Nickel-Based Superalloys for Aerospace Market

Global Forecast 2026-2032

MRR-0A3806951741 | October 2026

Great Place To Work. Certified FEB 2026-FEB 2027 INDIA

Table of Contents

1. Preface 7
   1.1. Objectives of the Study 7
   1.2. Market Definition 7
   1.3. Market Segmentation & Coverage 8
   1.4. Years Considered for the Study 20
   1.5. Currency Considered for the Study 20
   1.6. Language Considered for the Study 21
   1.7. Key Stakeholders 21
2. Research Methodology 22
   2.1. Introduction 22
   2.2. Research Design 22
      2.2.1. Primary Research 23
      2.2.2. Secondary Research 23
   2.3. Research Framework 23
      2.3.1. Qualitative Analysis 24
      2.3.2. Quantitative Analysis 24
   2.4. Market Size Estimation 25
      2.4.1. Top-Down Approach 25
      2.4.2. Bottom-Up Approach 25
   2.5. Data Triangulation 25
   2.6. Research Outcomes 26
   2.7. Research Assumptions 26
   2.8. Research Limitations 27
3. Executive Summary 28
   3.1. Introduction 28
   3.2. CXO Perspective 28
   3.3. New Revenue Opportunities 29
   3.4. Next-Generation Business Models 30
   3.5. Industry Roadmap 31
4. Market Overview 33
   4.1. Introduction 33
   4.2. Key Growth Contribution 34
   4.3. Industry Ecosystem & Value Chain Analysis 62
      4.3.1. Supply-Side Analysis 63
      4.3.2. Demand-Side Analysis 64
      4.3.3. Stakeholder Analysis 65
   4.4. Market Dynamics 65
      4.4.1. Key Drivers 66
         4.4.1.1. Program releases translate propulsion requirements into material purchasing 66
         4.4.1.2. Authorized fleet upgrades create conditional replacement-material requirements 66
         4.4.1.3. Named powder partnerships support commercial qualification activity 67

4.4.2. Key Restraints 67
4.4.2.1. Contract-specific authorization limits material switching 67
4.4.2.2. Repair and reuse interrupt the link between maintenance and new material 67
4.4.2.3. Covered defense contracts restrict eligible material origins 68
4.4.3. Key Opportunities 68
4.4.3.1. Contract-backed assurance for accepted material requirements 68
4.4.3.2. Form-specific sourcing and fulfillment accountability 68
4.4.3.3. Project-bounded purchasing of proprietary powder offerings 69
4.4.4. Key Challenges 69
4.4.4.1. Converting supplier relationships into verifiable supply assurance 69
4.4.4.2. Managing indexation timing and unrecovered contractual exposure 70
4.4.4.3. Maintaining usable pedigree across material handoffs 70
4.5. Porter's Five Forces Analysis 70
4.6. PESTLE Analysis 71
4.7. Market Outlook 73
4.7.1. Near-Term Market Outlook (0-2 Years) 73
4.7.2. Medium-Term Market Outlook (3-5 Years) 74
4.7.3. Long-Term Market Outlook (5-10 Years) 75
4.8. Go-to-Market Strategy 75
5. Market Insights 78
5.1. Consumer Insights & End-User Perspective 78
5.2. Consumer Experience Benchmarking 79
5.3. Opportunity Mapping 79
5.4. Distribution Channel Analysis 82
5.5. Pricing Trend Analysis 82
5.6. Regulatory Compliance & Standards Framework 83
5.7. ESG & Sustainability Analysis 85
5.8. Disruption & Risk Scenarios 86
5.9. Return on Investment & Cost-Benefit Analysis 87
6. Cumulative Impact of Artificial Intelligence 2026 89
7. Nickel-Based Superalloys for Aerospace Market, by Product Form 90
7.1. Billets and Forging Stock 96
7.2. Plate, Sheet, Strip and Foil 100
7.3. Bars, Rods and Profiles 105
7.4. Ingots 110
7.5. Powder 115
7.6. Wire 119
7.7. Tubes and Pipes 124
8. Nickel-Based Superalloys for Aerospace Market, by Strengthening Class 129
8.1. Precipitation-Strengthened Alloys 135
8.2. Solid-Solution-Strengthened Alloys 140
8.3. Dispersion-Strengthened Alloys 145
9. Nickel-Based Superalloys for Aerospace Market, by Component Application 151
9.1. Air-Breathing Propulsion & Auxiliary Power 155

9.1.1. Turbine Disks & Rotor Hardware 162
9.1.2. Engine Structures & Auxiliary Systems 166
9.1.3. Turbine Blades & Vanes 171
9.1.4. Combustion & Exhaust Components 177
9.1.5. Compressor Components 181
9.2. Rocket & Spacecraft Propulsion 186
9.3. Vehicle Structures & Thermal Protection 191
9.4. Onboard Systems & Equipment 196
10. Nickel-Based Superalloys for Aerospace Market, by Demand Stage 202
10.1. Initial Equipment Production 208
10.2. Replacement & Retrofit Production 212
10.3. Research, Development & Qualification 218
10.4. Repair, Overhaul & Refurbishment 223
11. Nickel-Based Superalloys for Aerospace Market, by Aerospace End Market 228
11.1. Civil & Nonmilitary State Aviation 235
11.2. Military Aviation 240
11.3. Space Systems 245
11.4. Guided Missile Systems 250
12. Nickel-Based Superalloys for Aerospace Market, by Buyer Function 255
12.1. Component & Subassembly Manufacturers 261
12.2. Engine & Propulsion-System Manufacturers 266
12.3. Aerospace Vehicle Manufacturers & Integrators 270
12.4. Maintenance, Repair & Overhaul Organizations 274
12.5. Research & Development Organizations 279
13. Nickel-Based Superalloys for Aerospace Market, by Fulfillment Model 284
13.1. Order-Dedicated Supply 288
13.2. Stock Supply 293
14. Nickel-Based Superalloys for Aerospace Market, by Supply Channel 298
14.1. Producer-Direct Supply 303
14.2. Independent Intermediary Supply 308
14.3. Captive Supply 313
15. Nickel-Based Superalloys for Aerospace Market, by Alloy Grade 318
15.1. Alloy 718 329
15.2. Alloy 625 334
15.3. CMSX-4 338
15.4. Hastelloy X 342
15.5. Waspaloy 346
15.6. Rene 88DT 350
15.7. RR1000 354
15.8. PWA 1484 359
15.9. Haynes 230 363
15.10. Udimet 720Li 367

15.11. CM247LC 372
15.12. Alloy 263 376
15.13. IN-100 380
15.14. MAR-M 247 384
15.15. Rene 65 388
15.16. IN-792 392
15.17. Rene 80 396
15.18. PWA 1480 400
15.19. IN-713C 404
15.20. Alloy X-750 408
15.21. Alloy 706 412
15.22. Rene 41 416
15.23. IN-713LC 420
15.24. Nimonic 80A 424
15.25. Alloy 718Plus 428
15.26. Alloy 901 432
15.27. Rene 95 437
15.28. Udimet 720 441
15.29. AD730 445
15.30. Nimonic 75 450
15.31. Haynes 282 454
15.32. IN-738LC 458
15.33. Nimonic 90 462
15.34. Rene 77 466
15.35. IN-738 470
15.36. Udimet 700 474
15.37. Udimet 500 478
15.38. IN-939 482
15.39. ABD-900AM 486
15.40. ABD-1000AM 490

16. Nickel-Based Superalloys for Aerospace Market, by Region 495

16.1. North America 500
16.2. Europe 533
16.3. Asia-Pacific 565
16.4. Middle East 598
16.5. Latin America 631
16.6. Africa 663

17. Nickel-Based Superalloys for Aerospace Market, by Group 694

17.1. NATO 698
17.2. G7 733
17.3. European Union 765
17.4. BRICS 798
17.5. ASEAN 829

17.6. GCC 861
18. Nickel-Based Superalloys for Aerospace Market, by Country 892
18.1. United States 898
18.2. United Kingdom 928
18.3. China 959
18.4. France 990
18.5. Germany 1021
18.6. Mexico 1052
18.7. Japan 1083
18.8. Italy 1114
18.9. Russia 1145
18.10. Canada 1176
18.11. India 1207
18.12. South Korea 1238
18.13. Spain 1269
18.14. Brazil 1300
18.15. Australia 1331
19. Competitive Landscape 1363
19.1. Market Share Analysis, 2025 1363
19.2. Market Concentration Analysis, 2025 1373
19.3. Recent Developments & Impact Analysis, 2025 1375
19.4. Product Portfolio Analysis, 2025 1377
19.5. Benchmarking Analysis, 2025 1382
20. Company Profiles 1387
20.1. ATI Inc. 1387
20.2. Special Metals Corporation 1387
20.3. Haynes International, Inc. 1388
20.4. Doncasters 1389
20.5. Aubert & Duval 1390
20.6. Western Superconducting Technologies Co., Ltd. 1391
20.7. Ulbrich Stainless Steels & Special Metals, Inc. 1392
20.8. 6K Additive 1393
20.9. Linde Advanced Material Technologies, Inc. 1394
20.10. AMETEK Specialty Metal Products 1395
20.11. Rolled Alloys 1396
20.12. Villares Metals S.A. 1397
20.13. EOS GmbH 1398
20.14. SeAH Changwon Integrated Special Steel Corporation 1399
20.15. Alloyed Ltd. 1400
21. Companies Covered 1402
22. Key Experts 1430

1. Preface

1.1. Objectives of the Study

- Which suppliers have documented commercial participation in the accepted alloy grades and product forms, and what distinguishes their roles as producers, independent intermediaries, or participants in Captive Supply?
- What buyer-specific qualification, documentation, and supply-commitment requirements determine eligible sourcing, and under what documented conditions could a buyer change supplier, alloy grade, product form, or channel?
- How do material procurement requirements differ across Component Application, Demand Stage, and Aerospace End Market, and where is the connection to aerospace use documented rather than inferred from broader business activity?
- Which ownership, licensing, distribution, purchasing, and jurisdiction-specific access conditions affect participation in the accepted aerospace end markets, and what must be established before a commercial commitment?
- How do Stock Supply and Order-Dedicated Supply interact with Producer-Direct Supply, Independent Intermediary Supply, and Captive Supply in allocating inventory responsibility, delivery commitments, and commercial control?
- Which documented offerings, business rights, and service commitments support supplier selection, buyer targeting, or commercial entry, and what qualification burdens, continuity considerations, and alternative supply routes must accompany those choices?

1.2. Market Definition

The Nickel-Based Superalloys for Aerospace study covers the Global commercial supply and procurement of nickel-based superalloy materials in the accepted Product Form categories: Ingots; Billets and Forging Stock; Bars, Rods and Profiles; Plate, Sheet, Strip and Foil; Wire; Tubes and Pipes; and Powder. The accepted Strengthening Class and Alloy Grade categories identify the material scope without implying that every grade is offered in every form or eligible for every aerospace use.

The buyer boundary encompasses Component & Subassembly Manufacturers; Engine & Propulsion-System Manufacturers; Aerospace Vehicle Manufacturers & Integrators; Maintenance, Repair & Overhaul Organizations; and Research & Development Organizations. Material participation is included across the accepted applications, aerospace end markets, and demand stages, including research and qualification, replacement production, and repair-related material use. Stock Supply, Order-Dedicated Supply, and all accepted supply channels remain within the study.

The studied offering is the material, not the full downstream component, engine, vehicle, research activity, or maintenance service in which it participates. Upstream primary metals and other constituent inputs are adjacent activities rather than included offerings solely

because they enter a superalloy supply chain. Application and demand-stage categories describe material use; they do not add the full value of downstream equipment or services to the material boundary.

1.3. Market Segmentation & Coverage

Product Form distinguishes the material format being procured: Ingots; Billets and Forging Stock; Bars, Rods and Profiles; Plate, Sheet, Strip and Foil; Wire; Tubes and Pipes; and Powder. This lens separates commercially distinct offering formats without assuming that a supplier's participation in one establishes participation in the others.

Strengthening Class comprises Solid-Solution-Strengthened Alloys; Precipitation-Strengthened Alloys; and Dispersion-Strengthened Alloys. These accepted categories organize material-family comparisons. Their inclusion does not establish substitution, buyer acceptance, or a particular supplier's capability.

Component Application comprises Air-Breathing Propulsion & Auxiliary Power, with Turbine Blades & Vanes, Turbine Disks & Rotor Hardware, Compressor Components, Combustion & Exhaust Components, and Engine Structures & Auxiliary Systems beneath it; followed by Rocket & Spacecraft Propulsion; Vehicle Structures & Thermal Protection; and Onboard Systems & Equipment. The hierarchy identifies the downstream application of the studied material rather than treating completed components as separate material offerings.

Demand Stage comprises Initial Equipment Production; Replacement & Retrofit Production; Repair, Overhaul & Refurbishment; and Research, Development & Qualification. This lens distinguishes the purchasing purpose and lifecycle context of material demand. It retains research and repair-related material activity without converting the associated services into separate offerings.

Aerospace End Market comprises Civil & Nonmilitary State Aviation; Military Aviation; Space Systems; and Guided Missile Systems. These categories retain the full accepted aerospace scope while keeping questions about buyer eligibility, procurement authority, and jurisdiction-specific access separate from category inclusion.

Buyer Function comprises Component & Subassembly Manufacturers; Engine & Propulsion-System Manufacturers; Aerospace Vehicle Manufacturers & Integrators; Maintenance, Repair & Overhaul Organizations; and Research & Development Organizations. This lens identifies the purchasing organization's role rather than assuming that the ultimate platform operator directly purchases the material.

Fulfillment Model comprises Stock Supply and Order-Dedicated Supply. It distinguishes the supply arrangement associated with a purchase and is independent of the identity or ownership of the supplying organization.

Supply Channel comprises Producer-Direct Supply; Independent Intermediary Supply; and Captive Supply. It distinguishes commercial routes and organizational relationships. Captive participation remains included, but its inclusion does not establish availability to unaffiliated buyers.

Alloy Grade comprises ABD-900AM; ABD-1000AM; AD730; Alloy xx.xx; Alloy xx.xx; Alloy xx.xx; Alloy xx.xx; Alloy 718Plus; Alloy xx.xx; Alloy X-xx.xx; CM247LC; CMSX-xx.xx; Hastelloy X; Haynes xx.xx; Haynes xx.xx; IN-xx.xx; IN-713C; IN-713LC; IN-xx.xx; IN-738LC; IN-xx.xx; IN-xx.xx; MAR-M xx.xx; Nimonic xx.xx; Nimonic 80A; Nimonic xx.xx; PWA xx.xx; PWA xx.xx; Rene xx.xx; Rene xx.xx; Rene xx.xx; Rene xx.xx; Rene 88DT; Rene xx.xx; RR1000; Udimet xx.xx; Udimet xx.xx; Udimet xx.xx; Udimet 720Li; and Waspaloy. Grade identities are retained individually; the taxonomy does not establish equivalence, supplier rights, or qualification for a particular application.

The axes are independent analytical lenses within the Global market. A material offering can be described through several lenses simultaneously, so the categories do not represent automatically additive commercial opportunities.

Table 1. Global Nickel-Based Superalloys for Aerospace Market Segmentation & Coverage

Segmentation	Coverage
Aerospace End Market	• Civil & Nonmilitary State Aviation • Military Aviation • Space Systems • Guided Missile Systems
Alloy Grade	• Alloy xx.xx • Alloy xx.xx • CMSX-xx.xx • Hastelloy X • Waspaloy • Rene 88DT • RR1000 • PWA xx.xx • Haynes xx.xx • Udimet 720Li • CM247LC • Alloy xx.xx • IN-xx.xx • MAR-M xx.xx • Rene xx.xx • IN-xx.xx • Rene xx.xx • PWA xx.xx • IN-713C • Alloy X-xx.xx • Alloy xx.xx • Rene xx.xx • IN-713LC • Nimonic 80A • Alloy 718Plus • Alloy xx.xx • Rene xx.xx • Udimet xx.xx • AD730 • Nimonic xx.xx • Haynes xx.xx • IN-738LC • Nimonic xx.xx • Rene xx.xx • IN-xx.xx • Udimet xx.xx • Udimet xx.xx • IN-xx.xx • ABD-900AM • ABD-1000AM
Buyer Function	• Component & Subassembly Manufacturers • Engine & Propulsion-System Manufacturers • Aerospace Vehicle Manufacturers & Integrators • Maintenance, Repair & Overhaul Organizations • Research & Development Organizations

Table 1 - continued

Segmentation	Coverage

Component Application	• Air-Breathing Propulsion & Auxiliary Power
	  o Turbine Disks & Rotor Hardware
	  o Engine Structures & Auxiliary Systems
	  o Turbine Blades & Vanes
	  o Combustion & Exhaust Components
	  o Compressor Components
	• Rocket & Spacecraft Propulsion
	• Vehicle Structures & Thermal Protection
	• Onboard Systems & Equipment

Demand Stage	• Initial Equipment Production • Replacement & Retrofit Production • Research, Development & Qualification • Repair, Overhaul & Refurbishment
Fulfillment Model	• Order-Dedicated Supply • Stock Supply
Product Form	• Billets and Forging Stock • Plate, Sheet, Strip and Foil • Bars, Rods and Profiles • Ingots • Powder • Wire • Tubes and Pipes
Strengthening Class	• Precipitation-Strengthened Alloys • Solid-Solution-Strengthened Alloys • Dispersion-Strengthened Alloys
Supply Channel	• Producer-Direct Supply • Independent Intermediary Supply • Captive Supply

Sources & Evidence

1. Anticipated acquisition by Acerinox, S.A. of Haynes International, Inc. - Full text decision

· Taxonomy evidence: The decision distinguishes shape, grade, and material specification as separate nickel-alloy descriptors. These broader-market classifications support distinct analytical questions, not a finding that every retained category is a separate competitive market. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))

· Taxonomy evidence: Paragraphs xx.xx-xx.xx report customer purchasing distinctions between flat and long nickel products and shape-specific demand. The investigation did not establish separate competitive markets for every sub-shape; its findings are not global aerospace demand allocations. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))

· Taxonomy evidence: Footnote xx.xx states that the industry has no single plate-versus-sheet delineation, supporting the retained combined flat-product category rather than a universal dimensional split. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))

· Taxonomy evidence: The decision identifies UNS as a widely accepted grade-designation framework. It does not establish equivalence among all proprietary or nationally named grades in this aerospace taxonomy. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))

· Taxonomy evidence: Paragraph xx.xx identifies billets among commercial nickel-product shapes, alongside bars, wires and tubes. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))

· Taxonomy evidence: Paragraphs xx.xx-xx.xx describe nickel-alloy stockholding, delivery availability, producer sales centers, and independent distributors. These are original supply-chain and customer findings, not the report's excluded market-data estimates.

· Taxonomy evidence: Nickel-alloy service centers hold inventory for customer delivery; customers identify stock availability as a purchasing consideration.

· Taxonomy evidence: The investigation distinguishes manufacturer-direct supply from independent distributors and stockists. Its narrower geographic and product scope does not establish worldwide channel shares.

· Taxonomy evidence: Manufacturer-direct supply includes sales through the manufacturer's service centers or sales offices.

· Taxonomy evidence: Independent distributors and stockists are identified as an indirect nickel-alloy supply path.

2. DPC Holdings Limited - Draft Registration Statement, April 14, 2026

· Taxonomy evidence: The publicly accessible April xx.xx 2026 registration-statement record identifies nickel- and cobalt-based superalloy ingots and separately describes ingot supply for aerospace customers. Together with the regulatory form classification, this corroborates ingots as an aerospace material category; mixed-base-metal disclosures do not provide a nickel-only allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))

· Taxonomy evidence: The business record distinguishes superalloy ingots from downstream structural castings and airfoils, supporting the analytical separation of supplied alloy material from component sales value. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))

· Taxonomy evidence: The public registration-statement record distinguishes the issuer's internal superalloy supply from external superalloy sales. This corroborates captive material supply without establishing its global share.

· Taxonomy evidence: The issuer describes supplying superalloy material internally to its affiliated aerospace and industrial-gas-turbine casting facilities; only the aerospace-directed material flow is relevant here.

3. Accelerating Manufacturing Readiness level of ABD®-1000AM for AM of high temperature aerospace components (AMRAM1000)

   · Taxonomy evidence: The Innovate UK project explicitly identifies ABD-1000AM and an aerospace-adoption development objective. Its April 2025-October 2026 funded period establishes developmental activity, not completed production adoption or recurring material sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

   · Taxonomy evidence: The funded project concerns aerospace demonstrator and readiness advancement, providing a development-demand example without disclosing underlying material-purchase quantities. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

   · Taxonomy evidence: The project identifies a combustor-tile demonstrator, supporting combustion-component placement for this developmental activity rather than establishing production-market demand. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

4. New aircraft superalloy - CESAME Project

   · Taxonomy evidence: The European Commission's CESAME results record identifies AD730 as a separately named aircraft-engine alloy evaluated alongside U720Li in a project completed in 2015. This establishes historical aerospace-development relevance, not grade equivalence or current sales. ([cordis.europa.eu](https://cordis.europa.eu/article/id/xx.xx-new-aircraft-superalloy))

5. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI

   · Taxonomy evidence: The aerospace-engine authors explicitly pair UDIMET 720LI with the abbreviation U720LI and identify compressor- and turbine-disk applications, resolving the captured nomenclature inference. This 2000 record does not establish current material sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

   · Taxonomy evidence: The introduction distinguishes conventional UDIMET xx.xx from its 720LI derivative, supporting separate grade identities rather than automatic consolidation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

   · Taxonomy evidence: The introduction identifies aerospace compressor disks as an application of the explicitly named 720LI material. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

   · Taxonomy evidence: The same aerospace-demand-side record identifies turbine disks, corroborating this component category without quantifying its complete rotor-hardware boundary. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

6. Evaluation of the IN 939 Alloy for Large Aircraft Engine Structures

   · Taxonomy evidence: The 2004 aerospace-industry paper identifies IN xx.xx and evaluates its prospective use in large aircraft-engine structures, while distinguishing its established industrial-turbine background. It supports historical developmental relevance, not current aerospace commercial adoption. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2004/Superalloys_2004_441_450.pdf))

   · Taxonomy evidence: The paper's stated aircraft-engine structural application supports placement under engine structures rather than treating all turbine-alloy activity as an airfoil application. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2004/Superalloys_2004_441_450.pdf))

7. ASME International Gas Turbine Institute - 2026 Awards Program

   · Taxonomy evidence: The ASME 2026 awards program identifies paper GT2025-xx.xx as addressing ABD900AM qualification for turbine, aerospace, and energy applications. This independently establishes the exact named material's aerospace-qualification context, not production approval or sales. ([event.asme.org](https://event.asme.org/Events/media/library/resources/turbo/Turbo-2026-Awards-Program.pdf))

8. SAE AMS7075 - Nickel Alloy, Corrosion- and Heat-Resistant, Powder for Additive Manufacturing

   · Taxonomy evidence: The public scope of AMS7075, issued January xx.xx 2026, explicitly covers a corrosion- and heat-resistant nickel alloy supplied as prealloyed powder. This adds a current aerospace-material-standard anchor for the powder form without asserting a proprietary-grade equivalence not stated on the page. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams7075-nickel-alloy-corrosion-heat-resistant-powder-additive-manufacturing-50ni-20co-17cr-31w-23ti-21al-21mo-18cb-nb-15ta-004c-0005b))

9. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: The chapter's superalloy material listing explicitly names Inconel xx.xx. It establishes a material-name anchor but not the full designation crosswalk or current aerospace commercial allocation. No experimental conditions are used for classification. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
   - Taxonomy evidence: The same listing explicitly names Inconel 713LC. This supports partial identity recognition for the retained IN-713LC category; exact normalization and current aerospace-destination trade remain unresolved. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
   - Taxonomy evidence: The aerospace-applications section identifies aircraft turbine engines and rocket engines as distinct superalloy-consuming systems; it does not establish a global allocation. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
   - Taxonomy evidence: The chapter describes nickel-superalloy use across compressor, combustion and turbine sections of aircraft engines. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
   - Taxonomy evidence: Nickel-superalloy turbine blades are explicitly identified. This passage does not separately establish every stationary-vane inclusion. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
   - Taxonomy evidence: The chapter identifies superalloy turbine disks as an aerospace application. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
   - Taxonomy evidence: IN-xx.xx compressor disks and blades, and stronger nickel-base alloys for later compressor stages, are described. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
   - Taxonomy evidence: Combustor materials and the downstream exhaust-nozzle region are distinguished from compressor and turbine components. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
   - Taxonomy evidence: Rocket-engine turbopump blades, disks and housings are identified as superalloy applications, including IN-xx.xx. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
   - Taxonomy evidence: Section xx.xx provides illustrative aerospace superalloy identities, not an exhaustive commercial grade census.
   - Taxonomy evidence: Listed aerospace nickel-base grade.
   - Taxonomy evidence: Listed aerospace superalloy grade.
   - Taxonomy evidence: Named material identity; current commercial allocation is not established.
   - Taxonomy evidence: Identified as an aero-engine blade alloy.

10. 2022 Economic Census - Aerospace Product and Parts Manufacturing Questionnaire (MC-33641)
    - Taxonomy evidence: The questionnaire defines rebuilt/remanufactured products by restoration of a used or worn article and separately distinguishes repair services. This supports lifecycle classification by the existing article being restored, not merely the presence of newly manufactured parts. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
    - Taxonomy evidence: The questionnaire separately identifies new products, rebuilt/remanufactured products, services and engine prototypes, supporting lifecycle distinctions without resolving material-order destinations. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
    - Taxonomy evidence: The definition allows reused, repaired, and new parts within a rebuilt article, supporting the rule that new material consumption does not automatically constitute initial-equipment or standalone replacement production. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
    - Taxonomy evidence: Rebuilt/remanufactured products are distinguished from new products and repair services, supporting a restoration-purpose category. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
    - Taxonomy evidence: The questionnaire's reporting unit is an establishment, providing an official statistical anchor for establishment-level buyer-role attribution rather than classifying an entire corporate group as one consumer type. It does not identify the recipient of every material order. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
    - Taxonomy evidence: New aircraft engines and new engine parts are explicit product classes. Newly manufactured parts are not necessarily destined for initial installation. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
    - Taxonomy evidence: Civilian and military aircraft engines and parts are separately identified, supporting the aviation-sector distinction rather than material volumes. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
    - Taxonomy evidence: Military aircraft engines and associated parts have explicit reporting categories. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
11. Customs Tariff 2026 - Chapter 75: Nickel and Articles Thereof
    - Taxonomy evidence: Chapter xx.xx separately recognizes unwrought nickel alloys, powders, long products, wire, flat products and tubular products. These classifications cover a wider material boundary than aerospace superalloys. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
    - Taxonomy evidence: Heading xx.xx recognizes unwrought nickel alloys, providing a broader material-form crosswalk rather than direct aerospace-ingot verification. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
    - Taxonomy evidence: Subheading xx.xx separately identifies nickel-alloy bars, rods and profiles. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
    - Taxonomy evidence: Heading xx.xx groups plate, sheet, strip and foil, with a distinct nickel-alloy subdivision. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
    - Taxonomy evidence: Subheading xx.xx distinguishes nickel-alloy wire from bars, rods and profiles. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
    - Taxonomy evidence: Subheading xx.xx identifies nickel-alloy tubes and pipes separately from fittings. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
    - Taxonomy evidence: Heading xx.xx separately recognizes nickel powder products. It does not isolate the aerospace-superalloy subset. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
12. ASTM B637-26 - Precipitation-Hardening and Cold Worked Nickel Alloy Bars, Forgings, and Forging Stock
    - Taxonomy evidence: The public scope distinguishes forging stock from finished forgings within its nickel-alloy material coverage. ([store.astm.org](https://store.astm.org/standards/b637))
    - Taxonomy evidence: The specification expressly covers nickel-alloy rod and bar as supplied material forms. ([store.astm.org](https://store.astm.org/standards/b637))
    - Taxonomy evidence: The public scope recognizes precipitation-hardenable nickel alloys intended for moderate- or high-temperature service. ([store.astm.org](https://store.astm.org/standards/b637))

13. SAE AMS5670H - Nickel Alloy Bars, Forgings, Rings and Stock for Rings, Forgings and Heading

    · Taxonomy evidence: The aerospace-material scope separately includes stock for forging, rings or heading, supporting a material-stock distinction from component-specific forgings. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams5670h-nickel-alloy-corrosion-heat-resistant-bars-forgings-and-rings-stock-rings-forgings-heading-72ni-155cr-095cb-nb-25ti-070al-70fe-x750-xx.xx-f-xx.xx-c-solution-heat-treated-precipitation-hardenable))

    · Taxonomy evidence: The specification identifies X750 as precipitation-hardenable despite its stated delivered condition, supporting separation of alloy family from delivery temper. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams5670h-nickel-alloy-corrosion-heat-resistant-bars-forgings-and-rings-stock-rings-forgings-heading-72ni-155cr-095cb-nb-25ti-070al-70fe-x750-xx.xx-f-xx.xx-c-solution-heat-treated-precipitation-hardenable))

14. SAE MAM5914 - Nickel Alloy, Corrosion and Heat Resistant, Sheet, Strip, and Foil

    · Taxonomy evidence: The public aerospace-material scope recognizes sheet, strip and foil as supplied forms within a nickel-alloy material family. This supports category recognition, not current sales or a universal dimensional crosswalk. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/mam5914-nickel-alloy-corrosion-heat-resistant-sheet-strip-foil-525ni-19cr-30mo-50cb-090ti-050al-18fe-consumable-electrode-vacuum-induction-melted-precision-cold-rolled-solution-heat-treated))

15. SAE AMS5832E - Nickel Alloy, Corrosion and Heat Resistant, Welding Wire

    · Taxonomy evidence: The inspected historical revision's public scope recognizes corrosion- and heat-resistant nickel-alloy welding wire as a supplied material form. It does not establish current customer qualification or sales. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams5832e-nickel-alloy-corrosion-heat-resistant-welding-wire-525ni-19cr-30mo-51cb-090ti-050al-18fe-consumable-electrode-vacuum-induction-melted))

16. SAE AMS5589H - Nickel Alloy, Corrosion- and Heat-Resistant, Seamless Tubing

    · Taxonomy evidence: The March 2026 aerospace-material specification explicitly recognizes Inconel xx.xx seamless tubing, directly connecting a tubular material form to an in-scope nickel-superalloy identity. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams5589h-nickel-alloy-corrosion-heat-resistant-seamless-tubing-525ni-19cr-30mo-51cb-nb-090ti-050al-18fe-inconel-xx.xx-consumable-electrode-remelted-vacuum-induction-melted-xx.xx-f-xx.xx-c-solution-heat-treated))

17. SAE AMS7006 - Nickel Alloy, Corrosion- and Heat-Resistant, Powder for Additive Manufacturing

    · Taxonomy evidence: The aerospace-material specification recognizes supplied nickel-alloy powder for additive manufacturing as a material category distinct from finished components. No technical production conditions are used for segmentation. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams7006-nickel-alloy-corrosion-heat-resistant-powder-additive-manufacturing-525ni-19cr-30mo-51cb-nb-090ti-050al-18fe))

18. Materials Needs and R&D Strategy for Future Military Aerospace Propulsion Systems - Appendix E

    · Taxonomy evidence: The aerospace-propulsion case study distinguishes solid-solution and precipitation strengthening within its nickel-superalloy discussion. It supports an alloy-family axis separate from delivered product form. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

    · Taxonomy evidence: The case study explicitly recognizes solid-solution-strengthened nickel material within the superalloy discussion. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

    · Taxonomy evidence: The case study explicitly recognizes precipitation strengthening as a nickel-superalloy classification distinction. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))

19. Welding and Brazing of Nickel and Nickel-Base Alloys

- Taxonomy evidence: The public abstract distinguishes solid-solution-hardening, precipitation-hardening and dispersion-hardening nickel-base alloy families. Its broader high-nickel nonheat-treatable category is not adopted because the report boundary is structural superalloys. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))
- Taxonomy evidence: The abstract separately recognizes the solid-solution-hardening nickel-base alloy family. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))
- Taxonomy evidence: The abstract identifies precipitation-hardening nickel-base alloys and explicitly connects them to aerospace applications. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))
- Taxonomy evidence: The abstract recognizes dispersion-hardening nickel-base material as a distinct elevated-temperature family. This historical classification does not establish contemporary sales. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))

20. Longitudinal Shear Behavior of Several Oxide Dispersion Strengthened Alloys

- Taxonomy evidence: NASA's August 1978 record explicitly distinguishes commercial oxide-dispersion-strengthened alloys from experimental variants in turbine-related materials research. It supports historical commercial recognition, not present aerospace deliveries or recurring supply. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))

21. NASA and Superalloys: A Customer, a Participant, and a Referee

- Taxonomy evidence: The 2008 paper records IN718 in Space Shuttle wing backing and thermal-protection supporting structures, establishing a historical non-engine structural application. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
- Taxonomy evidence: Historical examples include IN718 in Shuttle rudder-speed-brake hardware and International Space Station battery pressure vessels, supporting non-propulsion equipment uses. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
- Taxonomy evidence: Documented Shuttle and space-station applications establish space hardware as a distinct superalloy end-use domain, not a current-demand estimate. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
- Taxonomy evidence: NASA describes superalloy research and development involving government, industry and universities, separately from operational vehicle applications. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))
- Taxonomy evidence: The paper distinguishes research participants and funded industry/university development roles. Funding responsibility does not identify the recipient of every material purchase. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))

22. North American Industry Classification System, United States, 2022

- Taxonomy evidence: The 2022 classification distinguishes aerospace manufacturing, repair and R&D establishments. It supplies a business-role crosswalk, not a ready-made material-buyer partition. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Aircraft parts, auxiliary equipment, propulsion parts and vehicle-parts manufacturing are recognized activities, supporting a component-producing business role. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Aircraft-engine manufacturing and guided-missile/space-vehicle propulsion-unit manufacturing are separately identified activities. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Complete aircraft, guided-missile and space-vehicle manufacturing are distinguished from supplying parts; satellite manufacturing is separately cross-referenced. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Aerospace R&D outside prototype production is separately cross-referenced, demonstrating why research activity and manufacturing output should not be conflated. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
- Taxonomy evidence: Guided-missile manufacturing and associated propulsion/parts activities are recognized aerospace categories; the classification does not establish nickel-superalloy content. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))

23. Parts Manufacturer Approval (PMA) - Design Approval

- Taxonomy evidence: The FAA recognizes replacement and modification articles as distinct commercial approval subjects. This supports aftermarket-purpose classification, not an approval requirement for base alloy material. ([faa.gov](https://www.faa.gov/aircraft/air_cert/design_approvals/pma/pma_des))
- Taxonomy evidence: The page distinguishes articles produced for sale from articles produced by owners/operators for their own equipment, supporting separation of producer role from ultimate operator. ([faa.gov](https://www.faa.gov/aircraft/air_cert/design_approvals/pma/pma_des))
- Taxonomy evidence: The FAA explicitly recognizes repair-station fabrication of articles for in-house repair, showing that maintenance organizations can have material-consuming fabrication roles. ([faa.gov](https://www.faa.gov/aircraft/air_cert/design_approvals/pma/pma_des))

24. 76th PMXG Welding Shops are forging strong bonds

- Taxonomy evidence: The September xx.xx 2015 depot account describes aircraft-engine component repair and lists Inconel among handled materials. It does not identify every consumed grade or product form. ([tinker.af.mil](https://www.tinker.af.mil/News/Article-Display/Article/xx.xx/76th-pmxg-welding-shops-are-forging-strong-bonds/))
- Taxonomy evidence: The Air Force propulsion-maintenance organization documents its own component-restoration activity, providing historical demand-side evidence for the MRO business role. ([tinker.af.mil](https://www.tinker.af.mil/News/Article-Display/Article/xx.xx/76th-pmxg-welding-shops-are-forging-strong-bonds/))
- Taxonomy evidence: The account connects Inconel-handling activity with a military aircraft-engine maintenance setting; it is not evidence of current material quantities. ([tinker.af.mil](https://www.tinker.af.mil/News/Article-Display/Article/xx.xx/76th-pmxg-welding-shops-are-forging-strong-bonds/))

25. Development and validation of a powder HIP route for high temperature Astroloy to manufacture Ultrafan® IP Turbine Casings

- Taxonomy evidence: The 2020-2021 project report identifies nickel-superalloy material for aircraft-engine turbine casings, supporting a structural-engine component category. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting))
- Taxonomy evidence: The funded project concerns development and demonstration of aerospace superalloy casing hardware, establishing developmental rather than recurring production activity. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting))
- Taxonomy evidence: The official project record identifies a technological research organization coordinating the aerospace-material development activity; it does not disclose every material-order recipient. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting))

26. Transforming the manufacturing of aero-engine casing components for Rolls-Royce and its supply chain

- Taxonomy evidence: The institutional impact record distinguishes a provider delivering prototype engine casings from the engine-company customer, supporting separate component-supply and propulsion-system roles. ([impact.ref.ac.uk](https://impact.ref.ac.uk/casestudies/CaseStudy.aspx?Id=xx.xx))
- Taxonomy evidence: The engine company is identified as the customer for casing-development work. This establishes a customer role, not direct purchase of every underlying material lot. ([impact.ref.ac.uk](https://impact.ref.ac.uk/casestudies/CaseStudy.aspx?Id=xx.xx))
- Taxonomy evidence: The record identifies superalloy aero-engine casings as commercially consequential components, corroborating their placement within engine structures. ([impact.ref.ac.uk](https://impact.ref.ac.uk/casestudies/CaseStudy.aspx?Id=xx.xx))

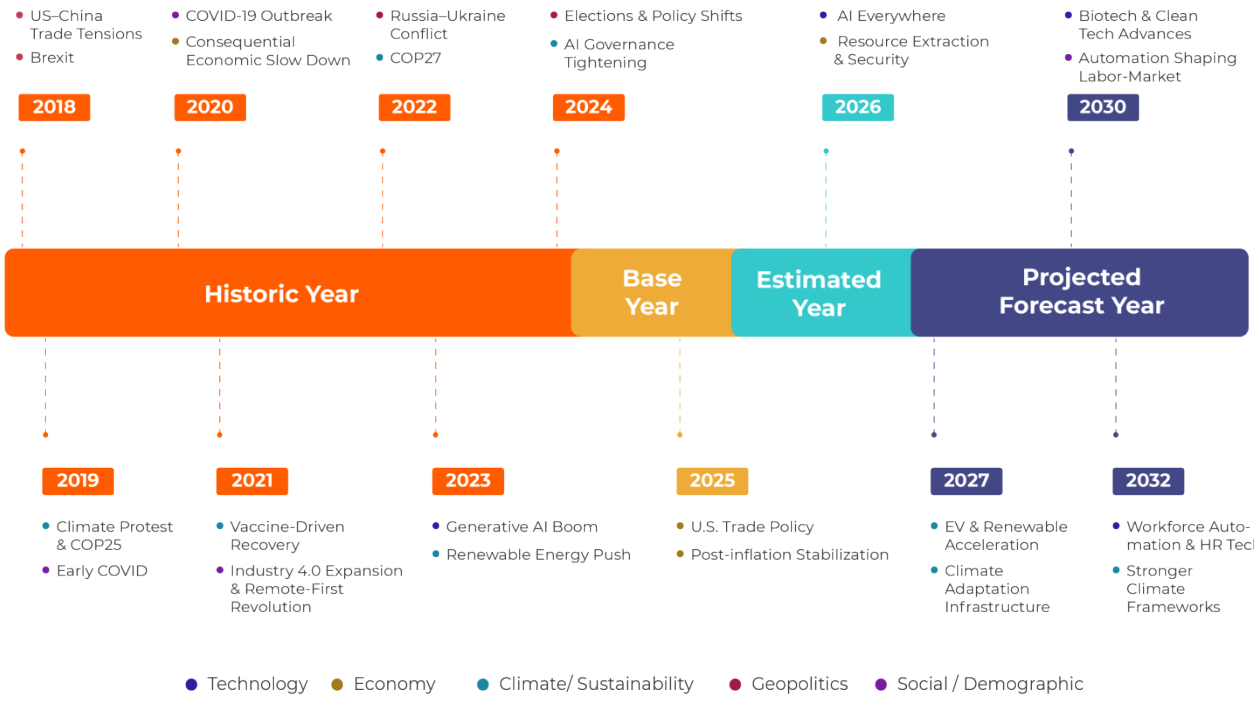
27. NATO Policy for civil/military aircraft operating in support of NATO or NATO-led missions and operations
    - Taxonomy evidence: The ICAO-hosted NATO presentation distinguishes civil aircraft from state aircraft and identifies military, customs and police services within the state-aircraft concept. ([icao.int](https://www.icao.int/sites/default/files/EURNAT/MeetingDocs/ICAO%20EUR%20Region%20Civil-Military%20Cooperation%20Meetings/2015%20ICAO%20Civil-Military%20Cooperation%20Symposium/ICMCS-PPT10.pdf))
    - Taxonomy evidence: Customs and police aircraft demonstrate why a commercial aviation partition needs an explicit treatment for nonmilitary state aviation; their material demand is not quantified. ([icao.int](https://www.icao.int/sites/default/files/EURNAT/MeetingDocs/ICAO%20EUR%20Region%20Civil-Military%20Cooperation%20Meetings/2015%20ICAO%20Civil-Military%20Cooperation%20Symposium/ICMCS-PPT10.pdf))
    - Taxonomy evidence: The presentation treats military-registered aircraft as state aircraft, supporting a distinct military-aviation program classification. ([icao.int](https://www.icao.int/sites/default/files/EURNAT/MeetingDocs/ICAO%20EUR%20Region%20Civil-Military%20Cooperation%20Meetings/2015%20ICAO%20Civil-Military%20Cooperation%20Symposium/ICMCS-PPT10.pdf))
28. Annex 6 - Operation of Aircraft
    - Taxonomy evidence: ICAO's Annex xx.xx account separately recognizes international commercial air transport and general aviation, supporting inclusion of both within the civil-aviation domain without equating civil aviation with airlines alone. ([icao.int](https://www.icao.int/sites/default/files/postalhistory/annex_6_operation_of_aircraft.htm))
29. APICS CPIM 2019 - Part 1 Excerpt
    - Taxonomy evidence: The order-promising discussion distinguishes inventory-backed fulfillment from order-driven supply. The proposed binary taxonomy adapts these commercial concepts rather than reproducing every production-planning category.
    - Taxonomy evidence: The excerpt distinguishes available inventory from inventory already allocated or reserved.
    - Taxonomy evidence: Make-to-order commitments consider material and capacity availability. This supports order-driven supply, but not a universal aerospace rule for reserved buffers.
30. AWI brings its largest ever range of high temperature alloys to Farnborough International Airshow
    - Taxonomy evidence: The company's aerospace business announcement describes made-to-order high-temperature alloy wire alongside held inventory. This corroborates a commercial example, not a market-wide fulfillment allocation.
31. JSC 27301H
    - Taxonomy evidence: Section xx.xx.xx.xx identifies Inconel xx.xx as a superalloy example in spacecraft material requirements.
    - Taxonomy evidence: Section xx.xx.xx.xx identifies Mar-M-xx.xx as a superalloy example. This establishes grade relevance, not inclusion of component sales value.
32. Browse Topic: Vacuum
    - Taxonomy evidence: AMS5966D explicitly names Alloy xx.xx.
    - Taxonomy evidence: AMS5960B explicitly names Alloy xx.xx+, separately from ordinary xx.xx references.
    - Taxonomy evidence: AMS5661H names Alloy xx.xx as a nickel-iron material; its listed identity is consistent with the frozen nickel-predominant inclusion rule.
    - Taxonomy evidence: AMS5598G and AMS5583G name X750 in different material forms, supporting one grade identity across those forms.
    - Taxonomy evidence: AMS5545H explicitly names Rene xx.xx.
33. AIAA-2024-0997
    - Taxonomy evidence: The aerospace propulsion discussion explicitly identifies Haynes xx.xx among established superalloys.

34. Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission
    - Taxonomy evidence: The engine manufacturer distinguishes Rene xx.xx from Rene 88DT despite shared chemistry, supporting retention as separate recognized grade identities.
    - Taxonomy evidence: The manufacturer identifies Rene 88DT in its GE90 material history.
35. Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials
    - Taxonomy evidence: The institutional impact record identifies RR1000 adoption in Rolls-Royce aero-engines.
    - Taxonomy evidence: The record identifies U720Li and aero-engine adoption. Equating that abbreviation with the displayed Udimet 720Li designation remains an explicit nomenclature inference.
36. Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures
    - Taxonomy evidence: Identifies IN-xx.xx among nickel-base superalloys; current aerospace trade is not established.
    - Taxonomy evidence: Names 713C; the IN-713C crosswalk and current aerospace trade remain unverified.
    - Taxonomy evidence: Identifies Rene xx.xx among nickel-base superalloys; current aerospace trade is not established.
    - Taxonomy evidence: Identifies Udimet xx.xx among nickel-base superalloys; current aerospace trade is not established.

1.4. Years Considered for the Study

The study designates 2024 as the historical year, 2025 as the base year, 2026 as the estimated year, and 2032 as the forecast year.

Figure 1. Global Nickel-Based Superalloys for Aerospace Market, Years Considered for the Study



1.5. Currency Considered for the Study

The reporting currency is the U.S. dollar (USD). Monetary reporting uses absolute USD values.

1.6. Language Considered for the Study

The report is published in U.S. English.

1.7. Key Stakeholders

- Nickel-based superalloy producers: decisions about grade and product-form participation, buyer qualification commitments, direct supply relationships, and the distinction between externally offered and captive material.
- Independent intermediaries and material distributors: decisions about represented offerings, distribution rights, documentation continuity, inventory responsibility, and Stock Supply versus Order-Dedicated Supply commitments.
- Component & Subassembly Manufacturers: decisions about eligible material sources, required product forms, supplier switching, and the relationship between material procurement and downstream customer requirements.
- Engine & Propulsion-System Manufacturers and Aerospace Vehicle Manufacturers & Integrators: decisions about material-source acceptance, supplier oversight, supply continuity, and alignment of procurement with the relevant aerospace application and program.
- Maintenance, Repair & Overhaul Organizations: decisions distinguishing material procurement for replacement production from material procurement for repair, overhaul, and refurbishment, including the applicability of buyer and program requirements.
- Research & Development Organizations: decisions about sourcing included materials for research, development, and qualification without treating investigational participation as evidence of established production adoption.
- Regulators, public procurement authorities, and standards bodies: interpretation of the jurisdiction-specific legal, purchasing, and qualification conditions relevant to the stated offering and buyer, without equating authorization with adoption.
- Investors and corporate strategy teams: decisions about supplier positioning, partnerships, acquisitions, and commercial entry that distinguish the accepted aerospace-material scope from diversified company activities and downstream equipment businesses.

2. Research Methodology

2.1. Introduction

The Nickel-Based Superalloys for Aerospace study frames commercial decisions around the relationship between a specified material offering and an aerospace purchaser's requirements. It separates the accepted material categories from adjacent upstream inputs and downstream activities, then uses the buyer, application, demand-stage, fulfillment, and channel classifications to define the questions that commercial evidence must answer.

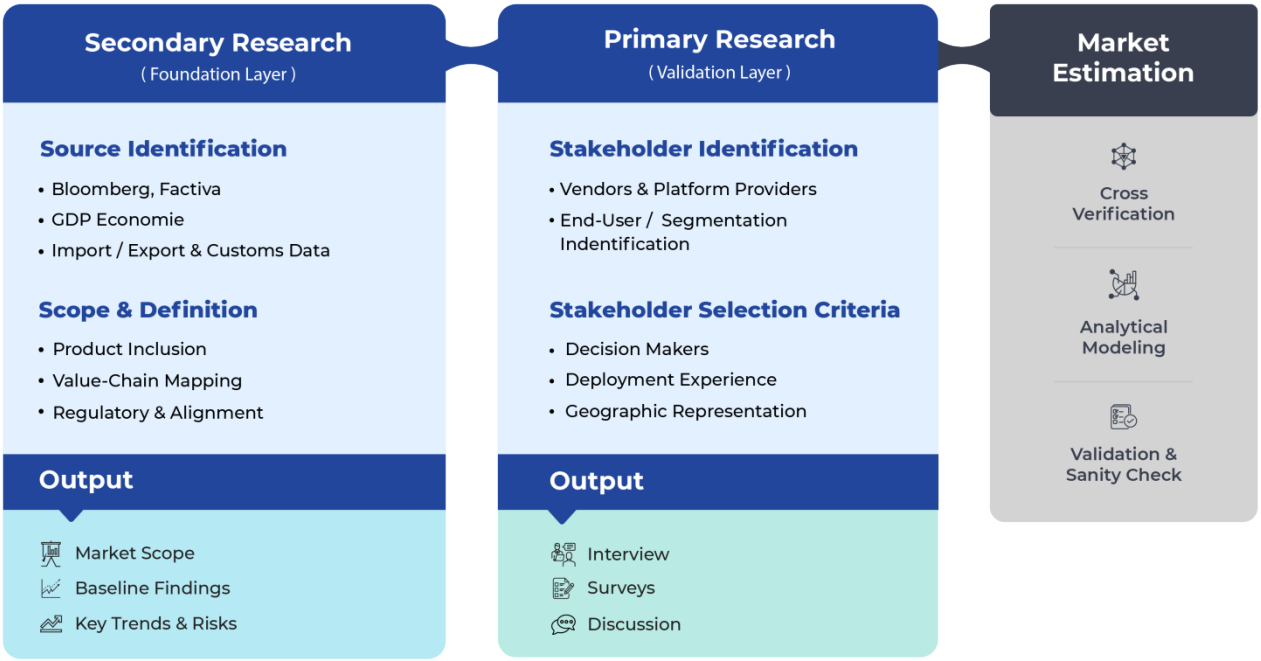
The approach distinguishes observed business facts from economic interpretation. Technical category names provide commercial classification; they do not call for examination of material preparation, experimental procedures, or production methods.

2.2. Research Design

The unit of commercial interpretation is a defined material offering and its business relationship: the relevant alloy grade, product form, aerospace use, buyer function, and supply arrangement. A company-wide claim is not automatically transferable to each offering, application, or jurisdiction in which that company may participate.

Evidence is interpreted according to its authority, effective period, and actual coverage. An advertised offering, an announced development, a permitted business activity, and a buyer-qualified supply relationship establish different facts. The design preserves those distinctions so that competitive or procurement conclusions do not exceed their commercial premises.

Figure 2. Global Nickel-Based Superalloys for Aerospace Market, Research Design



2.2.1. Primary Research

The analyst team conducted primary research as a qualitative challenge layer for market definition, segmentation, demand conditions, adoption barriers, and competitive interpretation. This work tested analytical assumptions and sharpened explanations of market mechanisms without serving as standalone support for numerical estimates.

The qualitative challenge layer is evaluated alongside secondary evidence within the accepted market scope. It informs conditional market explanations and hypotheses for subsequent quantitative analysis. Numerical estimates require their own supporting evidence, and a forecast derived from a qualitative assumption does not independently validate that assumption. Final interpretation must reconcile the qualitative findings with the completed quantitative results.

2.2.2. Secondary Research

Secondary records have distinct evidentiary roles. Official portfolios can establish advertised offerings; mandatory filings can establish disclosed business activities and ownership relationships; licensing and distribution records can establish specified commercial rights; and buyer policies or public awards can establish particular purchasing conditions or dated commitments. Regulatory records establish status only within their stated jurisdiction and scope.

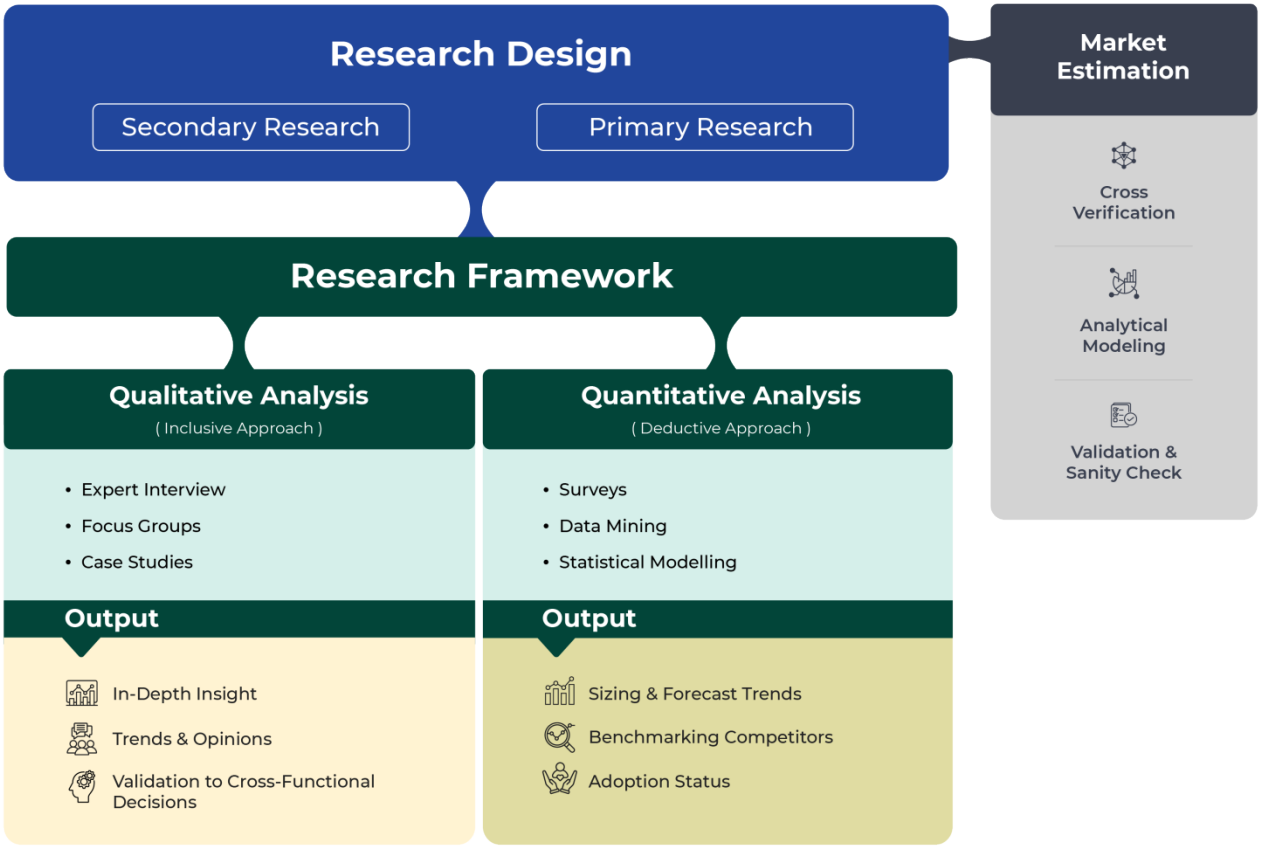
These source roles do not make the records interchangeable. An authorization does not establish adoption, a public award does not establish access to every buyer, and an announcement does not establish continuing availability. Where a claim depends on several commercial conditions, each condition requires support appropriate to its meaning.

2.3. Research Framework

Product Form, Strengthening Class, and Alloy Grade identify the studied offerings. Component Application, Demand Stage, and Aerospace End Market identify the intended use and procurement context. Buyer Function identifies the purchasing role, while Fulfillment Model and Supply Channel distinguish how supply is arranged and through whom it passes.

These relationships organize the commercial questions without determining their answers. Competitive interpretation must connect an offering to an evidenced buyer requirement and supply relationship before drawing implications for entry, switching, distribution, or investment. The Global boundary remains constant across these analytical views.

Figure 3. Global Nickel-Based Superalloys for Aerospace Market, Research Framework



2.3.1. Qualitative Analysis

Qualitative analysis addresses why a buyer could select, retain, or reject a supplier for a particular alloy grade and product form. Relevant commercial questions concern buyer eligibility, documentation, switching requirements, licensing and distribution rights, delivery commitments, inventory responsibility, and supply continuity. These questions are interpreted within the relevant Component Application, Demand Stage, and Aerospace End Market rather than generalized across all aerospace procurement.

Commercial alternatives are assessed conditionally. Stock Supply and Order-Dedicated Supply, for example, provide distinct settings for examining availability commitments and purchasing responsibility; neither category alone establishes a superior procurement choice.

2.3.2. Quantitative Analysis

Quantitative interpretation requires compatible offering boundaries, aerospace attribution, organizational scope, and study periods. A disclosure about an entire materials business cannot be assigned wholly to this study merely because the business also offers an included alloy grade. Likewise, evidence concerning one product form or aerospace application does not establish the same commercial position across the remaining categories.

The segmentation axes are intersecting views of the same market. Comparisons must therefore distinguish a change in classification from a distinct economic activity and must not

combine overlapping views as separate opportunities. Monetary presentation follows the absolute USD reporting convention.

2.4. Market Size Estimation

The measurement subject is nickel-based superalloy material within the accepted aerospace scope, not the complete business of every participating supplier or the full value of downstream engines, components, vehicles, or maintenance services. Inclusion of material used in research or repair does not convert the associated research or service activity into a separate material offering.

Because the accepted Product Form categories can occur at different points in a material's commercial progression, category coverage does not establish an additive monetary perimeter. Any estimate requires an explicit economic boundary before intermediate transfers and converted material can be interpreted together. Captive Supply remains an included commercial relationship but does not, by itself, establish an external sale.

2.4.1. Top-Down Approach

For a top-down perspective, a broader materials or aerospace business aggregate is relevant only to the extent that its boundary can be connected to the accepted nickel-based superalloy material categories and aerospace uses. General nickel activity and complete aerospace equipment businesses provide context rather than direct substitutes for the studied offering.

A broad aggregate cannot establish how activity is distributed among grades, product forms, buyers, or channels without supporting attribution. The Global boundary must also be preserved: evidence concerning a selected country, customer, or program cannot stand for the entire market merely because it is commercially prominent.

2.4.2. Bottom-Up Approach

For a bottom-up perspective, supplier- and offering-level records are relevant when they connect an identifiable business to an included grade or product form and an aerospace commercial role. Portfolio breadth alone does not establish access to each buyer or application, and a distributor listing does not by itself establish a separate producer capability.

Interpretation must distinguish producers, independent intermediaries, and captive relationships. Multiple organizations referring to the same material or supply chain do not automatically represent independent economic opportunities. Any aggregation requires a consistent boundary that separates genuinely distinct activities from successive representations of the same material.

2.5. Data Triangulation

Corroboration requires records that support the same claim within compatible periods and commercial boundaries. A product listing, a buyer-eligibility record, and a contractual disclosure may establish complementary conditions rather than independently prove the

same conclusion. Repetition of an originating announcement does not create independent confirmation.

Where records concern different entities, applications, rights, or supply relationships, interpretation must retain those differences. Conflicts are resolved by the authority and scope of the records for the particular claim, not by selecting the account most favorable to a proposed commercial conclusion.

Figure 4. Global Nickel-Based Superalloys for Aerospace Market, Data Triangulation

2.6. Research Outcomes

The study is intended to support supplier screening, buyer targeting, sourcing choices, channel evaluation, and assessment of commercial entry requirements for Nickel-Based Superalloys for Aerospace. Decision support depends on connecting an identified material offering to its buyer, application, supply relationship, and applicable access conditions, rather than treating inclusion in an aerospace portfolio as sufficient evidence of an addressable opportunity.

Conclusions should distinguish documented commercial participation from conditional opportunities and identify the qualification, contractual, or jurisdiction-specific facts that would change a business decision. The analytical purpose is to explain choices and constraints without presuming a preferred supplier, alloy grade, or route to market.

2.7. Research Assumptions

- Aerospace attribution is specific to the studied material use. A supplier's broader nickel-alloy or diversified materials activity is not assumed to belong wholly to this

market; commercial comparisons require a defensible connection to the accepted aerospace scope.

- An included alloy grade or product form is a study category, not proof of buyer eligibility, current availability, or interchangeability. Sourcing and switching interpretations remain conditional on the applicable buyer and offering requirements.
- The segmentation axes describe intersecting commercial attributes. Their inclusion does not make them additive opportunities, and successive material transfers must not automatically be treated as distinct underlying demand.
- An organizational relationship is interpreted within its documented commercial scope. Ownership, licensing, distribution, and captive arrangements do not automatically confer equivalent rights or customer access on every affiliated business.
- Forward-looking commercial interpretations are conditional on relevant buyer programs, procurement decisions, supply commitments, and applicable access conditions. A prospective application or announced offering is not assumed to become an established purchasing relationship.

2.8. Research Limitations

- A disclosure combining aerospace and non-aerospace activities, several product forms, or multiple businesses cannot independently resolve the corresponding narrower commercial position. Comparisons must remain within the disclosure's actual scope rather than assigning the whole business to an included category.
- A portfolio entry or public announcement does not establish buyer qualification, contractual availability, or permission to supply in every jurisdiction. Commitments based on those conditions require the relevant commercial or authoritative record.
- A grade identity alone does not establish equivalence across suppliers, product forms, or aerospace applications. Substitution conclusions must remain bounded to documented buyer requirements and cannot be inferred from a shared grade label.
- Production location, intermediary location, purchasing location, and ultimate aerospace use describe different geographic relationships. Geographic interpretations require an explicit attribution basis and must not narrow the Global market to the locations visible in particular examples.
- Captive Supply and externally accessible supply have different commercial relationships. Participation within a corporate group does not establish that the same material offering is available to an independent buyer, limiting conclusions about entry routes and alternative sourcing.

3. Executive Summary

3.1. Introduction

The Global Nickel-Based Superalloys for Aerospace market is organized around customer-accepted material relationships, not interchangeable alloy catalogs. Buyers need the required grade and form from an eligible source, with usable records and the commitment required for that purchase. Boeing's contractual sourcing controls and GE Aerospace's separate bidding and order-administration routes show why acceptance, account access, and an order are distinct commercial gates. Sellers must identify both the purchasing entity and acceptance authority before treating a prospect as executable business.

Authorized engine improvements provide a conditional purchasing trigger across new and in-service engines. Rolls-Royce reported the Trent xx.xx XE phase-one blade improvement's June 2025 certification and installation in both settings. GE Aerospace's repair and serviceable-part reuse activities provide a counterforce to new-replacement purchasing. Suppliers should distinguish initial installation, retrofit, and repair-related requirements rather than assume aerospace activity converts uniformly into new-material orders.

Sources & Evidence

1. Boeing Suppliers - Quality
   · Boeing makes supplier-quality applicability contractual and connects raw-material sourcing controls to contractual engineering and quality requirements. This supports distinguishing customer acceptance from general account access. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))
2. Rolls-Royce Holdings Plc - 2025 Full Year Results
   · Rolls-Royce's 2025 results report June 2025 certification of the Trent xx.xx XE phase-one blade improvement and fitting to new and in-service engines. The record does not identify individual material awards. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
3. GE Aerospace - 2025 Sustainability Report
   · GE Aerospace describes component repair and serviceable-part reuse as alternatives that reduce requirements for new replacement parts. Their material consequences depend on the selected workscope. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
4. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition
   · Boeing D607 prohibits unauthorized substitutions, recognizes authorized alternatives, and makes permitted deviations purchase-contract-specific. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
5. GE Aerospace Supplier Portal
   · GE Aerospace separates potential-supplier inquiries and bidding from order inquiry, acknowledgment, invoicing, and payment administration. (supplier.geaerospace.com)

3.2. CXO Perspective

For producer CEOs and finance leaders, dedicated supply or investment needs a commitment-backed commercial case. ATI Inc. distinguishes multiyear commercial terms from contracts typically established through accepted purchase orders and discloses delayed or incomplete cost recovery through adjustment mechanisms. Commitments should align

purchasing obligations, payment, termination, and schedule-change responsibilities. Waiting preserves flexibility but can delay account access; longer agreements retain planning value without necessarily protecting the entire exposure.

For procurement leaders, corporate diversification and site resilience are separate objectives. Acerinox's completed acquisition of Haynes International, Inc. connects Haynes and VDM Metals under common control. Separate facilities may still protect against local disruption, but these businesses do not provide independent parent exposure. Adding an unrelated source is useful only when its material acceptance and delivery undertaking satisfy the actual requirement.

For sellers serving covered U.S. defense contracts, origin eligibility must be resolved under the governing specialty-metal clause before award. DFARS xx.xx-xx.xx and xx.xx-xx.xx impose different conditions; the latter includes qualifying-country routes and specified exceptions. Warehouse location alone is not the eligibility test. This is a contract-specific access risk, not a U.S.-only restriction on the Global market.

Sources & Evidence

1. ATI 2025 Annual Report
   · ATI distinguishes multiyear commercial terms from contracts typically established through accepted or acknowledged purchase orders. It also discloses delayed or incomplete recovery through surcharge and index mechanisms, while recognizing supply-planning benefits from longer agreements. ([s27.q4cdn.com](https://s27.q4cdn.com/xx.xx/files/doc_financials/2025/ar/ATI-2025-Annual-Report-web-FINAL.pdf))
2. VDM Metals - Acerinox Completes the Acquisition of Haynes International
   · The November xx.xx 2024 announcement records Acerinox's completed Haynes acquisition and connects Haynes and VDM in its high-performance-alloys business. Distinguishing corporate exposure from site resilience is the bounded commercial implication. ([vdm-metals.com](https://www.vdm-metals.com/en/company/news-and-events/news-archive/single/acerinox-completes-the-acquisition-of-haynes-international))
3. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
   · DFARS xx.xx-xx.xx addresses specialty metals in covered articles, recognizes qualifying-country origins and specified exceptions, and excludes unincorporated specialty-metal mill products from a blanket commercial-off-the-shelf exception. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
4. DFARS 252.225-7008 - Restriction on Acquisition of Specialty Metals
   · DFARS xx.xx-xx.xx requires specialty metal delivered under the covered contract to be melted or produced in the United States or its outlying areas. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-specialty-metals.))

3.3. New Revenue Opportunities

Conditional revenue opportunities include substantiated material assurance for Component & Subassembly Manufacturers, accountable strip, foil, and tube sourcing for form-specific buyers, project-bounded ABD powder purchases, and shared EU stocking where customer requirements and customs status align. These are separate purchasing routes, not additive opportunities. Capture requires accepted upstream access and a demonstrated service gap, or the relevant project authority, seller permissions, and regional fulfillment obligations. An

adequate incumbent or direct producer offer can make an additional intermediary unnecessary. The Opportunity Mapping section provides the detailed assessment.

Sources & Evidence

1. Alloyed - About
   · Alloyed records a 2019 ABD licensing agreement with Aubert & Duval. The public history does not disclose the complete grant, qualifying assumptions about third-party commercial access. ([alloyed.com](https://alloyed.com/about))
2. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition
   · D607 preserves material pedigree through intermediate ownership and constrains unauthorized changes. These conditions qualify assurance-led and shared-stocking opportunities where the clause applies. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
3. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
   · Where incorporated into the contract, Boeing D604 permits requests for substantive raw-material assurance documentation, including mill undertakings, contracts, and stock evidence. It does not establish the prevalence of unmet assurance needs. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D604_20180220.pdf))
4. UKRI - Accelerating Manufacturing Readiness Level of ABD-1000AM for High Temperature Aerospace Components
   · UKRI identifies an Alloyed-led ABD-1000AM aerospace development project with an April 2025-October 2026 funded period. The record establishes a project context, not recurring production procurement or each purchase signatory. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
5. European Commission - Importation
   · The European Commission explains that customs clearance permits free circulation within EU customs territory. Shared stocking is a conditional commercial inference requiring separate customer acceptance and fulfillment obligations. ([taxation-customs.ec.europa.eu](https://taxation-customs.ec.europa.eu/customs/customs-procedures-import-and-export/importation_en))
6. Ulbrich - Aerospace Engine Components and High-Temperature Alloys
   · Ulbrich advertises nickel-based alloys in continuous precision strip and foil for aerospace products, supporting a concrete form-specific purchasing route. ([ulbrich.com](https://www.ulbrich.com/applications/aerospace-engine-components-high-temp-alloys/))
7. Fine Tubes - Aerospace
   · Fine Tubes lists aerospace nickel-tube offerings including Alloy xx.xx and Alloy xx.xx. These support a tube-specific inquiry without establishing every customer's acceptance. ([finetubes.co.uk](https://www.finetubes.co.uk/markets/aerospace-tubes))
8. Aubert & Duval - Metal Powders, June 2024
   · Aubert & Duval's June 2024 brochure lists ABD-900AM and ABD-1000AM as nickel-superalloy powders and identifies ABD as an Alloyed trademark, supporting named offerings for a bounded purchasing inquiry. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/2024-xx.xx-Aubert-Duval-Metal-Powders-for-Additive-Manufacturing-Brochure_web.pdf))

3.4. Next-Generation Business Models

Established offerings combine material supply with inventory and release administration without necessarily changing the producer. Rolled Alloys advertises customer-site replenishment and supplier-held release arrangements; Haynes International, Inc. provides a producer-operated regional service alternative. Buyers should compare allocation, ownership, release duties, documentation, and unused-material responsibility rather than choose by

channel label. A fulfillment partner is justified when its agreed contribution improves coverage; otherwise direct contracting avoids another dependency.

Powder offerings allocate documentation and commercialization rights differently. EOS GmbH associates nickel powders with its systems and commits to accompanying inspection certificates. Alloyed Ltd.'s recorded ABD license with Aubert & Duval, alongside the latter's ABD-900AM and ABD-1000AM listings, illustrates a rights-based partner route. These are documented models, not unrestricted distribution or universal customer acceptance. An ordinary buyer needs a covered supply offer; a prospective distributor additionally needs the applicable permissions. Documentation convenience and proprietary access must be weighed against supplier and rights-holder dependence.

Sources & Evidence

1. Rolled Alloys - E-Services Stocking Programs
   · Rolled Alloys describes customer-site replenishment, supplier-held orders awaiting release, and scheduled arrangements requiring contractual terms. Ownership, allocation, and unused-material responsibility remain agreement-specific verification questions. ([rolledalloys.com](https://www.rolledalloys.com/eservices/))
2. Alloyed - About
   · The recorded ABD license establishes a rights-based commercialization relationship, not unrestricted distribution permissions for unrelated parties. ([alloyed.com](https://alloyed.com/about))
3. Haynes International - Sales and Service
   · Haynes describes North American service centers, wholly owned European affiliates, on-demand delivery, and end-use support, establishing a producer-operated regional service alternative rather than an order-specific guarantee. ([haynesintl.com](https://haynesintl.com/en/sales-and-service/))
4. EOS - Nickel Alloys for Industrial 3D Printing
   · EOS associates its listed nickel powders with EOS metal systems and states that they ship with inspection certificates. This supports a documentation-linked material model, not universal customer acceptance or mandatory sole sourcing. ([eos.info](https://www.eos.info/metal-solutions/metal-materials/nickel-alloys))
5. Aubert & Duval - Metal Powders, June 2024
   · The ABD-900AM and ABD-1000AM catalog entries connect the licensed relationship to named commercial offerings without establishing unrestricted third-party rights or customer-specific suitability. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/2024-xx.xx-Aubert-Duval-Metal-Powders-for-Additive-Manufacturing-Brochure_web.pdf))

3.5. Industry Roadmap

In 2026-2027, the priority is converting planning visibility into executable coverage within accepted relationships. GE Aerospace reports more stable short-term supplier forecasts and better longer-term visibility, while its portal distinguishes bidding from order acknowledgment. Buyers and sellers should use acknowledged requirements, release dates, customer acceptance, and agreed schedule-change responsibilities as commitment gates. Forecasts remain planning inputs, not purchase obligations.

For 2028-2029 sourcing, monitor whether announced U.S. projects become usable external supply. Doncasters' August 2026 results describe customer-backed Alabama investment, while SeAH Superalloy Technologies' August 2026 announcement presents Temple cast ingot as moving toward production. Neither announcement establishes coverage for a particular outside buyer. Retain established coverage until documented commercial commencement,

required customer acceptance, and an attributable supply undertaking support reliance. Early discussions can preserve an option without making downstream promises dependent on it.

For 2030-2032, tie long-lived commitments to named program awards and material selections rather than assume existing acceptance carries into future programs. GE's reported introduction of ceramic matrix composites into CFM LEAP commercial service in 2016 establishes an application-specific alternative, not universal displacement of nickel superalloys. Monitor program selections and authorized lifecycle workscopes; a shift toward competing materials, repair, or reuse favors contractual flexibility over unsupported dedicated exposure.

Sources & Evidence

1. Boeing Suppliers - Quality
   - Boeing's contract-defined requirements support retaining customer acceptance as a separate commitment gate in the near-term roadmap. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))
2. GE Aerospace - Annual Report 2025
   - GE Aerospace reports changing supplier demand signals to provide more stable short-term forecasting and greater long-term visibility. This establishes planning information rather than an individual material order. ([geaerospace.com](https://www.geaerospace.com/investor-relations/annual-report))
3. GE Aerospace - 2025 Sustainability Report
   - Documented repair and reuse provide a commercial counterforce to assuming unchanged replacement purchasing over the long-term horizon. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
4. GE Recognized by the American Ceramics Society for Commercializing Ceramic Matrix Composites in Aircraft Engines
   - GE's July xx.xx 2019 announcement states that ceramic matrix composites entered commercial service with CFM LEAP in 2016. This establishes a program-specific alternative, not universal displacement of nickel-superalloy applications. ([geaerospace.com](https://www.geaerospace.com/news/press-releases/research/ge-recognized-american-ceramics-society-world-first-commercializing-ceramic))
5. GE Aerospace Supplier Portal
   - The separate sourcing and order-administration functions support distinguishing planning or bidding access from an acknowledged purchasing transaction. (supplier.geaerospace.com)
6. Doncasters Group - DPC Holdings Reports Strong Second Quarter 2026 Results
   - Doncasters' August xx.xx 2026 results describe an aerospace-customer partnership underpinning investment in a new Alabama superalloy facility. The announcement does not establish an individual outside buyer's supply undertaking. ([ir.doncasters.com](https://ir.doncasters.com/news-and-events/news/news-details/2026/DPC-Holdings-Reports-Strong-Second-Quarter-2026-Results/default.aspx))
7. SeAH Superalloy Technologies - Introducing Cast Ingot
   - SeAH's August xx.xx 2026 announcement presents a non-captive cast-ingot proposition and describes Temple as moving closer to production, rather than establishing order-specific fulfillment. ([seahsuperalloys.com](https://www.seahsuperalloys.com/news/introducing-cast-ingot-expanding-seahs-superalloy-capabilities))

4. Market Overview

4.1. Introduction

[redacted] It encompasses the specified material forms and strengthening classes across initial production, replacement, repair-related use, and research and qualification. Completed components, propulsion systems, vehicles, and maintenance services remain downstream activities rather than the studied material offering.

[redacted] The relevant commercial market is therefore not simply all material carrying a recognized grade name. Buyers must establish the required form, eligible source, documentation, and applicable purchasing authority before treating an offering as an available alternative.

Figure 5. Global Nickel-Based Superalloys for Aerospace Market Size, 2017-2040 (USD Million, Growth %)

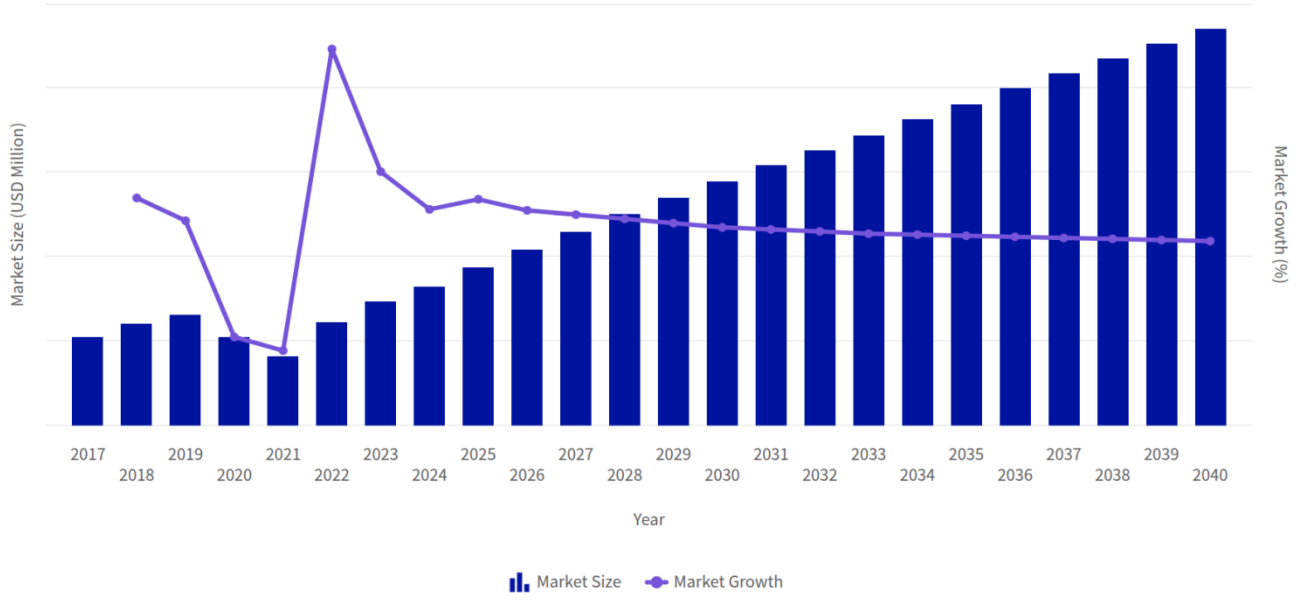


Table 2. Global Nickel-Based Superalloys for Aerospace Market Size, 2017-2040 (USD Million, Growth %)

Metric	2017	2024	2025	2026	2027	2032	2040
Market Size (USD Million)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Market Growth (%)	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Special Metals - Aerospace
   - Special Metals lists INCONEL aerospace offerings corresponding to Alloy xx.xx Alloy xx.xx and Alloy X-xx.xx. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
2. Boeing Suppliers - Quality
   - Boeing connects raw-material sourcing with contractually established engineering and quality requirements. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))
3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

4.2. Key Growth Contribution

Authorized engine improvements can create material purchasing requirements across Initial Equipment Production and Replacement & Retrofit Production. Rolls-Royce's June 2025 certification of the Trent xx.xx XE phase-one blade improvement, followed by fitting to new

and in-service engines, illustrates this adoption mechanism. Serving it requires the customer's accepted grade-form-source relationship and an attributable supply commitment, not simply a recognized alloy designation. Longer component life and the availability of repair or serviceable-part reuse can subsequently reduce new-replacement requirements, so an upgrade-related purchasing trigger should not be treated as a permanent material-demand pattern.

Figure 6. Global Nickel-Based Superalloys for Aerospace Market, Key Growth Contribution, by Region, 2025-2032 (USD Million)

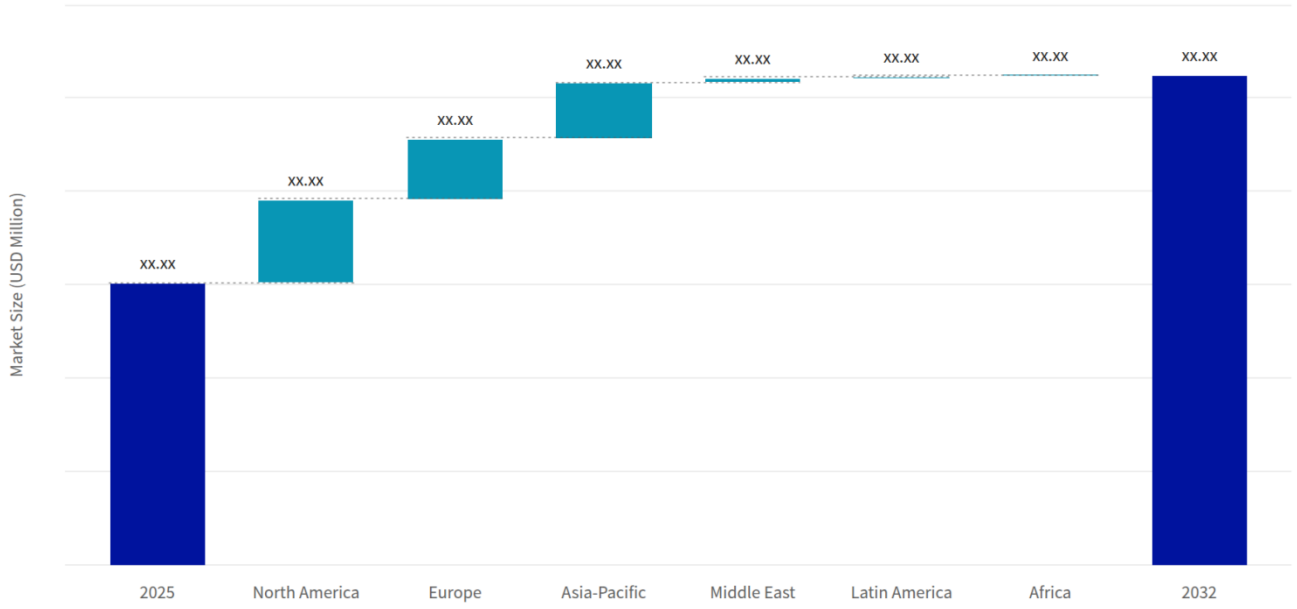

Figure 7. Global Nickel-Based Superalloys for Aerospace Market, Key Growth Contribution, by Country, 2025-2032 (CAGR %)

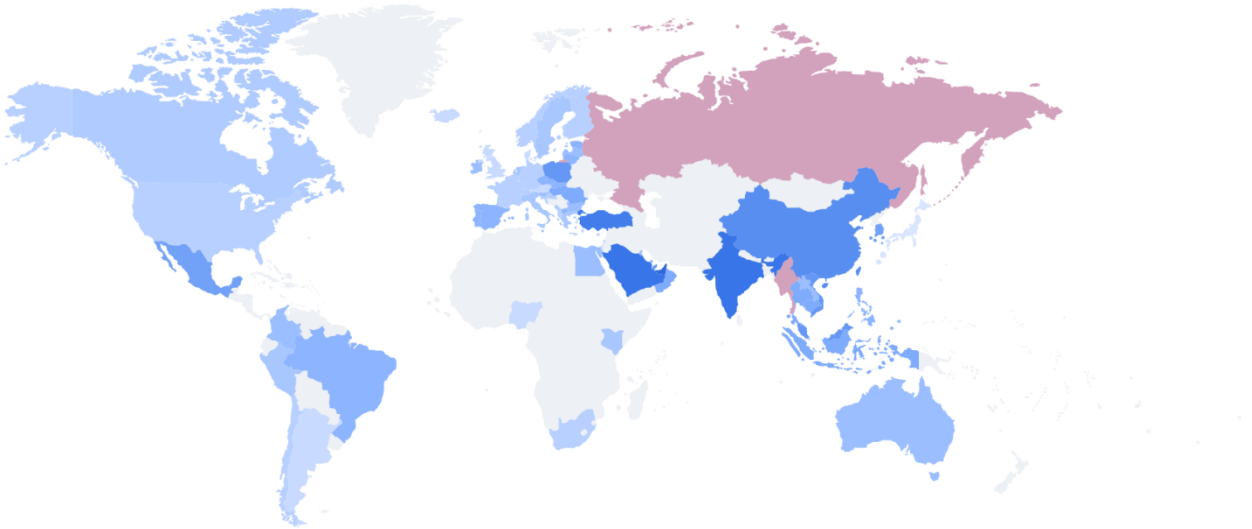

Table 3. Global Nickel-Based Superalloys for Aerospace Market, Key Growth Contribution, 2025-2032

Scope	Leading Category	Added Market Size (USD Million)	Growth Share (%)	CAGR (%)
Aerospace End Market	xx.xx	xx.xx	xx.xx	xx.xx
Alloy Grade	xx.xx	xx.xx	xx.xx	xx.xx
Buyer Function	xx.xx	xx.xx	xx.xx	xx.xx

Supply Channel	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Boeing Suppliers - Quality

   • Boeing states that supplier-quality requirements apply as defined by contract, supporting the transaction-specific acceptance condition attached to upgrade-related material purchasing. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))

2. Rolls-Royce Holdings Plc - 2025 Full Year Results

- Rolls-Royce's 2025 results report June 2025 certification of the Trent xx.xx XE phase-one blade improvement and installation in new and in-service engines. Durability improvement is also a stated objective. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2028 shop-visit target is below the reported 2025 total despite prospective fleet growth, qualifying any automatic conversion of fleet expansion into proportionate maintenance-material purchasing. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The divergence between 2025 engine deliveries and shop visits independently challenges a uniform new-engine-led material forecast; no service revenue is included in the numerator. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed engine-delivery and shop-visit activity supports separate new-program and replacement-demand

3. GE Aerospace - 2025 Sustainability Report
   - GE Aerospace describes repair and serviceable-part reuse as alternatives to newly manufactured replacement parts. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
4. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
5. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
6. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.

7. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

8. ATI Inc. - 2025 Form 10-K
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC's reported financial/product-category inputs and listed ingot offering constrain the eligible material envelope; the ingot allocation remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AA&S sales of USD xx.xx and its xx.xx% nickel-based/specialty-alloy category anchor the separately adjusted rolled-material envelope.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but not identifying price growth or a 2032 material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but not identifying price growth or a 2032 material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))

9. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
10. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
11. Haynes International - Sales and Service
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Narrow-strip supply supports a limited flat-product allocation within the modeled eligible Carpenter envelope.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire is a disclosed supplied form; its eligible monetary weight remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.

13. Haynes International, Inc. - 2023 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical xx.xx% slab/bar/billet revenue category constrains the long-stock proxy; its eligible billet split is assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported combined stock category provides a proxy anchor, not a separately disclosed bar revenue share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 flat products represented approximately xx.xx% of net product revenue; extrapolation to the eligible Acerinox envelope is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 wire represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 tubulars represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical product revenue, channel mix and backlog conversion anchor the modeled stock value weight, with explicit scope adjustments.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Firm backlog and its distinction from short-notice service-center business constrain the complementary dedicated allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 revenue was approximately xx.xx% through the direct organization, including company-operated centers; this is a representative channel calibration, not a Global aerospace share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 revenue was approximately xx.xx% through the direct organization, including company-operated centers; this is a representative channel calibration, not a Global aerospace share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2023 revenue came through independent distributors, resellers and agents; the model separately assumes the title-taking portion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2023 revenue came through independent distributors, resellers and agents; the model separately assumes the title-taking portion.

14. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised ingot supply establishes a PCC material-form crosswalk, not its sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised billet supply supports the forging-stock category mapping within the inherited PCC envelope.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised bar supply supports classification only; the monetary coefficient is an assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Plate, sheet and strip offerings support a distinct flat-product allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire availability supports the material-form crosswalk without establishing revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tubing availability supports the material-form crosswalk without establishing revenue.
15. DPC Holdings Limited - Registration Statement with 2025 Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing separates ingots from component sales and describes external supply and xx.xx% internal superalloy sourcing, contradicting the inherited xx.xx% captive parameter.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
16. Howmet Aerospace Inc. - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Casting-alloy activities support an ingot-material equivalent rather than attributing full engine-component revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed metal/billet activities support retaining a forging-stock allocation; the assumed xx.xx% weight is not reported.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 sales of USD xx.xx and Engine Products aerospace revenues of USD xx.xx commercial and USD xx.xx defense establish the component-cohort scale; USD xx.xx gas-turbine revenue is excluded through an explicit attribution model. These are not material-market revenues. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The segment/end-market revenue table supplies the aerospace and gas-turbine boundaries needed to bridge combined spares activity into an aerospace replacement-material proxy. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial aerospace represented xx.xx% of 2025 company sales, supplying an independent downstream mix comparison rather than a nickel-material allocation weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense aerospace represented xx.xx% of 2025 company sales; the paired commercial/defense comparison tests the aviation model while retaining component and material-scope differences. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.

17. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned US long-product expansion supports the relative conventional-long-material premise; investment is not recognized as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx of planned platform investment includes expansion of the long-products offering, informing the bars forecast premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace demand and planned long-product diversification support testing a relative mix shift without assuming flat-product contraction.
18. Haynes International - HAYNES 282
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Powder is offered alongside conventional forms for HAYNES xx.xx supporting nonexclusive form classification, not an observed sales allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification.
      ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification.
      ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

19. CMA - Anticipated Acquisition of Haynes International by Acerinox: Full Text Decision
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer evidence in paragraphs xx.xx-xx.xx supports separate flat/long purchasing pools; no published market-share table is used.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shape-specific purchasing supports a distinct long-stock allocation model without proving a separate competitive market for billet.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
20. Haynes International - HAYNES 230
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
21. Carpenter Technology - Advanced Materials for Aerospace Motor & Engines
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

22. Elementum 3D - Metal Alloy Additive Manufacturing Colorado

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed. ([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed. ([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

23. NASA - NASA-Developed Printable Metal Can Take the Heat

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake. ([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake. ([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

24. Carpenter Technology - Lighter, Faster, Stronger Metallurgy for Defense, July 2025

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights. ([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights. ([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

25. Special Metals - Aerospace
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy xx.xx; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy X-xx.xx; no current sales quantity is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Waspaloy; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

26. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: D607 prohibits unauthorized material substitutions while recognizing specified alternatives. It constrains assumptions about frictionless cross-class substitution, without quantifying adoption delays. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization requirements qualify assumptions about precipitation-family substitution opportunities; the clause does not prove future purchases or a class-growth premium. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause prohibits unauthorized substitutions where contractually applicable. It constrains the adoption interpretation but does not establish approval prevalence or a numerical adoption rate. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific material authorization is a counterweight to treating a named offering as immediately substitutable production material. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization limits interpretation of the assumed adoption multiplier; it does not directly establish powder sales. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

27. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
28. NASA - Chapter 2: Aerospace Materials Characteristics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
29. ESA - ESA Space Environment Report 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
30. NASA and Superalloys: A Customer, a Participant, and a Referee
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

31. VDM Metals - Alloys for the Aerospace Industry

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))

32. Howmet Aerospace - 2025 Annual Report, Letter to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% combined aerospace and gas-turbine spares revenue constrains the distinction between initial-production and spare-component activity; material and destination adjustments remain modeled. ([howmet.com](https://www.howmet.com/annualreport/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed combined spares proportion supplies the replacement proxy; approximately xx.xx% commercial aerospace engine-spares growth is historical counterevidence against assuming weak aftermarket activity. ([howmet.com](https://www.howmet.com/annualreport/))

33. GE Aerospace - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment and services costs provide commercial budget anchors for the common material-value denominator; assumed eligible-material fractions prevent full equipment or service value from entering the allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Services include spare parts and maintenance activity, supporting an explicit new-article versus restoration attribution rather than equating services revenue with replacement-material purchases. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported USD xx.xx services cost anchors the restoration-material bridge; the restoration allocation and direct eligible-material fraction are assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Total funded R&D of USD xx.xx supplies a development-budget proxy, not observed nickel-material purchasing; only an assumed eligible-material fraction is used. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.

34. UKRI - Accelerating Manufacturing Readiness level of ABD-1000AM for AM of high temperature aerospace components (AMRAM1000)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Alloyed-led project has xx.xx of funding and an April 2025-October 2026 funded period. This independently establishes bounded development activity, not annual material sales or recurring production purchases. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
35. Safran - FY 2025 Results and Investor Update, February 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))

36. Airbus - Full-Year 2025 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 deliveries by aircraft family provide the starting activity comparison for the initial-production forecast; aircraft delivery value is not included in the material numerator. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx% decline in 2025 self-financed R&D is counterevidence to uniform development-budget acceleration and supports a restrained, explicitly assumed development-purchasing scenario. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.

37. Airbus - Half-Year 2026 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 update retained the A320-family, A350 and other production-rate targets, providing a dated commercial constraint on the initial-production activity scenario rather than proof of future material orders. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 self-financed R&D of EUR xx.xx versus EUR xx.xx provides a modest-growth countercheck for the assumed development-project activity path; the budget is not material-market revenue. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))

38. RTX Corporation - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))

39. Federal Reserve Bank of St. Louis - Annual USD/GBP Exchange Rate, AEXUSUK
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
40. L3Harris Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
41. FAA Aerospace Forecast Fiscal Years 2025-2045 - Commercial Space
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated official low/high scenarios provide FY2032 licensed launch/reentry activity bounds. Their U.S.-licensed scope and treatment of reusable vehicles prevent direct conversion into Global material revenue. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-commercial-space.pdf))
42. ICAO - Convention on International Civil Aviation, Ninth Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

43. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
44. Aubert & Duval - Space Industry Metallurgical Solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
45. Aubert & Duval - Metallurgical Solutions for the Defense Industry, June 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
46. Berkshire Hathaway Inc. - 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.

47. Lufthansa Group Annual Report 2025 - MRO business segment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
48. Oliver Wyman - Global Fleet And MRO Market Forecast 2026-2036: Key Trends
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
49. German Aerospace Center (DLR) - Financing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
50. Federal Aviation Administration - Parts Manufacturer Approval (PMA): Design Approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

51. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
52. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
53. Carpenter Technology Corporation - Second Quarter Fiscal 2026 Earnings Call Presentation, January 29, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation distinguishes specialized non-LTA business from a conventional spot market, countering automatic classification of transactional sales as stock.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three additional aerospace LTAs and xx.xx% sequential commercial-aerospace bookings growth inform the reservation hypothesis, but do not measure its modeled magnitude.
54. Precision Castparts Corp. - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.

55. Howmet Aerospace - United States Locations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
56. ATI Inc. - 2024 Annual Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New sales commitments through 2040, including amounts expected during the remainder of the decade and predominantly involving jet-engine nickel alloys, inform the direct-program forecast premise without being counted as realized sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2024 plate volume went to independent service centers, providing a historical comparison that cautions against assuming generalized intermediary displacement.
57. Alloyed - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.

58. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 aerospace realization and revenue provide the common monetary calibration for this modeled grade; neither is a grade-specific sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace material realization supplies a price-scale input, with modeled year and product-mix adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization calibrates the assumed blended material price, not this grade's observed revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported eight-to-ten-year aerospace application-introduction periods constrain interpretation of the seven-year adoption forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace application-introduction periods provide an adoption-delay counterweight, not a forecast sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
59. European Commission CORDIS - Welding Metallurgy and Cracking in Superalloys: Reporting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical all-sector tonnage discussion is only a dominance cross-check; it cannot establish current aerospace monetary share. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies 718Plus separately from ordinary xx.xx supporting identity separation without supplying a current sales weight. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
60. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: August-October 2026 grade surcharges provide a differentiated cost-exposure check, not full invoice prices or observed 2032 prices. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx surcharge sequence independently qualifies a uniform price assumption; it is not substituted for a material selling price. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The grade-specific surcharge listing is a commercial cost comparison, not an observed Global grade realization. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))

61. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current-and-past supplier identity mapping only; not proof of 2025 aerospace sales or the modeled volume. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CMSX-xx.xx is separately identified; the material-value weight remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current sales are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713C is listed separately from IN-713LC; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713LC is listed separately from IN-713C; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx identity mapping only; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-738LC is separately identified; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current aerospace tonnes are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx appears in a current-and-past identification list; this does not establish recurring aerospace production sales. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: MAR-M xx.xx is identified separately from CM247LC; monetary weights remain modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PWA xx.xx is separately identified; no attributable sales value is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; current commercial scale remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; no current grade-specific material sales are disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Udimet xx.xx appears in the supplier's current-and-past identities; aerospace attribution is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

62. GE Aerospace - Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
63. Aubert & Duval - AD730: Ni-Based Superalloy for High Temperature Applications
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
64. University of Portsmouth - Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials: REF Impact Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))

65. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aerospace-industry publication distinguishes conventional Udimet xx.xx from its 720Li derivative; it does not establish a current monetary allocation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The publication independently supports the 720Li identity and aircraft-engine-disc category, without supplying current sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))
66. NASA Contractor Report 174639 - Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical institutional material identification is a legacy-category anchor only; it does not demonstrate current aerospace material sales. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
67. America Makes - 5566.002 Proliferation of Nickel Superalloy Material Datasets for Powder Bed Fusion Additive Manufacturing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))
68. GE Aerospace - Fourth Quarter 2025 Earnings Presentation
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 commercial-engine delivery growth supplies a near-term demand cross-check, not a grade-specific purchasing or seven-year growth observation. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate commercial and defense delivery growth constrains the commercial-demand scenario without establishing this grade's attributable consumption. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported defense-engine delivery growth is a demand-exposure check only; the PWA xx.xx activity factor remains assumed. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

4.3. Industry Ecosystem & Value Chain Analysis

Contract structure determines how planning visibility becomes a material obligation. ATI's 2025 annual report distinguishes multiyear agreements defining commercial terms from customer contracts typically established through accepted or acknowledged purchase orders.

■■ ■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■

Alloy ownership and material supply can capture value through different relationships. Alloyed records a 2019 licensing agreement with Aubert & Duval covering its ABD platform. ■■■■ ■■■■■■■■■■■■ ■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■ ■ ■■■■■■■ ■■■■ ■■ ■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■ ■■ ■■■■■■ ■■ ■■■■■■ ■ ■■■■■ ■■■■■■■■■■

Material relationships can also extend into the return stream. ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ Return-material ownership and access can consequently matter to supply relationships, but participation in an aerospace program does not itself grant an independent seller access to those streams.

Sources & Evidence

1. ATI 2025 Annual Report
   · ATI distinguishes multiyear agreements from contracts typically established when purchase orders are accepted or acknowledged. ([s27.q4cdn.com](https://s27.q4cdn.com/xx.xx/files/doc_financials/2025/ar/ATI-2025-Annual-Report-web-FINAL.pdf))
2. Alloyed - About
   · Alloyed's company history records an ABD licensing agreement with Aubert & Duval in 2019. ([alloyed.com](https://alloyed.com/about))
3. GE Aerospace - 2025 Sustainability Report
   · GE describes metal recovery from internal operations, suppliers, and its maintenance network. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))

4.3.1. Supply-Side Analysis

■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ These records establish producer and intermediary roles, not every grade-form combination or a customer's permission to purchase it. Captive Supply likewise requires examination of internal allocation rights rather than being assumed available to unaffiliated buyers.

■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■ ■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ Such programs can shift inventory administration and delivery timing, but inventory ownership, allocation, and obsolescence exposure still require agreement. A portfolio or stocking-program description should not be treated as a firm delivery commitment for a particular requirement.

■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■ ■■■■■ ■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ Quotations from those businesses consequently do not, by themselves, establish independent parent-level exposure. Common ownership does not prove identical plant risks, interchangeable approvals, or common availability; those remain separate commercial questions.

Sources & Evidence

1. Special Metals - Tech Center
   · Special Metals advertises ingots, billets, plate, sheet, strip, tubing, bar, and wire. ([specialmetals.com](https://www.specialmetals.com/tech-center/))
2. Rolled Alloys - Aerospace
   · Rolled Alloys describes aerospace nickel-alloy inventory and material offerings. ([rolledalloys.com](https://www.rolledalloys.com/markets/aerospace/))
3. Rolled Alloys - E-Services Stocking Programs
   · Rolled Alloys offers replenishment, part-release, and scheduled inventory programs; scheduled arrangements require contract or long-term-agreement terms. ([rolledalloys.com](https://www.rolledalloys.com/eservices/))
4. Haynes International Form 8-K - November 21, 2024
   · Haynes' mandatory filing records the merger closing on November xx.xx 2024, involving Acerinox and North American Stainless. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/tm2428965d6_8k.htm))
5. VDM Metals - Acerinox Completes the Acquisition of Haynes International
   · VDM announced Acerinox's completed Haynes acquisition and described Haynes and VDM forming its high-performance alloys division. ([vdm-metals.com](https://www.vdm-metals.com/en/company/news-and-events/news-archive/single/acerinox-completes-the-acquisition-of-haynes-international))

4.3.2. Demand-Side Analysis

Component & Subassembly Manufacturers, Engine & Propulsion-System Manufacturers, and Aerospace Vehicle Manufacturers & Integrators can occupy different positions in the purchasing relationship. ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■ ■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■ ■■■ ■■ ■■■■■■■■ ■■ ■■■ ■■■■ ■■■■■■■■■■■■■■■■ Procurement must establish both authorities before comparing alternative material offers.

For Maintenance, Repair & Overhaul Organizations, the purchasing trigger is the authorized workscope rather than aircraft utilization alone. ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ Service receipts are not themselves evidence of a corresponding new-material order.

Research & Development Organizations represent a distinct demand stage: material acquired for research or qualification need not become a production award. Across buyer functions, the commercially useful demand record identifies the ordering entity, approving customer, applicable program, and whether the requirement concerns initial equipment, replacement, repair, or qualification. ■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. Boeing Suppliers - Quality
   · Supplier quality requirements and approved-source arrangements illustrate customer control over purchasing acceptance. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))

2. FAA AC 20-62E - Eligibility, Quality, & Identification of Aeronautical Replacement Parts
   · FAA AC xx.xx-62E concerns quality, eligibility, and traceability of parts and materials intended for U.S. type-certificated products. ([faa.gov](https://www.faa.gov/regulations_policies/advisory_circulars/index.cfm/go/document.information/documentID/xx.xx))
3. Rolls-Royce Holdings Plc - 2025 Full Year Results
   · Rolls-Royce describes flying-hour receipts under long-term service agreements, distinguishing service economics from individual material purchases. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

4.3.3. Stakeholder Analysis

Regulators, program customers, material sellers, and purchasing organizations control different permissions. FAA replacement-part guidance concerns the U.S. type-certificated system; Boeing's supplier requirements derive their applicability from the contract. ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■ ■■ ■■■■ ■■ ■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■ ■■■■ ■■■■■■

■■■■■■■■■■ ■■■■ ■■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■ These practices can support resilience while increasing supplier information obligations. Financing eligibility and contractual participation remain distinct from permission to supply a selected material and from the supplier's continuing delivery obligations.

Sources & Evidence

1. Boeing Suppliers - Quality
   · Boeing states that applicability of its supplier quality requirements is defined by contract. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))
2. FAA AC 20-62E - Eligibility, Quality, & Identification of Aeronautical Replacement Parts
   · The circular's stated U.S. type-certificated scope bounds the regulatory stakeholder interpretation. ([faa.gov](https://www.faa.gov/regulations_policies/advisory_circulars/index.cfm/go/document.information/documentID/xx.xx))
3. Rolls-Royce - Our Stakeholders
   · Rolls-Royce describes financial-stability assessments, strategic-supplier continuity plans, and supplier-finance programs. ([rolls-royce.com](https://www.rolls-royce.com/sustainability/customers-and-suppliers))

4.4. Market Dynamics

Demand visibility and immediately fulfillable material demand are different conditions. ■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■ ■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■ Inventory can alter purchasing timing without resolving a downstream component or maintenance constraint.

Lifecycle choices create a further counterforce. ■■■■■■ ■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ The decisive commercial indicator is an eligible, documented purchasing requirement for the particular grade and form, supported by a credible fulfillment commitment.

Sources & Evidence

1. Rolled Alloys - E-Services Stocking Programs
   - Its programs accommodate delivery scheduling and customer-held or distributor-held inventory, supporting the timing-buffer interpretation. ([rolledalloys.com](https://www.rolledalloys.com/eservices/))
2. Rolls-Royce Holdings Plc - 2025 Full Year Results
   - Rolls-Royce describes durability improvements intended to change subsequent service requirements. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
3. GE Aerospace - Annual Report 2025
   - GE's 2025 account describes interconnected supplier constraints and maintenance turnaround delays, without identifying every affected material obligation. ([geaerospace.com](https://www.geaerospace.com/investor-relations/annual-report))
4. GE Aerospace - 2025 Sustainability Report
   - GE describes repair and reuse as ways to reduce requirements for newly manufactured parts. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))

4.4.1. Key Drivers

4.4.1.1. Program releases translate propulsion requirements into material purchasing

■■ ■■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ For Initial Equipment Production, program purchasing releases transmit these requirements to material buyers. Aircraft orders alone do not establish a material commitment: suppliers need the applicable purchasing schedule and scope, while component availability and program sequencing can delay conversion.

Sources & Evidence

1. GE Aerospace - Annual Report 2025
   - The annual report describes simultaneous new-engine and aftermarket requirements and supplier-delivery constraints. ([geaerospace.com](https://www.geaerospace.com/investor-relations/annual-report))

4.4.1.2. Authorized fleet upgrades create conditional replacement-material requirements

Rolls-Royce reported certification of a Trent xx.xx XE blade improvement in June 2025 and its introduction into new and in-service engines. ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ Material demand remains conditional on the approved replacement workscope; longer service life can

subsequently reduce replacement frequency rather than sustain the initial upgrade-related purchasing pattern.

Sources & Evidence

1. Rolls-Royce Holdings Plc - 2025 Full Year Results
   · A Trent xx.xx XE blade improvement was certified in June 2025 and introduced into new and in-service engines; durability is a stated program objective. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

4.4.1.3. Named powder partnerships support commercial qualification activity

Aubert & Duval and Alloyed announced ABD-1000AM on June xx.xx 2024, with Aubert & Duval identified as Alloyed's powder production partner, extending their relationship covering ABD-900AM. ■■■■ ■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■ It does not establish customer qualification, unrestricted resale rights, or recurring aerospace production purchases.

Sources & Evidence

1. Aubert & Duval and Alloyed Launch ABD-1000AM Nickel Superalloy at RAPID + TCT
   · The June xx.xx 2024 announcement identifies ABD-1000AM and Aubert & Duval as Alloyed's powder production partner, extending the ABD-900AM relationship. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2024/xx.xx/AD_PR_Launch-of-ABD-1000AM_EN_06-xx.xx-2024.pdf))

4.4.2. Key Restraints

4.4.2.1. Contract-specific authorization limits material switching

Boeing's D607 clause prohibits unauthorized material substitutions and makes authorized deviations specific to the purchase contract. A shared grade designation or attractive alternative offer therefore does not establish permission to switch form or source conditions. ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■

Sources & Evidence

1. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition
   · Boeing D607 prohibits unauthorized material substitutions, recognizes authorized alternatives, and makes deviations purchase-contract-specific. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

4.4.2.2. Repair and reuse interrupt the link between maintenance and new material

■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■ Aftermarket activity can therefore support repair or reuse instead of newly manufactured replacement components. This restrains the

associated new-material requirement without excluding Repair, Overhaul & Refurbishment material purchases where those workscopes require them.

Sources & Evidence

1. GE Aerospace - 2025 Sustainability Report
   · GE reports component restoration and used-serviceable-part activities as alternatives to new parts. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))

4.4.2.3. Covered defense contracts restrict eligible material origins

[redacted] A domestic warehouse therefore does not independently establish compliant origin. The restriction concerns covered contracts, not all Global aerospace purchases.

Sources & Evidence

1. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
   · The clause specifies eligible melting or production origins, exceptions, and limitations on the commercial-off-the-shelf treatment of specialty-metal mill products. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

4.4.3. Key Opportunities

4.4.3.1. Contract-backed assurance for accepted material requirements

Component buyers needing substantiated upstream coverage create an opportunity for accepted material sellers offering contract-backed assurance rather than another catalog entry. [redacted] Capture requires requirement-specific allocation and agreed release and unused-material responsibilities; an advertised program alone does not establish coverage.

Sources & Evidence

1. Rolled Alloys - E-Services Stocking Programs
   · Rolled Alloys advertises replenishment and release arrangements, with contractual terms required for its scheduled program. These descriptions do not reserve material for an individual buyer. ([rolledalloys.com](https://www.rolledalloys.com/eservices/))
2. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
   · Where incorporated into the contract, Boeing D604 permits the procurement representative to request substantive raw-material assurance documentation, including mill assurances and stock records. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D604_20180220.pdf))

4.4.3.2. Form-specific sourcing and fulfillment accountability

Buyers of precision strip, foil, and tubing can seek accountability tailored to the required form instead of relying on grade breadth. Ulbrich advertises aerospace nickel-alloy strip and foil,

while Fine Tubes lists aerospace nickel tubing. ■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■ ■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■ ■■■■■■■■■ ■■■■■■ ■■■■■■

Sources & Evidence

1. Ulbrich - Aerospace Engine Components and High-Temperature Alloys
   · Ulbrich advertises nickel-based precision strip and foil for aerospace engine applications. ([ulbrich.com](https://www.ulbrich.com/applications/aerospace-engine-components-high-temp-alloys/))
2. Fine Tubes - Aerospace
   · Fine Tubes lists aerospace nickel-tube offerings including Alloy xx.xx and Alloy xx.xx. A listed designation does not establish every customer's acceptance. ([finetubes.co.uk](https://www.finetubes.co.uk/markets/aerospace-tubes))

4.4.3.3. Project-bounded purchasing of proprietary powder offerings

Named proprietary powders can support defined Research, Development & Qualification purchases without requiring an assumed production award. ■■■■■■ ■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ Sellers need the actual purchasing institution, applicable permissions, and project commitment; recurring production requires a separate customer decision.

Sources & Evidence

1. Alloyed - About
   · Alloyed's corporate history records a 2019 ABD licensing agreement with Aubert & Duval, but does not publish its complete grant. ([alloyed.com](https://alloyed.com/about))
2. UKRI - Accelerating Manufacturing Readiness Level of ABD-1000AM for High Temperature Aerospace Components
   · UKRI identifies an Alloyed-led ABD-1000AM aerospace development project with a funded period from April 2025 through October 2026. It does not establish recurring production procurement. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
3. Aubert & Duval - Metal Powders, June 2024
   · Aubert & Duval's June 2024 powder brochure lists ABD-900AM and ABD-1000AM and identifies ABD as an Alloyed trademark. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/2024-xx.xx-Aubert-Duval-Metal-Powders-for-Additive-Manufacturing-Brochure_web.pdf))

4.4.4. Key Challenges

4.4.4.1. Converting supplier relationships into verifiable supply assurance

■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■ Component sellers must turn general supplier relationships into credible coverage of their actual obligations. Committing before that coverage is established exposes the seller to a mismatch between its downstream promise and upstream availability.

Sources & Evidence

1. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
   · Boeing D604 permits requests for protection evidence, including contracts, mill assurances, and available-stock documentation. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D604_20180220.pdf))

4.4.4.2. Managing indexation timing and unrecovered contractual exposure

[redacted] Indexation therefore does not eliminate funding or contract-basis exposure. Producers and buyers need aligned reset provisions, purchasing commitments, and schedule-change responsibilities rather than assuming that a surcharge automatically protects the full commercial obligation.

Sources & Evidence

1. ATI 2025 Annual Report
   · ATI describes raw-material exposure that may not be fully recovered through surcharge and index mechanisms. ([s27.q4cdn.com](https://s27.q4cdn.com/xx.xx/files/doc_financials/2025/ar/ATI-2025-Annual-Report-web-FINAL.pdf))
2. ATI Specialty Materials - Tools & Resources
   · ATI Specialty Materials states that customer-specific raw-material indices may differ from its published framework. ([atimaterials.com](https://www.atimaterials.com/specialtymaterials/Pages/tools-resources.aspx))

4.4.4.3. Maintaining usable pedigree across material handoffs

Saint-Gobain Aerospace's March xx.xx 2024 supplier manual links raw-material traceability to finished goods, while FAA receiving guidance emphasizes sufficient traceability and is expressly nonmandatory guidance rather than a regulation. Intermediary and repair-related transactions must preserve the documentation required by the actual buyer. [redacted]

Sources & Evidence

1. Saint-Gobain Aerospace - Supplier Quality Manual, Revision I, March 26, 2024
   · The March xx.xx 2024 manual requires traceability connecting raw materials and finished goods. ([saint-gobain-aerospace.com](https://www.saint-gobain-aerospace.com/sites/hps-mac3-aerospace/files/2024-xx.xx/Supplier%20Quality%20Manual%20Rev.%20I%xx.xx%2003-xx.xx-xx.xx.PDF))
2. FAA AC 20-154A - Guide for Developing a Receiving Inspection System for Aircraft Parts and Materials
   · FAA AC xx.xx-154A emphasizes sufficient receiving traceability and expressly states that it is nonmandatory guidance, not a regulation. ([faa.gov](https://www.faa.gov/airports/resources/advisory_circulars/index.cfm/go/document.information/documentID/xx.xx))

4.5. Porter’s Five Forces Analysis

Rivalry and entry barriers operate within an approved grade, product form, and customer application rather than across an undifferentiated supplier roster. [redacted]

[redacted] Competition among stocking sellers therefore should not be confused with independent competition among qualified material producers.

Buyer and supplier leverage coexist. [redacted] Upstream energy and raw-material dependencies can further constrain a producer that possesses downstream approval.

Substitution is commercially real but application-specific. [redacted] Substitution assessments must therefore distinguish new-program selection from authorized changes to in-service products.

Sources & Evidence

1. Rolled Alloys - Aerospace
   · The distributor's aerospace portfolio establishes a fulfillment role distinct from material production. ([rolledalloys.com](https://www.rolledalloys.com/markets/aerospace/))
2. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
   · The clause demonstrates a buyer's contractual ability to request substantiated upstream raw-material coverage from its seller. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D604_20180220.pdf))
3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   · Carpenter describes product- and geography-dependent competition, customer qualification requirements, and upstream raw-material and energy dependencies. ([s21.q4cdn.com](https://s21.q4cdn.com/xx.xx/files/doc_financials/2025/ar/CRS-xx.xx-xx.xx-2025-10K-Print-Only-Final.pdf))
4. GE Recognized by the American Ceramics Society for Commercializing Ceramic Matrix Composites in Aircraft Engines
   · GE's July xx.xx 2019 announcement states that ceramic matrix composites entered commercial service with CFM LEAP in 2016. ([geaerospace.com](https://www.geaerospace.com/news/press-releases/research/ge-recognized-american-ceramics-society-world-first-commercializing-ceramic))

4.6. PESTLE Analysis

Defense sourcing policy and customs treatment impose different access conditions. U.S. specialty-metal requirements concern eligible material origins under covered contracts, not simply the location of a distributor. [redacted]

[redacted]

Intellectual-property protection is another relationship-specific condition. [redacted] The relevant commercial questions are which rights cover the selected offering, where they apply, and whether the proposed seller possesses them.

[redacted] For aerospace-material contracts, metal indexation should not be assumed to absorb electricity, labor, financing, or schedule-change exposure. A supplier's willingness to accept dedicated commitments can consequently depend on the allocation of these obligations, even where the material itself remains approved.

Environmental and social requirements also affect customer administration and access. [redacted] Suppliers must distinguish mandatory contractual disclosures from voluntary credentials; satisfying either does not independently establish a material award.

Sources & Evidence

1. Rolls-Royce - Our Stakeholders
   · Its supplier practices include environmental, ethics, labor, and human-rights screening, improvement plans, and encouragement of environmental-management certification. ([rolls-royce.com](https://www.rolls-royce.com/sustainability/customers-and-suppliers))
2. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
   · Qualifying-country provisions and exceptions qualify a U.S.-only interpretation of covered specialty-metal sourcing. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   · The filing discloses owned and in-licensed patents, no material dependence on a single such item or related group, and energy cost and availability risks. ([s21.q4cdn.com](https://s21.q4cdn.com/xx.xx/files/doc_financials/2025/ar/CRS-xx.xx-xx.xx-2025-10K-Print-Only-Final.pdf))
4. Canada Border Services Agency - Chapter 75: T2026-2, Nickel and Articles Thereof
   · Canada's 2026 Chapter xx.xx schedule lists nickel-alloy bars, wire, flat products, and tubes under duty-free MFN treatment. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/html/xx.xx/ch75-eng.html))

4.7. Market Outlook

[redacted] GE Aerospace's account of interconnected supplier constraints supports demand visibility but does not identify every affected grade-form requirement. ATI Inc.'s distinction between multiyear commercial terms and accepted orders identifies a separate turning point: a planning relationship becomes useful supply coverage only to the extent that the actual obligation is established.

[redacted] The relevant indicators are accepted material orders, customer source authorizations, order amendments, and substantiated upstream coverage. Engine activity or a new supplier announcement alone cannot establish an accessible opportunity or justify dedicated exposure.

Sources & Evidence

1. ATI 2025 Annual Report
   - ATI distinguishes multiyear commercial agreements from customer contracts typically established through accepted or acknowledged purchase orders. ([s27.q4cdn.com](https://s27.q4cdn.com/xx.xx/files/doc_financials/2025/ar/ATI-2025-Annual-Report-web-FINAL.pdf))
2. GE Aerospace - Annual Report 2025
   - GE Aerospace's 2025 account describes interconnected supplier constraints, without attributing all engine-level disruption to a particular superalloy requirement. ([geaerospace.com](https://www.geaerospace.com/investor-relations/annual-report))
3. GE Aerospace - 2025 Sustainability Report
   - Repair and reuse qualify an outlook based on maintenance activity because a service event need not require a new replacement component. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))

4.7.1. Near-Term Market Outlook (0-2 Years)

For 2026-2027, the defensible focus is converting visibility into executable coverage within existing accepted material relationships. GE Aerospace reports improving short-term supplier demand signals and longer-term visibility, while its portal separates sourcing activity from order administration. [redacted]

Suppliers should monitor order acknowledgments, release dates, and customer acceptance for the particular grade and form before reserving dedicated material. Buyers should compare coverage from already accepted alternatives where their contracts permit it, rather than rely on a broad shortage narrative. [redacted]

Sources & Evidence

1. Boeing Suppliers - Quality
   · Contract-defined supplier requirements support verifying acceptance separately from the availability of supplier planning information. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))
2. GE Aerospace - Annual Report 2025
   · GE reports changing supplier demand signals to provide more stable short-term forecasting and longer-term visibility. This establishes planning information, not an individual raw-material order. ([geaerospace.com](https://www.geaerospace.com/investor-relations/annual-report))
3. GE Aerospace Supplier Portal
   · GE's public supplier portal distinguishes potential-supplier inquiries and bids from order acknowledgment, invoicing, and payment administration. (supplier.geaerospace.com)

4.7.2. Medium-Term Market Outlook (3-5 Years)

[redacted] SeAH Superalloy Technologies' August 2026 cast-ingot announcement presents a non-captive Temple proposition while describing the site as moving closer to production. These records establish development pathways, not an obligation to supply a particular outside buyer.

Buyers can preserve these options through commercial discussions, but should make reliance contingent on documented commercial commencement, the required customer acceptance, and an attributable external supply undertaking. [redacted] Announced domestic production also does not independently resolve the origin and acceptance conditions of a covered customer contract.

Sources & Evidence

1. Doncasters Group - DPC Holdings Reports Strong Second Quarter 2026 Results
   · Doncasters' August xx.xx 2026 results describe an aerospace-customer partnership supporting a new Alabama superalloy facility, not completed commercial supply. ([ir.doncasters.com](https://ir.doncasters.com/news-and-events/news/news-details/2026/DPC-Holdings-Reports-Strong-Second-Quarter-2026-Results/default.aspx))
2. SeAH Superalloy Technologies - Introducing Cast Ingot
   · SeAH Superalloy Technologies' August xx.xx 2026 announcement describes Temple as moving closer to production and presents a non-captive cast-ingot proposition. It does not establish order-specific fulfillment. ([seahsuperalloys.com](https://www.seahsuperalloys.com/news/introducing-cast-ingot-expanding-seahs-superalloy-capabilities))
3. Doncasters - New Advanced Manufacturing Facility in Auburn, Alabama, September 2026
   · Doncasters' September 2026 announcement identifies Auburn, Alabama, as a planned new superalloy facility and distinguishes it from the existing Oxford casting operation. ([doncasters.com](https://www.doncasters.com/news/doncasters-announces-a-new-xx.xx-million-advanced-manufacturing-facility-in-auburn-alabama))

4.7.3. Long-Term Market Outlook (5-10 Years)

[redacted] GE's commercialization of ceramic matrix composites with CFM LEAP in 2016 establishes that alternative material families can enter a specific commercial application; it does not establish displacement of every nickel-superalloy use. Producers should connect long-lived commitments to named customer programs rather than assume that an existing qualified grade position guarantees future selection.

Lifecycle purchasing can also change within established programs. Documented repair and reuse provide a counterforce to treating an installed fleet as an unchanged replacement-material requirement. [redacted]

Sources & Evidence

1. GE Aerospace - 2025 Sustainability Report
   - GE's lifecycle activities provide a documented counterforce to assuming that existing replacement-material relationships persist unchanged. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
2. GE Recognized by the American Ceramics Society for Commercializing Ceramic Matrix Composites in Aircraft Engines
   - GE's July xx.xx 2019 announcement states that ceramic matrix composites entered commercial service with CFM LEAP in 2016. This establishes program-specific alternative-material commercialization, not universal superalloy replacement. ([geaerospace.com](https://www.geaerospace.com/news/press-releases/research/ge-recognized-american-ceramics-society-world-first-commercializing-ceramic))

4.8. Go-to-Market Strategy

Material sellers should organize account entry around the purchasing entity and the customer controlling acceptance. [redacted] General supplier credentials should support this inquiry rather than replace it.

An independent intermediary should pursue a release-service proposition only when it can document access to the accepted upstream material and any necessary selling permissions. [redacted]

[redacted]
Intermediary participation adds dependence and divides commercial control; direct producer contracting is preferable when its commitment already meets the buyer's needs.

Negotiate the commercial basis before accepting dedicated exposure. ATI Specialty Materials warns that customer-specific indices can differ from published guidance. [redacted]

For proprietary powders, keep material selling and broader commercialization rights separate. [redacted]
A bounded development-material sale can be appropriate without implying a later production award; broader commitments should wait for the required customer acceptance and contractual grant.

Sources & Evidence

1. Boeing Suppliers - Quality
   - Boeing's supplier-quality page establishes contract-specific requirements, not universal account access from a general supplier credential. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))
2. Rolled Alloys - E-Services Stocking Programs
   - The advertised programs establish release administration as an actual service proposition, not evidence of an available partnership or customer authorization. ([rolledalloys.com](https://www.rolledalloys.com/eservices/))
3. Alloyed - About
   - The recorded license supports a named commercialization relationship, not unrestricted rights for an unrelated distributor. ([alloyed.com](https://alloyed.com/about))
4. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition
   - Where applicable, Boeing D607 prohibits unauthorized substitutions and preserves material pedigree through intermediate ownership. Authorized alternatives remain possible. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
5. ATI Specialty Materials - Tools & Resources
   - ATI Specialty Materials warns that customer-specific raw-material indices may differ from published guidance and that calculation methods can change. ([atimaterials.com](https://www.atimaterials.com/specialtymaterials/Pages/tools-resources.aspx))
6. GE Aerospace Supplier Portal
   - The distinct sourcing and transaction-administration routes support separating bid participation from an executable order and identifying the accountable purchasing relationship. (supplier.geaerospace.com)

RESEARCH SAMPLE REPORT

7. Haynes International - Sales and Service

· Haynes advertises North American service centers and wholly owned European affiliates, providing a producer-operated alternative to independent intermediary fulfillment. These are service descriptions rather than order guarantees. ([haynesintl.com](https://haynesintl.com/en/sales-and-service/))

8. Aubert & Duval - Metal Powders, June 2024

· The brochure establishes named proprietary powder offerings, not unrestricted resale rights or customer-specific production acceptance. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/2024-xx.xx-Aubert-Duval-Metal-Powders-for-Additive-Manufacturing-Brochure_web.pdf))

5. Market Insights

5.1. Consumer Insights & End-User Perspective

[redacted] Boeing makes supplier quality applicability contractual, and D607 prohibits unauthorized material substitutions while recognizing authorized alternatives. Before proposing a switch, a seller should establish the ordering entity, source approver, and authorized procurement representative; a shared grade designation does not settle those permissions.

Pre-award participation and executable purchasing are also different stages. GE Aerospace's supplier performance framework covers safety, compliance, quality, and supplier health, while its portal distinguishes inquiries and bidding from order acknowledgment, invoicing, and payment. [redacted]

[redacted] Whether this represents an unmet need depends on the account's existing coverage. A seller should establish that gap before offering additional assurance services; approved alternatives can preserve flexibility, but an apparently accessible offer is less useful when its supporting commitment cannot satisfy the actual obligation.

Sources & Evidence

1. Boeing Suppliers - Quality
   · Boeing states that supplier quality requirements apply as defined by contract and connects raw-material sourcing controls to contractual engineering and quality requirements. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))
2. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition
   · Boeing D607 prohibits unauthorized material substitutions, recognizes alternatives specified in the engineering definition, and makes authorized deviations purchase-contract-specific. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
3. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
   · Where incorporated into the contract, Boeing D604 permits its authorized procurement representative to request substantive raw-material assurance documentation, including mill assurances, contracts, and stock records. The clause establishes an assurance requirement, not the prevalence of unmet buyer needs. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D604_20180220.pdf))

4. GE Aerospace Supplier Portal
   · GE Aerospace separates potential-supplier inquiries and bidding from order inquiry, acknowledgment, invoicing, and payment administration. These functions establish distinct commercial stages rather than equivalent evidence of an accepted purchase. (supplier.geaerospace.com)
5. GE Aerospace - Doing Business with GE Aerospace
   · GE Aerospace describes supplier expectations and performance management addressing safety, compliance, quality, supplier health, transparency, and accountability. ([geaerospace.com](https://www.geaerospace.com/company/doing-business))

5.2. Consumer Experience Benchmarking

For North American nickel-alloy purchases, useful service benchmarks distinguish transaction visibility from supplier support. Rolled Alloys' May 2026 line card advertises shipment tracking and retrieval of certifications, packing slips, and invoices. ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪

Published risk allocation can qualify the convenience being offered. Rolled Alloys' U.S. sales terms dated May xx.xx 2026 describe estimated shipping dates, transfer of transit risk at carrier delivery, limited warranty remedies, and exclusion of consequential damages. ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. Rolled Alloys - United States Full Line Card, Bulletin 194US, May 2026
   · Rolled Alloys' May 2026 line card advertises order submission, shipment tracking, shipping-location information, and retrieval of certifications and commercial documents. ([rolledalloys.com](https://www.rolledalloys.com/wp-content/uploads/RolledAlloys_Full_LineCard_US.pdf))
2. Haynes International - Sales and Service
   · Haynes advertises North American service-center reach, on-demand delivery, end-use support, and European affiliate relationships. These are service descriptions rather than order-specific guarantees. ([haynesintl.com](https://haynesintl.com/en/sales-and-service/))
3. Rolled Alloys - U.S. Terms and Conditions of Sale, May 6, 2026
   · Rolled Alloys' U.S. sales terms dated May xx.xx 2026 describe estimated shipping dates, transfer of transit risk at carrier delivery, limited warranty remedies, and exclusion of consequential damages. ([rolledalloys.com](https://www.rolledalloys.com/wp-content/uploads/2022/xx.xx/Rolled_Alloys_Sales_Terms_US.pdf))

5.3. Opportunity Mapping

For a seller with access to an accepted upstream source, requirement-specific supply assurance is a lower-change account proposition than an unauthorized material substitute. ▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪

[illegible] This prioritization concerns commercial accessibility, not an assertion that fulfillment services are universally more profitable than material production.

Form-specific purchasing provides another bounded route. Ulbrich Stainless Steels & Special Metals, Inc. advertises aerospace nickel-alloy strip and foil alongside upstream sourcing and regional distribution relationships; Fine Tubes provides a separate aerospace tubing proposition within AMETEK Specialty Metal Products. [illegible]

Proprietary Powder has a legitimate project-purchasing opportunity distinct from recurring production supply. Aubert & Duval's brochure lists ABD-900AM and ABD-1000AM, Alloyed Ltd. records an ABD licensing relationship, and UKRI identifies the Alloyed-led ABD-1000AM project with funding through October 2026. [illegible]

[illegible] Direct delivery remains preferable when customer requirements differ materially or a hub adds inventory exposure without a meaningful service benefit. This is a conditional EU fulfillment choice within the Global market, not a conclusion that a regional presence creates uniform access.

Sources & Evidence

1. Alloyed - About
   · The historical licensing relationship supports investigating an existing commercial route before assuming that a material buyer needs a broader commercialization grant. The applicable permissions remain unverified. ([alloyed.com](https://alloyed.com/about))
2. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition
   · D607 makes permitted deviations contract-specific and prohibits disguising the material's chain of ownership. A new fulfillment relationship therefore does not independently authorize a different material source. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
3. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
   · D604 establishes a documented buyer need for substantiated upstream coverage rather than a general supplier relationship. The proposed assurance-led proposition is a conditional commercial inference. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D604_20180220.pdf))
4. UKRI - Accelerating Manufacturing Readiness Level of ABD-1000AM for High Temperature Aerospace Components
   · The project record supports a bounded development-purchasing context. A later production relationship requires a separate attributable commercial commitment. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
5. European Commission - Importation
   · The European Commission explains that goods released for free circulation can move within EU customs territory after applicable import requirements are satisfied. Customer material acceptance remains a separate commercial condition. ([taxation-customs.ec.europa.eu](https://taxation-customs.ec.europa.eu/customs/customs-procedures-import-and-export/importation_en))
6. Ulbrich - Aerospace Engine Components and High-Temperature Alloys
   · The aerospace strip-and-foil offering supports a form-specific purchasing inquiry rather than treating every broad alloy catalog as an equivalent alternative. ([ulbrich.com](https://www.ulbrich.com/applications/aerospace-engine-components-high-temp-alloys/))
7. Supply Chain Management That Understands Your Customer | Ulbrich
   · Ulbrich describes upstream sourcing relationships and a German distribution operation handling high-performance nickel alloys. These establish commercial functions, not an individual customer's accepted source or allocation. ([ulbrich.com](https://www.ulbrich.com/company/supply-chain/))
8. Fine Tubes - Aerospace
   · Fine Tubes' named aerospace tubing portfolio establishes a concrete form-specialist comparison for tube buyers, without establishing interchangeability with strip, foil, or other stock forms. ([finetubes.co.uk](https://www.finetubes.co.uk/markets/aerospace-tubes))
9. EOS - Nickel Alloys for Industrial 3D Printing
   · EOS markets system-associated nickel powders and commits to accompanying inspection certificates. This establishes a different documentation relationship, not automatic equivalence to an ABD offering. ([eos.info](https://www.eos.info/metal-solutions/metal-materials/nickel-alloys))
10. Aubert & Duval - Metal Powders, June 2024
    · The named powder portfolio provides a supplier inquiry route. Its application statements are illustrative rather than warranties of suitability, reinforcing the need for transaction-specific acceptance. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/2024-xx.xx-Aubert-Duval-Metal-Powders-for-Additive-Manufacturing-Brochure_web.pdf))

5.4. Distribution Channel Analysis

[illegible] Stock Supply and Order-Dedicated Supply must therefore be assessed separately from channel ownership. For Captive Supply, the relevant purchasing question is internal allocation authority and transfer obligations, not an assumption that affiliated inventory is available to outside buyers.

Rolled Alloys describes arrangements placing replenishment stock at the customer and others retaining material for subsequent release; its scheduled program requires contract or long-term-agreement terms. [illegible] Buyers should retain an order-dedicated alternative when the stocking program cannot cover the accepted material and documentation requirement.

[illegible] This establishes a named commercialization arrangement, not unrestricted intermediary access. An unaffiliated buyer should establish contractual availability and the proposed seller's rights before relying on this route; customer acceptance remains a separate requirement.

Sources & Evidence

1. Rolled Alloys - E-Services Stocking Programs
   · Rolled Alloys describes customer-site replenishment, distributor-held release arrangements, and scheduled programs requiring contract or long-term-agreement terms. ([rolledalloys.com](https://www.rolledalloys.com/eservices/))
2. Aubert & Duval and Alloyed Launch ABD-1000AM Nickel Superalloy at RAPID + TCT
   · The June xx.xx 2024 announcement names Aubert & Duval as Alloyed's ABD-1000AM powder production partner supplying Alloyed and extends the relationship covering ABD-900AM. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2024/xx.xx/AD_PR_Launch-of-ABD-1000AM_EN_06-xx.xx-2024.pdf))
3. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition
   · D607 requires material pedigree and prohibits disguising intermediate ownership; its substance flows to subcontracts. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
4. Haynes International - Our Company
   · Haynes identifies nickel-alloy product forms and company-operated sales offices and service centers that stock material and provide associated services. ([haynesintl.com](https://haynesintl.com/en/our-company/))

5.5. Pricing Trend Analysis

[illegible]

RESEARCH SAMPLE REPORT

[illegible] Buyers should compare the agreed index basis, reset provisions, commitment date, and downstream recovery terms. An indexed agreement can reduce constituent-material exposure without eliminating a funding mismatch.

[illegible] Fixed commercial terms provide buyer certainty but leave the supplier exposed unless separately addressed; broader adjustment provisions transfer more uncertainty to the buyer. Contract renewal and schedule changes are therefore important points for reviewing residual exposure rather than assuming automatic pass-through.

Trade costs are likewise transaction-specific. Haynes' North American terms permit recovery of duties or tariffs imposed before shipment. [illegible]

Sources & Evidence

1. ATI 2025 Annual Report
   · ATI describes delayed or incomplete raw-material recovery, competitive constraints on pass-through, and separate energy and skilled-labor cost exposures. ([s27.q4cdn.com](https://s27.q4cdn.com/xx.xx/files/doc_financials/2025/ar/ATI-2025-Annual-Report-web-FINAL.pdf))
2. ATI Specialty Materials - Tools & Resources
   · ATI Specialty Materials warns that customer-specific raw-material indices can differ from its published guidance and that calculation methods can change. ([atimaterials.com](https://www.atimaterials.com/specialtymaterials/Pages/tools-resources.aspx))
3. Canada Border Services Agency - Chapter 75: T2026-2, Nickel and Articles Thereof
   · Canada's 2026 Chapter xx.xx schedule lists specified nickel-alloy bars, rods, profiles, wire, flat products, and tubes under duty-free MFN treatment. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/html/xx.xx/ch75-eng.html))
4. Haynes International - Terms and Conditions of Sale North America
   · Haynes' North American terms permit recovery of duties, taxes, or tariffs imposed before shipment; an inconsistent signed agreement can prevail. ([haynesintl.com](https://haynesintl.com/en/terms-and-conditions-of-sale-north-america/))

5.6. Regulatory Compliance & Standards Framework

Civil-aerospace material access is mediated through the approved production organization's obligations. U.S. xx.xx CFR xx.xx requires production-certificate applicants and holders to maintain supplier controls. [illegible]

[redacted] Boeing defines the applicability of its supplier quality requirements through the contract. Buyers should therefore identify the governing obligation and required documentation without treating either advisory guidance or another customer's approval as universally binding.

Covered U.S. defense procurement requires a further distinction. [redacted] These are covered-contract conditions, not restrictions on every Global aerospace transaction.

Patent exposure and licensing rights are additional, offering-specific questions. Alloyed records an ABD licensing agreement with Aubert & Duval, while Haynes' North American terms state that a goods sale does not grant an implied intellectual-property license. [redacted]

Sources & Evidence

1. Boeing Suppliers - Quality
   · Boeing states that the applicability of its supplier quality requirements is defined by contract. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))
2. Alloyed - About
   · Alloyed's corporate history records a 2019 ABD licensing agreement with Aubert & Duval. ([alloyed.com](https://alloyed.com/about))
3. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
   · DFARS xx.xx-xx.xx addresses specialty metals incorporated in covered articles and recognizes qualifying-country origins and specified exceptions. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
4. FAA AC 20-154A - Guide for Developing a Receiving Inspection System for Aircraft Parts and Materials
   · FAA AC xx.xx-154A, issued July xx.xx 2024, addresses receiving traceability and explicitly states that it is nonmandatory guidance rather than a regulation. ([faa.gov](https://www.faa.gov/airports/resources/advisory_circulars/index.cfm/go/document.information/documentID/xx.xx))
5. Haynes International - Terms and Conditions of Sale North America
   · Haynes states that selling goods does not expressly or implicitly grant rights or licenses in its intellectual property. ([haynesintl.com](https://haynesintl.com/en/terms-and-conditions-of-sale-north-america/))

6. Electronic Code of Federal Regulations - 14 CFR 21.137, Quality System
   - xx.xx CFR xx.xx requires production-certificate applicants and holders to maintain supplier controls addressing conformity to the production approval holder's requirements and reporting of nonconformity. ([ecfr.gov](https://www.ecfr.gov/current/title-xx.xx/chapter-I/subchapter-C/part-xx.xx/subpart-G/section-xx.xx))
7. EASA - Easy Access Rules for Initial Airworthiness and Environmental Protection, November 2025
   - EU Part xx.xx.A.xx.xx includes vendor control, incoming-material conformity, identification, and traceability requirements. Related EASA acceptable means explain that recognized quality certification does not replace Part xx.xx compliance. ([easa.europa.eu](https://www.easa.europa.eu/en/downloads/xx.xx/en))
8. DFARS 252.225-7008 - Restriction on Acquisition of Specialty Metals
   - DFARS xx.xx-xx.xx requires specialty metal delivered under the covered contract to be melted or produced in the United States or its outlying areas. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-specialty-metals.))

5.7. ESG & Sustainability Analysis

Sustainability requirements can influence supplier administration and access independently of alloy performance. ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■ ■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ Participation requires management attention and record sharing, while satisfying an assessment does not itself secure a material award.

Circularity also changes control of material relationships. ■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■ ■■■■ ■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■ ■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■ These initiatives should not automatically be interpreted as additional new-material demand or proof of a particular offering's environmental advantage.

Sources & Evidence

1. Rolls-Royce - Our Stakeholders
   - Rolls-Royce describes environmental, ethics, labor, and human-rights supplier screening, further assessments and improvement plans, and encouragement of environmental-management certification. ([rolls-royce.com](https://www.rolls-royce.com/sustainability/customers-and-suppliers))
2. GE Aerospace - 2025 Sustainability Report
   - GE Aerospace reports recovery of high-performance metals across internal operations, suppliers, and its MRO network, alongside repair and serviceable-part reuse. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))

5.8. Disruption & Risk Scenarios

A corporate-level interruption could undermine apparent diversification even when operating facilities differ. ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ Separate sites may still protect against a local interruption, so common ownership alone does not justify replacing an otherwise dependable source.

An origin-documentation failure could make physically available material unusable for a covered U.S. defense obligation. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Repair-related material purchases remain included, but should be identified separately.

Sources & Evidence

1. VDM Metals - Acerinox Completes the Acquisition of Haynes International
   - The November xx.xx 2024 announcement records Acerinox's completed Haynes acquisition and connects Haynes and VDM within its high-performance-alloys business. It does not establish identical facility risks or allocation policies.
   ([vdm-metals.com](https://www.vdm-metals.com/en/company/news-and-events/news-archive/single/acerinox-completes-the-acquisition-of-haynes-international))
2. GE Aerospace - 2025 Sustainability Report
   - GE describes component restoration and serviceable-part reuse, supporting the conditional scenario in which a changed maintenance workscope leaves dedicated replacement material unused.
   ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
3. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
   - DFARS xx.xx-xx.xx recognizes qualifying-country origins and specified exceptions for covered articles. Unincorporated specialty-metal mill products do not receive a blanket commercial-off-the-shelf exception.
   ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

4. DFARS 252.225-7008 - Restriction on Acquisition of Specialty Metals
   · DFARS xx.xx-xx.xx requires specialty metal delivered under the covered contract to be melted or produced in the United States or its outlying areas. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-specialty-metals.))

5.9. Return on Investment & Cost-Benefit Analysis

For a component buyer, a stocking arrangement can justify commitment when dependable allocation and release administration reduce disruption exposure enough to outweigh inventory funding, storage, and unused-material obligations. Customer-held and supplier-held programs change where inventory sits, not automatically who owns it or bears schedule risk. ■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■ ■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■

For a material supplier, dedicated coverage or investment is more defensible when supported by an attributable customer commitment than by general aerospace activity. ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ATI Inc.'s distinction between multiyear terms and accepted orders shows why relationship duration alone is insufficient.

Residual cost recovery is a separate sensitivity. ATI discloses that surcharge and index mechanisms can recover costs incompletely or with delay. ■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■

Sources & Evidence

1. ATI 2025 Annual Report
   · ATI says longer agreements reduce supply uncertainty but discloses delayed or incomplete recovery through surcharge and index mechanisms. These facts support assessing commitment coverage and residual funding exposure separately. ([s27.q4cdn.com](https://s27.q4cdn.com/xx.xx/files/doc_financials/2025/ar/ATI-2025-Annual-Report-web-FINAL.pdf))
2. Rolled Alloys - E-Services Stocking Programs
   · Customer-site and supplier-held arrangements provide distinct inventory-location choices. Ownership, allocation, unused-material responsibility, and economic benefits require an order-specific agreement. ([rolledalloys.com](https://www.rolledalloys.com/eservices/))

3. Rolled Alloys - U.S. Terms and Conditions of Sale, May 6, 2026

   · Rolled Alloys' U.S. terms describe estimated shipping dates, transfer of transit risk at carrier delivery, limited warranty remedies, and exclusion of consequential damages. Negotiated written terms can alter the applicable relationship. ([rolledalloys.com](https://www.rolledalloys.com/wp-content/uploads/2022/xx.xx/Rolled_Alloys_Sales_Terms_US.pdf))

4. Doncasters Group - DPC Holdings Reports Strong Second Quarter 2026 Results

   · The disclosed customer partnership connects the Alabama project to purchasing commitments. It supports commitment-backed investment as a commercial precedent, not evidence of access for an unrelated buyer. ([ir.doncasters.com](https://ir.doncasters.com/news-and-events/news/news-details/2026/DPC-Holdings-Reports-Strong-Second-Quarter-2026-Results/default.aspx))

6. Cumulative Impact of Artificial Intelligence 2026

AI has a documented downstream planning role that may affect superalloy purchasing timing. ■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ Component manufacturers and material suppliers could benefit from shared planning signals only when they identify an attributable requirement and distinguish forecasts from purchasing commitments; the direction of new-material demand still depends on the workscope.

■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■ ■■ ■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ Procurement and quality staff would still need to reconcile outputs with authorized business records. The supported commercial effect is a combination of potential planning visibility and additional governance obligations, not demonstrated removal of purchasing labor or universal material-order gains.

Sources & Evidence

1. GE Aerospace - 2025 Annual Report CEO Letter
   - GE Aerospace reports deploying an AI material assistant at its Celma and Malaysia MRO facilities in 2025 to anticipate LEAP workscopes and support earlier parts ordering. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_2025ceoletter.pdf))
2. Rolls-Royce Notice to Suppliers 632 - Supplier Minimum Cyber Security Standards, July 18, 2025
   - Rolls-Royce's July xx.xx 2025 supplier notice requires applicable AI security compliance and prior notification and approval for AI connected with its business or data. ([suppliers.rolls-royce.com](https://suppliers.rolls-royce.com/GSPWeb/ShowProperty?nodePath=%2FBEA+Repository%2FGlobal+Supplier+Portal%2FNoticesToSuppliers%2Fnts_632%2F%2FntsFile))

7. Nickel-Based Superalloys for Aerospace Market, by Product Form

Product Form changes the relevant sourcing comparison, not merely the material description. ■■■ ■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■ ■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■ ■■■■ ■■■■■■ ■■■■ ■ ■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ Special Metals advertises several of these forms, but its portfolio description does not establish every grade-form combination or an order-specific commitment.

For Ingots and Billets and Forging Stock, buyers must also distinguish the material transaction from the downstream component award. DPC Holdings' April 2026 draft disclosure describes Doncasters supplying superalloy ingots externally alongside internal material supply to its casting businesses. ■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■

Powder has identifiable commercial offerings without constituting an exclusive supplier category. ■■■■■■ ■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■ ■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■ ■■■■■ ■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ An alternative stock offer becomes useful only when its form and documentation meet the actual purchasing requirement; apparent availability alone does not justify switching.

Sources & Evidence

1. Special Metals - Tech Center

   · Special Metals advertises ingots, billets, plate, sheet, strip, tubing, bar, and wire. This establishes advertised form breadth, not every grade-form combination or a particular fulfillment obligation. ([specialmetals.com](https://www.specialmetals.com/tech-center/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised ingot supply establishes a PCC material-form crosswalk, not its sales weight.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised billet supply supports the forging-stock category mapping within the inherited PCC envelope.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised bar supply supports classification only; the monetary coefficient is an assumption.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Plate, sheet and strip offerings support a distinct flat-product allocation premise.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire availability supports the material-form crosswalk without establishing revenue.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tubing availability supports the material-form crosswalk without establishing revenue.

2. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition

   · Boeing D607 treats unauthorized departures from the required material definition, including form, as prohibited substitutions and makes authorized deviations specific to the purchase contract. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

3. CMA - Anticipated Acquisition by Acerinox, S.A. of Haynes International, Inc.: Full Text Decision
   - The CMA's 2024 investigation distinguished flat and long nickel products, identified shape-specific purchasing, and did not establish separate competitive markets for every sub-shape. Its reviewed market is broader than aerospace superalloys alone. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))
   - Taxonomy evidence: The decision distinguishes shape, grade, and material specification as separate nickel-alloy descriptors. These broader-market classifications support distinct analytical questions, not a finding that every retained category is a separate competitive market. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))
   - Taxonomy evidence: Paragraphs xx.xx-xx.xx report customer purchasing distinctions between flat and long nickel products and shape-specific demand. The investigation did not establish separate competitive markets for every sub-shape; its findings are not global aerospace demand allocations. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer evidence in paragraphs xx.xx-xx.xx supports separate flat/long purchasing pools; no published market-share table is used.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shape-specific purchasing supports a distinct long-stock allocation model without proving a separate competitive market for billet.
4. DPC Holdings Limited - Draft Registration Statement, April 14, 2026
   - DPC Holdings' April xx.xx 2026 draft registration statement describes Doncasters' superalloy ingots, internal supply to casting facilities, and external supply to aerospace and industrial-gas-turbine customers. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
   - Taxonomy evidence: The business record distinguishes superalloy ingots from downstream structural castings and airfoils, supporting the analytical separation of supplied alloy material from component sales value. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing separates ingots from component sales and describes external supply and xx.xx% internal superalloy sourcing, contradicting the inherited xx.xx% captive parameter.
5. Aubert & Duval - Stellar ABD-1000AM Powder for Additive Manufacturing
   - Aubert & Duval lists ABD-1000AM as a nickel-based powder offering associated with aerospace applications; the page does not establish an individual customer's acceptance or order commitment. ([aubertduval.com](https://www.aubertduval.com/en/products/stellar-abd-1000am-powder-for-additive-manufacturing/))
6. Haynes International - HAYNES 282
   - Haynes advertises Haynes xx.xx across flat, long, tubular, ingot, billet, and powder forms, supporting a comparison that does not equate powder with a unique producer category. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Powder is offered alongside conventional forms for HAYNES xx.xx supporting nonexclusive form classification, not an observed sales allocation.
7. Customs Tariff 2026 - Chapter 75: Nickel and Articles Thereof
   - Taxonomy evidence: Chapter xx.xx separately recognizes unwrought nickel alloys, powders, long products, wire, flat products and tubular products. These classifications cover a wider material boundary than aerospace superalloys. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))

8. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC's reported financial/product-category inputs and listed ingot offering constrain the eligible material envelope; the ingot allocation remains assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AA&S sales of USD xx.xx and its xx.xx% nickel-based/specialty-alloy category anchor the separately adjusted rolled-material envelope.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
9. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
10. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Narrow-strip supply supports a limited flat-product allocation within the modeled eligible Carpenter envelope.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire is a disclosed supplied form; its eligible monetary weight remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.

11. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical xx.xx% slab/bar/billet revenue category constrains the long-stock proxy; its eligible billet split is assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported combined stock category provides a proxy anchor, not a separately disclosed bar revenue share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 flat products represented approximately xx.xx% of net product revenue; extrapolation to the eligible Acerinox envelope is modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 wire represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 tubulars represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
12. Howmet Aerospace Inc. - 2025 Form 10-K
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Casting-alloy activities support an ingot-material equivalent rather than attributing full engine-component revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed metal/billet activities support retaining a forging-stock allocation; the assumed xx.xx% weight is not reported.
13. GE Aerospace - 2025 Sustainability Report
    - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
14. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned US long-product expansion supports the relative conventional-long-material premise; investment is not recognized as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx of planned platform investment includes expansion of the long-products offering, informing the bars forecast premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace demand and planned long-product diversification support testing a relative mix shift without assuming flat-product contraction.

7.1. Billets and Forging Stock

Table 6. Global Nickel-Based Superalloys for Aerospace Market Size, by Billets and Forging Stock, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. Anticipated acquisition by Acerinox, S.A. of Haynes International, Inc. - Full text decision

   · Taxonomy evidence: Paragraph xx.xx identifies billets among commercial nickel-product shapes, alongside bars, wires and tubes. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shape-specific purchasing supports a distinct long-stock allocation model without proving a separate competitive market for billet.

2. ASTM B637-26 - Precipitation-Hardening and Cold Worked Nickel Alloy Bars, Forgings, and Forging Stock

   · Taxonomy evidence: The public scope distinguishes forging stock from finished forgings within its nickel-alloy material coverage. ([store.astm.org](https://store.astm.org/standards/b637))

3. SAE AMS5670H - Nickel Alloy Bars, Forgings, Rings and Stock for Rings, Forgings and Heading

   · Taxonomy evidence: The aerospace-material scope separately includes stock for forging, rings or heading, supporting a material-stock distinction from component-specific forgings. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams5670h-nickel-alloy-corrosion-heat-resistant-bars-forgings-and-rings-stock-rings-forgings-heading-72ni-155cr-095cb-nb-25ti-070al-70fe-x750-xx.xx-f-xx.xx-c-solution-heat-treated-precipitation-hardenable))

4. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
5. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
6. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
7. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical xx.xx% slab/bar/billet revenue category constrains the long-stock proxy; its eligible billet split is assumed.
8. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed metal/billet activities support retaining a forging-stock allocation; the assumed xx.xx% weight is not reported.

9. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
11. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
12. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
13. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

14. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
15. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
16. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
17. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised billet supply supports the forging-stock category mapping within the inherited PCC envelope.
18. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned US long-product expansion supports the relative conventional-long-material premise; investment is not recognized as sales.

7.2. Plate, Sheet, Strip and Foil

Table 9. Global Nickel-Based Superalloys for Aerospace Market Size, by Plate, Sheet, Strip and Foil, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Anticipated acquisition by Acerinox, S.A. of Haynes International, Inc. - Full text decision

   · Taxonomy evidence: Footnote xx.xx states that the industry has no single plate-versus-sheet delineation, supporting the retained combined flat-product category rather than a universal dimensional split. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer evidence in paragraphs xx.xx-xx.xx supports separate flat/long purchasing pools; no published market-share table is used.

2. Customs Tariff 2026 - Chapter 75: Nickel and Articles Thereof

   · Taxonomy evidence: Heading xx.xx groups plate, sheet, strip and foil, with a distinct nickel-alloy subdivision. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))

3. SAE MAM5914 - Nickel Alloy, Corrosion and Heat Resistant, Sheet, Strip, and Foil

   · Taxonomy evidence: The public aerospace-material scope recognizes sheet, strip and foil as supplied forms within a nickel-alloy material family. This supports category recognition, not current sales or a universal dimensional crosswalk. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/mam5914-nickel-alloy-corrosion-heat-resistant-sheet-strip-foil-525ni-19cr-30mo-50cb-090ti-050al-18fe-consumable-electrode-vacuum-induction-melted-precision-cold-rolled-solution-heat-treated))

4. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: AA&S sales of USD xx.xx and its xx.xx% nickel-based/specialty-alloy category anchor the separately adjusted rolled-material envelope.
5. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
6. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Narrow-strip supply supports a limited flat-product allocation within the modeled eligible Carpenter envelope.
7. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 flat products represented approximately xx.xx% of net product revenue; extrapolation to the eligible Acerinox envelope is modeled.
8. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
9. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
11. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
12. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
13. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

14. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
15. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
16. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
17. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Plate, sheet and strip offerings support a distinct flat-product allocation premise.
18. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace demand and planned long-product diversification support testing a relative mix shift without assuming flat-product contraction.

7.3. Bars, Rods and Profiles

Table 12. Global Nickel-Based Superalloys for Aerospace Market Size, by Bars, Rods and Profiles, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Customs Tariff 2026 - Chapter 75: Nickel and Articles Thereof
   - Taxonomy evidence: Subheading xx.xx separately identifies nickel-alloy bars, rods and profiles. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
2. ASTM B637-26 - Precipitation-Hardening and Cold Worked Nickel Alloy Bars, Forgings, and Forging Stock
   - Taxonomy evidence: The specification expressly covers nickel-alloy rod and bar as supplied material forms. ([store.astm.org](https://store.astm.org/standards/b637))
3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.

4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported combined stock category provides a proxy anchor, not a separately disclosed bar revenue share.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised bar supply supports classification only; the monetary coefficient is an assumption.
17. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx of planned platform investment includes expansion of the long-products offering, informing the bars forecast premise.

7.4. Ingots

Table 15. Global Nickel-Based Superalloys for Aerospace Market Size, by Ingots, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. DPC Holdings Limited - Draft Registration Statement, April 14, 2026

   · Taxonomy evidence: The publicly accessible April xx.xx 2026 registration-statement record identifies nickel- and cobalt-based superalloy ingots and separately describes ingot supply for aerospace customers. Together with the regulatory form classification, this corroborates ingots as an aerospace material category; mixed-base-metal disclosures do not provide a nickel-only allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing separates ingots from component sales and describes external supply and xx.xx% internal superalloy sourcing, contradicting the inherited xx.xx% captive parameter.

2. Customs Tariff 2026 - Chapter 75: Nickel and Articles Thereof

   · Taxonomy evidence: Heading xx.xx recognizes unwrought nickel alloys, providing a broader material-form crosswalk rather than direct aerospace-ingot verification. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC's reported financial/product-category inputs and listed ingot offering constrain the eligible material envelope; the ingot allocation remains assumed.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Casting-alloy activities support an ingot-material equivalent rather than attributing full engine-component revenue.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised ingot supply establishes a PCC material-form crosswalk, not its sales weight.

7.5. Powder

Table 18. Global Nickel-Based Superalloys for Aerospace Market Size, by Powder, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. SAE AMS7075 - Nickel Alloy, Corrosion- and Heat-Resistant, Powder for Additive Manufacturing
   · Taxonomy evidence: The public scope of AMS7075, issued January xx.xx 2026, explicitly covers a corrosion- and heat-resistant nickel alloy supplied as prealloyed powder. This adds a current aerospace-material-standard anchor for the powder form without asserting a proprietary-grade equivalence not stated on the page. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams7075-nickel-alloy-corrosion-heat-resistant-powder-additive-manufacturing-50ni-20co-17cr-31w-23ti-21al-21mo-18cb-nb-15ta-004c-0005b))
2. Customs Tariff 2026 - Chapter 75: Nickel and Articles Thereof
   · Taxonomy evidence: Heading xx.xx separately recognizes nickel powder products. It does not isolate the aerospace-superalloy subset. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
3. SAE AMS7006 - Nickel Alloy, Corrosion- and Heat-Resistant, Powder for Additive Manufacturing
   · Taxonomy evidence: The aerospace-material specification recognizes supplied nickel-alloy powder for additive manufacturing as a material category distinct from finished components. No technical production conditions are used for segmentation. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams7006-nickel-alloy-corrosion-heat-resistant-powder-additive-manufacturing-525ni-19cr-30mo-51cb-nb-090ti-050al-18fe))
4. ATI Inc. - 2025 Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
5. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
6. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.

7. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
8. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
9. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
11. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.

12. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
13. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
14. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
15. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
16. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
17. Haynes International - HAYNES 282
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Powder is offered alongside conventional forms for HAYNES xx.xx supporting nonexclusive form classification, not an observed sales allocation.

Sources & Evidence

1. Customs Tariff 2026 - Chapter 75: Nickel and Articles Thereof
   · Taxonomy evidence: Subheading xx.xx distinguishes nickel-alloy wire from bars, rods and profiles. ([cbsa-asfc.gc.ca](https://www.cbsa-asfc.gc.ca/trade-commerce/tariff-tarif/2026/xx.xx-xx.xx/ch75-2026-eng.pdf))
2. SAE AMS5832E - Nickel Alloy, Corrosion and Heat Resistant, Welding Wire
   · Taxonomy evidence: The inspected historical revision's public scope recognizes corrosion- and heat-resistant nickel-alloy welding wire as a supplied material form. It does not establish current customer qualification or sales. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams5832e-nickel-alloy-corrosion-heat-resistant-welding-wire-525ni-19cr-30mo-51cb-090ti-050al-18fe-consumable-electrode-vacuum-induction-melted))

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire is a disclosed supplied form; its eligible monetary weight remains modeled.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 wire represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire availability supports the material-form crosswalk without establishing revenue.

7.7. Tubes and Pipes

Table 24. Global Nickel-Based Superalloys for Aerospace Market Size, by Tubes and Pipes, by Region, 2017-2040 (USD Million)

   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tubing availability supports the material-form crosswalk without establishing revenue.

8. Nickel-Based Superalloys for Aerospace Market, by Strengthening Class

Strengthening Class distinguishes material requirements rather than separate supplier tiers. [illegible] Where contractual substitution controls apply, moving to another class requires the relevant authorization rather than a general performance comparison.

[illegible] Before treating this class as a sourcing alternative, buyers need a named supplier's applicable offering and fulfillment commitment. Historical pedigree supports investigation, not an unconditional material commitment.

Figure 10. Global Nickel-Based Superalloys for Aerospace Market Size, by Strengthening Class, 2025 (%)

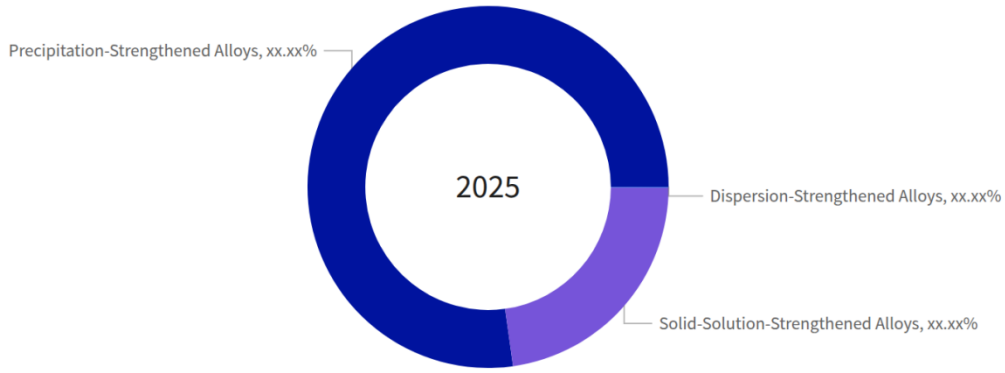

Figure 11. Global Nickel-Based Superalloys for Aerospace Market, by Strengthening Class, 2032 (USD Million)

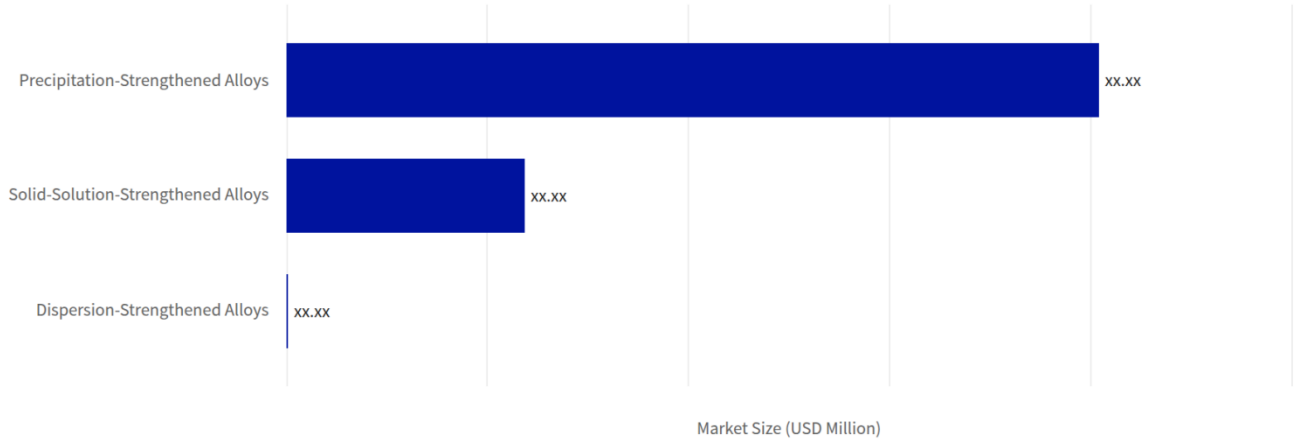

Table 27. Global Nickel-Based Superalloys for Aerospace Market, by Strengthening Class growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Dispersion-Strengthened Alloys	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Special Metals - Aerospace

   · Special Metals' undated aerospace portfolio lists INCONEL alloy MA754. The listing does not state an order-specific form, continuing delivery commitment, or customer acceptance. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

2. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition

   · The clause recognizes authorized alternatives but does not permit an unapproved material change, grounding the conditional treatment of cross-class sourcing rather than an assumption of interchangeability. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: D607 prohibits unauthorized material substitutions while recognizing specified alternatives. It constrains assumptions about frictionless cross-class substitution, without quantifying adoption delays. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization requirements qualify assumptions about precipitation-family substitution opportunities; the clause does not prove future purchases or a class-growth premium. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

3. Haynes International - HAYNES 282

   · Haynes describes Haynes xx.xx as gamma-prime strengthened, discusses its precipitation strengthening, and positions it for high-temperature structural applications including aeroengines. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

4. Haynes International - HAYNES 230
   - Haynes identifies Haynes xx.xx as solid-solution-strengthened and describes combustion-hardware applications. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
5. NASA - Welding and Brazing of Nickel and Nickel-Base Alloys: Public Abstract
   - The public abstract distinguishes solid-solution, precipitation, and dispersion-hardening nickel-base families. Only this historical classification is used, not the document's operational subject matter. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))
   - Taxonomy evidence: The public abstract distinguishes solid-solution-hardening, precipitation-hardening and dispersion-hardening nickel-base alloy families. Its broader high-nickel nonheat-treatable category is not adopted because the report boundary is structural superalloys. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))
6. NASA - Longitudinal Shear Behavior of Several Oxide Dispersion Strengthened Alloys: Public Abstract
   - NASA's 1978 abstract identifies MA-xx.xx and MA-xx.xx as commercial oxide-dispersion-strengthened alloys. This establishes historical commercial recognition, not continuing aerospace deliveries. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))
7. Materials Needs and R&D Strategy for Future Military Aerospace Propulsion Systems - Appendix E
   - Taxonomy evidence: The aerospace-propulsion case study distinguishes solid-solution and precipitation strengthening within its nickel-superalloy discussion. It supports an alloy-family axis separate from delivered product form. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
8. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))

9. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
10. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
11. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
12. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
13. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

14. Carpenter Technology - Advanced Materials for Aerospace Motor & Engines

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

15. Elementum 3D - Metal Alloy Additive Manufacturing Colorado

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed.
([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed.
([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

16. NASA - NASA-Developed Printable Metal Can Take the Heat

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake.
([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake.
([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

17. Carpenter Technology - Lighter, Faster, Stronger Metallurgy for Defense, July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

8.1. Precipitation-Strengthened Alloys

Table 29. Global Nickel-Based Superalloys for Aerospace Market Size, by Precipitation-Strengthened Alloys, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ASTM B637-26 - Precipitation-Hardening and Cold Worked Nickel Alloy Bars, Forgings, and Forging Stock
   · Taxonomy evidence: The public scope recognizes precipitation-hardenable nickel alloys intended for moderate- or high-temperature service. ([store.astm.org](https://store.astm.org/standards/b637))
2. SAE AMS5670H - Nickel Alloy Bars, Forgings, Rings and Stock for Rings, Forgings and Heading
   · Taxonomy evidence: The specification identifies X750 as precipitation-hardenable despite its stated delivered condition, supporting separation of alloy family from delivery temper. ([saemobilus.sae.org](https://saemobilus.sae.org/standards/ams5670h-nickel-alloy-corrosion-heat-resistant-bars-forgings-and-rings-stock-rings-forgings-heading-72ni-155cr-095cb-nb-25ti-070al-70fe-x750-xx.xx-f-xx.xx-c-solution-heat-treated-precipitation-hardenable))
3. Materials Needs and R&D Strategy for Future Military Aerospace Propulsion Systems - Appendix E
   · Taxonomy evidence: The case study explicitly recognizes precipitation strengthening as a nickel-superalloy classification distinction. ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
4. Welding and Brazing of Nickel and Nickel-Base Alloys
   · Taxonomy evidence: The abstract identifies precipitation-hardening nickel-base alloys and explicitly connects them to aerospace applications. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))

5. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
6. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
7. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
8. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
9. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.

10. GE Aerospace - 2025 Sustainability Report
    - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
12. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
13. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
14. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

15. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
16. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
17. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
18. Haynes International - HAYNES 282
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification.
      ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification.
      ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
19. Carpenter Technology - Advanced Materials for Aerospace Motor & Engines
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
      ([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
      ([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

20. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization requirements qualify assumptions about precipitation-family substitution opportunities; the clause does not prove future purchases or a class-growth premium. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

8.2. Solid-Solution-Strengthened Alloys

Table 32. Global Nickel-Based Superalloys for Aerospace Market Size, by Solid-Solution-Strengthened Alloys, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Materials Needs and R&D Strategy for Future Military Aerospace Propulsion Systems - Appendix E
   · Taxonomy evidence: The case study explicitly recognizes solid-solution-strengthened nickel material within the superalloy discussion.
   ([nationalacademies.org](https://www.nationalacademies.org/read/xx.xx/chapter/xx.xx))
2. Welding and Brazing of Nickel and Nickel-Base Alloys
   · Taxonomy evidence: The abstract separately recognizes the solid-solution-hardening nickel-base alloy family.
   ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))

7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Haynes International - HAYNES 230
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
17. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: D607 prohibits unauthorized material substitutions while recognizing specified alternatives. It constrains assumptions about frictionless cross-class substitution, without quantifying adoption delays. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

8.3. Dispersion-Strengthened Alloys

Table 35. Global Nickel-Based Superalloys for Aerospace Market Size, by Dispersion-Strengthened Alloys, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

16. Elementum 3D - Metal Alloy Additive Manufacturing Colorado
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed. ([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed. ([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))
17. NASA - NASA-Developed Printable Metal Can Take the Heat
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake. ([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake. ([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

18. Carpenter Technology - Lighter, Faster, Stronger Metallurgy for Defense, July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

19. Special Metals - Aerospace

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight.
([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight.
([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

9. Nickel-Based Superalloys for Aerospace Market, by Component Application

Within Air-Breathing Propulsion & Auxiliary Power, component identity can change the purchasing cycle. ■■■ ■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ This company-specific distinction makes Turbine Blades & Vanes and Engine Structures & Auxiliary Systems different commercial questions; it does not establish a universal replacement pattern or an external material award.

Turbine Disks & Rotor Hardware, Compressor Components, and Combustion & Exhaust Components also require separate material attribution. ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■ ■■■■ ■■ ■■■ ■■■ ■■■■■■■■■ ■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■ ■ ■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ A supplier's aircraft-engine credentials should not be treated as proof of access to every component or auxiliary-power requirement.

■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■ These historical examples establish different material destinations, not current sourcing commitments. Suppliers should establish the current component program and attributable material release before dedicating supply; aggregate engine activity, a demonstrator, or historical vehicle use cannot settle that decision.

Sources & Evidence

1. DPC Holdings Limited - Draft Registration Statement, April 14, 2026

   · The disclosure distinguishes predominantly new-build aerospace structural castings, typically retained for an engine's life, from planned aerospace airfoil activity with replacement exposure. It does not establish the same lifecycle pattern across the market.
   ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))

2. Haynes International - HAYNES 230

   · The producer's application description connects Haynes xx.xx with combustion cans and related gas-turbine hardware; it does not establish coverage of every engine component.
   ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

3. NASA - Chapter 2: Aerospace Materials Characteristics

   · NASA's application account distinguishes nickel-superalloy uses in compressor components, turbine disks and blades, combustion and exhaust areas, and rocket-engine hardware. These are application classifications, not supplier awards. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

   · Taxonomy evidence: The aerospace-applications section identifies aircraft turbine engines and rocket engines as distinct superalloy-consuming systems; it does not establish a global allocation.
   ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed.
   ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

4. SIEF RP04-153 - Aero-engine Final Report Summary 2017

   · The 2017 project summary identifies a Safran auxiliary-power demonstrator and Hastelloy X among its materials. This supports developmental application evidence rather than recurring production procurement.
   ([sief.org.au](https://sief.org.au/wp-content/uploads/2019/xx.xx/RP04-153AeroFinalReportSummary.pdf))

5. NASA and Superalloys: A Customer, a Participant, and a Referee

   · NASA's 2008 account identifies IN718 in Shuttle wing backing structures and International Space Station battery pressure vessels, establishing historical structural and onboard-equipment uses without establishing current sourcing.
   ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award.
   ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award.
   ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program.
   ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program.
   ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

6. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
7. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
8. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
9. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
10. Howmet Aerospace Inc. - 2025 Form 10-K
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
11. GE Aerospace - 2025 Sustainability Report
    - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

12. ESA - ESA Space Environment Report 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
13. VDM Metals - Alloys for the Aerospace Industry
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))

9.1. Air-Breathing Propulsion & Auxiliary Power

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics

   · Taxonomy evidence: The chapter describes nickel-superalloy use across compressor, combustion and turbine sections of aircraft engines. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.

5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))

7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GE describes repaired/serviceable-part reuse, supporting a counterforce to converting aftermarket activity directly into newly supplied material purchases. Its reported approximately xx.xx% strategic-nickel revert content is not deducted from the terminal-material market. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial repair and component reuse support retaining uncertainty around replacement-related combustion material purchases. The selected procurement-intensity offset remains an assumption, not a measured avoided-purchase percentage. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. DPC Holdings Limited - Registration Statement with 2025 Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))

16. Haynes International - HAYNES 230
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
17. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
18. Carpenter Technology - Business Segments
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))

9.1.1. Turbine Disks & Rotor Hardware

Table 44. Global Nickel-Based Superalloys for Aerospace Market Size, by Turbine Disks & Rotor Hardware, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI

   · Taxonomy evidence: The same aerospace-demand-side record identifies turbine disks, corroborating this component category without quantifying its complete rotor-hardware boundary. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

2. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: The chapter identifies superalloy turbine disks as an aerospace application. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.

8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))

9.1.2. Engine Structures & Auxiliary Systems

Table 47. Global Nickel-Based Superalloys for Aerospace Market Size, by Engine Structures & Auxiliary Systems, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. Evaluation of the IN 939 Alloy for Large Aircraft Engine Structures
   · Taxonomy evidence: The paper's stated aircraft-engine structural application supports placement under engine structures rather than treating all turbine-alloy activity as an airfoil application. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2004/Superalloys_2004_441_450.pdf))
2. Development and validation of a powder HIP route for high temperature Astroloy to manufacture Ultrafan® IP Turbine Casings
   · Taxonomy evidence: The 2020-2021 project report identifies nickel-superalloy material for aircraft-engine turbine casings, supporting a structural-engine component category. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting))
3. Transforming the manufacturing of aero-engine casing components for Rolls-Royce and its supply chain
   · Taxonomy evidence: The record identifies superalloy aero-engine casings as commercially consequential components, corroborating their placement within engine structures. ([impact.ref.ac.uk](https://impact.ref.ac.uk/casestudies/CaseStudy.aspx?Id=xx.xx))

4. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
5. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
6. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
7. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
8. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))

9. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
11. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
12. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
13. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

14. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
15. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
16. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
17. DPC Holdings Limited - Registration Statement with 2025 Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics
   · Taxonomy evidence: Nickel-superalloy turbine blades are explicitly identified. This passage does not separately establish every stationary-vane inclusion. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
2. ATI Inc. - 2025 Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GE describes repaired/serviceable-part reuse, supporting a counterforce to converting aftermarket activity directly into newly supplied material purchases. Its reported approximately xx.xx% strategic-nickel revert content is not deducted from the terminal-material market. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. DPC Holdings Limited - Registration Statement with 2025 Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
16. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))

9.1.4. Combustion & Exhaust Components

Table 53. Global Nickel-Based Superalloys for Aerospace Market Size, by Combustion & Exhaust Components, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. Accelerating Manufacturing Readiness level of ABD®-1000AM for AM of high temperature aerospace components (AMRAM1000)

   · Taxonomy evidence: The project identifies a combustor-tile demonstrator, supporting combustion-component placement for this developmental activity rather than establishing production-market demand. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

2. Chapter 2: Aerospace Materials Characteristics

   · Taxonomy evidence: Combustor materials and the downstream exhaust-nozzle region are distinguished from compressor and turbine components. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.

8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial repair and component reuse support retaining uncertainty around replacement-related combustion material purchases. The selected procurement-intensity offset remains an assumption, not a measured avoided-purchase percentage. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Haynes International - HAYNES 230
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

9.1.5. Compressor Components

Sources & Evidence

1. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI

   · Taxonomy evidence: The introduction identifies aerospace compressor disks as an application of the explicitly named 720LI material. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

2. Chapter 2: Aerospace Materials Characteristics

   · Taxonomy evidence: IN-xx.xx compressor disks and blades, and stronger nickel-base alloys for later compressor stages, are described. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics

   · Taxonomy evidence: Rocket-engine turbopump blades, disks and housings are identified as superalloy applications, including IN-xx.xx. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. ESA - ESA Space Environment Report 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))

Sources & Evidence

1. NASA and Superalloys: A Customer, a Participant, and a Referee

   · Taxonomy evidence: The 2008 paper records IN718 in Space Shuttle wing backing and thermal-protection supporting structures, establishing a historical non-engine structural application. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.

10. Nickel-Based Superalloys for Aerospace Market, by Demand Stage

Initial Equipment Production and Replacement & Retrofit Production can purchase against the same authorized improvement while serving different destinations. ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■ ■■■■■ ■■■■ ■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■ ■■■■ ■■■ ■■■■■■■ ■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■ ■ ■■■ ■■■■ ■■ ■■■■■ ■■■■■■■■■■■■■■ Production planning should distinguish first installation from replacement or retrofit releases even when the grade and form coincide.

■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■ ■■ ■■■ ■■■■■■■■■■■■■■ ■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ Sellers should identify the authorized workscope and material obligation before reserving supply. Treating all maintenance activity as replacement production would expose commitments to repair, reuse, and workscope changes.

■■■■■■■■■■ ■■■■■■■■■■■ ■ ■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ A project-specific material offer can address that requirement, but a longer-term production commitment needs a separate customer award or accepted order. Demonstrator completion is a monitoring event; it is not, by itself, the trigger for assuming repeat production demand.

Sources & Evidence

1. Rolls-Royce Holdings Plc - 2025 Full Year Results

· Rolls-Royce's 2025 results report certification of the Trent xx.xx XE phase-one blade improvement in June 2025 and its fitting to new and in-service engines. This supports distinguishing initial installation from retrofit destinations.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2028 shop-visit target is below the reported 2025 total despite prospective fleet growth, qualifying any automatic conversion of fleet expansion into proportionate maintenance-material purchasing.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

2. GE Aerospace - 2025 Sustainability Report
   - GE Aerospace describes component restoration and serviceable-part reuse as alternatives to newly manufactured replacement parts. The material consequence therefore depends on the selected maintenance workscope. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
3. UKRI - Accelerating Manufacturing Readiness Level of ABD-1000AM for High Temperature Aerospace Components
   - UKRI identifies Alloyed as lead participant in the ABD-1000AM aerospace development project and gives an April 2025-October 2026 funded period. The record concerns development rather than a standing production purchase. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Alloyed-led project has xx.xx of funding and an April 2025-October 2026 funded period. This independently establishes bounded development activity, not annual material sales or recurring production purchases. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
4. 2022 Economic Census - Aerospace Product and Parts Manufacturing Questionnaire (MC-33641)
   - Taxonomy evidence: The questionnaire defines rebuilt/remanufactured products by restoration of a used or worn article and separately distinguishes repair services. This supports lifecycle classification by the existing article being restored, not merely the presence of newly manufactured parts. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
   - Taxonomy evidence: The questionnaire separately identifies new products, rebuilt/remanufactured products, services and engine prototypes, supporting lifecycle distinctions without resolving material-order destinations. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
5. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.

6. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
7. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
8. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
9. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 sales of USD xx.xx and Engine Products aerospace revenues of USD xx.xx commercial and USD xx.xx defense establish the component-cohort scale; USD xx.xx gas-turbine revenue is excluded through an explicit attribution model. These are not material-market revenues. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The segment/end-market revenue table supplies the aerospace and gas-turbine boundaries needed to bridge combined spares activity into an aerospace replacement-material proxy. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
10. Howmet Aerospace - 2025 Annual Report, Letter to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% combined aerospace and gas-turbine spares revenue constrains the distinction between initial-production and spare-component activity; material and destination adjustments remain modeled. ([howmet.com](https://www.howmet.com/annualreport/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed combined spares proportion supplies the replacement proxy; approximately xx.xx% commercial aerospace engine-spares growth is historical counterevidence against assuming weak aftermarket activity. ([howmet.com](https://www.howmet.com/annualreport/))

11. GE Aerospace - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment and services costs provide commercial budget anchors for the common material-value denominator; assumed eligible-material fractions prevent full equipment or service value from entering the allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Services include spare parts and maintenance activity, supporting an explicit new-article versus restoration attribution rather than equating services revenue with replacement-material purchases. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported USD xx.xx services cost anchors the restoration-material bridge; the restoration allocation and direct eligible-material fraction are assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Total funded R&D of USD xx.xx supplies a development-budget proxy, not observed nickel-material purchasing; only an assumed eligible-material fraction is used. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
12. Safran - FY 2025 Results and Investor Update, February 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
13. Airbus - Full-Year 2025 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 deliveries by aircraft family provide the starting activity comparison for the initial-production forecast; aircraft delivery value is not included in the material numerator. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx% decline in 2025 self-financed R&D is counterevidence to uniform development-budget acceleration and supports a restrained, explicitly assumed development-purchasing scenario. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))

14. Airbus - Half-Year 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 update retained the A320-family, A350 and other production-rate targets, providing a dated commercial constraint on the initial-production activity scenario rather than proof of future material orders. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 self-financed R&D of EUR xx.xx versus EUR xx.xx provides a modest-growth countercheck for the assumed development-project activity path; the budget is not material-market revenue. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))

10.1. Initial Equipment Production

Sources & Evidence

1. 2022 Economic Census - Aerospace Product and Parts Manufacturing Questionnaire (MC-33641)
   · Taxonomy evidence: New aircraft engines and new engine parts are explicit product classes. Newly manufactured parts are not necessarily destined for initial installation. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
2. ATI Inc. - 2025 Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 sales of USD xx.xx and Engine Products aerospace revenues of USD xx.xx commercial and USD xx.xx defense establish the component-cohort scale; USD xx.xx gas-turbine revenue is excluded through an explicit attribution model. These are not material-market revenues. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Howmet Aerospace - 2025 Annual Report, Letter to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% combined aerospace and gas-turbine spares revenue constrains the distinction between initial-production and spare-component activity; material and destination adjustments remain modeled. ([howmet.com](https://www.howmet.com/annualreport/))

16. GE Aerospace - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment and services costs provide commercial budget anchors for the common material-value denominator; assumed eligible-material fractions prevent full equipment or service value from entering the allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))

17. Rolls-Royce Holdings Plc - 2025 Full Year Results

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

18. Safran - FY 2025 Results and Investor Update, February 13, 2026

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))

19. Airbus - Full-Year 2025 Results

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 deliveries by aircraft family provide the starting activity comparison for the initial-production forecast; aircraft delivery value is not included in the material numerator. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))

20. Airbus - Half-Year 2026 Results

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 update retained the A320-family, A350 and other production-rate targets, providing a dated commercial constraint on the initial-production activity scenario rather than proof of future material orders. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))

10.2. Replacement & Retrofit Production

Table 73. Global Nickel-Based Superalloys for Aerospace Market Size, by Replacement & Retrofit Production, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Parts Manufacturer Approval (PMA) - Design Approval

   · Taxonomy evidence: The FAA recognizes replacement and modification articles as distinct commercial approval subjects. This supports aftermarket-purpose classification, not an approval requirement for base alloy material. ([faa.gov](https://www.faa.gov/aircraft/air_cert/design_approvals/pma/pma_des))

2. ATI Inc. - 2025 Form 10-K

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.

3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The segment/end-market revenue table supplies the aerospace and gas-turbine boundaries needed to bridge combined spares activity into an aerospace replacement-material proxy. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Howmet Aerospace - 2025 Annual Report, Letter to Shareholders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed combined spares proportion supplies the replacement proxy; approximately xx.xx% commercial aerospace engine-spares growth is historical counterevidence against assuming weak aftermarket activity. ([howmet.com](https://www.howmet.com/annualreport/))
16. GE Aerospace - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Services include spare parts and maintenance activity, supporting an explicit new-article versus restoration attribution rather than equating services revenue with replacement-material purchases. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
17. Rolls-Royce Holdings Plc - 2025 Full Year Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

18. Safran - FY 2025 Results and Investor Update, February 13, 2026

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))

10.3. Research, Development & Qualification

Table 76. Global Nickel-Based Superalloys for Aerospace Market Size, by Research, Development & Qualification, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Accelerating Manufacturing Readiness level of ABD®-1000AM for AM of high temperature aerospace components (AMRAM1000)
   · Taxonomy evidence: The funded project concerns aerospace demonstrator and readiness advancement, providing a development-demand example without disclosing underlying material-purchase quantities. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Alloyed-led project has xx.xx of funding and an April 2025-October 2026 funded period. This independently establishes bounded development activity, not annual material sales or recurring production purchases. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
2. NASA and Superalloys: A Customer, a Participant, and a Referee
   · Taxonomy evidence: NASA describes superalloy research and development involving government, industry and universities, separately from operational vehicle applications. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))
3. Development and validation of a powder HIP route for high temperature Astroloy to manufacture Ultrafan® IP Turbine Casings
   · Taxonomy evidence: The funded project concerns development and demonstration of aerospace superalloy casing hardware, establishing developmental rather than recurring production activity. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting))

4. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
5. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
6. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
7. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
8. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
9. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
11. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
12. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
13. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

14. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
15. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
16. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
17. GE Aerospace - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Total funded R&D of USD xx.xx supplies a development-budget proxy, not observed nickel-material purchasing; only an assumed eligible-material fraction is used. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
18. Airbus - Full-Year 2025 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx% decline in 2025 self-financed R&D is counterevidence to uniform development-budget acceleration and supports a restrained, explicitly assumed development-purchasing scenario. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
19. Airbus - Half-Year 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 self-financed R&D of EUR xx.xx versus EUR xx.xx provides a modest-growth countercheck for the assumed development-project activity path; the budget is not material-market revenue. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))

10.4. Repair, Overhaul & Refurbishment

Table 79. Global Nickel-Based Superalloys for Aerospace Market Size, by Repair, Overhaul & Refurbishment, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 2022 Economic Census - Aerospace Product and Parts Manufacturing Questionnaire (MC-33641)

   · Taxonomy evidence: The definition allows reused, repaired, and new parts within a rebuilt article, supporting the rule that new material consumption does not automatically constitute initial-equipment or standalone replacement production. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))

   · Taxonomy evidence: Rebuilt/remanufactured products are distinguished from new products and repair services, supporting a restoration-purpose category. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))

2. 76th PMXG Welding Shops are forging strong bonds

   · Taxonomy evidence: The September xx.xx 2015 depot account describes aircraft-engine component repair and lists Inconel among handled materials. It does not identify every consumed grade or product form. ([tinker.af.mil](https://www.tinker.af.mil/News/Article-Display/Article/xx.xx/76th-pmxg-welding-shops-are-forging-strong-bonds/))

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. GE Aerospace - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported USD xx.xx services cost anchors the restoration-material bridge; the restoration allocation and direct eligible-material fraction are assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
17. Rolls-Royce Holdings Plc - 2025 Full Year Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2028 shop-visit target is below the reported 2025 total despite prospective fleet growth, qualifying any automatic conversion of fleet expansion into proportionate maintenance-material purchasing. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

11. Nickel-Based Superalloys for Aerospace Market, by Aerospace End Market

[redacted] Within U.S. civil production, xx.xx CFR xx.xx places supplier-control obligations on the production approval holder. Material sellers must identify the actual approving organization and governing contract rather than infer access from the operator's commercial or government label.

[redacted] Aubert & Duval's 2024 defense brochure identifies AD730 and an Alloy xx.xx offering for missile customers, establishing a public material-commercial connection without demonstrating participation in an individual program. A defense seller should resolve the governing clause and acceptable origin documentation before committing to the order.

Space Systems is not synonymous with military procurement. Aubert & Duval's space portfolio includes nickel-superalloy offerings within a broader space-business proposition. [redacted]

Sources & Evidence

1. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals

   · DFARS xx.xx-xx.xx recognizes U.S., outlying-area, and qualifying-country origins, with specified exceptions. The clause concerns upstream specialty-metal origin rather than warehouse location alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

2. Electronic Code of Federal Regulations - 14 CFR 21.137, Quality System

   · xx.xx CFR xx.xx requires supplier controls addressing conformity to the production approval holder's requirements within the applicable U.S. production-certificate framework. ([ecfr.gov](https://www.ecfr.gov/current/title-xx.xx/chapter-I/subchapter-C/part-xx.xx/subpart-G/section-xx.xx))

3. ICAO - Convention on International Civil Aviation, Ninth Edition

   · Article xx.xx distinguishes civil and state aircraft and identifies aircraft used in military, customs, and police services as state aircraft. The combined commercial segment therefore does not imply uniform civil legal status. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

4. DFARS 225.7003-2 - Restrictions

   · DFARS xx.xx-xx.xx expressly addresses covered aircraft and missile or space systems and separately addresses specialty metal acquired as an end item, subject to applicable exceptions. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restrictions.))

5. Aubert & Duval - Metallurgical Solutions for the Defense Industry, June 2024
   - The brochure's missile-business section identifies AD730 and PYRAD53NW, labeled INCO718, as nickel-based offerings. This establishes the supplier's commercial-category connection, not an individual program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
6. Aubert & Duval - Space Industry Metallurgical Solutions
   - Aubert & Duval's space brochure identifies nickel-superalloy offerings within a portfolio spanning several space-business settings. It does not establish that each grade serves every named program or has uniform procurement eligibility. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
7. 2022 Economic Census - Aerospace Product and Parts Manufacturing Questionnaire (MC-33641)
   - Taxonomy evidence: Civilian and military aircraft engines and parts are separately identified, supporting the aviation-sector distinction rather than material volumes. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))
8. NATO Policy for civil/military aircraft operating in support of NATO or NATO-led missions and operations
   - Taxonomy evidence: The ICAO-hosted NATO presentation distinguishes civil aircraft from state aircraft and identifies military, customs and police services within the state-aircraft concept. ([icao.int](https://www.icao.int/sites/default/files/EURNAT/MeetingDocs/ICAO%20EUR%20Region%20Civil-Military%20Cooperation%20Meetings/2015%20ICAO%20Civil-Military%20Cooperation%20Symposium/ICMCS-PPT10.pdf))

9. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but not identifying price growth or a 2032 material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but not identifying price growth or a 2032 material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports defense end-market receipts, supporting a commercial distinction while requiring nickel eligibility and aviation-destination adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports defense end-market receipts, supporting a commercial distinction while requiring nickel eligibility and aviation-destination adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
10. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
11. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
12. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
13. Howmet Aerospace Inc. - 2025 Form 10-K
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial aerospace represented xx.xx% of 2025 company sales, supplying an independent downstream mix comparison rather than a nickel-material allocation weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense aerospace represented xx.xx% of 2025 company sales; the paired commercial/defense comparison tests the aviation model while retaining component and material-scope differences. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))

14. GE Aerospace - 2025 Sustainability Report
    - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
15. GE Aerospace - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
16. Rolls-Royce Holdings Plc - 2025 Full Year Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

17. RTX Corporation - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
18. Federal Reserve Bank of St. Louis - Annual USD/GBP Exchange Rate, AEXUSUK
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
19. L3Harris Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
20. FAA Aerospace Forecast Fiscal Years 2025-2045 - Commercial Space
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated official low/high scenarios provide FY2032 licensed launch/reentry activity bounds. Their U.S.-licensed scope and treatment of reusable vehicles prevent direct conversion into Global material revenue. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-commercial-space.pdf))

11.1. Civil & Nonmilitary State Aviation

Table 84. Global Nickel-Based Superalloys for Aerospace Market Size, by Civil & Nonmilitary State Aviation, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Europe	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. NATO Policy for civil/military aircraft operating in support of NATO or NATO-led missions and operations

   · Taxonomy evidence: Customs and police aircraft demonstrate why a commercial aviation partition needs an explicit treatment for nonmilitary state aviation; their material demand is not quantified. ([icao.int](https://www.icao.int/sites/default/files/EURNAT/MeetingDocs/ICAO%20EUR%20Region%20Civil-Military%20Cooperation%20Meetings/2015%20ICAO%20Civil-Military%20Cooperation%20Symposium/ICMCS-PPT10.pdf))

2. Annex 6 - Operation of Aircraft

   · Taxonomy evidence: ICAO's Annex xx.xx account separately recognizes international commercial air transport and general aviation, supporting inclusion of both within the civil-aviation domain without equating civil aviation with airlines alone. ([icao.int](https://www.icao.int/sites/default/files/postalhistory/annex_6_operation_of_aircraft.htm))

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but not identifying price growth or a 2032 material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but not identifying price growth or a 2032 material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial aerospace represented xx.xx% of 2025 company sales, supplying an independent downstream mix comparison rather than a nickel-material allocation weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))

8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. GE Aerospace - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
17. Rolls-Royce Holdings Plc - 2025 Full Year Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

18. RTX Corporation - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
19. Federal Reserve Bank of St. Louis - Annual USD/GBP Exchange Rate, AEXUSUK
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
20. ICAO - Convention on International Civil Aviation, Ninth Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

11.2. Military Aviation

Table 87. Global Nickel-Based Superalloys for Aerospace Market Size, by Military Aviation, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. 2022 Economic Census - Aerospace Product and Parts Manufacturing Questionnaire (MC-33641)
   - Taxonomy evidence: Military aircraft engines and associated parts have explicit reporting categories. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))

2. 76th PMXG Welding Shops are forging strong bonds
   - Taxonomy evidence: The account connects Inconel-handling activity with a military aircraft-engine maintenance setting; it is not evidence of current material quantities. ([tinker.af.mil](https://www.tinker.af.mil/News/Article-Display/Article/xx.xx/76th-pmxg-welding-shops-are-forging-strong-bonds/))
3. NATO Policy for civil/military aircraft operating in support of NATO or NATO-led missions and operations
   - Taxonomy evidence: The presentation treats military-registered aircraft as state aircraft, supporting a distinct military-aviation program classification. ([icao.int](https://www.icao.int/sites/default/files/EURNAT/MeetingDocs/ICAO%20EUR%20Region%20Civil-Military%20Cooperation%20Meetings/2015%20ICAO%20Civil-Military%20Cooperation%20Symposium/ICMCS-PPT10.pdf))
4. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports defense end-market receipts, supporting a commercial distinction while requiring nickel eligibility and aviation-destination adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports defense end-market receipts, supporting a commercial distinction while requiring nickel eligibility and aviation-destination adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
5. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
6. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
7. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.

8. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense aerospace represented xx.xx% of 2025 company sales; the paired commercial/defense comparison tests the aviation model while retaining component and material-scope differences. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
9. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
11. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
12. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
13. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

14. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
15. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
16. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
17. GE Aerospace - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
18. Rolls-Royce Holdings Plc - 2025 Full Year Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

19. RTX Corporation - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
20. Federal Reserve Bank of St. Louis - Annual USD/GBP Exchange Rate, AEXUSUK
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
21. ICAO - Convention on International Civil Aviation, Ninth Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
22. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

11.3. Space Systems

Sources & Evidence

1. NASA and Superalloys: A Customer, a Participant, and a Referee

   · Taxonomy evidence: Documented Shuttle and space-station applications establish space hardware as a distinct superalloy end-use domain, not a current-demand estimate. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. L3Harris Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
16. FAA Aerospace Forecast Fiscal Years 2025-2045 - Commercial Space
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated official low/high scenarios provide FY2032 licensed launch/reentry activity bounds. Their U.S.-licensed scope and treatment of reusable vehicles prevent direct conversion into Global material revenue. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-commercial-space.pdf))
17. Aubert & Duval - Space Industry Metallurgical Solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))

11.4. Guided Missile Systems

Sources & Evidence

1. North American Industry Classification System, United States, 2022
   · Taxonomy evidence: Guided-missile manufacturing and associated propulsion/parts activities are recognized aerospace categories; the classification does not establish nickel-superalloy content. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
2. ATI Inc. - 2025 Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.

15. L3Harris Technologies, Inc. - Fiscal 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))

16. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))

17. Aubert & Duval - Metallurgical Solutions for the Defense Industry, June 2024

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))

12. Nickel-Based Superalloys for Aerospace Market, by Buyer Function

[illegible] U.S. civil production approval holders also retain supplier-control obligations. Sellers should map the ordering entity, acceptance authority, and payment responsibility before choosing between an OEM account approach and a component manufacturer's procurement route; either contact alone may leave a commercial gate unresolved.

[illegible] Material supply to the repair organization and permission to market a finished replacement article are therefore different opportunities. Sellers should establish the authorized purchasing purpose rather than assume that an MRO relationship opens a standalone component-sales route.

Research & Development Organizations require a different contracting map. The ABD-1000AM project identifies Alloyed, ITP Aero UK, and Cranfield University in distinct participation roles. [illegible]

Figure 18. Global Nickel-Based Superalloys for Aerospace Market Size, by Buyer Function, 2025 (%)

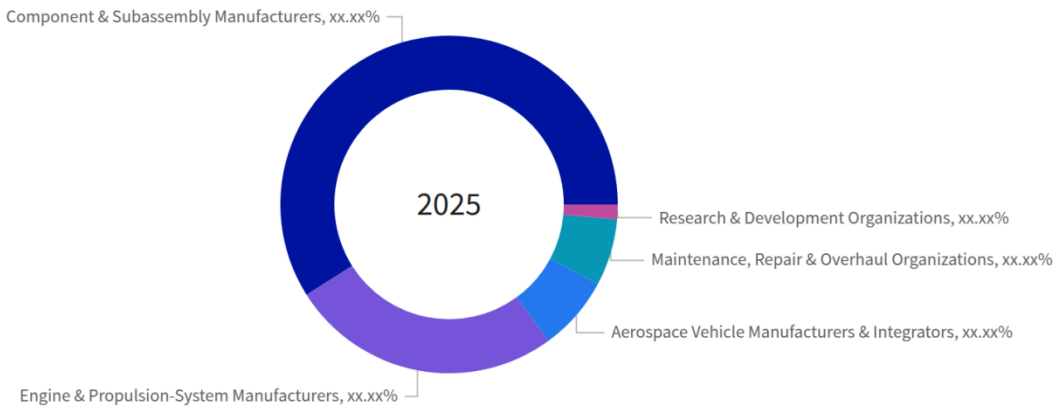

Figure 19. Global Nickel-Based Superalloys for Aerospace Market, by Buyer Function, 2032 (USD Million)

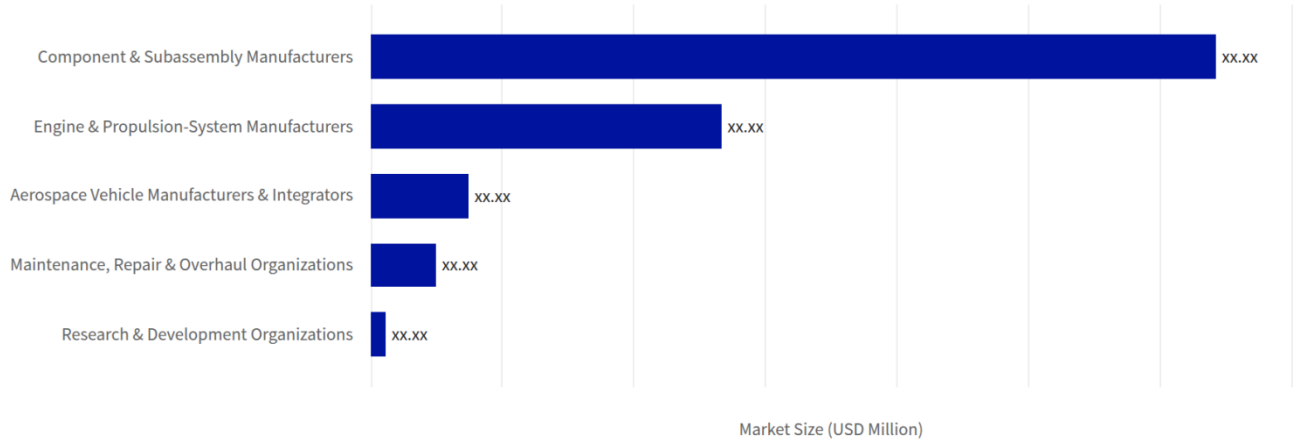

Table 96. Global Nickel-Based Superalloys for Aerospace Market, by Buyer Function growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)

Sources & Evidence

1. Boeing Suppliers - Quality

   · Boeing defines supplier-quality applicability through contracts and connects raw-material sourcing controls to contractual requirements. These provisions support distinguishing material procurement from the customer's acceptance authority. ([boeingsuppliers.com](https://www.boeingsuppliers.com/become/quality))

2. GE Aerospace Supplier Portal

   · GE Aerospace distinguishes potential-supplier inquiries and bids from administration of orders, invoices, and payments. These are separate commercial stages rather than equivalent evidence of a purchasing commitment. (supplier.geaerospace.com)

3. Electronic Code of Federal Regulations - 14 CFR 21.137, Quality System

   · Supplier-control obligations reside with the covered production approval holder; this supports distinguishing acceptance oversight from the entity administering a particular material purchase. ([ecfr.gov](https://www.ecfr.gov/current/title-xx.xx/chapter-I/subchapter-C/part-xx.xx/subpart-G/section-xx.xx))

4. UKRI - Accelerating Manufacturing Readiness Level of ABD-1000AM for High Temperature Aerospace Components

   · The record identifies Alloyed, Cranfield University, and ITP Aero UK in project participation roles. It does not allocate the signatory for every material purchase; the contracting distinction is a bounded commercial inference. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.

5. FAA - Parts Manufacturer Approval: Design Approval

   · The FAA's repair-station example concerns an article fabricated for an eligible in-house repair and states that such articles may not be offered separately for sale under that exception. This is not an approval requirement imposed on base alloy material. ([faa.gov](https://www.faa.gov/aircraft/air_cert/design_approvals/pma/pma_des))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

6. 2022 Economic Census - Aerospace Product and Parts Manufacturing Questionnaire (MC-33641)

   · Taxonomy evidence: The questionnaire's reporting unit is an establishment, providing an official statistical anchor for establishment-level buyer-role attribution rather than classifying an entire corporate group as one consumer type. It does not identify the recipient of every material order. ([bhs.econ.census.gov](https://bhs.econ.census.gov/ombpdfs2022/export/2022_MC-33641_su.pdf))

7. North American Industry Classification System, United States, 2022

   · Taxonomy evidence: The 2022 classification distinguishes aerospace manufacturing, repair and R&D establishments. It supplies a business-role crosswalk, not a ready-made material-buyer partition. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))

8. ATI Inc. - 2025 Form 10-K

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.

9. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

10. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
11. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
12. Howmet Aerospace Inc. - 2025 Form 10-K
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.
13. GE Aerospace - 2025 Sustainability Report
    - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

14. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
15. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
16. GE Aerospace - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.
17. Airbus - Full-Year 2025 Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.
18. Berkshire Hathaway Inc. - 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.

19. Lufthansa Group Annual Report 2025 - MRO business segment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
20. Oliver Wyman - Global Fleet And MRO Market Forecast 2026-2036: Key Trends
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
21. German Aerospace Center (DLR) - Financing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.

12.1. Component & Subassembly Manufacturers

Table 98. Global Nickel-Based Superalloys for Aerospace Market Size, by Component & Subassembly Manufacturers, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. North American Industry Classification System, United States, 2022

   · Taxonomy evidence: Aircraft parts, auxiliary equipment, propulsion parts and vehicle-parts manufacturing are recognized activities, supporting a component-producing business role. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))

2. Parts Manufacturer Approval (PMA) - Design Approval
   - Taxonomy evidence: The page distinguishes articles produced for sale from articles produced by owners/operators for their own equipment, supporting separation of producer role from ultimate operator. ([faa.gov](https://www.faa.gov/aircraft/air_cert/design_approvals/pma/pma_des))
3. Transforming the manufacturing of aero-engine casing components for Rolls-Royce and its supply chain
   - Taxonomy evidence: The institutional impact record distinguishes a provider delivering prototype engine casings from the engine-company customer, supporting separate component-supply and propulsion-system roles. ([impact.ref.ac.uk](https://impact.ref.ac.uk/casestudies/CaseStudy.aspx?Id=xx.xx))
4. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
5. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
6. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
7. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
8. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.

9. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
11. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
12. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
13. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

14. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
15. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
16. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
17. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
18. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
19. Berkshire Hathaway Inc. - 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.

12.2. Engine & Propulsion-System Manufacturers

Table 101. Global Nickel-Based Superalloys for Aerospace Market Size, by Engine & Propulsion-System Manufacturers, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. North American Industry Classification System, United States, 2022
   · Taxonomy evidence: Aircraft-engine manufacturing and guided-missile/space-vehicle propulsion-unit manufacturing are separately identified activities. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
2. Transforming the manufacturing of aero-engine casing components for Rolls-Royce and its supply chain
   · Taxonomy evidence: The engine company is identified as the customer for casing-development work. This establishes a customer role, not direct purchase of every underlying material lot. ([impact.ref.ac.uk](https://impact.ref.ac.uk/casestudies/CaseStudy.aspx?Id=xx.xx))
3. ATI Inc. - 2025 Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.

4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.

17. GE Aerospace - 2025 Form 10-K
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.

12.3. Aerospace Vehicle Manufacturers & Integrators

Table 104. Global Nickel-Based Superalloys for Aerospace Market Size, by Aerospace Vehicle Manufacturers & Integrators, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. North American Industry Classification System, United States, 2022
   - Taxonomy evidence: Complete aircraft, guided-missile and space-vehicle manufacturing are distinguished from supplying parts; satellite manufacturing is separately cross-referenced. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.

16. Airbus - Full-Year 2025 Results
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.

12.4. Maintenance, Repair & Overhaul Organizations

Table 107. Global Nickel-Based Superalloys for Aerospace Market Size, by Maintenance, Repair & Overhaul Organizations, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Parts Manufacturer Approval (PMA) - Design Approval

   · Taxonomy evidence: The FAA explicitly recognizes repair-station fabrication of articles for in-house repair, showing that maintenance organizations can have material-consuming fabrication roles. ([faa.gov](https://www.faa.gov/aircraft/air_cert/design_approvals/pma/pma_des))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

2. 76th PMXG Welding Shops are forging strong bonds

   · Taxonomy evidence: The Air Force propulsion-maintenance organization documents its own component-restoration activity, providing historical demand-side evidence for the MRO business role. ([tinker.af.mil](https://www.tinker.af.mil/News/Article-Display/Article/xx.xx/76th-pmxg-welding-shops-are-forging-strong-bonds/))

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Lufthansa Group Annual Report 2025 - MRO business segment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
17. Oliver Wyman - Global Fleet And MRO Market Forecast 2026-2036: Key Trends
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.

12.5. Research & Development Organizations

Table 110. Global Nickel-Based Superalloys for Aerospace Market Size, by Research & Development Organizations, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. NASA and Superalloys: A Customer, a Participant, and a Referee
   · Taxonomy evidence: The paper distinguishes research participants and funded industry/university development roles. Funding responsibility does not identify the recipient of every material purchase. ([ntrs.nasa.gov](https://ntrs.nasa.gov/citations/xx.xx))
2. North American Industry Classification System, United States, 2022
   · Taxonomy evidence: Aerospace R&D outside prototype production is separately cross-referenced, demonstrating why research activity and manufacturing output should not be conflated. ([census.gov](https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf))
3. Development and validation of a powder HIP route for high temperature Astroloy to manufacture Ultrafan® IP Turbine Casings
   · Taxonomy evidence: The official project record identifies a technological research organization coordinating the aerospace-material development activity; it does not disclose every material-order recipient. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting))

4. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
5. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
6. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
7. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
8. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
9. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
11. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
12. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
13. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

14. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
15. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
16. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
17. UKRI - Accelerating Manufacturing Readiness level of ABD-1000AM for AM of high temperature aerospace components (AMRAM1000)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
18. German Aerospace Center (DLR) - Financing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.

13. Nickel-Based Superalloys for Aerospace Market, by Fulfillment Model

[illegible] Physically stocked material can therefore support Order-Dedicated Supply when reserved against a customer obligation. Buyers seeking an immediate alternative should confirm availability for their own accepted requirement; buyers seeking continuity can accept dedicated reservations, but should agree release responsibility and responsibility for unused material.

[illegible] A component seller facing a firm customer deadline should obtain requirement-specific assurance and revisit it when the customer schedule changes. Dedicated coverage can reduce uncertainty while creating commitment exposure; accessible stock can preserve flexibility without guaranteeing future coverage.

Figure 20. Global Nickel-Based Superalloys for Aerospace Market Size, by Fulfillment Model, 2025 (%)

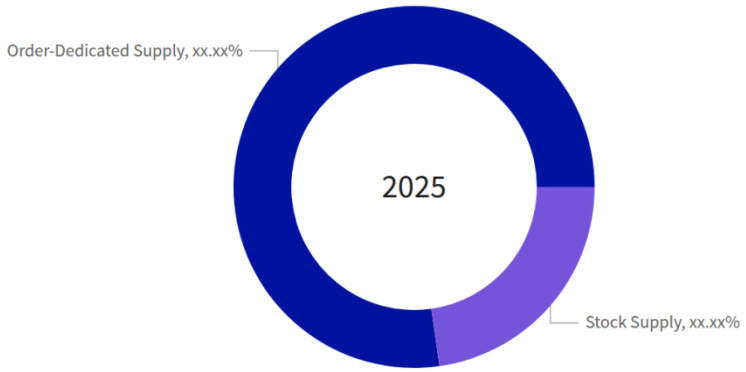

Figure 21. Global Nickel-Based Superalloys for Aerospace Market, by Fulfillment Model, 2032 (USD Million)

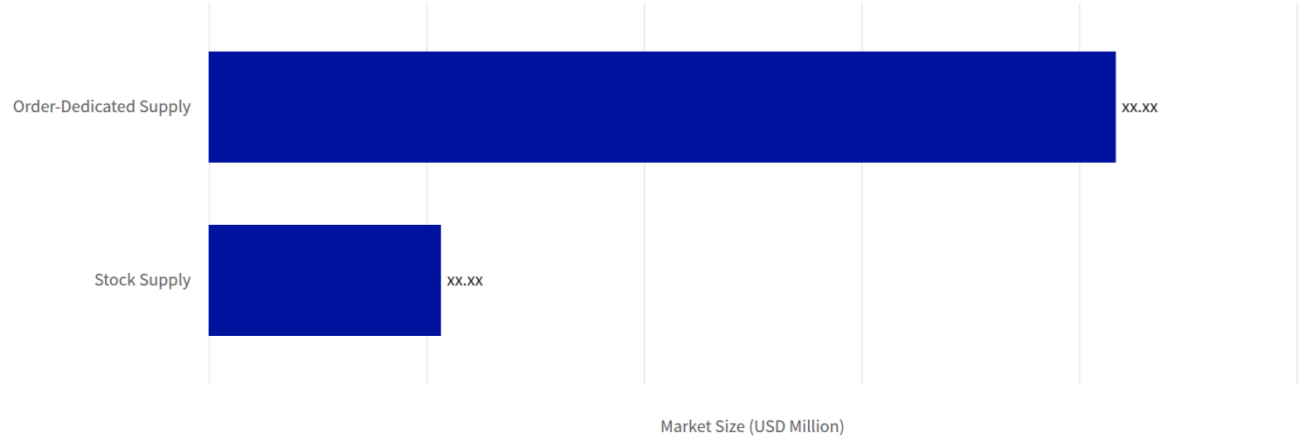

Table 113. Global Nickel-Based Superalloys for Aerospace Market, by Fulfillment Model growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Order-Dedicated Supply	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Stock Supply	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 114. Global Nickel-Based Superalloys for Aerospace Market Size, by Fulfillment Model, 2017-2040 (USD Million)

Fulfillment Model	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Order-Dedicated Supply	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Stock Supply	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Rolled Alloys - E-Services Stocking Programs

   · Rolled Alloys describes customer-site replenishment, supplier-held release arrangements, and scheduled programs requiring contract or long-term-agreement terms. These support distinguishing inventory location from customer allocation. ([rolledalloys.com](https://www.rolledalloys.com/eservices/))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.

2. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation

   · Boeing D604 permits the authorized procurement representative to request raw-material assurance documentation, including stock records and mill assurances. Applicability is contractual. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D604_20180220.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.

3. Anticipated acquisition by Acerinox, S.A. of Haynes International, Inc. - Full text decision

   · Taxonomy evidence: Paragraphs xx.xx-xx.xx describe nickel-alloy stockholding, delivery availability, producer sales centers, and independent distributors. These are original supply-chain and customer findings, not the report's excluded market-data estimates.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.

4. APICS CPIM 2019 - Part 1 Excerpt
   - Taxonomy evidence: The order-promising discussion distinguishes inventory-backed fulfillment from order-driven supply. The proposed binary taxonomy adapts these commercial concepts rather than reproducing every production-planning category.
5. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Confirmed backlog, expected conversion and annual sales provide an independent forward-commitment cross-check, not direct stock-share disclosure.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported orders and purchase-order/LTA recognition distinctions constrain the advance-commitment premise without measuring dedicated market share.
6. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
7. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
8. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical product revenue, channel mix and backlog conversion anchor the modeled stock value weight, with explicit scope adjustments.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Firm backlog and its distinction from short-notice service-center business constrain the complementary dedicated allocation.
9. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.

10. GE Aerospace - 2025 Sustainability Report
    - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
11. Carpenter Technology Corporation - Second Quarter Fiscal 2026 Earnings Call Presentation, January 29, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation distinguishes specialized non-LTA business from a conventional spot market, countering automatic classification of transactional sales as stock.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three additional aerospace LTAs and xx.xx% sequential commercial-aerospace bookings growth inform the reservation hypothesis, but do not measure its modeled magnitude.

13.1. Order-Dedicated Supply

Table 115. Global Nickel-Based Superalloys for Aerospace Market Size, by Order-Dedicated Supply, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. APICS CPIM 2019 - Part 1 Excerpt
   - Taxonomy evidence: Make-to-order commitments consider material and capacity availability. This supports order-driven supply, but not a universal aerospace rule for reserved buffers.
2. AWI brings its largest ever range of high temperature alloys to Farnborough International Airshow
   - Taxonomy evidence: The company's aerospace business announcement describes made-to-order high-temperature alloy wire alongside held inventory. This corroborates a commercial example, not a market-wide fulfillment allocation.

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported orders and purchase-order/LTA recognition distinctions constrain the advance-commitment premise without measuring dedicated market share.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Firm backlog and its distinction from short-notice service-center business constrain the complementary dedicated allocation.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. CMA - Anticipated Acquisition of Haynes International by Acerinox: Full Text Decision
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
17. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
18. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
19. Carpenter Technology Corporation - Second Quarter Fiscal 2026 Earnings Call Presentation, January 29, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three additional aerospace LTAs and xx.xx% sequential commercial-aerospace bookings growth inform the reservation hypothesis, but do not measure its modeled magnitude.

13.2. Stock Supply

Table 118. Global Nickel-Based Superalloys for Aerospace Market Size, by Stock Supply, by Region, 2017-2040 (USD Million)

Sources & Evidence

1. Anticipated acquisition by Acerinox, S.A. of Haynes International, Inc. - Full text decision
   - Taxonomy evidence: Nickel-alloy service centers hold inventory for customer delivery; customers identify stock availability as a purchasing consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
2. APICS CPIM 2019 - Part 1 Excerpt
   - Taxonomy evidence: The excerpt distinguishes available inventory from inventory already allocated or reserved.

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Confirmed backlog, expected conversion and annual sales provide an independent forward-commitment cross-check, not direct stock-share disclosure.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical product revenue, channel mix and backlog conversion anchor the modeled stock value weight, with explicit scope adjustments.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
17. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
18. Carpenter Technology Corporation - Second Quarter Fiscal 2026 Earnings Call Presentation, January 29, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation distinguishes specialized non-LTA business from a conventional spot market, countering automatic classification of transactional sales as stock.

14. Nickel-Based Superalloys for Aerospace Market, by Supply Channel

Producer-Direct Supply and Independent Intermediary Supply distinguish the commercial relationship, not whether inventory exists. ■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ An intermediary is useful when it provides an accepted offering and a better-suited fulfillment arrangement; a direct relationship remains preferable when the buyer needs a producer commitment the intermediary cannot substantiate.

■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■ ■■ ■■■■■■■■■■■■■ Within the group, allocation responsibility matters; outside it, an executable external offer matters. Internal coordination can support continuity for affiliates without establishing availability to unaffiliated purchasers.

Licensing creates an additional channel distinction for proprietary offerings. ■■■■■■■ ■■■■■■■ ■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■ ■ ■■■■■■■ ■■■ ■■■■■■■ ■ ■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ Using an existing licensed route can avoid assuming independent commercialization rights, but retains dependence on the relevant rights holder and supplier.

Sources & Evidence

1. Alloyed - About

· Alloyed's history records a 2019 ABD licensing agreement with Aubert & Duval; it does not disclose the full grant available to unrelated sellers. ([alloyed.com](https://alloyed.com/about))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.

2. CMA - Anticipated Acquisition by Acerinox, S.A. of Haynes International, Inc.: Full Text Decision

· The CMA's 2024 investigation distinguishes manufacturer supply through production facilities or service centers from independent distributor and stockist supply. Only these original supply-chain observations are used. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))

· Taxonomy evidence: The investigation distinguishes manufacturer-direct supply from independent distributors and stockists. Its narrower geographic and product scope does not establish worldwide channel shares.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.

3. DPC Holdings Limited - Draft Registration Statement, April 14, 2026

· DPC's April xx.xx 2026 draft registration statement describes internal superalloy supply to affiliated aerospace casting facilities and external material sales. This supports distinct captive and external relationships, not unrestricted availability. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))

· Taxonomy evidence: The public registration-statement record distinguishes the issuer's internal superalloy supply from external superalloy sales. This corroborates captive material supply without establishing its global share.

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.

4. Aubert & Duval - Stellar ABD-1000AM Powder for Additive Manufacturing
   · Aubert & Duval lists Stellar ABD-1000AM as a powder offering. A product listing does not disclose an unrelated intermediary's contractual rights. ([aubertduval.com](https://www.aubertduval.com/en/products/stellar-abd-1000am-powder-for-additive-manufacturing/))
5. ATI Inc. - 2025 Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported AA&S external revenue supplies the inherited eligible-material weighting input; direct OEM agreements provide a commercial premise, not verification of forecast channel growth.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported AA&S external revenue supplies the inherited eligible-material weighting input; direct OEM agreements provide a commercial premise, not verification of forecast channel growth.
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2025 plate volume was sold to independent service centers; this broader product proxy is bridged to material value with explicit scope and realization assumptions.
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2025 plate volume was sold to independent service centers; this broader product proxy is bridged to material value with explicit scope and realization assumptions.
6. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
7. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   · Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.

8. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 revenue was approximately xx.xx% through the direct organization, including company-operated centers; this is a representative channel calibration, not a Global aerospace share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 revenue was approximately xx.xx% through the direct organization, including company-operated centers; this is a representative channel calibration, not a Global aerospace share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2023 revenue came through independent distributors, resellers and agents; the model separately assumes the title-taking portion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2023 revenue came through independent distributors, resellers and agents; the model separately assumes the title-taking portion.
9. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
10. GE Aerospace - 2025 Sustainability Report
    - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
11. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
12. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.

13. Precision Castparts Corp. - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
14. Howmet Aerospace - United States Locations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
15. ATI Inc. - 2024 Annual Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New sales commitments through 2040, including amounts expected during the remainder of the decade and predominantly involving jet-engine nickel alloys, inform the direct-program forecast premise without being counted as realized sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2024 plate volume went to independent service centers, providing a historical comparison that cautions against assuming generalized intermediary displacement.

14.1. Producer-Direct Supply

Table 123. Global Nickel-Based Superalloys for Aerospace Market Size, by Producer-Direct Supply, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Anticipated acquisition by Acerinox, S.A. of Haynes International, Inc. - Full text decision
   - Taxonomy evidence: Manufacturer-direct supply includes sales through the manufacturer's service centers or sales offices.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported AA&S external revenue supplies the inherited eligible-material weighting input; direct OEM agreements provide a commercial premise, not verification of forecast channel growth.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported AA&S external revenue supplies the inherited eligible-material weighting input; direct OEM agreements provide a commercial premise, not verification of forecast channel growth.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.

5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 revenue was approximately xx.xx% through the direct organization, including company-operated centers; this is a representative channel calibration, not a Global aerospace share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 revenue was approximately xx.xx% through the direct organization, including company-operated centers; this is a representative channel calibration, not a Global aerospace share.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. ATI Inc. - 2024 Annual Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New sales commitments through 2040, including amounts expected during the remainder of the decade and predominantly involving jet-engine nickel alloys, inform the direct-program forecast premise without being counted as realized sales.

16. Alloyed - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.

14.2. Independent Intermediary Supply

Table 126. Global Nickel-Based Superalloys for Aerospace Market Size, by Independent Intermediary Supply, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Asia-Pacific	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Anticipated acquisition by Acerinox, S.A. of Haynes International, Inc. - Full text decision
   - Taxonomy evidence: Independent distributors and stockists are identified as an indirect nickel-alloy supply path.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2025 plate volume was sold to independent service centers; this broader product proxy is bridged to material value with explicit scope and realization assumptions.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2025 plate volume was sold to independent service centers; this broader product proxy is bridged to material value with explicit scope and realization assumptions.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2023 revenue came through independent distributors, resellers and agents; the model separately assumes the title-taking portion.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2023 revenue came through independent distributors, resellers and agents; the model separately assumes the title-taking portion.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.

7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
16. ATI Inc. - 2024 Annual Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2024 plate volume went to independent service centers, providing a historical comparison that cautions against assuming generalized intermediary displacement.
17. Alloyed - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.

14.3. Captive Supply

Table 129. Global Nickel-Based Superalloys for Aerospace Market Size, by Captive Supply, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. DPC Holdings Limited - Draft Registration Statement, April 14, 2026
   - Taxonomy evidence: The issuer describes supplying superalloy material internally to its affiliated aerospace and industrial-gas-turbine casting facilities; only the aerospace-directed material flow is relevant here.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
16. Precision Castparts Corp. - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
17. Howmet Aerospace - United States Locations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.

15. Nickel-Based Superalloys for Aerospace Market, by Alloy Grade

Alloy Grade is a purchasing identity, not a sufficient statement of interchangeability. Special Metals lists aerospace offerings corresponding to Alloy xx.xx Alloy xx.xx Alloy xx.xx Alloy X-xx.xx Nimonic xx.xx Nimonic 80A, Nimonic xx.xx Udimet xx.xx and Waspaloy. ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■

Proprietary families and historical application records require different interpretation from a firm material offer. Cannon-Muskegon separately identifies CM247LC, CMSX-xx.xx and MAR-M xx.xx in its alloy history. ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■ ■■ ■■■ ■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■ ■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■ ■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■ ■■■ ■■■ ■■■■■■■■■ ■■■■■

Newer powder offerings can coexist with continuing aerospace-adoption work. Aubert & Duval lists ABD-1000AM Powder, while UKRI records Alloyed's AMRAM1000 project with an aerospace-readiness objective. ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■ ■■■■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■ ■■ ■■■■■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■

Exact variants also matter for retained identities such as IN-xx.xx and IN-738LC, and Udimet xx.xx and Udimet 720Li. ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■ ■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■ ■■■■■■■■■■■ ■■■■■■ ■■ ■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■ The decision is to obtain a grade- and form-specific offer with the required acceptance and rights, rather than infer availability or equivalence from the breadth of the taxonomy.

Sources & Evidence

1. Special Metals - Aerospace

   · Special Metals lists the cited INCONEL, NIMONIC, UDIMET, and Waspaloy aerospace identities. The portfolio does not establish every form or buyer approval. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy xx.xx; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy X-xx.xx; no current sales quantity is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Waspaloy; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

2. Boeing BDS Terms and Conditions Guide - D607 Material Substitution Prohibition

   · Boeing D607 prohibits unauthorized substitutions, recognizes authorized alternatives, and makes deviations purchase-contract-specific. This supports exact-identity verification rather than inferred equivalence between retained variants. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause prohibits unauthorized substitutions where contractually applicable. It constrains the adoption interpretation but does not establish approval prevalence or a numerical adoption rate. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific material authorization is a counterweight to treating a named offering as immediately substitutable production material. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization limits interpretation of the assumed adoption multiplier; it does not directly establish powder sales. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

3. Aubert & Duval - Stellar ABD-1000AM Powder for Additive Manufacturing

   · The named ABD-1000AM powder listing establishes an offering identity, not customer-specific production acceptance. ([aubertduval.com](https://www.aubertduval.com/en/products/stellar-abd-1000am-powder-for-additive-manufacturing/))

4. UKRI - Accelerating Manufacturing Readiness Level of ABD-1000AM for High Temperature Aerospace Components

   · UKRI records AMRAM1000, led by Alloyed Limited, with an ABD-1000AM aerospace-readiness objective. The project identity does not establish customer production acceptance. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

5. Cannon-Muskegon - Alloy Development
   - Cannon-Muskegon's history separately names CM xx.xx LC, CMSX-xx.xx and MAR M xx.xx. Historical application records do not establish a current order-specific offer. ([cannonmuskegon.com](https://www.cannonmuskegon.com/products/alloy-development/))
6. GE Aerospace - Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission
   - GE's April xx.xx 2023 history separately identifies Rene xx.xx and Rene 88DT and associates the latter with GE90 application history; it does not grant substitution permission. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
7. Anticipated acquisition by Acerinox, S.A. of Haynes International, Inc. - Full text decision
   - Taxonomy evidence: The decision identifies UNS as a widely accepted grade-designation framework. It does not establish equivalence among all proprietary or nationally named grades in this aerospace taxonomy. ([assets.publishing.service.gov.uk](https://assets.publishing.service.gov.uk/media/67370ebb65b6c2f3313e5d39/__Full_text_decision___.pdf))
8. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: Section xx.xx provides illustrative aerospace superalloy identities, not an exhaustive commercial grade census.
9. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
10. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
11. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
    - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.

12. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
    - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
    - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
    - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
    - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
13. Howmet Aerospace Inc. - 2025 Form 10-K
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
14. GE Aerospace - 2025 Sustainability Report
    - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
15. Rolls-Royce Holdings Plc - 2025 Full Year Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The divergence between 2025 engine deliveries and shop visits independently challenges a uniform new-engine-led material forecast; no service revenue is included in the numerator. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed engine-delivery and shop-visit activity supports separate new-program and replacement-demand assumptions, not a proportional material-purchase conversion. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

16. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 aerospace realization and revenue provide the common monetary calibration for this modeled grade; neither is a grade-specific sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace material realization supplies a price-scale input, with modeled year and product-mix adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization calibrates the assumed blended material price, not this grade's observed revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported eight-to-ten-year aerospace application-introduction periods constrain interpretation of the seven-year adoption forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace application-introduction periods provide an adoption-delay counterweight, not a forecast sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
17. European Commission CORDIS - Welding Metallurgy and Cracking in Superalloys: Reporting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical all-sector tonnage discussion is only a dominance cross-check; it cannot establish current aerospace monetary share. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies 718Plus separately from ordinary xx.xx supporting identity separation without supplying a current sales weight. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
18. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: August-October 2026 grade surcharges provide a differentiated cost-exposure check, not full invoice prices or observed 2032 prices. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx surcharge sequence independently qualifies a uniform price assumption; it is not substituted for a material selling price. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The grade-specific surcharge listing is a commercial cost comparison, not an observed Global grade realization. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))

19. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current-and-past supplier identity mapping only; not proof of 2025 aerospace sales or the modeled volume. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CMSX-xx.xx is separately identified; the material-value weight remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current sales are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713C is listed separately from IN-713LC; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713LC is listed separately from IN-713C; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx identity mapping only; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-738LC is separately identified; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current aerospace tonnes are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx appears in a current-and-past identification list; this does not establish recurring aerospace production sales. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MAR-M xx.xx is identified separately from CM247LC; monetary weights remain modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PWA xx.xx is separately identified; no attributable sales value is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; current commercial scale remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; no current grade-specific material sales are disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Udimet xx.xx appears in the supplier's current-and-past identities; aerospace attribution is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

20. Aubert & Duval - AD730: Ni-Based Superalloy for High Temperature Applications
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
21. University of Portsmouth - Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials: REF Impact Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
22. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aerospace-industry publication distinguishes conventional Udimet xx.xx from its 720Li derivative; it does not establish a current monetary allocation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The publication independently supports the 720Li identity and aircraft-engine-disc category, without supplying current sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))
23. NASA Contractor Report 174639 - Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical institutional material identification is a legacy-category anchor only; it does not demonstrate current aerospace material sales. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

24. America Makes - 5566.002 Proliferation of Nickel Superalloy Material Datasets for Powder Bed Fusion Additive Manufacturing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))
25. GE Aerospace - Fourth Quarter 2025 Earnings Presentation
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 commercial-engine delivery growth supplies a near-term demand cross-check, not a grade-specific purchasing or seven-year growth observation. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate commercial and defense delivery growth constrains the commercial-demand scenario without establishing this grade's attributable consumption. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported defense-engine delivery growth is a demand-exposure check only; the PWA xx.xx activity factor remains assumed. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

Sources & Evidence

1. JSC 27301H

   · Taxonomy evidence: Section xx.xx.xx.xx identifies Inconel xx.xx as a superalloy example in spacecraft material requirements.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Special Metals - Aerospace
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy xx.xx; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
16. European Commission CORDIS - Welding Metallurgy and Cracking in Superalloys: Reporting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical all-sector tonnage discussion is only a dominance cross-check; it cannot establish current aerospace monetary share. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
17. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx surcharge sequence independently qualifies a uniform price assumption; it is not substituted for a material selling price. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
18. GE Aerospace - Fourth Quarter 2025 Earnings Presentation
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 commercial-engine delivery growth supplies a near-term demand cross-check, not a grade-specific purchasing or seven-year growth observation. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: Listed aerospace nickel-base grade.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CMSX-xx.xx is separately identified; the material-value weight remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

16. GE Aerospace - Fourth Quarter 2025 Earnings Presentation
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate commercial and defense delivery growth constrains the commercial-demand scenario without establishing this grade's attributable consumption.

   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Special Metals - Aerospace
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Waspaloy; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: Listed aerospace nickel-base grade.
2. Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission
   - Taxonomy evidence: The manufacturer identifies Rene 88DT in its GE90 material history.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.

Sources & Evidence

1. Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials
   - Taxonomy evidence: The institutional impact record identifies RR1000 adoption in Rolls-Royce aero-engines.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Rolls-Royce Holdings Plc - 2025 Full Year Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The divergence between 2025 engine deliveries and shop visits independently challenges a uniform new-engine-led material forecast; no service revenue is included in the numerator. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
16. University of Portsmouth - Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials: REF Impact Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. Sources & Evidence

1. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
4. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
10. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
11. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
12. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
13. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
14. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PWA xx.xx is separately identified; no attributable sales value is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

15. GE Aerospace - Fourth Quarter 2025 Earnings Presentation
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported defense-engine delivery growth is a demand-exposure check only; the PWA xx.xx activity factor remains assumed.
([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

Sources & Evidence

1. AIAA-2024-0997
   - Taxonomy evidence: The aerospace propulsion discussion explicitly identifies Haynes xx.xx among established superalloys.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization calibrates the assumed blended material price, not this grade's observed revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))

Sources & Evidence

1. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI

   · Taxonomy evidence: The aerospace-engine authors explicitly pair UDIMET 720LI with the abbreviation U720LI and identify compressor- and turbine-disk applications, resolving the captured nomenclature inference. This 2000 record does not establish current material sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The publication independently supports the 720Li identity and aircraft-engine-disc category, without supplying current sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

2. Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials

   · Taxonomy evidence: The record identifies U720Li and aero-engine adoption. Equating that abbreviation with the displayed Udimet 720Li designation remains an explicit nomenclature inference.

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Rolls-Royce Holdings Plc - 2025 Full Year Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed engine-delivery and shop-visit activity supports separate new-program and replacement-demand assumptions, not a proportional material-purchase conversion. ([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
17. University of Portsmouth - Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials: REF Impact Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))

Sources & Evidence

1. Browse Topic: Vacuum
   - Taxonomy evidence: AMS5966D explicitly names Alloy xx.xx.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 aerospace realization and revenue provide the common monetary calibration for this modeled grade; neither is a grade-specific sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))

16. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: August-October 2026 grade surcharges provide a differentiated cost-exposure check, not full invoice prices or observed 2032 prices.
    ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))

Sources & Evidence

1. Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures
   - Taxonomy evidence: Identifies IN-xx.xx among nickel-base superalloys; current aerospace trade is not established.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current sales are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. JSC 27301H
   - Taxonomy evidence: Section xx.xx.xx.xx identifies Mar-M-xx.xx as a superalloy example. This establishes grade relevance, not inclusion of component sales value.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MAR-M xx.xx is identified separately from CM247LC; monetary weights remain modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission

   · Taxonomy evidence: The engine manufacturer distinguishes Rene xx.xx from Rene 88DT despite shared chemistry, supporting retention as separate recognized grade identities.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.

Sources & Evidence

1. Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures
   - Taxonomy evidence: Identifies Rene xx.xx among nickel-base superalloys; current aerospace trade is not established.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; current commercial scale remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: Named material identity; current commercial allocation is not established.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PWA xx.xx is separately identified; no attributable sales value is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures
   - Taxonomy evidence: Names 713C; the IN-713C crosswalk and current aerospace trade remain unverified.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713C is listed separately from IN-713LC; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. Browse Topic: Vacuum

   · Taxonomy evidence: AMS5598G and AMS5583G name X750 in different material forms, supporting one grade identity across those forms.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Special Metals - Aerospace
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy X-xx.xx; no current sales quantity is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

Sources & Evidence

1. Browse Topic: Vacuum
   - Taxonomy evidence: AMS5545H explicitly names Rene xx.xx.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics

   · Taxonomy evidence: The same listing explicitly names Inconel 713LC. This supports partial identity recognition for the retained IN-713LC category; exact normalization and current aerospace-destination trade remain unresolved. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713LC is listed separately from IN-713C; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
4. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
10. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

11. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
12. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
13. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
14. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))

Sources & Evidence

1. Browse Topic: Vacuum
   - Taxonomy evidence: AMS5960B explicitly names Alloy xx.xx+, separately from ordinary xx.xx references.

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause prohibits unauthorized substitutions where contractually applicable. It constrains the adoption interpretation but does not establish approval prevalence or a numerical adoption rate. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
16. European Commission CORDIS - Welding Metallurgy and Cracking in Superalloys: Reporting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies 718Plus separately from ordinary xx.xx supporting identity separation without supplying a current sales weight. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))

Sources & Evidence

1. Browse Topic: Vacuum
   - Taxonomy evidence: AMS5661H names Alloy xx.xx as a nickel-iron material; its listed identity is consistent with the frozen nickel-predominant inclusion rule.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Special Metals - Aerospace
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy xx.xx; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: Named material identity; current commercial allocation is not established.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; no current grade-specific material sales are disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI
   - Taxonomy evidence: The introduction distinguishes conventional UDIMET xx.xx from its 720LI derivative, supporting separate grade identities rather than automatic consolidation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aerospace-industry publication distinguishes conventional Udimet xx.xx from its 720Li derivative; it does not establish a current monetary allocation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))
2. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: Listed aerospace nickel-base grade.

3. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
4. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
5. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
6. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
7. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
8. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
11. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
12. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

13. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
14. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
15. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
16. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The grade-specific surcharge listing is a commercial cost comparison, not an observed Global grade realization. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))

Sources & Evidence

1. New aircraft superalloy - CESAME Project

   · Taxonomy evidence: The European Commission's CESAME results record identifies AD730 as a separately named aircraft-engine alloy evaluated alongside U720Li in a project completed in 2015. This establishes historical aerospace-development relevance, not grade equivalence or current sales. ([cordis.europa.eu](https://cordis.europa.eu/article/id/xx.xx-new-aircraft-superalloy))

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific material authorization is a counterweight to treating a named offering as immediately substitutable production material. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
16. Aubert & Duval - AD730: Ni-Based Superalloy for High Temperature Applications
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))

Sources & Evidence

1. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
4. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
10. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
11. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
12. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
13. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
14. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))

Sources & Evidence

1. AIAA-2024-0997
   - Taxonomy evidence: The aerospace propulsion discussion explicitly identifies Haynes xx.xx among established superalloys.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.

15. Haynes International, Inc. - 2023 Form 10-K
   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. Sources & Evidence

1. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
4. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
10. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
11. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
12. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
13. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
14. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-738LC is separately identified; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
4. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
10. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
11. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
12. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
13. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
14. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: Identified as an aero-engine blade alloy.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; current commercial scale remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. Chapter 2: Aerospace Materials Characteristics
   - Taxonomy evidence: Listed aerospace nickel-base grade.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.

Sources & Evidence

1. Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures
   - Taxonomy evidence: Identifies Udimet xx.xx among nickel-base superalloys; current aerospace trade is not established.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical institutional material identification is a legacy-category anchor only; it does not demonstrate current aerospace material sales. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.

3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.

Sources & Evidence

1. Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures
   - Taxonomy evidence: Identifies Udimet xx.xx among nickel-base superalloys; current aerospace trade is not established.
2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Udimet xx.xx appears in the supplier's current-and-past identities; aerospace attribution is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. Evaluation of the IN 939 Alloy for Large Aircraft Engine Structures

   · Taxonomy evidence: The 2004 aerospace-industry paper identifies IN xx.xx and evaluates its prospective use in large aircraft-engine structures, while distinguishing its established industrial-turbine background. It supports historical developmental relevance, not current aerospace commercial adoption. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2004/Superalloys_2004_441_450.pdf))

2. ATI Inc. - 2025 Form 10-K

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.

3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.

4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx appears in a current-and-past identification list; this does not establish recurring aerospace production sales. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

Sources & Evidence

1. ASME International Gas Turbine Institute - 2026 Awards Program

   · Taxonomy evidence: The ASME 2026 awards program identifies paper GT2025-xx.xx as addressing ABD900AM qualification for turbine, aerospace, and energy applications. This independently establishes the exact named material's aerospace-qualification context, not production approval or sales. ([event.asme.org](https://event.asme.org/Events/media/library/resources/turbo/Turbo-2026-Awards-Program.pdf))

2. ATI Inc. - 2025 Form 10-K

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.

3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.

9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.
12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization limits interpretation of the assumed adoption multiplier; it does not directly establish powder sales.
      ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

16. Haynes International, Inc. - 2023 Form 10-K
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported eight-to-ten-year aerospace application-introduction periods constrain interpretation of the seven-year adoption forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
17. America Makes - 5566.002 Proliferation of Nickel Superalloy Material Datasets for Powder Bed Fusion Additive Manufacturing
· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))
· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

Sources & Evidence

1. Accelerating Manufacturing Readiness level of ABD®-1000AM for AM of high temperature aerospace components (AMRAM1000)

   · Taxonomy evidence: The Innovate UK project explicitly identifies ABD-1000AM and an aerospace-adoption development objective. Its April 2025-October 2026 funded period establishes developmental activity, not completed production adoption or recurring material sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))

2. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
3. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
4. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
5. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
6. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
7. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

8. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
9. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
10. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
11. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

12. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
13. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
14. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
15. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization limits interpretation of the assumed adoption multiplier; it does not directly establish powder sales. 16. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace application-introduction periods provide an adoption-delay counterweight, not a forecast sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))

16. Nickel-Based Superalloys for Aerospace Market, by Region

[illegible] Buyers can compare these services with an order-dedicated arrangement, but should establish the originating producer, reserved allocation, and customer acceptance before relying on proximity. A regional warehouse addresses fulfillment location, not all sourcing conditions.

In Europe, supplier-controlled commercial representation can support cross-border purchasing. [illegible] Changing the commercial contact may preserve the original source; changing the producer can introduce a different approval question.

Asia-Pacific contains different service functions even within one producer's network. [illegible] Local representation can simplify communication while leaving fulfillment dependent on another location.

Latin America and Africa illustrate different downstream purchasing relationships. GE Aerospace identifies its wholly owned Celma maintenance business in Brazil, while Safran describes its Moroccan engine-maintenance operation as a partnership with Royal Air Maroc. [illegible]

In the Middle East, announced service expansion requires careful timing. [illegible] A supplier considering dedicated exposure should require an attributable purchasing requirement and confirmation of the applicable commercial milestone before treating the announcement as executable demand.

Sources & Evidence

1. Haynes International - Sales and Service
   - Haynes describes North American service centers, on-demand delivery, and wholly owned European affiliates. These are service descriptions rather than individual delivery or source-eligibility commitments. ([haynesintl.com](https://haynesintl.com/en/sales-and-service/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
2. Haynes International - Locations and Directions
   - Haynes identifies a China Sales & Service Center and sales offices in Japan and Singapore, supporting differentiation by documented commercial function rather than assumed equivalent stock. ([haynesintl.com](https://haynesintl.com/en/our-company/locations-and-directions/))
3. GE Aerospace - Commercial and Defense Engines in Latin America
   - GE identifies Celma in Brazil as its wholly owned maintenance business, supporting a named downstream purchasing setting rather than an inferred raw-material order. ([geaerospace.com](https://www.geaerospace.com/commercial-latam))
4. Safran - Safran Aircraft Engine Services Morocco
   - Safran describes its Moroccan engine-maintenance subsidiary as a partnership with Royal Air Maroc, establishing a different counterparty relationship from an entirely OEM-owned site. ([safran-group.com](https://www.safran-group.com/locations/morocco/safran-aircraft-engine-services-morocco-xx.xx))
5. Sanad - Expanded GE Aerospace and Safran LEAP Agreement in Abu Dhabi
   - Sanad's July xx.xx 2025 announcement expands its GE Aerospace and Safran LEAP offload agreement and targets complete covered overhaul capability by 2027. It is not a completion or material-award record. ([sanad.ae](https://www.sanad.ae/press-releases/sanad-ge-aerospace-and-safran-aircraft-engines-expand-partnership-to-launch-full-cfm-leap-engine-overhaul-and-test-capabilities-in-abu-dhabi/))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.

6. ATI Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
7. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
8. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
9. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
10. Howmet Aerospace Inc. - 2025 Form 10-K
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
11. GE Aerospace - 2025 Sustainability Report
    - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
    - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
    - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.

12. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Includes exposure outside the mandatory-country group.
13. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
14. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.

16.1. North America

Table 256. North America Nickel-Based Superalloys for Aerospace Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ATI Inc. - 2025 Form 10-K

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: US and Canadian destination sales constrain the domestic-coverage calibration; business scope is broader than the target material.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC's reported financial/product-category inputs and listed ingot offering constrain the eligible material envelope; the ingot allocation remains assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: AA&S sales of USD xx.xx and its xx.xx% nickel-based/specialty-alloy category anchor the separately adjusted rolled-material envelope.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial

2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Narrow-strip supply supports a limited flat-product allocation within the modeled eligible Carpenter envelope.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire is a disclosed supplied form; its eligible monetary weight remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.

4. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical xx.xx% slab/bar/billet revenue category constrains the long-stock proxy; its eligible billet split is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported combined stock category provides a proxy anchor, not a separately disclosed bar revenue share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 flat products represented approximately xx.xx% of net product revenue; extrapolation to the eligible Acerinox envelope is modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 wire represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 tubulars represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical product revenue, channel mix and backlog conversion anchor the modeled stock value weight, with explicit scope adjustments.

5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Casting-alloy activities support an ingot-material equivalent rather than attributing full engine-component revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed metal/billet activities support retaining a forging-stock allocation; the assumed xx.xx% weight is not reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 sales of USD xx.xx and Engine Products aerospace revenues of USD xx.xx commercial and USD xx.xx defense establish the component-cohort scale; USD xx.xx gas-turbine revenue is excluded through an explicit attribution model. These are not material-market revenues. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The segment/end-market revenue table supplies the aerospace and gas-turbine boundaries needed to bridge combined spares activity into an aerospace replacement-material proxy. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial aerospace represented xx.xx% of 2025 company sales, supplying an independent downstream mix comparison rather than a nickel-material allocation weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense aerospace represented xx.xx% of 2025 company sales; the paired commercial/defense comparison tests the aviation model while retaining component and material-scope differences. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.

6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GE describes repaired/serviceable-part reuse, supporting a counterforce to converting aftermarket activity directly into newly supplied material purchases. Its reported approximately xx.xx% strategic-nickel revert content is not deducted from the terminal-material market. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial repair and component reuse support retaining uncertainty around replacement-related combustion material purchases. The selected procurement-intensity offset remains an assumption, not a measured avoided-purchase percentage. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gross nickel-alloy bar/profile imports constrain the regional allocation proxy; aerospace and domestic-supply adjustments are modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US import primitive before domestic/captive coverage adjustment.
8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input, discounted for product and industrial mix.

9. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-location revenue supports destination attribution and the North American cross-check; future allocation remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Canadian customer revenue constrains the conditional allocation calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Mexican customer revenue constrains the conditional allocation calibration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: US customer revenue constrains the domestic-material bridge, with product-scope exclusions.
10. Haynes International - Sales and Service
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Service-center presence is a fulfillment premise, not a local-demand percentage or material-origin entitlement.
11. Special Metals - Tech Center
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised ingot supply establishes a PCC material-form crosswalk, not its sales weight.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised billet supply supports the forging-stock category mapping within the inherited PCC envelope.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised bar supply supports classification only; the monetary coefficient is an assumption.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Plate, sheet and strip offerings support a distinct flat-product allocation premise.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire availability supports the material-form crosswalk without establishing revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tubing availability supports the material-form crosswalk without establishing revenue.

12. DPC Holdings Limited - Registration Statement with 2025 Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing separates ingots from component sales and describes external supply and xx.xx% internal superalloy sourcing, contradicting the inherited xx.xx% captive parameter.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
13. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned US long-product expansion supports the relative conventional-long-material premise; investment is not recognized as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx of planned platform investment includes expansion of the long-products offering, informing the bars forecast premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace demand and planned long-product diversification support testing a relative mix shift without assuming flat-product contraction.
14. Haynes International - HAYNES 282
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Powder is offered alongside conventional forms for HAYNES xx.xx supporting nonexclusive form classification, not an observed sales allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

15. CMA - Anticipated Acquisition of Haynes International by Acerinox: Full Text Decision
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer evidence in paragraphs xx.xx-xx.xx supports separate flat/long purchasing pools; no published market-share table is used.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shape-specific purchasing supports a distinct long-stock allocation model without proving a separate competitive market for billet.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
16. Haynes International - HAYNES 230
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

17. Carpenter Technology - Advanced Materials for Aerospace Motor & Engines

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

18. Elementum 3D - Metal Alloy Additive Manufacturing Colorado

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed.
([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed.
([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

19. NASA - NASA-Developed Printable Metal Can Take the Heat

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake.
([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake.
([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

20. Carpenter Technology - Lighter, Faster, Stronger Metallurgy for Defense, July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

21. Special Metals - Aerospace
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy xx.xx; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy X-xx.xx; no current sales quantity is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Waspaloy; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

22. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: D607 prohibits unauthorized material substitutions while recognizing specified alternatives. It constrains assumptions about frictionless cross-class substitution, without quantifying adoption delays. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization requirements qualify assumptions about precipitation-family substitution opportunities; the clause does not prove future purchases or a class-growth premium. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause prohibits unauthorized substitutions where contractually applicable. It constrains the adoption interpretation but does not establish approval prevalence or a numerical adoption rate. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific material authorization is a counterweight to treating a named offering as immediately substitutable production material. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization limits interpretation of the assumed adoption multiplier; it does not directly establish powder sales. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

23. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
24. NASA - Chapter 2: Aerospace Materials Characteristics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

25. ESA - ESA Space Environment Report 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
26. NASA and Superalloys: A Customer, a Participant, and a Referee
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
27. VDM Metals - Alloys for the Aerospace Industry
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
28. Carpenter Technology - Business Segments
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))

29. Howmet Aerospace - 2025 Annual Report, Letter to Shareholders

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% combined aerospace and gas-turbine spares revenue constrains the distinction between initial-production and spare-component activity; material and destination adjustments remain modeled. ([howmet.com](https://www.howmet.com/annualreport/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed combined spares proportion supplies the replacement proxy; approximately xx.xx% commercial aerospace engine-spares growth is historical counterevidence against assuming weak aftermarket activity. ([howmet.com](https://www.howmet.com/annualreport/))

30. GE Aerospace - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment and services costs provide commercial budget anchors for the common material-value denominator; assumed eligible-material fractions prevent full equipment or service value from entering the allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Services include spare parts and maintenance activity, supporting an explicit new-article versus restoration attribution rather than equating services revenue with replacement-material purchases. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported USD xx.xx services cost anchors the restoration-material bridge; the restoration allocation and direct eligible-material fraction are assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Total funded R&D of USD xx.xx supplies a development-budget proxy, not observed nickel-material purchasing; only an assumed eligible-material fraction is used. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.

31. Rolls-Royce Holdings Plc - 2025 Full Year Results

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2028 shop-visit target is below the reported 2025 total despite prospective fleet growth, qualifying any automatic conversion of fleet expansion into proportionate maintenance-material purchasing.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The divergence between 2025 engine deliveries and shop visits independently challenges a uniform new-engine-led material forecast; no service revenue is included in the numerator.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed engine-delivery and shop-visit activity supports separate new-program and replacement-demand assumptions, not a proportional material-purchase conversion.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

32. UKRI - Accelerating Manufacturing Readiness level of ABD-1000AM for AM of high temperature aerospace components (AMRAM1000)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Alloyed-led project has xx.xx of funding and an April 2025-October 2026 funded period. This independently establishes bounded development activity, not annual material sales or recurring production purchases. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
33. Safran - FY 2025 Results and Investor Update, February 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))

34. Airbus - Full-Year 2025 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 deliveries by aircraft family provide the starting activity comparison for the initial-production forecast; aircraft delivery value is not included in the material numerator. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx% decline in 2025 self-financed R&D is counterevidence to uniform development-budget acceleration and supports a restrained, explicitly assumed development-purchasing scenario. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.

35. Airbus - Half-Year 2026 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 update retained the A320-family, A350 and other production-rate targets, providing a dated commercial constraint on the initial-production activity scenario rather than proof of future material orders. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 self-financed R&D of EUR xx.xx versus EUR xx.xx provides a modest-growth countercheck for the assumed development-project activity path; the budget is not material-market revenue. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))

36. RTX Corporation - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))

37. Federal Reserve Bank of St. Louis - Annual USD/GBP Exchange Rate, AEXUSUK
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
38. L3Harris Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
39. FAA Aerospace Forecast Fiscal Years 2025-2045 - Commercial Space
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated official low/high scenarios provide FY2032 licensed launch/reentry activity bounds. Their U.S.-licensed scope and treatment of reusable vehicles prevent direct conversion into Global material revenue. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-commercial-space.pdf))
40. ICAO - Convention on International Civil Aviation, Ninth Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

41. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
42. Aubert & Duval - Space Industry Metallurgical Solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
43. Aubert & Duval - Metallurgical Solutions for the Defense Industry, June 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
44. Berkshire Hathaway Inc. - 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.

45. Lufthansa Group Annual Report 2025 - MRO business segment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
46. Oliver Wyman - Global Fleet And MRO Market Forecast 2026-2036: Key Trends
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
47. German Aerospace Center (DLR) - Financing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
48. Federal Aviation Administration - Parts Manufacturer Approval (PMA): Design Approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

49. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
50. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
51. Carpenter Technology Corporation - Second Quarter Fiscal 2026 Earnings Call Presentation, January 29, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation distinguishes specialized non-LTA business from a conventional spot market, countering automatic classification of transactional sales as stock.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three additional aerospace LTAs and xx.xx% sequential commercial-aerospace bookings growth inform the reservation hypothesis, but do not measure its modeled magnitude.
52. Precision Castparts Corp. - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.

53. Howmet Aerospace - United States Locations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
54. ATI Inc. - 2024 Annual Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New sales commitments through 2040, including amounts expected during the remainder of the decade and predominantly involving jet-engine nickel alloys, inform the direct-program forecast premise without being counted as realized sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2024 plate volume went to independent service centers, providing a historical comparison that cautions against assuming generalized intermediary displacement.
55. Alloyed - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.

56. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 aerospace realization and revenue provide the common monetary calibration for this modeled grade; neither is a grade-specific sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace material realization supplies a price-scale input, with modeled year and product-mix adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization calibrates the assumed blended material price, not this grade's observed revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported eight-to-ten-year aerospace application-introduction periods constrain interpretation of the seven-year adoption forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace application-introduction periods provide an adoption-delay counterweight, not a forecast sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
57. European Commission CORDIS - Welding Metallurgy and Cracking in Superalloys: Reporting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical all-sector tonnage discussion is only a dominance cross-check; it cannot establish current aerospace monetary share. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies 718Plus separately from ordinary xx.xx supporting identity separation without supplying a current sales weight. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
58. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: August-October 2026 grade surcharges provide a differentiated cost-exposure check, not full invoice prices or observed 2032 prices. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx surcharge sequence independently qualifies a uniform price assumption; it is not substituted for a material selling price. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The grade-specific surcharge listing is a commercial cost comparison, not an observed Global grade realization. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))

59. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current-and-past supplier identity mapping only; not proof of 2025 aerospace sales or the modeled volume. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CMSX-xx.xx is separately identified; the material-value weight remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current sales are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713C is listed separately from IN-713LC; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713LC is listed separately from IN-713C; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx identity mapping only; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-738LC is separately identified; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current aerospace tonnes are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx appears in a current-and-past identification list; this does not establish recurring aerospace production sales. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: MAR-M xx.xx is identified separately from CM247LC; monetary weights remain modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PWA xx.xx is separately identified; no attributable sales value is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; current commercial scale remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; no current grade-specific material sales are disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Udimet xx.xx appears in the supplier's current-and-past identities; aerospace attribution is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

60. GE Aerospace - Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
61. Aubert & Duval - AD730: Ni-Based Superalloy for High Temperature Applications
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
62. University of Portsmouth - Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials: REF Impact Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))

63. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aerospace-industry publication distinguishes conventional Udimet xx.xx from its 720Li derivative; it does not establish a current monetary allocation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The publication independently supports the 720Li identity and aircraft-engine-disc category, without supplying current sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

64. NASA Contractor Report 174639 - Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical institutional material identification is a legacy-category anchor only; it does not demonstrate current aerospace material sales. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

65. America Makes - 5566.002 Proliferation of Nickel Superalloy Material Datasets for Powder Bed Fusion Additive Manufacturing

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

66. GE Aerospace - Fourth Quarter 2025 Earnings Presentation

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 commercial-engine delivery growth supplies a near-term demand cross-check, not a grade-specific purchasing or seven-year growth observation. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate commercial and defense delivery growth constrains the commercial-demand scenario without establishing this grade's attributable consumption. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported defense-engine delivery growth is a demand-exposure check only; the PWA xx.xx activity factor remains assumed. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

16.2. Europe

Table 268. Europe Nickel-Based Superalloys for Aerospace Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Austria	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ATI Inc. - 2025 Form 10-K

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: European destination sales provide an independent broad-scope geographic check.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC's reported financial/product-category inputs and listed ingot offering constrain the eligible material envelope; the ingot allocation remains assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: AA&S sales of USD xx.xx and its xx.xx% nickel-based/specialty-alloy category anchor the separately adjusted rolled-material envelope.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but

2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Narrow-strip supply supports a limited flat-product allocation within the modeled eligible Carpenter envelope.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire is a disclosed supplied form; its eligible monetary weight remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.

4. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical xx.xx% slab/bar/billet revenue category constrains the long-stock proxy; its eligible billet split is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported combined stock category provides a proxy anchor, not a separately disclosed bar revenue share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 flat products represented approximately xx.xx% of net product revenue; extrapolation to the eligible Acerinox envelope is modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 wire represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 tubulars represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical product revenue, channel mix and backlog conversion anchor the modeled stock value weight, with explicit scope adjustments.

5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Casting-alloy activities support an ingot-material equivalent rather than attributing full engine-component revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed metal/billet activities support retaining a forging-stock allocation; the assumed xx.xx% weight is not reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 sales of USD xx.xx and Engine Products aerospace revenues of USD xx.xx commercial and USD xx.xx defense establish the component-cohort scale; USD xx.xx gas-turbine revenue is excluded through an explicit attribution model. These are not material-market revenues. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The segment/end-market revenue table supplies the aerospace and gas-turbine boundaries needed to bridge combined spares activity into an aerospace replacement-material proxy. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial aerospace represented xx.xx% of 2025 company sales, supplying an independent downstream mix comparison rather than a nickel-material allocation weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense aerospace represented xx.xx% of 2025 company sales; the paired commercial/defense comparison tests the aviation model while retaining component and material-scope differences. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.

6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GE describes repaired/serviceable-part reuse, supporting a counterforce to converting aftermarket activity directly into newly supplied material purchases. Its reported approximately xx.xx% strategic-nickel revert content is not deducted from the terminal-material market. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial repair and component reuse support retaining uncertainty around replacement-related combustion material purchases. The selected procurement-intensity offset remains an assumption, not a measured avoided-purchase percentage. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input; EU aggregate excluded from country summation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK import primitive.
8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Austria input requires a substantial non-aerospace mix adjustment.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2021 Russian bar-import value is the historical primitive; current scope, domestic coverage and temporal rebase are assumptions.
10. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: European customer revenue constrains the geographic comparison, not an observed market share.

11. Haynes International - Sales and Service
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-owned European representation qualifies the use of commercial-office locations as demand weights.
12. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised ingot supply establishes a PCC material-form crosswalk, not its sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised billet supply supports the forging-stock category mapping within the inherited PCC envelope.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised bar supply supports classification only; the monetary coefficient is an assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Plate, sheet and strip offerings support a distinct flat-product allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire availability supports the material-form crosswalk without establishing revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tubing availability supports the material-form crosswalk without establishing revenue.
13. DPC Holdings Limited - Registration Statement with 2025 Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing separates ingots from component sales and describes external supply and xx.xx% internal superalloy sourcing, contradicting the inherited xx.xx% captive parameter.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
14. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned US long-product expansion supports the relative conventional-long-material premise; investment is not recognized as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx of planned platform investment includes expansion of the long-products offering, informing the bars forecast premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace demand and planned long-product diversification support testing a relative mix shift without assuming flat-product contraction.

15. Haynes International - HAYNES 282
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Powder is offered alongside conventional forms for HAYNES xx.xx supporting nonexclusive form classification, not an observed sales allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
16. CMA - Anticipated Acquisition of Haynes International by Acerinox: Full Text Decision
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer evidence in paragraphs xx.xx-xx.xx supports separate flat/long purchasing pools; no published market-share table is used.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shape-specific purchasing supports a distinct long-stock allocation model without proving a separate competitive market for billet.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.

17. Haynes International - HAYNES 230
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
18. Carpenter Technology - Advanced Materials for Aerospace Motor & Engines
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))
19. Elementum 3D - Metal Alloy Additive Manufacturing Colorado
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed. ([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed. ([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))
20. NASA - NASA-Developed Printable Metal Can Take the Heat
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake. ([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake. ([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

21. Carpenter Technology - Lighter, Faster, Stronger Metallurgy for Defense, July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

22. Special Metals - Aerospace

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight.
([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight.
([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy xx.xx; no sales weight is disclosed.
([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy X-xx.xx; no current sales quantity is disclosed.
([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Waspaloy; no sales weight is disclosed.
([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

23. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: D607 prohibits unauthorized material substitutions while recognizing specified alternatives. It constrains assumptions about frictionless cross-class substitution, without quantifying adoption delays. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization requirements qualify assumptions about precipitation-family substitution opportunities; the clause does not prove future purchases or a class-growth premium. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause prohibits unauthorized substitutions where contractually applicable. It constrains the adoption interpretation but does not establish approval prevalence or a numerical adoption rate. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific material authorization is a counterweight to treating a named offering as immediately substitutable production material. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization limits interpretation of the assumed adoption multiplier; it does not directly establish powder sales. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

24. Precision Castparts Corp. - Fiscal 2015 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
25. NASA - Chapter 2: Aerospace Materials Characteristics
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

26. ESA - ESA Space Environment Report 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
27. NASA and Superalloys: A Customer, a Participant, and a Referee
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
28. VDM Metals - Alloys for the Aerospace Industry
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
29. Carpenter Technology - Business Segments
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))

30. Howmet Aerospace - 2025 Annual Report, Letter to Shareholders

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% combined aerospace and gas-turbine spares revenue constrains the distinction between initial-production and spare-component activity; material and destination adjustments remain modeled. ([howmet.com](https://www.howmet.com/annualreport/))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed combined spares proportion supplies the replacement proxy; approximately xx.xx% commercial aerospace engine-spares growth is historical counterevidence against assuming weak aftermarket activity. ([howmet.com](https://www.howmet.com/annualreport/))

31. GE Aerospace - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment and services costs provide commercial budget anchors for the common material-value denominator; assumed eligible-material fractions prevent full equipment or service value from entering the allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Services include spare parts and maintenance activity, supporting an explicit new-article versus restoration attribution rather than equating services revenue with replacement-material purchases. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported USD xx.xx services cost anchors the restoration-material bridge; the restoration allocation and direct eligible-material fraction are assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Total funded R&D of USD xx.xx supplies a development-budget proxy, not observed nickel-material purchasing; only an assumed eligible-material fraction is used. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.

32. Rolls-Royce Holdings Plc - 2025 Full Year Results

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2028 shop-visit target is below the reported 2025 total despite prospective fleet growth, qualifying any automatic conversion of fleet expansion into proportionate maintenance-material purchasing.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The divergence between 2025 engine deliveries and shop visits independently challenges a uniform new-engine-led material forecast; no service revenue is included in the numerator.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed engine-delivery and shop-visit activity supports separate new-program and replacement-demand assumptions, not a proportional material-purchase conversion.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

33. UKRI - Accelerating Manufacturing Readiness level of ABD-1000AM for AM of high temperature aerospace components (AMRAM1000)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Alloyed-led project has xx.xx of funding and an April 2025-October 2026 funded period. This independently establishes bounded development activity, not annual material sales or recurring production purchases. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
34. Safran - FY 2025 Results and Investor Update, February 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))

35. Airbus - Full-Year 2025 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 deliveries by aircraft family provide the starting activity comparison for the initial-production forecast; aircraft delivery value is not included in the material numerator. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx% decline in 2025 self-financed R&D is counterevidence to uniform development-budget acceleration and supports a restrained, explicitly assumed development-purchasing scenario. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.

36. Airbus - Half-Year 2026 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 update retained the A320-family, A350 and other production-rate targets, providing a dated commercial constraint on the initial-production activity scenario rather than proof of future material orders. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 self-financed R&D of EUR xx.xx versus EUR xx.xx provides a modest-growth countercheck for the assumed development-project activity path; the budget is not material-market revenue. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))

37. RTX Corporation - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))

38. Federal Reserve Bank of St. Louis - Annual USD/GBP Exchange Rate, AEXUSUK
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
39. L3Harris Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
40. FAA Aerospace Forecast Fiscal Years 2025-2045 - Commercial Space
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated official low/high scenarios provide FY2032 licensed launch/reentry activity bounds. Their U.S.-licensed scope and treatment of reusable vehicles prevent direct conversion into Global material revenue. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-commercial-space.pdf))
41. ICAO - Convention on International Civil Aviation, Ninth Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

42. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
43. Aubert & Duval - Space Industry Metallurgical Solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
44. Aubert & Duval - Metallurgical Solutions for the Defense Industry, June 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
45. Berkshire Hathaway Inc. - 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.

46. Lufthansa Group Annual Report 2025 - MRO business segment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
47. Oliver Wyman - Global Fleet And MRO Market Forecast 2026-2036: Key Trends
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
48. German Aerospace Center (DLR) - Financing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
49. Federal Aviation Administration - Parts Manufacturer Approval (PMA): Design Approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

50. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
51. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
52. Carpenter Technology Corporation - Second Quarter Fiscal 2026 Earnings Call Presentation, January 29, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation distinguishes specialized non-LTA business from a conventional spot market, countering automatic classification of transactional sales as stock.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three additional aerospace LTAs and xx.xx% sequential commercial-aerospace bookings growth inform the reservation hypothesis, but do not measure its modeled magnitude.
53. Precision Castparts Corp. - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.

54. Howmet Aerospace - United States Locations
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.

55. ATI Inc. - 2024 Annual Report
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New sales commitments through 2040, including amounts expected during the remainder of the decade and predominantly involving jet-engine nickel alloys, inform the direct-program forecast premise without being counted as realized sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2024 plate volume went to independent service centers, providing a historical comparison that cautions against assuming generalized intermediary displacement.

56. Alloyed - About
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.

57. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 aerospace realization and revenue provide the common monetary calibration for this modeled grade; neither is a grade-specific sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace material realization supplies a price-scale input, with modeled year and product-mix adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization calibrates the assumed blended material price, not this grade's observed revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported eight-to-ten-year aerospace application-introduction periods constrain interpretation of the seven-year adoption forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace application-introduction periods provide an adoption-delay counterweight, not a forecast sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
58. European Commission CORDIS - Welding Metallurgy and Cracking in Superalloys: Reporting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical all-sector tonnage discussion is only a dominance cross-check; it cannot establish current aerospace monetary share. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies 718Plus separately from ordinary xx.xx supporting identity separation without supplying a current sales weight. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
59. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: August-October 2026 grade surcharges provide a differentiated cost-exposure check, not full invoice prices or observed 2032 prices. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx surcharge sequence independently qualifies a uniform price assumption; it is not substituted for a material selling price. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The grade-specific surcharge listing is a commercial cost comparison, not an observed Global grade realization. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))

60. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current-and-past supplier identity mapping only; not proof of 2025 aerospace sales or the modeled volume. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: CMSX-xx.xx is separately identified; the material-value weight remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current sales are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713C is listed separately from IN-713LC; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713LC is listed separately from IN-713C; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx identity mapping only; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-738LC is separately identified; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current aerospace tonnes are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx appears in a current-and-past identification list; this does not establish recurring aerospace production sales. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MAR-M xx.xx is identified separately from CM247LC; monetary weights remain modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PWA xx.xx is separately identified; no attributable sales value is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; current commercial scale remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; no current grade-specific material sales are disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Udimet xx.xx appears in the supplier's current-and-past identities; aerospace attribution is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

61. GE Aerospace - Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
62. Aubert & Duval - AD730: Ni-Based Superalloy for High Temperature Applications
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
63. University of Portsmouth - Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials: REF Impact Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))

64. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aerospace-industry publication distinguishes conventional Udimet xx.xx from its 720Li derivative; it does not establish a current monetary allocation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The publication independently supports the 720Li identity and aircraft-engine-disc category, without supplying current sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

65. NASA Contractor Report 174639 - Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical institutional material identification is a legacy-category anchor only; it does not demonstrate current aerospace material sales. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

66. America Makes - 5566.002 Proliferation of Nickel Superalloy Material Datasets for Powder Bed Fusion Additive Manufacturing

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

67. GE Aerospace - Fourth Quarter 2025 Earnings Presentation

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 commercial-engine delivery growth supplies a near-term demand cross-check, not a grade-specific purchasing or seven-year growth observation. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate commercial and defense delivery growth constrains the commercial-demand scenario without establishing this grade's attributable consumption. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported defense-engine delivery growth is a demand-exposure check only; the PWA xx.xx activity factor remains assumed. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

16.3. Asia-Pacific

Table 280. Asia-Pacific Nickel-Based Superalloys for Aerospace Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Indonesia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Malaysia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Philippines	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Singapore	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Korea	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Taiwan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Thailand	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 281. Asia-Pacific Nickel-Based Superalloys for Aerospace Market Size, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ATI Inc. - 2025 Form 10-K

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Asian destination sales provide an independent broad-scope geographic check.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC's reported financial/product-category inputs and listed ingot offering constrain the eligible material envelope; the ingot allocation remains assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: AA&S sales of USD xx.xx and its xx.xx% nickel-based/specialty-alloy category anchor the separately adjusted rolled-material envelope.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but

2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Narrow-strip supply supports a limited flat-product allocation within the modeled eligible Carpenter envelope.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire is a disclosed supplied form; its eligible monetary weight remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.

4. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical xx.xx% slab/bar/billet revenue category constrains the long-stock proxy; its eligible billet split is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported combined stock category provides a proxy anchor, not a separately disclosed bar revenue share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 flat products represented approximately xx.xx% of net product revenue; extrapolation to the eligible Acerinox envelope is modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 wire represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 tubulars represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical product revenue, channel mix and backlog conversion anchor the modeled stock value weight, with explicit scope adjustments.

5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Casting-alloy activities support an ingot-material equivalent rather than attributing full engine-component revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed metal/billet activities support retaining a forging-stock allocation; the assumed xx.xx% weight is not reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 sales of USD xx.xx and Engine Products aerospace revenues of USD xx.xx commercial and USD xx.xx defense establish the component-cohort scale; USD xx.xx gas-turbine revenue is excluded through an explicit attribution model. These are not material-market revenues. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The segment/end-market revenue table supplies the aerospace and gas-turbine boundaries needed to bridge combined spares activity into an aerospace replacement-material proxy. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial aerospace represented xx.xx% of 2025 company sales, supplying an independent downstream mix comparison rather than a nickel-material allocation weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense aerospace represented xx.xx% of 2025 company sales; the paired commercial/defense comparison tests the aviation model while retaining component and material-scope differences. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.

6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GE describes repaired/serviceable-part reuse, supporting a counterforce to converting aftermarket activity directly into newly supplied material purchases. Its reported approximately xx.xx% strategic-nickel revert content is not deducted from the terminal-material market. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial repair and component reuse support retaining uncertainty around replacement-related combustion material purchases. The selected procurement-intensity offset remains an assumption, not a measured avoided-purchase percentage. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China import primitive before aerospace attribution and domestic coverage.
8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: South Korean flat-product input.
9. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Component-trade exposure qualifies a direct conversion of maintenance-hub activity into raw-material demand.

10. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal 2024-2025 Asia-Pacific decline is counterevidence to automatic regional growth; it qualifies the forecast assumption.
11. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised ingot supply establishes a PCC material-form crosswalk, not its sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised billet supply supports the forging-stock category mapping within the inherited PCC envelope.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised bar supply supports classification only; the monetary coefficient is an assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Plate, sheet and strip offerings support a distinct flat-product allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire availability supports the material-form crosswalk without establishing revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tubing availability supports the material-form crosswalk without establishing revenue.
12. DPC Holdings Limited - Registration Statement with 2025 Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing separates ingots from component sales and describes external supply and xx.xx% internal superalloy sourcing, contradicting the inherited xx.xx% captive parameter.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.

13. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned US long-product expansion supports the relative conventional-long-material premise; investment is not recognized as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx of planned platform investment includes expansion of the long-products offering, informing the bars forecast premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace demand and planned long-product diversification support testing a relative mix shift without assuming flat-product contraction.
14. Haynes International - HAYNES 282
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Powder is offered alongside conventional forms for HAYNES xx.xx supporting nonexclusive form classification, not an observed sales allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification.
      ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification.
      ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

15. CMA - Anticipated Acquisition of Haynes International by Acerinox: Full Text Decision
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer evidence in paragraphs xx.xx-xx.xx supports separate flat/long purchasing pools; no published market-share table is used.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shape-specific purchasing supports a distinct long-stock allocation model without proving a separate competitive market for billet.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
16. Haynes International - HAYNES 230
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

17. Carpenter Technology - Advanced Materials for Aerospace Motor & Engines

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

18. Elementum 3D - Metal Alloy Additive Manufacturing Colorado

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed.
([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed.
([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

19. NASA - NASA-Developed Printable Metal Can Take the Heat

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake.
([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake.
([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

20. Carpenter Technology - Lighter, Faster, Stronger Metallurgy for Defense, July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

21. Special Metals - Aerospace
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy xx.xx; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy X-xx.xx; no current sales quantity is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Waspaloy; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

22. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: D607 prohibits unauthorized material substitutions while recognizing specified alternatives. It constrains assumptions about frictionless cross-class substitution, without quantifying adoption delays. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization requirements qualify assumptions about precipitation-family substitution opportunities; the clause does not prove future purchases or a class-growth premium. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause prohibits unauthorized substitutions where contractually applicable. It constrains the adoption interpretation but does not establish approval prevalence or a numerical adoption rate. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific material authorization is a counterweight to treating a named offering as immediately substitutable production material. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization limits interpretation of the assumed adoption multiplier; it does not directly establish powder sales. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

23. Precision Castparts Corp. - Fiscal 2015 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.

24. NASA - Chapter 2: Aerospace Materials Characteristics

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

25. ESA - ESA Space Environment Report 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
26. NASA and Superalloys: A Customer, a Participant, and a Referee
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
27. VDM Metals - Alloys for the Aerospace Industry
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
28. Carpenter Technology - Business Segments
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))

29. Howmet Aerospace - 2025 Annual Report, Letter to Shareholders

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% combined aerospace and gas-turbine spares revenue constrains the distinction between initial-production and spare-component activity; material and destination adjustments remain modeled. ([howmet.com](https://www.howmet.com/annualreport/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed combined spares proportion supplies the replacement proxy; approximately xx.xx% commercial aerospace engine-spares growth is historical counterevidence against assuming weak aftermarket activity. ([howmet.com](https://www.howmet.com/annualreport/))

30. GE Aerospace - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment and services costs provide commercial budget anchors for the common material-value denominator; assumed eligible-material fractions prevent full equipment or service value from entering the allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Services include spare parts and maintenance activity, supporting an explicit new-article versus restoration attribution rather than equating services revenue with replacement-material purchases. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported USD xx.xx services cost anchors the restoration-material bridge; the restoration allocation and direct eligible-material fraction are assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Total funded R&D of USD xx.xx supplies a development-budget proxy, not observed nickel-material purchasing; only an assumed eligible-material fraction is used. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.

31. Rolls-Royce Holdings Plc - 2025 Full Year Results

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2028 shop-visit target is below the reported 2025 total despite prospective fleet growth, qualifying any automatic conversion of fleet expansion into proportionate maintenance-material purchasing.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The divergence between 2025 engine deliveries and shop visits independently challenges a uniform new-engine-led material forecast; no service revenue is included in the numerator.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed engine-delivery and shop-visit activity supports separate new-program and replacement-demand assumptions, not a proportional material-purchase conversion.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

32. UKRI - Accelerating Manufacturing Readiness level of ABD-1000AM for AM of high temperature aerospace components (AMRAM1000)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Alloyed-led project has xx.xx of funding and an April 2025-October 2026 funded period. This independently establishes bounded development activity, not annual material sales or recurring production purchases. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
33. Safran - FY 2025 Results and Investor Update, February 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))

34. Airbus - Full-Year 2025 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 deliveries by aircraft family provide the starting activity comparison for the initial-production forecast; aircraft delivery value is not included in the material numerator. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx% decline in 2025 self-financed R&D is counterevidence to uniform development-budget acceleration and supports a restrained, explicitly assumed development-purchasing scenario. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.

35. Airbus - Half-Year 2026 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 update retained the A320-family, A350 and other production-rate targets, providing a dated commercial constraint on the initial-production activity scenario rather than proof of future material orders. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 self-financed R&D of EUR xx.xx versus EUR xx.xx provides a modest-growth countercheck for the assumed development-project activity path; the budget is not material-market revenue. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))

36. RTX Corporation - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))

37. Federal Reserve Bank of St. Louis - Annual USD/GBP Exchange Rate, AEXUSUK
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
38. L3Harris Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
39. FAA Aerospace Forecast Fiscal Years 2025-2045 - Commercial Space
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated official low/high scenarios provide FY2032 licensed launch/reentry activity bounds. Their U.S.-licensed scope and treatment of reusable vehicles prevent direct conversion into Global material revenue. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-commercial-space.pdf))
40. ICAO - Convention on International Civil Aviation, Ninth Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

41. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
42. Aubert & Duval - Space Industry Metallurgical Solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
43. Aubert & Duval - Metallurgical Solutions for the Defense Industry, June 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
44. Berkshire Hathaway Inc. - 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.

45. Lufthansa Group Annual Report 2025 - MRO business segment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
46. Oliver Wyman - Global Fleet And MRO Market Forecast 2026-2036: Key Trends
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
47. German Aerospace Center (DLR) - Financing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
48. Federal Aviation Administration - Parts Manufacturer Approval (PMA): Design Approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

49. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
50. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
51. Carpenter Technology Corporation - Second Quarter Fiscal 2026 Earnings Call Presentation, January 29, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation distinguishes specialized non-LTA business from a conventional spot market, countering automatic classification of transactional sales as stock.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three additional aerospace LTAs and xx.xx% sequential commercial-aerospace bookings growth inform the reservation hypothesis, but do not measure its modeled magnitude.
52. Precision Castparts Corp. - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.

53. Howmet Aerospace - United States Locations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
54. ATI Inc. - 2024 Annual Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New sales commitments through 2040, including amounts expected during the remainder of the decade and predominantly involving jet-engine nickel alloys, inform the direct-program forecast premise without being counted as realized sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2024 plate volume went to independent service centers, providing a historical comparison that cautions against assuming generalized intermediary displacement.
55. Alloyed - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.

56. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 aerospace realization and revenue provide the common monetary calibration for this modeled grade; neither is a grade-specific sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace material realization supplies a price-scale input, with modeled year and product-mix adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization calibrates the assumed blended material price, not this grade's observed revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported eight-to-ten-year aerospace application-introduction periods constrain interpretation of the seven-year adoption forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace application-introduction periods provide an adoption-delay counterweight, not a forecast sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
57. European Commission CORDIS - Welding Metallurgy and Cracking in Superalloys: Reporting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical all-sector tonnage discussion is only a dominance cross-check; it cannot establish current aerospace monetary share. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies 718Plus separately from ordinary xx.xx supporting identity separation without supplying a current sales weight. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
58. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: August-October 2026 grade surcharges provide a differentiated cost-exposure check, not full invoice prices or observed 2032 prices. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx surcharge sequence independently qualifies a uniform price assumption; it is not substituted for a material selling price. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The grade-specific surcharge listing is a commercial cost comparison, not an observed Global grade realization. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))

59. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current-and-past supplier identity mapping only; not proof of 2025 aerospace sales or the modeled volume. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CMSX-xx.xx is separately identified; the material-value weight remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current sales are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713C is listed separately from IN-713LC; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713LC is listed separately from IN-713C; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx identity mapping only; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-738LC is separately identified; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current aerospace tonnes are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx appears in a current-and-past identification list; this does not establish recurring aerospace production sales. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: MAR-M xx.xx is identified separately from CM247LC; monetary weights remain modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PWA xx.xx is separately identified; no attributable sales value is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; current commercial scale remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; no current grade-specific material sales are disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Udimet xx.xx appears in the supplier's current-and-past identities; aerospace attribution is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

60. GE Aerospace - Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
61. Aubert & Duval - AD730: Ni-Based Superalloy for High Temperature Applications
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
62. University of Portsmouth - Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials: REF Impact Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))

63. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aerospace-industry publication distinguishes conventional Udimet xx.xx from its 720Li derivative; it does not establish a current monetary allocation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The publication independently supports the 720Li identity and aircraft-engine-disc category, without supplying current sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

64. NASA Contractor Report 174639 - Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical institutional material identification is a legacy-category anchor only; it does not demonstrate current aerospace material sales. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

65. America Makes - 5566.002 Proliferation of Nickel Superalloy Material Datasets for Powder Bed Fusion Additive Manufacturing

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

66. GE Aerospace - Fourth Quarter 2025 Earnings Presentation

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 commercial-engine delivery growth supplies a near-term demand cross-check, not a grade-specific purchasing or seven-year growth observation. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate commercial and defense delivery growth constrains the commercial-demand scenario without establishing this grade's attributable consumption. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported defense-engine delivery growth is a demand-exposure check only; the PWA xx.xx activity factor remains assumed. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

16.4. Middle East

Table 292. Middle East Nickel-Based Superalloys for Aerospace Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Israel	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Qatar	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Saudi Arabia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Turkey	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Arab Emirates	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 293. Middle East Nickel-Based Superalloys for Aerospace Market Size, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Israel	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Qatar	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ATI Inc. - 2025 Form 10-K

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC's reported financial/product-category inputs and listed ingot offering constrain the eligible material envelope; the ingot allocation remains assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: AA&S sales of USD xx.xx and its xx.xx% nickel-based/specialty-alloy category anchor the separately adjusted rolled-material envelope.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but not identifying price growth or a 2032 material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))

2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Narrow-strip supply supports a limited flat-product allocation within the modeled eligible Carpenter envelope.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire is a disclosed supplied form; its eligible monetary weight remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.

4. Haynes International, Inc. - 2023 Form 10-K

- Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
- Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
- Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
- Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
- Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical xx.xx% slab/bar/billet revenue category constrains the long-stock proxy; its eligible billet split is assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported combined stock category provides a proxy anchor, not a separately disclosed bar revenue share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 flat products represented approximately xx.xx% of net product revenue; extrapolation to the eligible Acerinox envelope is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 wire represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 tubulars represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical product revenue, channel mix and backlog conversion anchor the modeled stock value weight, with explicit scope adjustments.

5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Casting-alloy activities support an ingot-material equivalent rather than attributing full engine-component revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed metal/billet activities support retaining a forging-stock allocation; the assumed xx.xx% weight is not reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 sales of USD xx.xx and Engine Products aerospace revenues of USD xx.xx commercial and USD xx.xx defense establish the component-cohort scale; USD xx.xx gas-turbine revenue is excluded through an explicit attribution model. These are not material-market revenues. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The segment/end-market revenue table supplies the aerospace and gas-turbine boundaries needed to bridge combined spares activity into an aerospace replacement-material proxy. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial aerospace represented xx.xx% of 2025 company sales, supplying an independent downstream mix comparison rather than a nickel-material allocation weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense aerospace represented xx.xx% of 2025 company sales; the paired commercial/defense comparison tests the aviation model while retaining component and material-scope differences. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.

6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GE describes repaired/serviceable-part reuse, supporting a counterforce to converting aftermarket activity directly into newly supplied material purchases. Its reported approximately xx.xx% strategic-nickel revert content is not deducted from the terminal-material market. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial repair and component reuse support retaining uncertainty around replacement-related combustion material purchases. The selected procurement-intensity offset remains an assumption, not a measured avoided-purchase percentage. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
9. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Older bar-import input with explicit temporal and relevance bridge.
10. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2023 flat-product input supplements the older bar primitive.

11. Sanad - Expanded GE Aerospace and Safran LEAP agreement, July 2, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Completed shop visits establish existing service activity; announced expansion constrains timing but does not establish alloy procurement or forecast revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Completed shop visits establish existing service activity; announced expansion constrains timing but does not establish alloy procurement or forecast revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Agreement-specific milestones qualify assumed regional material-demand growth.
12. TEI - TEI Provides MRO Services to International Fighter Aircraft, January 30, 2025
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Maintenance performed in Turkey for overseas operators supports service-location attribution rather than airline-country allocation; material intensity remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Maintenance performed in Turkey for overseas operators supports service-location attribution rather than airline-country allocation; material intensity remains assumed.
13. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised ingot supply establishes a PCC material-form crosswalk, not its sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised billet supply supports the forging-stock category mapping within the inherited PCC envelope.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised bar supply supports classification only; the monetary coefficient is an assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Plate, sheet and strip offerings support a distinct flat-product allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire availability supports the material-form crosswalk without establishing revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tubing availability supports the material-form crosswalk without establishing revenue.

14. DPC Holdings Limited - Registration Statement with 2025 Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing separates ingots from component sales and describes external supply and xx.xx% internal superalloy sourcing, contradicting the inherited xx.xx% captive parameter.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
15. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned US long-product expansion supports the relative conventional-long-material premise; investment is not recognized as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx of planned platform investment includes expansion of the long-products offering, informing the bars forecast premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace demand and planned long-product diversification support testing a relative mix shift without assuming flat-product contraction.
16. Haynes International - HAYNES 282
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Powder is offered alongside conventional forms for HAYNES xx.xx supporting nonexclusive form classification, not an observed sales allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

17. CMA - Anticipated Acquisition of Haynes International by Acerinox: Full Text Decision
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer evidence in paragraphs xx.xx-xx.xx supports separate flat/long purchasing pools; no published market-share table is used.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shape-specific purchasing supports a distinct long-stock allocation model without proving a separate competitive market for billet.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
18. Haynes International - HAYNES 230
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))

19. Carpenter Technology - Advanced Materials for Aerospace Motor & Engines

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation.
([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))

20. Elementum 3D - Metal Alloy Additive Manufacturing Colorado

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed.
([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed.
([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))

21. NASA - NASA-Developed Printable Metal Can Take the Heat

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake.
([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake.
([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

22. Carpenter Technology - Lighter, Faster, Stronger Metallurgy for Defense, July 2025

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

23. Special Metals - Aerospace
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy xx.xx; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy X-xx.xx; no current sales quantity is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Waspaloy; no sales weight is disclosed. ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

24. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: D607 prohibits unauthorized material substitutions while recognizing specified alternatives. It constrains assumptions about frictionless cross-class substitution, without quantifying adoption delays. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization requirements qualify assumptions about precipitation-family substitution opportunities; the clause does not prove future purchases or a class-growth premium. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause prohibits unauthorized substitutions where contractually applicable. It constrains the adoption interpretation but does not establish approval prevalence or a numerical adoption rate. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific material authorization is a counterweight to treating a named offering as immediately substitutable production material. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization limits interpretation of the assumed adoption multiplier; it does not directly establish powder sales. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

25. Precision Castparts Corp. - Fiscal 2015 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.

26. NASA - Chapter 2: Aerospace Materials Characteristics

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

27. ESA - ESA Space Environment Report 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
28. NASA and Superalloys: A Customer, a Participant, and a Referee
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
29. VDM Metals - Alloys for the Aerospace Industry
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
30. Carpenter Technology - Business Segments
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))

31. Howmet Aerospace - 2025 Annual Report, Letter to Shareholders

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% combined aerospace and gas-turbine spares revenue constrains the distinction between initial-production and spare-component activity; material and destination adjustments remain modeled. ([howmet.com](https://www.howmet.com/annualreport/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed combined spares proportion supplies the replacement proxy; approximately xx.xx% commercial aerospace engine-spares growth is historical counterevidence against assuming weak aftermarket activity. ([howmet.com](https://www.howmet.com/annualreport/))

32. GE Aerospace - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment and services costs provide commercial budget anchors for the common material-value denominator; assumed eligible-material fractions prevent full equipment or service value from entering the allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Services include spare parts and maintenance activity, supporting an explicit new-article versus restoration attribution rather than equating services revenue with replacement-material purchases. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported USD xx.xx services cost anchors the restoration-material bridge; the restoration allocation and direct eligible-material fraction are assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Total funded R&D of USD xx.xx supplies a development-budget proxy, not observed nickel-material purchasing; only an assumed eligible-material fraction is used. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.

33. Rolls-Royce Holdings Plc - 2025 Full Year Results

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2028 shop-visit target is below the reported 2025 total despite prospective fleet growth, qualifying any automatic conversion of fleet expansion into proportionate maintenance-material purchasing.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The divergence between 2025 engine deliveries and shop visits independently challenges a uniform new-engine-led material forecast; no service revenue is included in the numerator.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed engine-delivery and shop-visit activity supports separate new-program and replacement-demand assumptions, not a proportional material-purchase conversion.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

34. UKRI - Accelerating Manufacturing Readiness level of ABD-1000AM for AM of high temperature aerospace components (AMRAM1000)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Alloyed-led project has xx.xx of funding and an April 2025-October 2026 funded period. This independently establishes bounded development activity, not annual material sales or recurring production purchases. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
35. Safran - FY 2025 Results and Investor Update, February 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))

36. Airbus - Full-Year 2025 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 deliveries by aircraft family provide the starting activity comparison for the initial-production forecast; aircraft delivery value is not included in the material numerator. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx% decline in 2025 self-financed R&D is counterevidence to uniform development-budget acceleration and supports a restrained, explicitly assumed development-purchasing scenario. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.

37. Airbus - Half-Year 2026 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 update retained the A320-family, A350 and other production-rate targets, providing a dated commercial constraint on the initial-production activity scenario rather than proof of future material orders. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 self-financed R&D of EUR xx.xx versus EUR xx.xx provides a modest-growth countercheck for the assumed development-project activity path; the budget is not material-market revenue. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))

38. RTX Corporation - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))

39. Federal Reserve Bank of St. Louis - Annual USD/GBP Exchange Rate, AEXUSUK
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
40. L3Harris Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
41. FAA Aerospace Forecast Fiscal Years 2025-2045 - Commercial Space
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated official low/high scenarios provide FY2032 licensed launch/reentry activity bounds. Their U.S.-licensed scope and treatment of reusable vehicles prevent direct conversion into Global material revenue. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-commercial-space.pdf))
42. ICAO - Convention on International Civil Aviation, Ninth Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

43. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
44. Aubert & Duval - Space Industry Metallurgical Solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
45. Aubert & Duval - Metallurgical Solutions for the Defense Industry, June 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
46. Berkshire Hathaway Inc. - 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.

47. Lufthansa Group Annual Report 2025 - MRO business segment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
48. Oliver Wyman - Global Fleet And MRO Market Forecast 2026-2036: Key Trends
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
49. German Aerospace Center (DLR) - Financing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
50. Federal Aviation Administration - Parts Manufacturer Approval (PMA): Design Approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

51. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
52. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
53. Carpenter Technology Corporation - Second Quarter Fiscal 2026 Earnings Call Presentation, January 29, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation distinguishes specialized non-LTA business from a conventional spot market, countering automatic classification of transactional sales as stock.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three additional aerospace LTAs and xx.xx% sequential commercial-aerospace bookings growth inform the reservation hypothesis, but do not measure its modeled magnitude.
54. Precision Castparts Corp. - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.

55. Howmet Aerospace - United States Locations
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
56. ATI Inc. - 2024 Annual Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New sales commitments through 2040, including amounts expected during the remainder of the decade and predominantly involving jet-engine nickel alloys, inform the direct-program forecast premise without being counted as realized sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2024 plate volume went to independent service centers, providing a historical comparison that cautions against assuming generalized intermediary displacement.
57. Alloyed - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.

58. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 aerospace realization and revenue provide the common monetary calibration for this modeled grade; neither is a grade-specific sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace material realization supplies a price-scale input, with modeled year and product-mix adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization calibrates the assumed blended material price, not this grade's observed revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported eight-to-ten-year aerospace application-introduction periods constrain interpretation of the seven-year adoption forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace application-introduction periods provide an adoption-delay counterweight, not a forecast sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
59. European Commission CORDIS - Welding Metallurgy and Cracking in Superalloys: Reporting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical all-sector tonnage discussion is only a dominance cross-check; it cannot establish current aerospace monetary share. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies 718Plus separately from ordinary xx.xx supporting identity separation without supplying a current sales weight. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
60. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: August-October 2026 grade surcharges provide a differentiated cost-exposure check, not full invoice prices or observed 2032 prices. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx surcharge sequence independently qualifies a uniform price assumption; it is not substituted for a material selling price. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The grade-specific surcharge listing is a commercial cost comparison, not an observed Global grade realization. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))

61. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current-and-past supplier identity mapping only; not proof of 2025 aerospace sales or the modeled volume. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CMSX-xx.xx is separately identified; the material-value weight remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current sales are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713C is listed separately from IN-713LC; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713LC is listed separately from IN-713C; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx identity mapping only; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-738LC is separately identified; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current aerospace tonnes are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx appears in a current-and-past identification list; this does not establish recurring aerospace production sales. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: MAR-M xx.xx is identified separately from CM247LC; monetary weights remain modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PWA xx.xx is separately identified; no attributable sales value is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; current commercial scale remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; no current grade-specific material sales are disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Udimet xx.xx appears in the supplier's current-and-past identities; aerospace attribution is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

62. GE Aerospace - Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
63. Aubert & Duval - AD730: Ni-Based Superalloy for High Temperature Applications
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
64. University of Portsmouth - Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials: REF Impact Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))

65. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aerospace-industry publication distinguishes conventional Udimet xx.xx from its 720Li derivative; it does not establish a current monetary allocation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The publication independently supports the 720Li identity and aircraft-engine-disc category, without supplying current sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

66. NASA Contractor Report 174639 - Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical institutional material identification is a legacy-category anchor only; it does not demonstrate current aerospace material sales. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

67. America Makes - 5566.002 Proliferation of Nickel Superalloy Material Datasets for Powder Bed Fusion Additive Manufacturing

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

68. GE Aerospace - Fourth Quarter 2025 Earnings Presentation

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 commercial-engine delivery growth supplies a near-term demand cross-check, not a grade-specific purchasing or seven-year growth observation. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate commercial and defense delivery growth constrains the commercial-demand scenario without establishing this grade's attributable consumption. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported defense-engine delivery growth is a demand-exposure check only; the PWA xx.xx activity factor remains assumed. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

16.5. Latin America

Table 304. Latin America Nickel-Based Superalloys for Aerospace Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Argentina	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chile	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Colombia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Peru	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. ATI Inc. - 2025 Form 10-K

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: Commercial jet-engine sales growth provides a near-term demand indicator, not an observed global market growth rate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC's reported financial/product-category inputs and listed ingot offering constrain the eligible material envelope; the ingot allocation remains assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: HPMC supplies long materials including billet; engine-material positioning informs the modeled forging-stock envelope and relative-demand premise.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: AA&S sales of USD xx.xx and its xx.xx% nickel-based/specialty-alloy category anchor the separately adjusted rolled-material envelope.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Advanced powder offerings and expected increased usage support commercial classification and a forecast premise, not a disclosed powder share.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The AA&S and HPMC product distinctions constrain the flat-oriented versus high-strength-oriented material proxies. Reported segment growth also challenges an automatic relative-growth advantage; neither segment is a strengthening-class sales disclosure. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2025 nickel/specialty-alloy product shares were xx.xx% in HPMC and xx.xx% in AA&S. Aerospace-and-defense growth was xx.xx% and xx.xx%, respectively. These are cohort-model inputs and forecast constraints, not observed precipitation-family shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2025 filing separates HPMC and AA&S product exposures, supporting distinct material-value cohorts rather than treating all supplier revenue as interchangeable application demand. Final application coefficients remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disc-quality mill products, precision forgings and engine-material supply relationships support the rotor-stock cohort classification and forecast premise, not the final disk percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial jet-engine revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025, supporting purchasing recovery but not identifying price growth or a 2032 material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ati-xx.xx.htm))

2. Carpenter Technology Corporation - 2026 Annual Report on Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Fiscal 2026 aerospace-and-defense growth constrains the current-year demand assumption while retaining product-mix and reporting-period differences.
3. Carpenter Technology Corporation - 2025 Annual Report on Form 10-K
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue provides a historical supplier-recovery calibration input.
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Reported aerospace-and-defense revenue constrains the modeled historical recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Disclosed billet activity and aerospace sales constrain the long-material proxy; the within-envelope billet weight is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Bar and rod offerings and aerospace engine/fastener demand support the bars classification and relative activity premise.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Narrow-strip supply supports a limited flat-product allocation within the modeled eligible Carpenter envelope.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire is a disclosed supplied form; its eligible monetary weight remains modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PEP aerospace-and-defense revenue of USD xx.xx constrains powder attribution; its decline and additive restructuring qualify the adoption forecast.

4. Haynes International, Inc. - 2023 Form 10-K
   - Evidence informing the 2019 market-value input; displayed series and growth include calculations: Aerospace shipment value anchors the pre-pandemic comparison.
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the pandemic contraction.
   - Evidence informing the 2021 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the inventory-cycle trough.
   - Evidence informing the 2022 market-value input; displayed series and growth include calculations: Aerospace shipment value constrains the subsequent recovery.
   - Evidence informing the 2023 market-value input; displayed series and growth include calculations: Aerospace sales and realized pricing constrain the historical value recovery.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical xx.xx% slab/bar/billet revenue category constrains the long-stock proxy; its eligible billet split is assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported combined stock category provides a proxy anchor, not a separately disclosed bar revenue share.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 flat products represented approximately xx.xx% of net product revenue; extrapolation to the eligible Acerinox envelope is modeled.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 wire represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FY2023 tubulars represented approximately xx.xx% of net product revenue, providing a historical value-mix proxy.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product-form revenues were approximately xx.xx% sheet/coil/plate, xx.xx% tubulars, xx.xx% wire and xx.xx% slab/bar/billet. This supports a flat-heavy commercial proxy, subject to aerospace, year and strengthening-family adjustments. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing identifies commercial aerospace participation by Haynes xx.xx qualifying any assumption that the supplier's flat-product business belongs entirely to solid-solution alloys. It does not disclose class-specific sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 product revenue mix was approximately xx.xx% sheet/coil/plate and xx.xx% tubular, supplying the xx.xx% flat/tubular proxy used in the material cohort model. Aerospace and 2025 extrapolation remain assumptions. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported xx.xx% wire and xx.xx% slab/bar/billet revenue provide the complementary xx.xx% long/wire proxy. The source supports a material-form input, not structural-equipment sales. ([haynesintl.com](https://haynesintl.com/wp-content/uploads/2024/xx.xx/Haynes-Intl-10K.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical product revenue, channel mix and backlog conversion anchor the modeled stock value weight, with explicit scope adjustments.

5. Howmet Aerospace Inc. - 2025 Form 10-K
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: Growth across aerospace and engine spares supports continued purchasing activity, without establishing a corresponding percentage increase in nickel-material demand.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Casting-alloy activities support an ingot-material equivalent rather than attributing full engine-component revenue.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Disclosed metal/billet activities support retaining a forging-stock allocation; the assumed xx.xx% weight is not reported.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Engine Products includes airfoils and structural parts; approximately xx.xx% segment sales growth in 2025 supplies an independent commercial comparison, not an aerospace-material growth rate. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed mix of rotating and structural engine products supports separating these purchasing exposures rather than assigning all casting-related material to airfoils. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported 2025 sales of USD xx.xx and Engine Products aerospace revenues of USD xx.xx commercial and USD xx.xx defense establish the component-cohort scale; USD xx.xx gas-turbine revenue is excluded through an explicit attribution model. These are not material-market revenues. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The segment/end-market revenue table supplies the aerospace and gas-turbine boundaries needed to bridge combined spares activity into an aerospace replacement-material proxy. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commercial aerospace represented xx.xx% of 2025 company sales, supplying an independent downstream mix comparison rather than a nickel-material allocation weight. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defense aerospace represented xx.xx% of 2025 company sales; the paired commercial/defense comparison tests the aviation model while retaining component and material-scope differences. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hwm-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Engine Products sales of USD xx.xx and identifies third-party raw-material purchasing. These constrain the component purchasing pool and its forecast starting weight; the source does not disclose the modeled material coefficients or global share.

6. GE Aerospace - 2025 Sustainability Report
   - Evidence informing the 2030 market-value input; displayed series and growth include calculations: Repair and serviceable-part reuse establish a commercial counterforce to mechanically converting maintenance activity into new-material purchases; the forecast offset remains assumed.
   - Evidence informing the 2032 market-value input; displayed series and growth include calculations: Lifecycle alternatives support retaining uncertainty around replacement-material intensity rather than assuming unchanged purchasing per maintained engine.
   - Evidence informing the 2040 market-value input; displayed series and growth include calculations: Lifecycle alternatives inform long-run demand sensitivity, not direct verification of the forecast value.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: GE describes repaired/serviceable-part reuse, supporting a counterforce to converting aftermarket activity directly into newly supplied material purchases. Its reported approximately xx.xx% strategic-nickel revert content is not deducted from the terminal-material market. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial repair and component reuse support retaining uncertainty around replacement-related combustion material purchases. The selected procurement-intensity offset remains an assumption, not a measured avoided-purchase percentage. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Restoration and used-serviceable parts are alternatives to new replacements, supporting a replacement-material offset mechanism but not its assumed numerical magnitude. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The report establishes restoration as a commercial activity distinct from newly manufactured replacement articles; eligible material spending within that activity remains modeled. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/2025-sustainability-report.pdf))
7. World Bank WITS / UN Comtrade - Bars, rods and profiles, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-trade input.
8. World Bank WITS / UN Comtrade - Plates, sheet, strip and foil, nickel alloy imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Flat-product import input.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil material input, not downstream aerospace sales.
9. World Bank WITS / UN Comtrade - Parts of turbo-jets or turbo-propellers imports by country, 2024
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished engine-parts imports independently test the exclusion of downstream component value from material demand.

10. Special Metals - Tech Center
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised ingot supply establishes a PCC material-form crosswalk, not its sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised billet supply supports the forging-stock category mapping within the inherited PCC envelope.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Advertised bar supply supports classification only; the monetary coefficient is an assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Plate, sheet and strip offerings support a distinct flat-product allocation premise.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Wire availability supports the material-form crosswalk without establishing revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tubing availability supports the material-form crosswalk without establishing revenue.
11. DPC Holdings Limited - Registration Statement with 2025 Financial Statements
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing separates ingots from component sales and describes external supply and xx.xx% internal superalloy sourcing, contradicting the inherited xx.xx% captive parameter.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace revenue increased from USD xx.xx in 2024 to USD xx.xx in 2025. The company describes predominantly new-build structural casting exposure, supplying a lifecycle comparison rather than a global structural-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned aerospace airfoil expansion is described as adding replacement exposure. It supports distinguishing lifecycle assumptions but does not establish a current material award or universal replacement frequency. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/filename1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The filing describes xx.xx% internal aerospace and IGT superalloy requirements being supplied internally alongside external superalloy sales; this informs allocation and exposes the frozen sourcing-assumption discrepancy.
12. Acerinox - Results FY 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Planned US long-product expansion supports the relative conventional-long-material premise; investment is not recognized as sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately USD xx.xx of planned platform investment includes expansion of the long-products offering, informing the bars forecast premise.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aerospace demand and planned long-product diversification support testing a relative mix shift without assuming flat-product contraction.

13. Haynes International - HAYNES 282
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Powder is offered alongside conventional forms for HAYNES xx.xx supporting nonexclusive form classification, not an observed sales allocation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Haynes xx.xx is identified as gamma-prime-strengthened, with aeroengine positioning and offerings across flat and other material forms. This prevents equating flat-product revenue or delivered condition with solid-solution classification. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
14. CMA - Anticipated Acquisition of Haynes International by Acerinox: Full Text Decision
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct customer evidence in paragraphs xx.xx-xx.xx supports separate flat/long purchasing pools; no published market-share table is used.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Shape-specific purchasing supports a distinct long-stock allocation model without proving a separate competitive market for billet.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original supply-chain findings in paragraphs xx.xx-xx.xx identify manufacturer-operated stocking and independent stockists, supporting separation of fulfillment from ownership.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Original customer findings recognize lead-time and availability considerations; these constrain classification but provide no dedicated-share percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer-operated service-center supply belongs to the direct channel rather than automatically to independent distribution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Independent distributors and stockists constitute a distinct commercial route; no market-research-derived channel share is used.

15. Haynes International - HAYNES 230
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies Haynes xx.xx as solid-solution-strengthened and positions it for aerospace combustion hardware. This establishes commercial category mapping, not a sales weight. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The producer identifies combustion cans, transition ducts and related gas-turbine applications for HAYNES xx.xx. This supports commercial classification of the flat/tubular cohort, not an observed application sales percentage. ([haynesintl.com](https://haynesintl.com/en/alloys/alloy-portfolio/high-temperature-alloys/haynes-xx.xx/))
16. Carpenter Technology - Advanced Materials for Aerospace Motor & Engines
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The engine-material portfolio identifies xx.xx and Waspaloy as precipitation-family nickel alloys serving structural and rotating-engine applications. It supports the high-strength cohort's classification premise, but supplies no numerical class allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/aerospace/engines))
17. Elementum 3D - Metal Alloy Additive Manufacturing Colorado
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed. ([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The company's 2025 history entry reports over xx.xx tons of GRX-xx.xx nickel superalloy sold to xx.xx customers. These are the reported quantity and customer anchors for the explicitly assumed price, aerospace-attribution, coverage and adoption model. No future sales are observed. ([elementum3d.com](https://www.elementum3d.com/about-metal-alloy-additive-manufacturing/))
18. NASA - NASA-Developed Printable Metal Can Take the Heat
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake. ([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The August xx.xx 2025 publication identifies GRX-xx.xx as an ODS commercial offering and describes customer supply from small batches to over a ton, including aviation and commercial-space interest. It corroborates commercial activity, not the modeled price, annual Global value or forecast uptake. ([nasa.gov](https://www.nasa.gov/technology/tech-transfer-spinoffs/nasa-developed-printable-metal-can-take-the-heat/))

19. Carpenter Technology - Lighter, Faster, Stronger Metallurgy for Defense, July 2025

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
    ([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July-2025 presentation identifies a separate licensed GRX-xx.xx ODS commercial offering. This supports allowing supplier activity beyond the observed sales cohort; it does not establish a coverage percentage or justify equal licensee weights.
    ([carpentertechnology.com](https://www.carpentertechnology.com/hubfs/presentations/Metallurgy-for-Defense_Presentation_NATO_F.pdf))

20. Special Metals - Aerospace

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight.
    ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

    · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The undated aerospace portfolio lists INCONEL MA754. This preserves a legacy-category lead while leaving current deliveries and revenue unresolved; it is not used as a numerical sales weight.
    ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy xx.xx; no sales weight is disclosed.
    ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Alloy X-xx.xx; no current sales quantity is disclosed.
    ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

    · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace portfolio mapping for Waspaloy; no sales weight is disclosed.
    ([specialmetals.com](https://www.specialmetals.com/markets/aerospace.html))

21. Boeing - BDS Terms and Conditions Guide, D607 Material Substitution Prohibition, November 15, 2013

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: D607 prohibits unauthorized material substitutions while recognizing specified alternatives. It constrains assumptions about frictionless cross-class substitution, without quantifying adoption delays. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization requirements qualify assumptions about precipitation-family substitution opportunities; the clause does not prove future purchases or a class-growth premium. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contractual material controls and supply-chain ownership traceability support distinguishing the component establishment purchasing material from the customer controlling acceptance. The clause supplies an attribution premise, not a quantitative weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Acceptance and contractual authority do not by themselves establish ownership of every upstream material purchase, supporting the engine-system model's separate purchasing-title retention assumption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integrator material requirements apply contractually through suppliers, supporting exclusion of supplier-owned material purchases from automatic attribution to the vehicle integrator.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause prohibits unauthorized substitutions where contractually applicable. It constrains the adoption interpretation but does not establish approval prevalence or a numerical adoption rate. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific material authorization is a counterweight to treating a named offering as immediately substitutable production material. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific authorization limits interpretation of the assumed adoption multiplier; it does not directly establish powder sales. ([boeingsuppliers.com](https://www.boeingsuppliers.com/content/dam/boeing/boeingsuppliers/boeing-suppliers/becoming/terms/clause-index/dxxx/D607_20131115.pdf))

22. Precision Castparts Corp. - Fiscal 2015 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Investment Cast Products revenue of USD xx.xx and Forged Products revenue of USD xx.xx provide the historical cast/forged calibration inputs. Scope, material-value and temporal adjustments are explicit assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical segment inputs constrain the complementary long/forged material cohort; they are not observed 2025 material revenues or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/pcp2015052810k.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Discloses a xx.xx% aerospace sales mix in fiscal 2015. This supplies a historical calibration lead for PCC's assumed aerospace attribution; it does not establish its 2025 mix or either final allocation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Fiscal-2015 Forged Products intercompany activity of USD xx.xx and external sales of USD xx.xx calibrate a historical internal-activity ratio, not a directly observed nickel-material captive share.

23. NASA - Chapter 2: Aerospace Materials Characteristics

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA distinguishes nickel-superalloy compressor applications from turbine disks and blades, supporting the compressor numerator boundary without supplying its monetary weight. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rocket-engine superalloy applications are identified separately from aircraft engines, supporting rocket attribution rather than inclusion in air-breathing component numerators. No current procurement value is disclosed. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

24. ESA - ESA Space Environment Report 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2026 report records more than xx.xx launches and more than xx.xx newly orbited payloads during 2025. These constrain contemporary space activity; purchasing intensity and the 2032 activity scenario remain modeled. ([esa.int](https://www.esa.int/Space_Safety/Space_Debris/ESA_Space_Environment_Report_2026))
25. NASA and Superalloys: A Customer, a Participant, and a Referee
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NASA documents historical IN718 backing structures associated with Shuttle thermal protection. This establishes a destination boundary, not continuing 2025 procurement or a forecast award. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical IN718 space-station battery pressure vessels establish a non-propulsion equipment application. Current attributable sales and forecast scale are explicitly estimated rather than inferred from that historical program. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf?attachment=true))
26. VDM Metals - Alloys for the Aerospace Industry
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The commercial aerospace brochure identifies nickel-alloy fuselage structural parts and fasteners, independently corroborating non-engine destinations. Product availability is not used as a sales-count weight. ([vdm-metals.com](https://www.vdm-metals.com/fileadmin/user_upload/Downloads/Brochures/VDM_Metals_Aerospace.pdf))
27. Carpenter Technology - Business Segments
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Carpenter identifies commercial long-product superalloy offerings, supporting classification of its inherited eligible material contribution in the long/wire cohort. It does not disclose the modeled compressor allocation. ([carpentertechnology.com](https://www.carpentertechnology.com/business-segments))

28. Howmet Aerospace - 2025 Annual Report, Letter to Shareholders

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% combined aerospace and gas-turbine spares revenue constrains the distinction between initial-production and spare-component activity; material and destination adjustments remain modeled. ([howmet.com](https://www.howmet.com/annualreport/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed combined spares proportion supplies the replacement proxy; approximately xx.xx% commercial aerospace engine-spares growth is historical counterevidence against assuming weak aftermarket activity. ([howmet.com](https://www.howmet.com/annualreport/))

29. GE Aerospace - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Equipment and services costs provide commercial budget anchors for the common material-value denominator; assumed eligible-material fractions prevent full equipment or service value from entering the allocation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Services include spare parts and maintenance activity, supporting an explicit new-article versus restoration attribution rather than equating services revenue with replacement-material purchases. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported USD xx.xx services cost anchors the restoration-material bridge; the restoration allocation and direct eligible-material fraction are assumptions. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Total funded R&D of USD xx.xx supplies a development-budget proxy, not observed nickel-material purchasing; only an assumed eligible-material fraction is used. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 CES equipment revenue of USD xx.xx and services revenue of USD xx.xx, providing separately scoped baseline inputs and commercial growth signals for the civil aviation model; it does not report nickel-material purchases or 2032 shares. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 Defense & Systems revenue of USD xx.xx, distinct from the broader DPT segment; this is a scoped propulsion proxy requiring assumed aviation and material-value adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/ge-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately reports 2025 equipment revenue of USD xx.xx for Commercial Engines & Services and USD xx.xx for Defense & Propulsion Technologies. Their sum anchors the scope-adjusted engine-system purchasing model and avoids using total services revenue as material procurement.

30. Rolls-Royce Holdings Plc - 2025 Full Year Results

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New and in-service destinations for the same certified improvement support purpose-based attribution. Reported engine deliveries and 2028 OE delivery targets constrain the initial-production scenario without measuring material orders.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Large-engine deliveries and major shop visits support an independent activity-ratio check. The comparison requires an assumed material purchase-value equivalent and does not disclose the final replacement share.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2028 shop-visit target is below the reported 2025 total despite prospective fleet growth, qualifying any automatic conversion of fleet expansion into proportionate maintenance-material purchasing.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates civil equipment and aftermarket receipts and identifies prior-period revenue recognition; its year-end engine backlog supplies a forecast demand indicator, not a material commitment.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separates defence equipment from aftermarket revenue while also describing non-aviation defence businesses, supporting an explicit aviation-retention adjustment rather than using all defence revenue as aircraft material demand.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The divergence between 2025 engine deliveries and shop visits independently challenges a uniform new-engine-led material forecast; no service revenue is included in the numerator.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed engine-delivery and shop-visit activity supports separate new-program and replacement-demand assumptions, not a proportional material-purchase conversion.
([rolls-royce.com](https://www.rolls-royce.com/investors/results-reports-and-presentations/financial-results/rr-holdings-plc-2025-full-year-results.aspx))

31. UKRI - Accelerating Manufacturing Readiness level of ABD-1000AM for AM of high temperature aerospace components (AMRAM1000)
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Alloyed-led project has xx.xx of funding and an April 2025-October 2026 funded period. This independently establishes bounded development activity, not annual material sales or recurring production purchases. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies separately funded industrial and university participants, including total funded value of GBP xx.xx and a GBP xx.xx Cranfield University grant. This supports excluding consortium budgets and prospective component sales from material revenue and does not identify each material purchaser.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The April 2025-October 2026 period, GBP xx.xx funding and participant project costs provide budget and timing primitives for the modeled material-spending bridge. They establish development activity, not recurring production procurement or 2032 sales. ([gtr.ukri.org](https://gtr.ukri.org/projects?ref=xx.xx))
32. Safran - FY 2025 Results and Investor Update, February 13, 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: LEAP delivery expansion and the disclosed low-double-digit spare-engine ratio constrain, but do not directly measure, the division between first-installation and replacement-destination material. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Projected LEAP installed-base and shop-visit expansion supports continuing replacement demand, while the expected CFM56 shop-visit decline from 2029 qualifies extrapolation of the current surge. Installed stock is not treated as annual material revenue. ([safran-group.com](https://www.safran-group.com/download/media/xx.xx))

33. Airbus - Full-Year 2025 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 deliveries by aircraft family provide the starting activity comparison for the initial-production forecast; aircraft delivery value is not included in the material numerator. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx% decline in 2025 self-financed R&D is counterevidence to uniform development-budget acceleration and supports a restrained, explicitly assumed development-purchasing scenario. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-full-year-fy-2025-results))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 consolidated revenue of EUR xx.xx, xx.xx commercial aircraft deliveries and a subsequent 2026 delivery target of approximately xx.xx. These constrain commercial scale and recovery assumptions, not the direct nickel-material purchasing coefficient.

34. Airbus - Half-Year 2026 Results

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The July 2026 update retained the A320-family, A350 and other production-rate targets, providing a dated commercial constraint on the initial-production activity scenario rather than proof of future material orders. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: First-half 2026 self-financed R&D of EUR xx.xx versus EUR xx.xx provides a modest-growth countercheck for the assumed development-project activity path; the budget is not material-market revenue. ([airbus.com](https://www.airbus.com/en/newsroom/press-releases/2026-xx.xx-airbus-reports-half-year-h1-2026-results))

35. RTX Corporation - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's 2025 commercial aerospace and other commercial revenue is USD xx.xx versus USD xx.xx in 2024; these are commercial receipts, not material sales or a pure legal-status classification. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pratt & Whitney's government customer categories sum to USD xx.xx in 2025 and constrain the military propulsion proxy, with nonmilitary-state attribution remaining an explicit limitation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/rtx-xx.xx.htm))

36. Federal Reserve Bank of St. Louis - Annual USD/GBP Exchange Rate, AEXUSUK
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The annual 2025 exchange rate is USD xx.xx per GBP, used to make the civil propulsion proxy inputs monetarily comparable before forecast roll-forward. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same annual currency bridge converts the GBP military aviation proxy inputs; it does not measure category demand or future exchange rates. ([fred.stlouisfed.org](https://fred.stlouisfed.org/data/AEXUSUK))
37. L3Harris Technologies, Inc. - Fiscal 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports the combined 2025 Aerojet Rocketdyne revenue anchor and a USD xx.xx space-sector revenue increase associated with a NASA program. The assumed sector split, material ratio and global coverage remain modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports USD xx.xx of combined segment revenue and a USD xx.xx increase in missile activity; these constrain commercial scale and forecast direction without establishing nickel-material share. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hrs-xx.xx.htm))
38. FAA Aerospace Forecast Fiscal Years 2025-2045 - Commercial Space
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated official low/high scenarios provide FY2032 licensed launch/reentry activity bounds. Their U.S.-licensed scope and treatment of reusable vehicles prevent direct conversion into Global material revenue. ([faa.gov](https://www.faa.gov/data_research/aviation/aerospace_forecasts/2025-commercial-space.pdf))
39. ICAO - Convention on International Civil Aviation, Ninth Edition
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Article xx.xx distinguishes civil from state aircraft and includes customs and police services in the state concept, supporting the combined category boundary without assigning a common permission regime or a sales weight. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Military aircraft fall within the state-aircraft concept; this is a classification premise, not evidence of aggregate material demand. ([icao.int](https://www.icao.int/sites/default/files/2024-xx.xx/7300_9ed.pdf))

40. DFARS 252.225-7009 - Restriction on Acquisition of Certain Articles Containing Specialty Metals
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The clause recognizes qualifying-country routes and specified exceptions, supporting the decision not to infer a uniform sourcing restriction, price premium or market-access probability from military destination alone. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contract-specific specialty-metal conditions provide an access caveat, not a quantitative guided-missile sales allocation. ([acquisition.gov](https://www.acquisition.gov/dfars/xx.xx-xx.xx-restriction-acquisition-certain-articles-containing-specialty-metals.))
41. Aubert & Duval - Space Industry Metallurgical Solutions
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies nickel-superalloy offerings within the company's space portfolio, independently supporting commercial category participation only; no portfolio count or program listing is used as a sales weight. ([aubertduval.com](https://www.aubertduval.com/wp-media/uploads/2022/xx.xx/Space_brochure_202207.pdf))
42. Aubert & Duval - Metallurgical Solutions for the Defense Industry, June 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The missile portfolio identifies AD730 and PYRAD53NW/INCO718 nickel-alloy offerings, supporting commercial classification without establishing current revenue, material intensity or a program award. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2024/xx.xx/Brochure-Defense-xx.xx.pdf))
43. Berkshire Hathaway Inc. - 2025 Annual Report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports PCC revenue of approximately USD xx.xx in 2025 and aerospace revenue growth. The revenue scale anchors an adjusted component-material purchasing proxy, not a directly observed alloy procurement total.

44. Lufthansa Group Annual Report 2025 - MRO business segment
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports 2025 MRO revenue of EUR xx.xx and EUR xx.xx in raw materials, consumables and supplies, separately from external services. Their ratio supports the accounting-spend bridge; the eligible nickel-material retention and forecast remain modeled.
45. Oliver Wyman - Global Fleet And MRO Market Forecast 2026-2036: Key Trends
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consulting firm's updated assessment estimates 2025 commercial MRO demand at USD xx.xx and discusses fleet-aging and maintenance-growth scenarios. It anchors adjusted maintenance activity, not nickel-material sales or a directly verified buyer share.
46. German Aerospace Center (DLR) - Financing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports total DLR financing of EUR xx.xx in 2023 and EUR xx.xx in 2024. These constrain institutional research scale and the historical funding bridge; aerospace retention, material purchasing and global coverage are explicit assumptions.
47. Federal Aviation Administration - Parts Manufacturer Approval (PMA): Design Approval
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Recognizes repair-station fabrication for an eligible in-house repair while distinguishing it from separate article sales. This supports the MRO material-consuming role and the exclusion of finished replacement-article turnover; it does not quantify material demand.

48. Rolled Alloys - E-Services Stocking Programs
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and supplier-held ready inventory establish why location alone cannot determine unreserved stock availability.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-held customer orders and schedules requiring contract or LTA terms support classifying reserved inventory as dedicated.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Customer-site replenishment and distributor-held release programs establish commercial inventory-service arrangements, not their sales prevalence or an automatic channel-growth premium.
49. Boeing BDS Terms and Conditions Guide - D604 Raw Material Risk Mitigation
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Stock-on-hand documentation is an accepted assurance route under the clause; this supports category treatment, not stock prevalence.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Long-term contracts and written mill assurances are alternative documentation routes where the clause applies, without proving preference or market share.
50. Carpenter Technology Corporation - Second Quarter Fiscal 2026 Earnings Call Presentation, January 29, 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The presentation distinguishes specialized non-LTA business from a conventional spot market, countering automatic classification of transactional sales as stock.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Three additional aerospace LTAs and xx.xx% sequential commercial-aerospace bookings growth inform the reservation hypothesis, but do not measure its modeled magnitude.
51. Precision Castparts Corp. - About
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Corporate history describes internal coverage of casting nickel-ingot requirements and more than xx.xx% of forging billet requirements, supporting integration while using a different denominator from material-output channel share.

52. Howmet Aerospace - United States Locations
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Official location descriptions corroborate alloy and investment-casting operations; they do not independently measure the retained captive-material valuation.

53. ATI Inc. - 2024 Annual Report
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: New sales commitments through 2040, including amounts expected during the remainder of the decade and predominantly involving jet-engine nickel alloys, inform the direct-program forecast premise without being counted as realized sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Approximately xx.xx% of fiscal-2024 plate volume went to independent service centers, providing a historical comparison that cautions against assuming generalized intermediary displacement.

54. Alloyed - About
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The recorded 2019 ABD licensing agreement supports a named commercial rights relationship but supplies no producer-direct revenue weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The licensing history does not establish unrestricted independent resale rights or attributable intermediary sales, preventing an unsupported licensing-related allocation increment.

55. Haynes International, Inc. - 2023 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Fiscal-2023 aerospace realization and revenue provide the common monetary calibration for this modeled grade; neither is a grade-specific sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace material realization supplies a price-scale input, with modeled year and product-mix adjustments. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization calibrates the assumed blended material price, not this grade's observed revenue. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace realization and discussion of xx.xx commercial traction support the price and adoption premises; the allocation remains modeled. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aerospace realization provides a shared monetary comparison for the assumed grade price. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported eight-to-ten-year aerospace application-introduction periods constrain interpretation of the seven-year adoption forecast. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported aerospace application-introduction periods provide an adoption-delay counterweight, not a forecast sales observation. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/hayn-20230930x10k.htm))
56. European Commission CORDIS - Welding Metallurgy and Cracking in Superalloys: Reporting
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical all-sector tonnage discussion is only a dominance cross-check; it cannot establish current aerospace monetary share. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The report identifies 718Plus separately from ordinary xx.xx supporting identity separation without supplying a current sales weight. ([cordis.europa.eu](https://cordis.europa.eu/project/id/xx.xx/reporting/it))
57. Special Metals - Alloy Surcharge Report
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: August-October 2026 grade surcharges provide a differentiated cost-exposure check, not full invoice prices or observed 2032 prices. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx surcharge sequence independently qualifies a uniform price assumption; it is not substituted for a material selling price. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The grade-specific surcharge listing is a commercial cost comparison, not an observed Global grade realization. ([specialmetals.com](https://www.specialmetals.com/services/prior-month-adjuster.html))

58. Cannon-Muskegon - Safety Data Sheet: Nickel Alloy Castings

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Current-and-past supplier identity mapping only; not proof of 2025 aerospace sales or the modeled volume. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: CMSX-xx.xx is separately identified; the material-value weight remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current sales are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713C is listed separately from IN-713LC; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-713LC is listed separately from IN-713C; no quantitative split is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx identity mapping only; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-738LC is separately identified; the aerospace-attribution fraction is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx category mapping only; current aerospace tonnes are not disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: IN-xx.xx appears in a current-and-past identification list; this does not establish recurring aerospace production sales. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: MAR-M xx.xx is identified separately from CM247LC; monetary weights remain modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PWA xx.xx is separately identified; no attributable sales value is disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; current commercial scale remains assumed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rene xx.xx identity mapping only; no current grade-specific material sales are disclosed. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Udimet xx.xx appears in the supplier's current-and-past identities; aerospace attribution is modeled. ([cannonmuskegon.com](https://www.cannonmuskegon.com/documents/sds-nickel-alloy.pdf))

59. GE Aerospace - Safety First: A Retiring GE Aerospace Materials Engineer Made Protecting Lives His Mission
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer separately describes Rene xx.xx and its commercial-volume rationale; this supports category mapping, not an observed grade share. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer associates Rene 88DT with GE90 application history, supporting an installed-program demand premise without disclosing current material purchasing. ([geaerospace.com](https://www.geaerospace.com/news/articles/people/safety-first-retiring-ge-aerospace-materials-engineer-made-protecting-lives-his))
60. Aubert & Duval - AD730: Ni-Based Superalloy for High Temperature Applications
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier aerospace application and cost positioning support the category and relative-price premise; neither current sales nor the forecast adoption factor is disclosed. ([aubertduval.com](https://www.aubertduval.com/wp-content/uploads/2025/xx.xx/AD730-superalloy-2024-xx.xx.pdf))
61. University of Portsmouth - Improved Creep-Fatigue-Oxidation Resistance in Gas Turbine Disc Materials: REF Impact Case Study
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies RR1000 in Rolls-Royce engine applications; it supports commercial exposure, not the assumed annual material volume. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional evidence identifies U720Li in Rolls-Royce engine applications; it supports commercial exposure, not a current sales split. ([ref2014impact.azurewebsites.net](https://ref2014impact.azurewebsites.net/casestudies2/refservice.svc/GetCaseStudyPDF/xx.xx))

62. Influence of Long Term Exposure in Air on Microstructure, Surface Stability and Mechanical Properties of UDIMET 720LI

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The aerospace-industry publication distinguishes conventional Udimet xx.xx from its 720Li derivative; it does not establish a current monetary allocation. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The publication independently supports the 720Li identity and aircraft-engine-disc category, without supplying current sales. ([tms.org](https://www.tms.org/Superalloys/xx.xx/2000/Superalloys_2000_487_493.pdf))

63. NASA Contractor Report 174639 - Literature Survey on Oxidations and Fatigue Lives at Elevated Temperatures

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical institutional material identification is a legacy-category anchor only; it does not demonstrate current aerospace material sales. ([ntrs.nasa.gov](https://ntrs.nasa.gov/api/citations/xx.xx/downloads/xx.xx.pdf))

64. America Makes - 5566.002 Proliferation of Nickel Superalloy Material Datasets for Powder Bed Fusion Additive Manufacturing

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosed USD xx.xx project budget is the observed spending-scale primitive for an explicitly assumed material-budget, annualization, aerospace-attribution and coverage bridge. It is not powder revenue; its development stage also constrains the forecast starting point. ([americamakes.us](https://www.americamakes.us/projects/xx.xx-xx.xx-proliferation-of-nickel-superalloy-material-datasets-for-powder-bed-fusion-additive-manufacturing/))

65. GE Aerospace - Fourth Quarter 2025 Earnings Presentation

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported 2025 commercial-engine delivery growth supplies a near-term demand cross-check, not a grade-specific purchasing or seven-year growth observation. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate commercial and defense delivery growth constrains the commercial-demand scenario without establishing this grade's attributable consumption. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported defense-engine delivery growth is a demand-exposure check only; the PWA xx.xx activity factor remains assumed. ([geaerospace.com](https://www.geaerospace.com/sites/default/files/geaerospace_webcast_presentation_01222026_00_1.pdf))

16.6. Africa

Table 316. Africa Nickel-Based Superalloys for Aerospace Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Egypt	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Kenya	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nigeria	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 317. Africa Nickel-Based Superalloys for Aerospace Market Size, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Egypt	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Kenya	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nigeria	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 318. Africa Nickel-Based Superalloys for Aerospace Market Size, by Product Form, 2017-2040 (USD Million)

Product Form	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bars, Rods and Profiles	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Billets and Forging Stock	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ingots	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Plate, Sheet, Strip and Foil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Powder	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Tubes and Pipes	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wire	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 319. Africa Nickel-Based Superalloys for Aerospace Market Size, by Strengthening Class, 2017-2040 (USD Million)

Strengthening Class	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Dispersion-Strengthened Alloys	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Precipitation-Strengthened Alloys	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Solid-Solution-Strengthened Alloys	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 320. Africa Nickel-Based Superalloys for Aerospace Market Size, by Component Application, 2017-2040 (USD Million)

Component Application	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Air-Breathing Propulsion & Auxiliary Power	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Onboard Systems & Equipment	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Rocket & Spacecraft Propulsion	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Vehicle Structures & Thermal Protection	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 321. Africa Nickel-Based Superalloys for Aerospace Market Size, by Air-Breathing Propulsion & Auxiliary Power, 2017-2040 (USD Million)

Air-Breathing Propulsion & Auxiliary Power	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Combustion & Exhaust Components	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Compressor Components	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Engine Structures & Auxiliary Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Turbine Blades & Vanes	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
