com/newgrouppage9.cfm?objectgroup_id=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The retrieved catalog lists DTS25 at USD xx.xx and DTS25V at USD xx.xx with matched motion and mounting features, supplying the base comparator for the relative-realization model, not a sales weight. ([punchout.thorlabs.com](https://punchout.thorlabs.com/newgrouppage9.cfm?objectgroup_id=xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The catalog price ratio xx.xx/xx.xx is used as a modeled single-environment relative realization; global transaction representativeness and stability through 2032 are assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The catalog price ratio xx.xx/xx.xx is used as a modeled single-environment relative realization; global transaction representativeness and stability through 2032 are assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The single-profile price input affects the common sibling denominator. This source does not establish a combined-environment premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The single-profile price input affects the common sibling denominator. This source does not establish a combined-environment premium.
26. RSW Family - Rotary Stages, Vacuum Compatible Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct North American motor-only family prices provide a sensitivity check: RSW USD 1962, low-vacuum RSW-V1 USD xx.xx and high-vacuum RSW-V2 USD xx.xx. Baseline cleanroom suitability prevents treating this as a verified ambient-to-specialized category comparison. ([zaber.com](https://www.zaber.com/products/families/RSW))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct North American motor-only family prices provide a sensitivity check: RSW USD 1962, low-vacuum RSW-V1 USD xx.xx and high-vacuum RSW-V2 USD xx.xx. Baseline cleanroom suitability prevents treating this as a verified ambient-to-specialized category comparison. ([zaber.com](https://www.zaber.com/products/families/RSW))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Family price comparisons qualify the transferability of the manual-stage premium and support broad realization sensitivity rather than a universal observed premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Family price comparisons qualify the transferability of the manual-stage premium and support broad realization sensitivity rather than a universal observed premium.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Higher-scope catalog pricing provides a commercial scale check only; the combined-profile realization of xx.xx remains assumed and is not disclosed by this source.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Higher-scope catalog pricing provides a commercial scale check only; the combined-profile realization of xx.xx remains assumed and is not disclosed by this source.
27. Low Temperature Nanopositioners
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer markets low-temperature nanopositioners for demanding combinations including cryogenic, vacuum and magnetic-field environments. This supports commercial category availability, not annual sales quantities or the selected coverage of every configuration. ([attocube.com](https://www.attocube.com/en/products/nanopositioners/low-temperature-nanopositioners))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer markets low-temperature nanopositioners for demanding combinations including cryogenic, vacuum and magnetic-field environments. This supports commercial category availability, not annual sales quantities or the selected coverage of every configuration. ([attocube.com](https://www.attocube.com/en/products/nanopositioners/low-temperature-nanopositioners))

28. Cleanroom | Festo USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Broad cleanroom-classified automation offerings qualify any assumption that industrial catalog products are necessarily ambient-only; their availability is not a stage-sales weight. ([[festo.com](https://www.festo.com/us/en/e/solutions/industries/electronics-industry/cleanroom-id_7016)](https://www.festo.com/us/en/e/solutions/industries/electronics-industry/cleanroom-id_7016))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Broad cleanroom-classified automation offerings qualify any assumption that industrial catalog products are necessarily ambient-only; their availability is not a stage-sales weight. ([[festo.com](https://www.festo.com/us/en/e/solutions/industries/electronics-industry/cleanroom-id_7016)](https://www.festo.com/us/en/e/solutions/industries/electronics-industry/cleanroom-id_7016))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's documented cleanroom offering supports retaining single-environment activity in industrial demand, while stage-specific configuration and shipment incidence remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's documented cleanroom offering supports retaining single-environment activity in industrial demand, while stage-specific configuration and shipment incidence remain unmeasured.

18.1. Standard-Environment Stages

Table 215. Global Motion Positioning Stages Market Size, by Standard-Environment Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Latin America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Middle East	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
North America	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 216. Global Motion Positioning Stages Market Size, by Standard-Environment Stages, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
European Union	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Loan Service for Nanopositioners

   · Taxonomy evidence: The manufacturer explicitly describes its EC*xx.xx positioner product line as intended for ambient conditions. The inspected page concerns loan kits; loan activity is not counted as new-stage market revenue.
   ([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The EC*xx.xx loan-kit product line is explicitly described as intended for ambient conditions, independently supporting the standard-environment category mapping. Loan activity is not counted as stage-sales revenue.
   ([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The EC*xx.xx loan-kit product line is explicitly described as intended for ambient conditions, independently supporting the standard-environment category mapping. Loan activity is not counted as stage-sales revenue.
   ([attocube.com](https://www.attocube.com/en/products/nanopositioners/loan-service-nanopositioners))

2. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
3. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.
4. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
5. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
6. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
7. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
8. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.

9. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
10. Novanta Announces Agreement to Acquire Motion Solutions
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
11. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

12. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: SEMI reports USD xx.xx of 2025 semiconductor-equipment billings from member and SEAJ submissions, anchoring the inherited semiconductor demand proxy after an assumed merchant-stage-content adjustment. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: SEMI reports USD xx.xx of 2025 semiconductor-equipment billings from member and SEAJ submissions, anchoring the inherited semiconductor demand proxy after an assumed merchant-stage-content adjustment. ([semi.org](https://www.semi.org/en/SEMI-Reports-Global-Semiconductor-Equipment-Billings-Reached-xx.xx-Billion-in-2025))
13. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025. The inherited model uses xx.xx as a rounded automation-activity benchmark, not stage shipments. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025. The inherited model uses xx.xx as a rounded automation-activity benchmark, not stage shipments. ([ifr.org](https://ifr.org/ifr-press-releases/news/five-million-robots-now-operate-in-factories-globally))

14. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
15. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
16. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
17. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
18. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
19. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July xx.xx 2026 association forecast projects wafer-fab-equipment growth of xx.xx%, xx.xx% and xx.xx% in 2026-2028, supporting the inherited attenuated semiconductor demand driver rather than directly forecasting environmental shares.
      ([semi.org](https://www.semi.org/en/semi-press-release/global-semiconductor-equipment-sales-forecast-to-reach-a-record-xx.xx-billion-dollars-in-2028-semi-reports?trk=article-ssr-frontend-pulse_little-text-block))

20. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.
21. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
22. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.

24. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
25. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
26. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
27. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
28. 1" (25 mm) Travel Dovetail Translation Stages
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The retrieved catalog lists DTS25 at USD xx.xx and DTS25V at USD xx.xx with matched motion and mounting features, supplying the base comparator for the relative-realization model, not a sales weight. ([punchout.thorlabs.com](https://punchout.thorlabs.com/newgrouppage9.cfm?objectgroup_id=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The retrieved catalog lists DTS25 at USD xx.xx and DTS25V at USD xx.xx with matched motion and mounting features, supplying the base comparator for the relative-realization model, not a sales weight. ([punchout.thorlabs.com](https://punchout.thorlabs.com/newgrouppage9.cfm?objectgroup_id=xx.xx))
29. RSW Family - Rotary Stages, Vacuum Compatible Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct North American motor-only family prices provide a sensitivity check: RSW USD 1962, low-vacuum RSW-V1 USD xx.xx and high-vacuum RSW-V2 USD xx.xx. Baseline cleanroom suitability prevents treating this as a verified ambient-to-specialized category comparison. ([zaber.com](https://www.zaber.com/products/families/RSW))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct North American motor-only family prices provide a sensitivity check: RSW USD 1962, low-vacuum RSW-V1 USD xx.xx and high-vacuum RSW-V2 USD xx.xx. Baseline cleanroom suitability prevents treating this as a verified ambient-to-specialized category comparison. ([zaber.com](https://www.zaber.com/products/families/RSW))
30. Cleanroom | Festo USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Broad cleanroom-classified automation offerings qualify any assumption that industrial catalog products are necessarily ambient-only; their availability is not a stage-sales weight. ([festo.com](https://www.festo.com/us/en/e/solutions/industries/electronics-industry/cleanroom-id_7016))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Broad cleanroom-classified automation offerings qualify any assumption that industrial catalog products are necessarily ambient-only; their availability is not a stage-sales weight. ([festo.com](https://www.festo.com/us/en/e/solutions/industries/electronics-industry/cleanroom-id_7016))

18.2. Single-Environment Qualified Stages

Table 218. Global Motion Positioning Stages Market Size, by Single-Environment Qualified Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Positioning 2026 Business Report - HOERBIGER
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2024, providing a comparable supplier-level historical constraint.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: PI reported EUR xx.xx sales in 2025 and approximately 1,900 employees. These constrain the modeled stage attribution and revenue-per-employee calibration, not the global market directly.
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: PI targeted high-single-digit growth for 2026. This is corporate guidance used as an outlook constraint, not realized revenue.
2. MKS Inc. Annual Report 2025
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: MKS reported 2024 Photonics Solutions Division revenue of USD xx.xx, providing a broader-business comparison.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MKS reported 2025 Photonics Solutions Division product revenue of USD xx.xx and total division revenue of USD xx.xx. Only an assumed stage-attributable fraction of product revenue enters the model.

3. SIGMAKOKI Integrated Report 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: For the year ended May 2025, SIGMAKOKI disclosed JPY xx.xx optical-basic-equipment sales and JPY xx.xx automatic-applied-product sales. The model separates attributable stages from holders, controls and unrelated products.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Consolidated sales of JPY xx.xx and xx.xx employees provide a commercial revenue-per-employee calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-May-2025 sales were xx.xx% Japan and xx.xx% other Asia; this supplier-specific mix challenges extrapolation from a single supplier footprint.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's xx.xx% Japanese sales mix is a commercial countercheck, not Japan's market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% European sales, illustrating supplier-specific geographic heterogeneity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier disclosed xx.xx% US sales; its diversified portfolio prevents direct use as stage-market allocation.
4. MISUMI Integrated Report 2025 - Business Portfolio
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: MISUMI disclosed JPY xx.xx FA Business sales for FY2024 and distinguished manufacturing from VONA distribution. A modeled stage fraction and reporting-period bridge are applied only to the manufacturing pool.
5. Festo Sustainability Report 2025 - Festo at a Glance
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2025. This is a diversified supplier ceiling to which an explicitly assumed complete-stage fraction is applied.
6. Festo startet optimistisch ins Jubiläumsjahr
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Festo reported EUR xx.xx sales in 2024, down xx.xx%, providing counterevidence to uniform automation-market expansion.
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2024 revenue provides the comparison for assessing Festo's weaker 2025 euro-denominated sales.
7. THK Business Strategy: Industrial Machinery Business - Reflecting on 2025
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: THK reported JPY xx.xx industrial-machinery revenue in 2025. Only an assumed complete-stage portion is included; component and other business revenue is excluded.
8. Aerotech Recruiting FAQs
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Aerotech's December 2025 recruiting material states that it has more than xx.xx employees worldwide and distinguishes positioning products from complete automation machines. The model uses xx.xx employees conservatively, with assumed commercial revenue intensity and stage attribution.
9. Novanta Announces Agreement to Acquire Motion Solutions
   - Evidence informing the 2025 market-value input; displayed series and growth include calculations: Novanta expected Motion Solutions to generate approximately USD xx.xx revenue in 2023. This historical corporate expectation is bridged to 2025 with assumed growth and stage attribution; it is not treated as audited realized revenue.
10. Federal Reserve G.5A Annual Foreign Exchange Rates - January 5, 2026
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: The 2024 annual-average EUR conversion of USD xx.xx per EUR supports comparison of euro-denominated supplier activity.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: The 2025 annual averages are USD xx.xx per EUR and JPY xx.xx per USD. These are used for the base-year monetary conversions.

11. SEMI Reports Global Semiconductor Equipment Billings Reached USD 135 Billion in 2025
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2024, providing an independent downstream equipment-activity constraint.
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: SEMI reported USD xx.xx semiconductor-equipment sales in 2025, compiled from member submissions with SEAJ. This supports a merchant-stage-content cross-check, not substitution of whole-equipment sales for stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 semiconductor-equipment spending provides an independent demand-context check; fab geography is not copied into merchant-stage shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: North American equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: European equipment spending declined xx.xx% to USD xx.xx in 2025, qualifying uniform stage-growth assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chinese equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Korean equipment spending of USD xx.xx is a downstream commercial anchor, not stage revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The adjusted semiconductor activity pool constrains the shared allocation weights; environmental incidence within that pool is modeled, not reported.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The adjusted semiconductor activity pool constrains the shared allocation weights; environmental incidence within that pool is modeled, not reported.
12. IFR World Robotics 2026 - Five Million Robots Now Operate in Factories Globally
    - Evidence informing the 2025 market-value input; displayed series and growth include calculations: IFR's September xx.xx 2026 release reports more than xx.xx industrial-robot installations in 2025, up xx.xx%. The model uses xx.xx as a rounded automation-activity benchmark, not as stage shipments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The benchmark constrains the other-industrial pool after assumed stage attachment and realization adjustments; it does not disclose qualified-stage incidence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The benchmark constrains the other-industrial pool after assumed stage attachment and realization adjustments; it does not disclose qualified-stage incidence.

13. World Robotics 2025 Industrial Robots - Executive Summary
    - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The historical installations chart supplies an automation-activity reference for the backcast starting point.
    - Evidence informing the 2018 market-value input; displayed series and growth include calculations: The historical chart supports expansion before the subsequent industrial downturn.
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: The historical chart supports weaker industrial activity during the 2019 downturn.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Historical installations constrain the automation component without equating robot purchases with stage purchases.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: IFR reported xx.xx installations in 2024, versus xx.xx in 2023 and xx.xx in 2022.
14. SEMI Release: 2020 Global Semiconductor Equipment Sales Surge 19% to USD 71.2 Billion
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: SEMI's published release reports USD xx.xx semiconductor-equipment sales in 2019.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: SEMI reported equipment sales rising xx.xx% to USD xx.xx in 2020, constraining the semiconductor component of the historical bridge.
15. 2021 Global Semiconductor Equipment Sales Surge 44% to USD 102.6 Billion - SEMI
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment sales increasing xx.xx% to USD xx.xx in 2021. The stage model applies a substantially attenuated rebound.
16. Global Semiconductor Equipment Billings Reach USD 107.6 Billion in 2022 - SEMI
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings of USD xx.xx in 2022, supporting continued but slower equipment demand.
17. Global Semiconductor Equipment Billings Slip to USD 106.3 Billion in 2023 - SEMI
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: SEMI reported semiconductor-equipment billings falling to USD xx.xx in 2023, constraining the modeled correction.
18. Global Semiconductor Equipment Sales Forecast to Reach USD 229 Billion in 2028 - SEMI
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July 2026 association forecast projects xx.xx% wafer-fab-equipment growth in 2026; the model applies a lower merchant-stage response.
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2027, supporting the near-term demand driver rather than a directly observed stage forecast.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The association projects xx.xx% wafer-fab-equipment growth in 2028, supporting moderation of the semiconductor-related driver.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Differential semiconductor demand growth changes the forecast allocation through the base environmental model; its stage-response coefficient remains assumed.
19. MISUMI Expands Automated Positioning Stage Production for Data Centers
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: MISUMI's January xx.xx 2026 announcement identifies approximately JPY xx.xx planned investment to double automated-positioning-stage supply capacity. Investment and capacity are not counted as stage sales.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The announced expansion supports a conditional supply-response premise for the medium-term forecast, not proof of utilization or completed sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January xx.xx 2026 announcement identifies optical-transceiver equipment demand and planned stage-capacity expansion; it supports a conditional commercial driver, not realized sales or a production-location demand allocation.

20. MISUMI - Increased Production of Automated Stages for Data Centers and Components for Growth Industries
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The July xx.xx 2026 announcement describes approximately JPY xx.xx broader investment covering automated stages and other growth-industry components. Its entire amount is not attributed to stages or added to realized revenue.
    - Evidence informing the 2028 market-value input; displayed series and growth include calculations: The updated investment announcement strengthens the conditional capacity-expansion premise while leaving delivery, utilization and product-mix uncertainty unresolved.
21. UNIDO - Factsheet: Northern America and Europe, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
22. UNIDO - Factsheet: Latin America and the Caribbean, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Mexico's manufacturing composition and growth enter the North American country model, not the source's regional grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
23. UNIDO - Factsheet: Asia and Oceania, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial-input allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: National industrial-input proxy.
24. UNIDO - Factsheet: Africa, International Yearbook of Industrial Statistics 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Industrial composition, regional coverage and growth constrain the modeled allocation; they do not measure stage sales.

25. Locations and Contact - Zaber
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Four-country Nordic and UK/Ireland territorial listings support the distinction between shared channels and national purchasing; no sales uplift is inferred.
26. 关于贯彻落实《国务院办公厅关于在政府采购中实施本国产品标准及相关政策的通知》的意见
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The notice implements domestic-product procurement requirements from January xx.xx 2026, with declarations and equal treatment of qualifying foreign-invested products; it does not quantify stage demand or imported-stage eligibility.
27. 1" (25 mm) Travel Dovetail Translation Stages
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The catalog price ratio xx.xx/xx.xx is used as a modeled single-environment relative realization; global transaction representativeness and stability through 2032 are assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The catalog price ratio xx.xx/xx.xx is used as a modeled single-environment relative realization; global transaction representativeness and stability through 2032 are assumptions.
28. RSW Family - Rotary Stages, Vacuum Compatible Stages - Zaber
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Family price comparisons qualify the transferability of the manual-stage premium and support broad realization sensitivity rather than a universal observed premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Family price comparisons qualify the transferability of the manual-stage premium and support broad realization sensitivity rather than a universal observed premium.
29. Vacuum / UHV Compatible Stages - Linear & Rotary Positioners for Vacuum, Wide Temperature Ranges | PI USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PI offers vacuum-ready standard products and request-based modifications. This supports separating environmental qualification from catalog/custom status, but supplies no environmental revenue share. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PI offers vacuum-ready standard products and request-based modifications. This supports separating environmental qualification from catalog/custom status, but supplies no environmental revenue share. ([pi-usa.us](https://www.pi-usa.us/en/products/vacuum-positioning-stages-actuators))
30. Cleanroom | Festo USA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's documented cleanroom offering supports retaining single-environment activity in industrial demand, while stage-specific configuration and shipment incidence remain unmeasured.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's documented cleanroom offering supports retaining single-environment activity in industrial demand, while stage-specific configuration and shipment incidence remain unmeasured.

18.3. Combined-Environment Qualified Stages

Table 221. Global Motion Positioning Stages Market Size, by Combined-Environment Qualified Stages, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
