    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
61. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
62. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
63. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

64. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

65. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

66. Medline Inc. - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

67. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

68. HealthShare NSW - Procurement Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

69. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

70. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

71. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

72. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
73. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
74. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

75. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
76. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
77. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

78. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

16.3. Asia-Pacific

Table 262. Asia-Pacific Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 267. Asia-Pacific Post-Operative Wound Dressings Market Size, by Healing Pathway, 2017-2040 (USD Million)

Healing Pathway	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Closed Surgical Wounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Awaiting Surgical Closure	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Healing by Secondary Intention	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 268. Asia-Pacific Post-Operative Wound Dressings Market Size, by Surgical Application, 2017-2040 (USD Million)

Surgical Application	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Cardiovascular Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ear, Nose, Oral & Throat Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Endocrine Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gastrointestinal & Abdominal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gynecologic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hematologic & Lymphatic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Male Reproductive Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Musculoskeletal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Neurological Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Obstetric Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ophthalmic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Respiratory Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Skin & Breast Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Urinary Tract Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 269. Asia-Pacific Post-Operative Wound Dressings Market Size, by End User, 2017-2040 (USD Million)

End User	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Freestanding Surgical Centers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Home Healthcare Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hospitals	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Office-Based & Community Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Residential & Post-Acute Care Facilities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Self-Care Households	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 270. Asia-Pacific Post-Operative Wound Dressings Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 271. Asia-Pacific Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 272. Asia-Pacific Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
2. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
3. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Asia-Pacific scores, with explicit domestic and re-export bridges.
10. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Asia-Pacific country and background inputs.
11. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Export observations constrain interpretation of Asian manufacturing and distribution footprints.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Singapore's outward trade supports a retained-destination adjustment rather than a footprint-based share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Singapore's outward trade supports a retained-destination adjustment rather than a footprint-based share.
12. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Singapore hub-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Singapore hub-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

13. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

14. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
15. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

16. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

17. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

18. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
19. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
20. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
21. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
22. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
23. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

24. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
25. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
26. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
27. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
28. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

29. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
30. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
31. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
32. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

33. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
34. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
35. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

36. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
37. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

38. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
39. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
40. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
41. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
42. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
43. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
44. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

45. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
46. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
47. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
48. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

49. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
50. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

51. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
52. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

53. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

54. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

55. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
56. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
57. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
58. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

59. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

60. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
61. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
62. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
63. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

64. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

65. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

66. Medline Inc. - 2025 Form 10-K

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

67. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

68. HealthShare NSW - Procurement Services

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

69. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

70. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

71. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

72. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
73. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
74. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

75. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
76. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
77. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

78. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

16.4. Latin America

Table 273. Latin America Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Argentina	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chile	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Colombia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Peru	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 277. Latin America Post-Operative Wound Dressings Market Size, by Antimicrobial Technology, 2017-2040 (USD Million)

Antimicrobial Technology	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Antibiotics	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Bismuth Compounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chitosan-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chlorhexidine	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Copper-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
DACC Microbial Binding	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Enzyme-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Honey-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Iodine-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Multi-Agent Antimicrobial Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
No Declared Antimicrobial Technology	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Octenidine	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Polyhexamethylene Biguanide	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Quaternary Ammonium Compounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Silver-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 278. Latin America Post-Operative Wound Dressings Market Size, by Healing Pathway, 2017-2040 (USD Million)

Healing Pathway	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Closed Surgical Wounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Awaiting Surgical Closure	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Healing by Secondary Intention	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 279. Latin America Post-Operative Wound Dressings Market Size, by Surgical Application, 2017-2040 (USD Million)

Surgical Application	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Cardiovascular Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ear, Nose, Oral & Throat Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Endocrine Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gastrointestinal & Abdominal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gynecologic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hematologic & Lymphatic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Male Reproductive Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Musculoskeletal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Neurological Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Obstetric Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ophthalmic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Respiratory Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Skin & Breast Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Urinary Tract Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 280. Latin America Post-Operative Wound Dressings Market Size, by End User, 2017-2040 (USD Million)

End User	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Freestanding Surgical Centers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Home Healthcare Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hospitals	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Office-Based & Community Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Residential & Post-Acute Care Facilities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Self-Care Households	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 281. Latin America Post-Operative Wound Dressings Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 282. Latin America Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 283. Latin America Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Latin American relative purchasing scores and background coverage.
10. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Latin American country and background inputs.
11. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

12. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

13. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
14. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

15. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

16. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

17. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
18. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
19. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
20. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
21. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
22. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

23. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
24. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
25. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
26. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
27. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

28. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
29. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
30. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
31. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

32. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
33. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
34. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

35. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
36. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

37. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
38. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
39. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
40. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
41. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
42. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
43. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

44. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
45. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
46. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
47. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

48. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
49. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

50. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
51. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

52. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

53. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

54. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
55. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
56. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
57. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

58. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

59. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
60. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
61. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
62. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

63. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

64. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

65. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

66. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

67. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

68. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

69. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

70. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

71. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
72. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
73. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

74. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
75. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
76. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

77. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

16.5. Middle East

Table 284. Middle East Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Israel	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Qatar	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Saudi Arabia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Turkey	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Arab Emirates	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 293. Middle East Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 294. Middle East Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support Middle Eastern scores; imports are not local end-use totals.
10. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support Middle Eastern country and background inputs.

11. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

12. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
13. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

14. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

15. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

16. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
17. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
18. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
19. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
20. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
21. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

22. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
23. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
24. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
25. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
26. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

27. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
28. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
29. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
30. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

31. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
32. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
33. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

34. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
35. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

36. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.

37. Essity acquires advanced wound care company in US - December 29, 2021
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.

38. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.

39. MaxioCel - What is MaxioCel?
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.

40. Schülke - Wound compendium
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.

41. MedCu - Advanced Copper-Based Wound Dressings
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.

42. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

43. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
44. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
45. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
46. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

47. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
48. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

49. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
50. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

51. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

52. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

53. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
54. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
55. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
56. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

57. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

58. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
59. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
60. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
61. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

62. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

63. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

64. Medline Inc. - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
65. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
66. HealthShare NSW - Procurement Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

67. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
68. Medline - Consumer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
69. PowerHeal Bandage - Shop
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

70. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
71. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
72. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

73. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
74. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
75. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

76. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

16.6. Africa

Table 295. Africa Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Egypt	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Kenya	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nigeria	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Unallocated / remaining scope	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 296. Africa Post-Operative Wound Dressings Market Size, by Region, 2017-2040 (USD Million)

Region	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Egypt	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Kenya	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 305. Africa Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Adhesive dressings, for medical purposes: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Country import inputs support African scores and noncatalog background estimation.
10. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed companion-code imports support African country and background inputs.

11. NHSBSA Drug Tariff April 2025 - Part IXA

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

12. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
13. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

14. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

15. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

16. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
17. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
18. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
19. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
20. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
21. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

22. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
23. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
24. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
25. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
26. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

27. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
28. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
29. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
30. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

31. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
32. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
33. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

34. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
35. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

36. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
37. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
38. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
39. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
40. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
41. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
42. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

43. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
44. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
45. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
46. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

47. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

48. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

49. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
50. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

51. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

52. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

53. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
54. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
55. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
56. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

57. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

58. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
59. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
60. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
61. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

62. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

63. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

64. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

65. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

66. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

67. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

68. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

69. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

70. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
71. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
72. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

73. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
74. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
75. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

76. Information for Clinical Choice - Gelling Fibre Dressings Support Document

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

17. Post-Operative Wound Dressings Market, by Group

Americas offers a documented opportunity to coordinate quality-system oversight without combining national market access. MDSAP includes the United States, Canada, and Brazil as members and allows an accepted audit to address participating authorities' requirements. ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■ ■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■ ■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■■■

Fewer contracts may simplify administration, but obscured local accountability makes that simplification unsuitable where the regional partner cannot demonstrate the necessary mandates.

ASEAN provides a shared dossier framework while preserving national access decisions. ■■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■ ■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ Harmonized submission language should reduce duplication where accepted, not be treated as a regional sales passport.

GCC has an institutional pooling mechanism through the Gulf Health Council's joint procurement program, which describes qualified sources, coordinated tenders, delivery, and after-sales service. This can consolidate a supplier's bidding effort when a solicitation includes the relevant dressing and destinations. ■■ ■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■ ■■■■■ ■■■■■■■■■■■■

■■■■■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■ ■■ ■ ■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ A shared regional distribution arrangement may coordinate logistics, but these records cannot be presented as equivalent approvals. Suppliers should maintain the appropriate local responsibilities and obtain purchasing acceptance separately rather than use either record as proof of trans-Tasman availability.

Nordic cooperation is visible in published common criteria for more sustainable healthcare packaging. The historical criteria library provides a shared procurement vocabulary, while its adoption into a particular tender determines the binding requirement. ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪

▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ The framework does not establish that a particular dressing is selected for joint assessment. Suppliers targeting Germany, France, or other constituents should separate common regulatory documentation from the country-specific funding and purchasing proposition; shared compliance alone does not secure formulary acceptance.

BRICS comparisons should focus on the accountable business party rather than assume a common entry route. ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ A single group-wide appointment is unsuitable unless those country-specific responsibilities are demonstrably covered; these examples do not settle requirements throughout BRICS.

G7 membership is less informative for audit planning than the actual cooperation mechanism. ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ Cooperation provides a counterforce to duplication, but does not justify synchronizing every product launch or treating observer status as equivalent participation.

▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ This establishes a conditional institutional route, not postoperative dressing demand or an award. Suppliers should confirm a relevant solicitation and bidder eligibility before dedicating inventory or sales resources; ordinary civilian purchasing remains a separate route.

▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ Their commercial value lies in identifying which documentation, procurement relationship, or legal responsibility can be shared-and which must remain destination-specific.

Figure 29. Global Post-Operative Wound Dressings Market Size, by Group, 2025 vs 2026 vs 2032

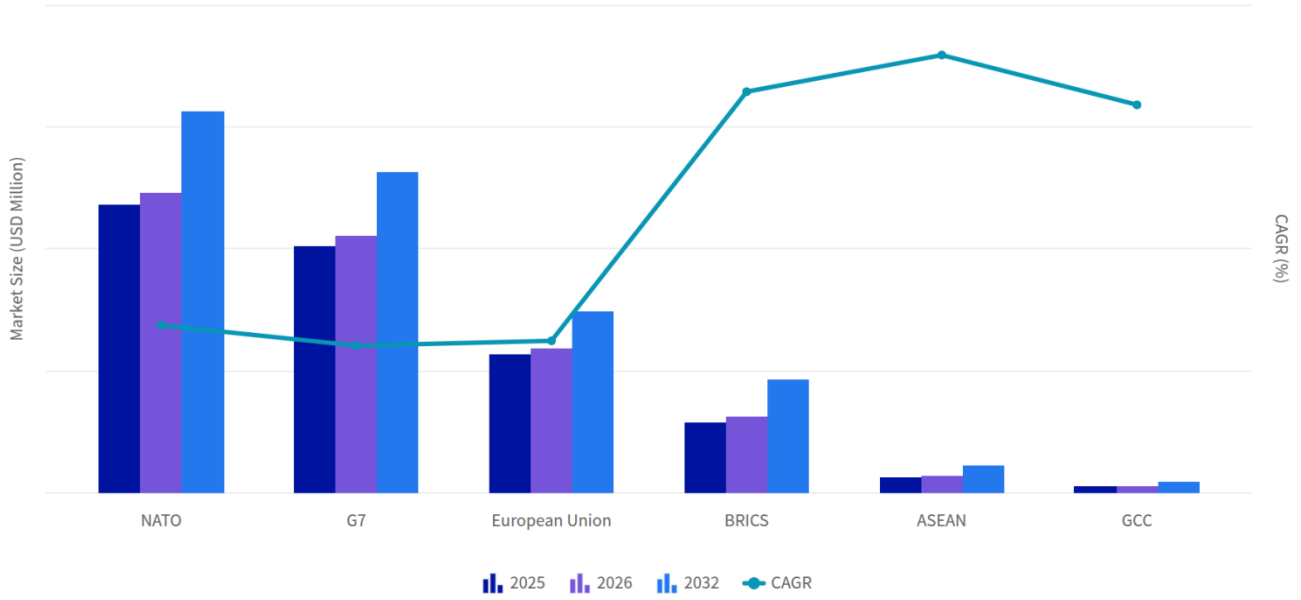

Table 306. Global Post-Operative Wound Dressings Market Size, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
ASEAN	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
BRICS	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

G7	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
GCC	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
NATO	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Convatec Australia Pty Ltd - AQUACEL Ag Surgical Cover Dressing - Dressing, hydrophilic gel-forming (216814)

   · ARTG entry xx.xx identifies AQUACEL Ag Surgical Cover Dressing, Convatec Australia Pty Ltd as sponsor, and Convatec Limited as manufacturer. ([tga.gov.au](https://www.tga.gov.au/resources/artg/xx.xx))

2. MDCG 2021-24 Rev.1 - Guidance on classification of medical devices

   · The European classification guidance organizes medical-device classification around intended purpose and applicable rules, supporting common documentation rather than a material-label shortcut. ([health.ec.europa.eu](https://health.ec.europa.eu/system/files/2021-xx.xx/mdcg_2021-24_en_0.pdf))

3. Medical devices

   · The Brazilian domestic-partner requirement supports a constituent-specific accountability comparison within BRICS, not a common bloc access route. ([gov.br](https://www.gov.br/anvisa/en/regulation-of-products/medical-devices))

4. Requirements for Medical Devices Marketing Authorization (MDS-REQ 1)

   · The Saudi requirements establish local obligations relevant to EMEA arrangements and GCC procurement participation; a regional distribution label does not satisfy those obligations by itself. ([sfda.gov.sa](https://www.sfda.gov.sa/sites/default/files/2021-xx.xx/REQ1En_0.pdf))

5. Medical Devices

   · The establishment roles provide a South African constituent distinction for EMEA and BRICS commercial-accountability comparisons. ([sahpra.org.za](https://www.sahpra.org.za/medical-devices/))

6. Importer, wholesaler and manufacturers' licensing

   · Singapore's activity-specific licensing provides an implementation example within ASEAN rather than evidence of a regional license. ([hsa.gov.sg](https://www.hsa.gov.sg/medical-devices/manufacturing-import-and-supply/dealers-licence/))

7. Medical Device Single Audit Program (MDSAP)

   · MDSAP provides a shared regulatory-audit mechanism. The United States, Canada, Brazil, and Japan are members; the European Union and United Kingdom are official observers. These distinctions support the Americas and G7 cooperation analysis. ([fda.gov](https://www.fda.gov/medical-devices/cdrh-international-affairs/medical-device-single-audit-program-mdsap))

8. ASEAN Medical Device Directive

   · The ASEAN Medical Device Directive includes the Common Submission Dossier Template while preserving member-state registration and licensing responsibilities. ([asean.org](https://www.asean.org/wp-content/uploads/2021/xx.xx/xx.xx.-September-2015-ASEAN-Medical-Device-Directive.pdf))

9. Joint clinical assessments of medical devices and in vitro diagnostic medical devices

   · The Commission states that joint assessment supports national HTA while member states retain decisions concerning use and reimbursement. The selected-device framework does not establish assessment eligibility for every dressing. ([health.ec.europa.eu](https://health.ec.europa.eu/health-technology-assessment/implementation-regulation-health-technology-assessment/joint-clinical-assessments-medical-devices-and-vitro-diagnostic-medical-devices_en))

10. Consolidated purchasing

    · The Gulf Health Council describes coordinated medical-supply procurement, qualified sources, delivery, and after-sales service. This establishes a pooling mechanism, not a postoperative dressing award. ([ghc.sa](https://www.ghc.sa/en/procurement/))

11. Explanation of the WAND Database

    · Medsafe states that WAND is a notification system and does not mean a device has been assessed or approved by Medsafe. ([medsafe.govt.nz](https://www.medsafe.govt.nz/regulatory/DevicesNew/xx.xx-2Explanation.asp))

12. Nordic Criteria for More Sustainable Packaging for Healthcare Products - November 2021 Final Version

    · The November 2021 Nordic packaging-criteria publication provides a common healthcare procurement library. Its historical publication does not establish the requirements adopted in a particular operative dressing tender. ([sykehusinnkjop.no](https://www.sykehusinnkjop.no/49612c/siteassets/dokumenter/om-oss/samfunnsansvar/final-version-of-nordic-criteria-for-more-sustainable-packaging-ver-xx.xx.pdf))

13. Procurement Opportunities

    · NATO states that bidder eligibility is specified in individual procurement calls and that opportunities are generally reserved for firms registered in member nations, with possible exceptions. The page does not establish a postoperative dressing purchase. ([nato.int](https://www.nato.int/en/work-with-us/business-and-project-opportunities/procurement-opportunities))

14. Regulating medical devices in the UK

    · MHRA guidance requires Great Britain registration and a UK responsible person for overseas manufacturers, supporting the distinction between local accountability roles. ([gov.uk](https://www.gov.uk/guidance/regulating-medical-devices-in-the-uk))

15. Size and distribution of the global volume of surgery in 2012.

    · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

16. Solventum Corporation - 2025 Form 10-K

    · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

17. Smith+Nephew Fourth Quarter and Full Year 2020 Results

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

18. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

    · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

19. Smith+Nephew Second Quarter and First Half 2026 Results

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

20. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

21. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

22. NHS Supply Chain - Negative Pressure Wound Therapy

· Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

· Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))

Office-Based & Community Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Residential & Post-Acute Care Facilities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Self-Care Households	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 315. NATO Post-Operative Wound Dressings Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 316. NATO Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 317. NATO Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
2. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
3. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its

9. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dutch outward trade independently supports discounting gross imports; it does not measure the exact discount.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dutch outward trade independently supports discounting gross imports; it does not measure the exact discount.
10. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Dutch hub-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Dutch hub-flow challenge.
11. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

12. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

13. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
14. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

15. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

16. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

17. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
18. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
19. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
20. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
21. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
22. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

23. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
24. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
25. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
26. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
27. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

28. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
29. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
30. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
31. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

32. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
33. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
34. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

35. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
36. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

37. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
38. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
39. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
40. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
41. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
42. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
43. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

44. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
45. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
46. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
47. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

48. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

49. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

50. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
51. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

52. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

53. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

54. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
55. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
56. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
57. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

58. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

59. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
60. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
61. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
62. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

63. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

64. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

65. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

66. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

67. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

68. Medline - Consumer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
69. PowerHeal Bandage - Shop
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))
70. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
71. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.

72. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
73. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
74. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.

75. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
76. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

17.2. G7

Table 318. G7 Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Germany	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Italy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Japan	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Kingdom	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United States	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 319. G7 Post-Operative Wound Dressings Market Size, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Canada	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
France	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
2. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
3. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its

9. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

10. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

11. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
12. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

13. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

14. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

15. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
16. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
17. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
18. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
19. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
20. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

21. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
22. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
23. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
24. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
25. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

26. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
27. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
28. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
29. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

30. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
31. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
32. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

33. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
34. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

35. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
36. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
37. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
38. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
39. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
40. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
41. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

42. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
43. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
44. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
45. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

46. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
47. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

48. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
49. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

50. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

51. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

52. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
53. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
54. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
55. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

56. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

57. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
58. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
59. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
60. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

61. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

62. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

63. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

64. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

65. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

66. Medline - Consumer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
67. PowerHeal Bandage - Shop
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))
68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.

70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.

73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

17.3. European Union

Table 329. European Union Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Austria	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Belgium	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Bulgaria	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
2. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
3. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dutch outward trade independently supports discounting gross imports; it does not measure the exact discount.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dutch outward trade independently supports discounting gross imports; it does not measure the exact discount.
10. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Dutch hub-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Dutch hub-flow challenge.

11. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

12. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
13. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

14. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

15. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

16. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
17. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
18. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
19. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
20. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
21. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

22. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
23. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
24. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
25. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
26. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

27. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
28. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
29. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
30. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

31. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
32. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
33. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

34. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
35. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

36. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
37. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
38. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
39. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
40. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
41. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
42. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

43. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
44. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
45. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
46. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

47. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

48. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

49. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
50. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

51. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

52. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

53. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
54. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
55. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
56. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

57. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

58. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
59. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
60. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
61. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

62. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

63. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

64. Medline Inc. - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
65. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
66. HealthShare NSW - Procurement Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

67. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

68. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

69. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

70. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
71. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
72. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

73. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
74. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
75. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

76. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

17.4. BRICS

Table 340. BRICS Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Russia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
South Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 341. BRICS Post-Operative Wound Dressings Market Size, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
China	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
India	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

South Africa	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 342. BRICS Post-Operative Wound Dressings Market Size, by Dressing Type, 2017-2040 (USD Million)

Dressing Type	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Absorbent Acrylic Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Acellular Extracellular Matrix Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Activated Charcoal Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Alginate Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Biocellulose Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Capillary Action Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chitosan Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Collagen Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Composite & Island Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Film & Membrane Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Foam Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gauze & Absorbent Pad Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gelling Fiber Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hyaluronic Acid Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hydrocolloid Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hydrogel Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Superabsorbent Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wound Contact Layers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 343. BRICS Post-Operative Wound Dressings Market Size, by Therapy Platform, 2017-2040 (USD Million)

Therapy Platform	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bioelectric Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Negative Pressure Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standard Dressing Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Topical Oxygen Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 344. BRICS Post-Operative Wound Dressings Market Size, by Antimicrobial Technology, 2017-2040 (USD Million)

Antimicrobial Technology	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Antibiotics	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Bismuth Compounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chitosan-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chlorhexidine	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Copper-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
DACC Microbial Binding	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Enzyme-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Honey-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Iodine-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Multi-Agent Antimicrobial Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
No Declared Antimicrobial Technology	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Octenidine	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Polyhexamethylene Biguanide	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Quaternary Ammonium Compounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Silver-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 345. BRICS Post-Operative Wound Dressings Market Size, by Healing Pathway, 2017-2040 (USD Million)

Healing Pathway	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Closed Surgical Wounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Awaiting Surgical Closure	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Healing by Secondary Intention	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 346. BRICS Post-Operative Wound Dressings Market Size, by Surgical Application, 2017-2040 (USD Million)

Surgical Application	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Cardiovascular Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ear, Nose, Oral & Throat Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Endocrine Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gastrointestinal & Abdominal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gynecologic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hematologic & Lymphatic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Male Reproductive Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Musculoskeletal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Neurological Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Obstetric Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ophthalmic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Respiratory Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Skin & Breast Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Urinary Tract Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 347. BRICS Post-Operative Wound Dressings Market Size, by End User, 2017-2040 (USD Million)

End User	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Freestanding Surgical Centers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Home Healthcare Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hospitals	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Office-Based & Community Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Residential & Post-Acute Care Facilities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Self-Care Households	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 348. BRICS Post-Operative Wound Dressings Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 349. BRICS Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 350. BRICS Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
10. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
11. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
12. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

13. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

14. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
15. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

16. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

17. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

18. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
19. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
20. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
21. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
22. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
23. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

24. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
25. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
26. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
27. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
28. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

29. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
30. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
31. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
32. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

33. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
34. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
35. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

36. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
37. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

38. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
39. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
40. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
41. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
42. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
43. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
44. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

45. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
46. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
47. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
48. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

49. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
50. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

51. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
52. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

53. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

54. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

55. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
56. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
57. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
58. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

59. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

60. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
61. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
62. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
63. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

64. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

65. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

66. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

67. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

68. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

69. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

70. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

71. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

72. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
73. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
74. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

75. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
76. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
77. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

78. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

17.5. ASEAN

Table 351. ASEAN Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Brunei	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cambodia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Indonesia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Lao People's Democratic Republic	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Malaysia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Myanmar	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Philippines	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Singapore	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Thailand	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Vietnam	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 352. ASEAN Post-Operative Wound Dressings Market Size, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Brunei	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Cambodia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Indonesia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Lao People's Democratic Republic	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Malaysia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Myanmar	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Iodine-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Multi-Agent Antimicrobial Systems	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
No Declared Antimicrobial Technology	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Octenidine	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Polyhexamethylene Biguanide	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Quaternary Ammonium Compounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Silver-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 356. ASEAN Post-Operative Wound Dressings Market Size, by Healing Pathway, 2017-2040 (USD Million)

Healing Pathway	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Closed Surgical Wounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Awaiting Surgical Closure	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Healing by Secondary Intention	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 357. ASEAN Post-Operative Wound Dressings Market Size, by Surgical Application, 2017-2040 (USD Million)

Surgical Application	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Cardiovascular Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ear, Nose, Oral & Throat Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Endocrine Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gastrointestinal & Abdominal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gynecologic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hematologic & Lymphatic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Male Reproductive Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Musculoskeletal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Neurological Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Obstetric Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ophthalmic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Respiratory Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Skin & Breast Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Urinary Tract Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 358. ASEAN Post-Operative Wound Dressings Market Size, by End User, 2017-2040 (USD Million)

End User	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Freestanding Surgical Centers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Home Healthcare Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hospitals	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Office-Based & Community Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Residential & Post-Acute Care Facilities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Self-Care Households	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 359. ASEAN Post-Operative Wound Dressings Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 360. ASEAN Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 361. ASEAN Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Wadding, gauze and related medical articles: imports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brunei's xx.xx input anchors the explicitly modeled missing-companion-code estimate.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brunei's xx.xx input anchors the explicitly modeled missing-companion-code estimate.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Laos's xx.xx input anchors the explicitly modeled missing-companion-code estimate.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Laos's xx.xx input anchors the explicitly modeled missing-companion-code estimate.
10. WITS/UN Comtrade - Adhesive dressings, for medical purposes: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Singapore's outward trade supports a retained-destination adjustment rather than a footprint-based share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Singapore's outward trade supports a retained-destination adjustment rather than a footprint-based share.
11. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Singapore hub-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Singapore hub-flow challenge.

12. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

13. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
14. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

15. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

16. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

17. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
18. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
19. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
20. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
21. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
22. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

23. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
24. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
25. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
26. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
27. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

28. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
29. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
30. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
31. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

32. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
33. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
34. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

35. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
36. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

37. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
38. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
39. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
40. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
41. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
42. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
43. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

44. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
45. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
46. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
47. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

48. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

49. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

50. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
51. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

52. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

53. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

54. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
55. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
56. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
57. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

58. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

59. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
60. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
61. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
62. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

63. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

64. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

65. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

66. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage.
([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

67. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed.
([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed.
([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence.
([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence.
([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

68. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
69. Medline - Consumer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
70. PowerHeal Bandage - Shop
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

71. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
72. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
73. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

74. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
75. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
76. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

77. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

17.6. GCC

Table 362. GCC Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Bahrain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Kuwait	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Oman	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Qatar	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Saudi Arabia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
United Arab Emirates	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Scope total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 363. GCC Post-Operative Wound Dressings Market Size, by Group, 2017-2040 (USD Million)

Group	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bahrain	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18. Post-Operative Wound Dressings Market, by Country

[illegible] A supplier should therefore establish an applicable funded arrangement before committing to a reimbursed postoperative Topical Oxygen Therapy proposition. The determination does not exclude the accepted category or establish a universal US rule; another payer's decision requires separate confirmation.

[illegible] Registration and an overseas manufacturer's UK responsible person remain separate requirements. Suppliers should match the actual device and certificate to the applicable route before promising continuity; a general CE-marked portfolio statement is insufficient.

Australia distinguishes consumer communication from unrestricted consumer selection. The TGA's June xx.xx 2023 permission for specified Mepilex Border Post Op representations requires accompanying healthcare-professional-supervision messaging. [illegible]

[illegible] A narrower supported assortment may be preferable to a broader catalog containing uncertain lines. This is a documented bid condition, not evidence of an individual award or a requirement governing every South African purchase.

Figure 30. Global Post-Operative Wound Dressings Market Size, by Country, 2025 vs 2032 (%)

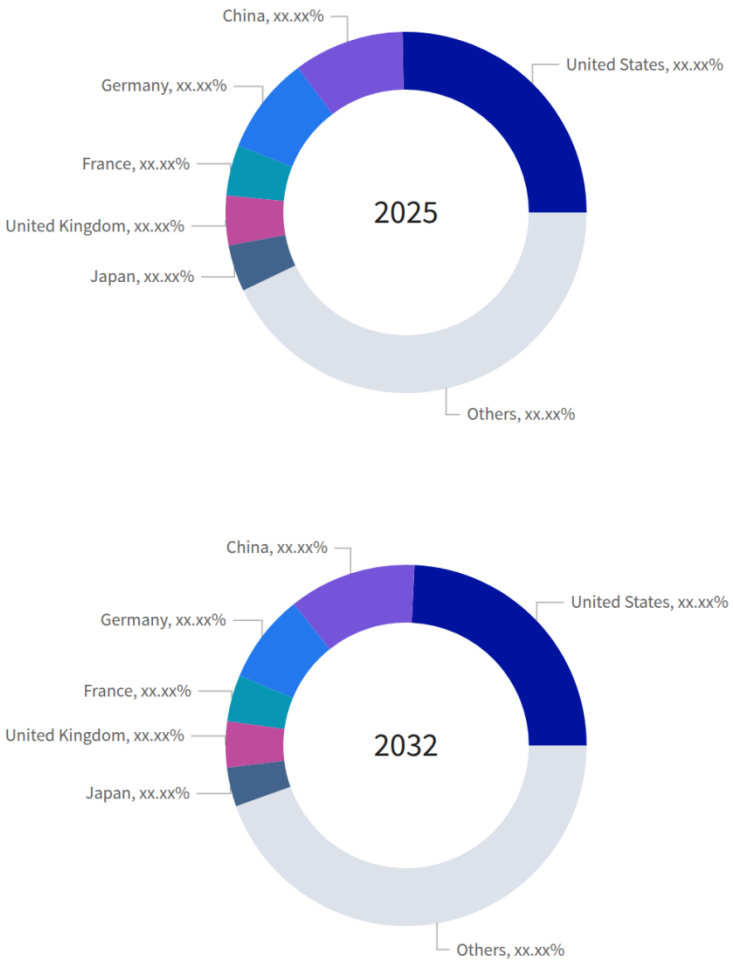

Figure 31. Global Post-Operative Wound Dressings Market Size, by Country, 2025 vs 2026 vs 2032

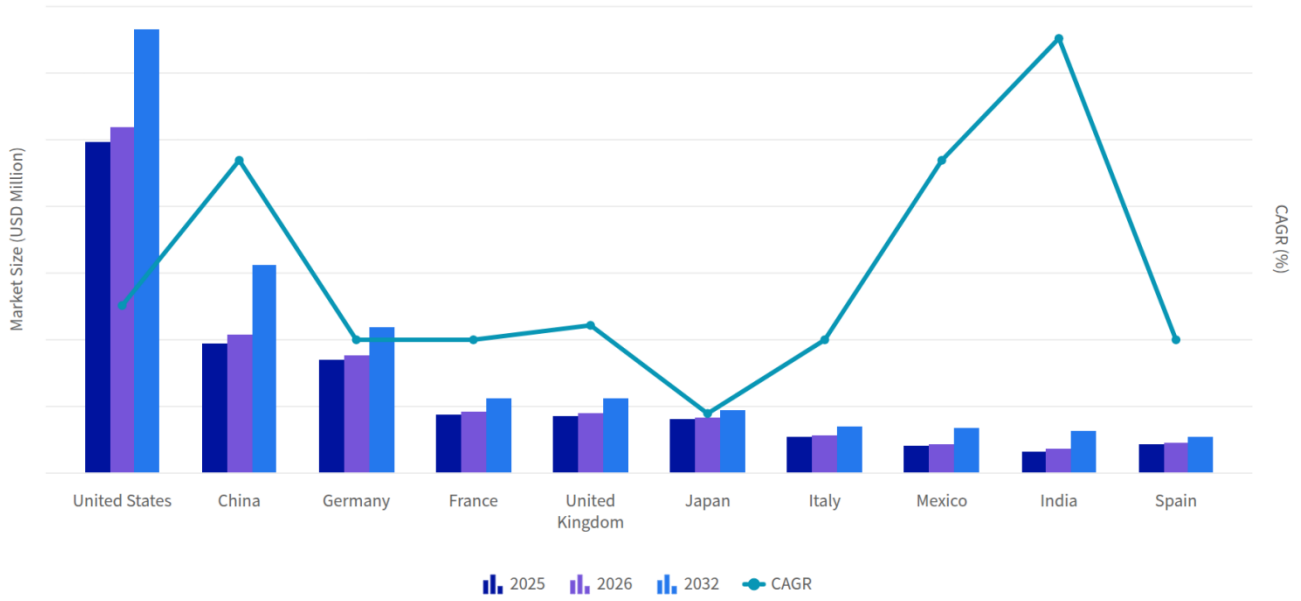

Table 373. Global Post-Operative Wound Dressings Market, by Country growth contribution, 2025-2032

Category	2025 value (USD Million)	2032 value (USD Million)	Added value (USD Million)	2025 share (%)	2032 share (%)	Change (pp)	Growth share (%)	CAGR (%)
Australia	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Brazil	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Sources & Evidence

1. Molnlycke Health Care Pty Ltd - Adhesive bandage
   - The TGA permission dated June xx.xx 2023 requires healthcare-professional-supervision messaging with specified Mepilex Border Post Op consumer representations. ([tga.gov.au](https://www.tga.gov.au/resources/advertising-permissions/molnlycke-health-care-pty-ltd-adhesive-bandage))
2. Topical Oxygen Therapy (L37873)
   - Palmetto GBA's identified topical-oxygen LCD specifies noncoverage within its stated scope; it does not establish a universal US payer decision. ([cms.gov](https://www.cms.gov/medicare-coverage-database/view/lcd.aspx?lcdid=xx.xx))
3. Regulating medical devices in the UK
   - Qualifying legacy-directive general devices have an earlier-certificate-expiry or June xx.xx 2028 limit; MDR-compliant general devices have a June xx.xx 2030 limit, subject to stated conditions. The guidance distinguishes Great Britain and Northern Ireland. ([gov.uk](https://www.gov.uk/guidance/regulating-medical-devices-in-the-uk))
4. RT42-2025 Annexure C: Declaration Related to the Product Discontinuation of Items Submitted for the Bid
   - RT42-2025 Annexure C requires disclosure of known product-discontinuation plans and acknowledges possible bid rejection, establishing a supply-continuity condition rather than an award. ([etenders.gov.za](https://www.etenders.gov.za/home/Download/?blobName=e3f2f53b-1dc5-485a-98eb-8b39f5b1c0be.pdf&downloadedFileName=xx.xx.+RT42-2025+Annexure+C+Product+Discontinuation+form.pdf))

5. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

6. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

7. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

8. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

9. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

10. Convatec - Interim Results for the Six Months Ended 30 June 2026

    · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

11. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

    · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

    · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

12. NHS Supply Chain - Negative Pressure Wound Therapy
    - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
13. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
14. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
15. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
16. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
17. Anvisa - Medical devices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

18.1. United States

Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))
2. Solventum Corporation - 2025 Form 10-K
   - Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))
3. Smith+Nephew Fourth Quarter and Full Year 2020 Results
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))
4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans
   - Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))
6. Convatec - Interim Results for the Six Months Ended 30 June 2026
   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))
7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.
   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.2. China

Table 385. China Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
China	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 386. China Post-Operative Wound Dressings Market Size, by Dressing Type, 2017-2040 (USD Million)

Dressing Type	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Absorbent Acrylic Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Acellular Extracellular Matrix Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Activated Charcoal Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 389. China Post-Operative Wound Dressings Market Size, by Healing Pathway, 2017-2040 (USD Million)

Healing Pathway	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Closed Surgical Wounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Awaiting Surgical Closure	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Open Wounds Healing by Secondary Intention	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 390. China Post-Operative Wound Dressings Market Size, by Surgical Application, 2017-2040 (USD Million)

Surgical Application	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Cardiovascular Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ear, Nose, Oral & Throat Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Endocrine Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gastrointestinal & Abdominal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gynecologic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hematologic & Lymphatic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Male Reproductive Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Musculoskeletal Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Neurological Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Obstetric Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ophthalmic Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Respiratory Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Skin & Breast Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Urinary Tract Surgery	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 391. China Post-Operative Wound Dressings Market Size, by End User, 2017-2040 (USD Million)

End User	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Freestanding Surgical Centers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Home Healthcare Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hospitals	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Office-Based & Community Providers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Residential & Post-Acute Care Facilities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Self-Care Households	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 392. China Post-Operative Wound Dressings Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 393. China Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 394. China Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: China's export exposure establishes production activity, not observed domestic postoperative purchases.

10. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

11. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
12. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

13. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

14. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

15. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
16. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
17. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
18. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
19. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
20. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

21. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
22. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
23. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
24. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
25. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

26. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
27. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
28. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
29. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

30. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
31. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
32. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

33. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
34. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

35. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
36. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
37. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
38. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
39. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
40. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
41. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

42. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
43. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
44. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
45. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

46. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
47. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

48. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
49. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

50. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

51. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

52. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
53. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
54. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
55. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

56. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

57. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
58. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
59. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
60. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

61. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

62. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

63. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

64. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

65. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

66. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

67. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

68. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

69. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
70. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
71. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

72. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
73. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
74. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

75. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.3. Germany

Table 395. Germany Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Germany	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))
63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))
64. HealthShare NSW - Procurement Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.4. France

Table 405. France Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.5. United Kingdom

Table 415. United Kingdom Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
United Kingdom	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 416. United Kingdom Post-Operative Wound Dressings Market Size, by Dressing Type, 2017-2040 (USD Million)

Dressing Type	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Absorbent Acrylic Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Acellular Extracellular Matrix Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Activated Charcoal Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Alginate Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Biocellulose Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Residential & Post-Acute Care Facilities	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Self-Care Households	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 422. United Kingdom Post-Operative Wound Dressings Market Size, by Sales Channel, 2017-2040 (USD Million)

Sales Channel	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Direct Institutional Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Direct-to-Consumer Sales	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Retail & Dispensing	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 423. United Kingdom Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 424. United Kingdom Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy
   - Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and pump-rental lots support dressing-only accounting; supplier and catalog counts do not establish penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its

9. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The purchasing framework establishes category and ordering access, not annual postoperative drawdown or the modeled adoption factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

10. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

11. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
12. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

13. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

14. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

15. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
16. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
17. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
18. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
19. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
20. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

21. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
22. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
23. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
24. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
25. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

26. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
27. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
28. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
29. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

30. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
31. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
32. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

33. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
34. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

35. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
36. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
37. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
38. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
39. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
40. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
41. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

42. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
43. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
44. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
45. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

46. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

47. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

48. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
49. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

50. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

51. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

52. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
53. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
54. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
55. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

56. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

57. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
58. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
59. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
60. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

61. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

62. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

63. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

64. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

65. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

66. Medline - Consumer
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
67. PowerHeal Bandage - Shop
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))
68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.

70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.

73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.6. Japan

Table 425. Japan Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Japan	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 426. Japan Post-Operative Wound Dressings Market Size, by Dressing Type, 2017-2040 (USD Million)

Dressing Type	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Absorbent Acrylic Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Acellular Extracellular Matrix Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Activated Charcoal Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Alginate Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Biocellulose Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Capillary Action Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chitosan Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Collagen Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Composite & Island Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Film & Membrane Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Foam Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gauze & Absorbent Pad Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gelling Fiber Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Wholesale & Distribution	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 433. Japan Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 434. Japan Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.7. Italy

Table 435. Italy Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.8. Spain

Table 445. Spain Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Spain	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.9. Mexico

Table 455. Mexico Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Wadding, gauze and related medical articles: exports by country, 2023
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Companion-code exports support the Mexican cross-border-flow challenge.

10. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

11. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
12. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

13. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

14. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

15. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
16. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
17. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
18. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
19. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
20. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

21. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
22. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
23. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
24. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
25. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

26. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
27. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
28. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
29. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

30. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
31. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
32. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

33. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
34. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

35. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
36. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
37. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
38. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
39. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
40. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
41. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

42. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
43. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
44. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
45. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

46. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
47. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

48. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
49. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

50. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

51. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

52. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
53. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
54. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
55. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

56. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

57. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
58. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
59. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
60. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

61. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

62. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

63. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

64. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

65. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

66. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

67. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

68. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

69. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
70. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
71. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

72. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
73. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
74. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

75. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.10. Brazil

Table 465. Brazil Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. Anvisa - Medical devices
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Brazil requires a legally constituted domestic partner for foreign suppliers' authorization arrangements; this is an access constraint, not a sales measure.

10. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

11. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
12. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

13. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

14. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

15. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
16. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
17. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
18. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
19. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
20. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

21. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
22. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
23. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
24. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
25. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

26. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
27. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
28. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
29. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

30. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
31. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
32. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

33. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
34. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

35. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
36. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
37. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
38. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
39. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
40. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
41. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

42. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
43. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
44. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
45. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

46. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
47. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

48. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
49. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

50. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

51. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

52. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
53. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
54. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
55. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

56. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

57. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
58. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
59. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
60. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

61. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

62. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

63. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

64. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

65. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

66. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

67. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

68. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

69. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
70. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
71. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

72. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
73. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
74. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

75. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.11. India

Table 475. India Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
India	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.

   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.

69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.

70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.12. Canada

Table 485. Canada Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Canada	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 486. Canada Post-Operative Wound Dressings Market Size, by Dressing Type, 2017-2040 (USD Million)

Dressing Type	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Absorbent Acrylic Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Acellular Extracellular Matrix Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Activated Charcoal Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Alginate Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Biocellulose Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Capillary Action Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chitosan Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Collagen Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Composite & Island Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Film & Membrane Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Foam Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gauze & Absorbent Pad Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gelling Fiber Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hyaluronic Acid Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hydrocolloid Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hydrogel Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Superabsorbent Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wound Contact Layers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 487. Canada Post-Operative Wound Dressings Market Size, by Therapy Platform, 2017-2040 (USD Million)

Therapy Platform	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bioelectric Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Negative Pressure Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standard Dressing Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Topical Oxygen Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Table 493. Canada Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 494. Canada Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.

35. Essity acquires advanced wound care company in US - December 29, 2021
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.

36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.

37. MaxioCel - What is MaxioCel?
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.

38. Schülke - Wound compendium
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.

39. MedCu - Advanced Copper-Based Wound Dressings
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.

40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.13. South Korea

Table 495. South Korea Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
South Korea	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 496. South Korea Post-Operative Wound Dressings Market Size, by Dressing Type, 2017-2040 (USD Million)

Dressing Type	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Absorbent Acrylic Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Acellular Extracellular Matrix Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Activated Charcoal Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Alginate Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Biocellulose Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Capillary Action Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chitosan Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Collagen Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Composite & Island Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Film & Membrane Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Foam Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gauze & Absorbent Pad Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Gelling Fiber Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hyaluronic Acid Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hydrocolloid Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Hydrogel Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Superabsorbent Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Wound Contact Layers	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 497. South Korea Post-Operative Wound Dressings Market Size, by Therapy Platform, 2017-2040 (USD Million)

Therapy Platform	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bioelectric Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Negative Pressure Wound Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Standard Dressing Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Topical Oxygen Therapy	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 498. South Korea Post-Operative Wound Dressings Market Size, by Antimicrobial Technology, 2017-2040 (USD Million)

Antimicrobial Technology	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Antibiotics	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Bismuth Compounds	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chitosan-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Chlorhexidine	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Copper-Based Antimicrobials	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. Smith+Nephew Second Quarter and First Half 2026 Results
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.14. Australia

Table 505. Australia Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Country	2017	2024	2025	2026	2027	2032	2040	CAGR (%)

Table 514. Australia Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   - Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. NHSBSA Drug Tariff April 2025 - Part IXA
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

10. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
11. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

12. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

13. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

14. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
15. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
16. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
17. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
18. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
19. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

20. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
21. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
22. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
23. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
24. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

25. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
26. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
27. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
28. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

29. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
30. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
31. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

32. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
33. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

34. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
35. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
36. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
37. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
38. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
39. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
40. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

41. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
42. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
43. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
44. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

45. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

46. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

47. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
48. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

49. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

50. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

51. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
52. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
53. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
54. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

55. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

56. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
57. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
58. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
59. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

60. Solventum V.A.C. Therapy for Patients
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
61. NHS Supply Chain - National Pricing Matrices
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

62. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

63. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

64. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

65. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

66. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

67. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

68. Smith+Nephew Advanced Wound Management Product Catalog
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.

69. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.

70. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

71. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
72. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
73. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

74. Information for Clinical Choice - Gelling Fibre Dressings Support Document
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

18.15. Russia

Table 515. Russia Post-Operative Wound Dressings Market Size, 2017-2040 (USD Million)

Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 523. Russia Post-Operative Wound Dressings Market Size, by Fixation Design, 2017-2040 (USD Million)

Fixation Design	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
Bordered Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Borderless Adhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonadhesive Dressings	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Table 524. Russia Post-Operative Wound Dressings Market Size, by Absorbency, 2017-2040 (USD Million)

Absorbency	2017	2024	2025	2026	2027	2032	2040	CAGR (%)
High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Low Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Moderate Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Nonabsorptive	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Ultra-High Absorbency	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Others	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx
Total	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**	**xx.xx**

Sources & Evidence

1. Size and distribution of the global volume of surgery in 2012.
   · Evidence informing the 2017 market-value input; displayed series and growth include calculations: The underlying study estimates xx.xx operations globally in 2012, with a xx.xx-xx.xx confidence interval. This is the historical activity anchor, not an observed dressing-market value. ([stanfordhealthcare.org](https://stanfordhealthcare.org/publications/xx.xx/xx.xx.html))

2. Solventum Corporation - 2025 Form 10-K

   · Evidence informing the 2024 market-value input; displayed series and growth include calculations: Advanced Wound Care sales were USD xx.xx in 2024. The business includes activities beyond postoperative finished dressings and is used only as a broad commercial constraint. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing base-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

   · Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Rental revenue cannot serve as a DTC dressing-sales numerator; attributable consumable consideration and purchasing-principal identity require separate treatment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/solv-xx.xx.htm))

3. Smith+Nephew Fourth Quarter and Full Year 2020 Results

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: Comparable Advanced Wound Care revenue fell from USD xx.xx in 2019 to USD xx.xx in 2020; Advanced Wound Devices fell from USD xx.xx to USD xx.xx. These observations constrain the modeled pandemic decline. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/33f321727e404f3c84f4483adbd486f3?v=fcbfaa8d))

4. Elective surgery cancellations due to the COVID-19 pandemic: global predictive modelling to inform surgical recovery plans

   · Evidence informing the 2020 market-value input; displayed series and growth include calculations: The study predicted xx.xx cancelled or postponed operations during xx.xx peak-disruption weeks. It supports a material activity shock, but is not an observed full-year cancellation census. ([bjssjournals.onlinelibrary.wiley.com](https://bjssjournals.onlinelibrary.wiley.com/doi/xx.xx/bjs.xx.xx))

5. Smith+Nephew Second Quarter and First Half 2026 Results

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half 2026 Advanced Wound Care revenue was USD xx.xx versus USD xx.xx; Advanced Wound Devices was USD xx.xx versus USD xx.xx. These broader categories support positive commercial momentum without directly measuring postoperative dressing growth. ([smith-nephew.stylelabs.cloud](https://smith-nephew.stylelabs.cloud/api/public/content/a7d555c46c15467eb98e59aa9a33a50d?v=a7317b8d))

6. Convatec - Interim Results for the Six Months Ended 30 June 2026

   · Evidence informing the 2026 market-value input; displayed series and growth include calculations: First-half Advanced Wound Care revenue was USD xx.xx in 2026 versus USD xx.xx, including InnovaMatrix revenue of USD xx.xx versus USD xx.xx. Excluding that adjacent exposure gives USD xx.xx versus USD xx.xx, illustrating the importance of a comparable product boundary. ([convatecgroup.com](https://www.convatecgroup.com/globalassets/convatec-h1-xx.xx-results--final-final.pdf))

7. Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial

   · Evidence informing the 2032 market-value input; displayed series and growth include calculations: The application-specific economic result constrains adoption assumptions; it does not establish a forecast commercial share.

   · Evidence informing the 2040 market-value input; displayed series and growth include calculations: The result supports retaining standard dressings as a counterforce to unrestricted long-term platform substitution.

8. NHS Supply Chain - Negative Pressure Wound Therapy

- Evidence informing the 2026 market-value input; displayed series and growth include calculations: The framework separately identifies consumables, pump purchases and pump rental, and includes portable equipment. This supports dressing-only accounting and the existence of continuation channels, not their global penetration. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing the 2027 market-value input; displayed series and growth include calculations: The published framework expires March xx.xx 2027. That contractual date is not treated as a global revenue discontinuity or proof of a successor arrangement. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate NPWT consumable procurement supports distinguishing dedicated NPWT dressing consideration from standalone standard-dressing offerings; it does not disclose their global value mix.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Five lots include consumables in Lot xx.xx and pump rental in Lot xx.xx. The March xx.xx 2021-March xx.xx 2027 framework supports commercial continuity and boundary separation, not the assumed global penetration rates.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumables and equipment arrangements support dressing-only valuation of closed-wound NPWT purchases rather than including pump consideration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Consumable procurement is distinct from pump rental; availability of continuation channels does not quantify global secondary-intention penetration.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Interim dressing expenditure must exclude separately arranged equipment and rental; the framework term does not establish a future global revenue discontinuity.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate consumable and equipment arrangements support dressing-only institutional attribution, excluding pump sales and rental from modeled value weights.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Portable-platform and consumable procurement establish continuation-channel availability, not its penetration or a guaranteed arrangement after the March xx.xx 2027 framework expiry.

9. WITS/UN Comtrade - Russian Federation medical wadding, gauze and related articles imports, 2021
   - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
   - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian imports of USD xx.xx anchor one component of the uncertain temporal bridge.
10. WITS/UN Comtrade - Russian Federation adhesive dressings imports, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Observed 2021 Russian adhesive-dressing imports of USD xx.xx provide the companion input; later-period purchasing is modeled.

11. NHSBSA Drug Tariff April 2025 - Part IXA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Tegaderm+Pad comparator: GBP0.xx.xx per listed unit.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Foam comparator GBP2.xx.xx; medium NPWT foam kit GBP29.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Gelling-fiber comparators GBP2.xx.xx and GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: KerraMaxCare comparator GBP1.xx.xx; standalone PICO dressing listed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Leukomed Control comparator GBP2.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Promogran comparator GBP5.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: MaxioCel comparator GBP1.xx.xx; listing does not measure sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Activated-charcoal dressings have separate purchasing categories.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Vacutex comparator GBP1.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Suprasorb X comparator GBP4.xx.xx.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished antimicrobial gel listings establish outside-taxonomy parent activity; volumes remain assumed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Silver dressings provide representative monetary and construction comparisons.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PHMB dressing prices constrain value-versus-volume interpretation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper pricing supplies a relative-realization anchor, not supplier revenue.

12. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical routine surgical purchasing is a demand comparator for the conventional-dressing cohort, not a contemporary Global gauze share.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Simple integrated surgical covers constrain the conventional purchasing model; historical unit observations are not value shares.
13. Achieving international consensus for the prevention of orthopaedic wound blistering: results of a Delphi survey
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: A small, industry-supported orthopaedic survey reports49.xx.xx% weighted initial foam-dressing use; this challenges extrapolating a universally conventional mix.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical survey reports2.xx.xx% Aquacel use; its procedure and sample biases prevent direct Global extrapolation.

14. CMS Surgical Dressings - Policy Article A54563
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The composite definition distinguishes conventional absorptive covers from foam, gelling-fiber, hydrocolloid and hydrogel constructions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Dressings applied within a billed professional service are not separately payable, distinguishing provider-provisioned products from independent supply purchases.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy supports separating eligible take-home supply relationships from dressings included in professional-service payment; no Global purchasing percentage is disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Defines adhesive-border wound covers through an integrated cover and distinct surrounding adhesive border; pad dimensions, rather than outer dimensions, support the classification and comparison premise used at both anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The policy explicitly distinguishes nonabsorptive contact layers from separate absorptive coverings, supporting the separate Nonabsorptive numerator at both anchors.

15. NHS Supply Chain Advanced Wound Care Specification
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Alginates and gelling fibers are separately identified within the purchasing specification.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate gelling-fiber recognition supports its retained commercial construction mapping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Superabsorbent dressings have a distinct purchasing grouping.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Collagen is recognized separately from temporary matrix dressings.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Temporary matrix purchasing requirements support a nonimplant boundary but do not establish universal eligibility of acellular products.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Biocellulose is explicitly recognized as a specialty construction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The procurement specification defines Low using total fluid handling of xx.xx-xx.xx g/xx.xx cm^2; this supplies a classification boundary, not a sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Moderate as xx.xx-xx.xx g/xx.xx cm^2, constraining classification at both modeled anchors.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines High as xx.xx-xx.xx g/xx.xx cm^2; qualitative supplier descriptions are not independent revenue observations.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The specification defines Ultra-High as at least xx.xx g/xx.xx cm^2, without establishing an international sales distribution.

16. FDA K210024 - NeoMatriX Wound Matrix
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: NeoMatriX uses collagen-dressing terminology while identifying acellular-matrix characteristics; regulatory naming cannot uniquely allocate these peers.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The record establishes an acellular wound-dressing identity with surgical-wound indications, supporting product-specific precedence rather than a revenue observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Regulatory offering context is kept separate from sales weighting; no clearance-derived revenue or adoption rate is assumed.
17. AccessGUDID - OASIS, Device Identifier 00827002466234
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The OASIS device record identifies a wound-matrix dressing in commercial distribution; it does not separate postoperative sales or establish a Global share.
18. FDA K261311 - HYALOMATRIX Clearance and 510(k) Summary
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The September2,2026 HYALOMATRIX clearance concerns an updated presentation against an earlier predicate; it supports continuing category identity, not a first-launch uplift.
19. FDA 510(k) Premarket Notification K073251 - HYALOMATRIX PA
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The earlier HYALOMATRIX PA regulatory record supports pre-existing category identity; it supplies neither2025 realized sales nor a forecast adoption rate.
20. Journal officiel, 6 September 2013 - IALUSET PLUS transfer prices, reimbursement tariffs and retail price ceilings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The historical maximum transfer price for ten IALUSET+ pads was EUR16.xx.xx from April2014; this anchors an ordinary-pad commercial tier, not a current Global ASP.
21. Rhode Island Medicaid Fee Schedule 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2021 OASIS Ultra rate of USD4.xx.xx per square centimetre is an adjacent historical reimbursement comparator used only in an explicit commercial valuation bridge.

22. Convatec 2025 Annual Results Transcript - 24 February 2026
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported ConvaFoam expansion supplies a directional commercial input, not a measured postoperative construction growth rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported Aquacel performance and4.xx.xx% wound-care growth excluding InnovaMatrix support selective expansion while leaving the forecast participation factor assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: InnovaMatrix revenue fell by USD30 million to USD69 million; this adjacent payment-sensitive exposure challenges indiscriminate matrix growth rather than measuring qualifying postoperative matrix sales.
23. Smith+Nephew - German consensus guidance for single-use NPWT, 6 July 2026
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: PICO's disclosed superabsorbent-core architecture supports construction mapping and the forecast model's separate superabsorbent platform-content allocation; it does not establish sales share.
24. Medline - Amplify What's Possible: Wound Care and Skin Health Portfolio, 24 April 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 company portfolio identifies chitosan-based Opticell, supporting specialty-material precedence over generic gelling-fiber naming without measuring2025 revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The2018 portfolio already identifies hyaluronic-acid-based Hyalomatrix, independently challenging treatment of the2026 updated clearance as a first product launch.
25. FDA K143124 - KA01 Chitosan Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The January26,2015 clearance identifies KA01 Chitosan Wound Dressing with surgical-wound indications; it establishes category history rather than continuing Global availability or sales.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Chitosan construction and surgical applications do not independently establish antimicrobial positioning; this constrains classification.
26. Hospital Chargemaster, July 3, 2020 - JumpStart Dressing Line Items
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Page xx.xx lists a JumpStart dressing charge of USD xx.xx with a January xx.xx 2020 effective date. This is the historical charge-level input for an explicitly assumed rebase and first-sale realization bridge, not an observed net supplier price or future price.

27. Connecticut Office of Health Strategy - Stamford Price Master, January 31, 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2018 price master lists different JumpStart configurations at USD xx.xx USD xx.xx, USD xx.xx, USD xx.xx, USD xx.xx and USD xx.xx. The dispersion qualifies any uniform-price assumption but is not a time series of inflation or global first-sale revenue.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical configuration-specific charges provide an independent price-level comparison for the modeled bioelectric basket; no catalog-count allocation or charge-to-revenue equivalence is assumed.
28. Vomaris Innovations - Corporate Overview, 2023
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2023 corporate overview reports more than one million wounds treated cumulatively and active commercialization in nine countries. These manufacturer-reported commercial aggregates constrain a niche-scale interpretation but do not establish annual postoperative revenue or forecast uptake.
29. Vomaris - Buy Products
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The buying page distinguishes professional Procellera inquiries from the JumpStart specialty route and identifies exclusive Arthrex access for the specified surgical specialties. This supports channel existence and restrictions, not a measured purchasing conversion rate.
30. Arthrex - JumpStart Antimicrobial Wound Dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The surgical product catalog includes a ClearFit product-highlight entry dated October xx.xx 2024 and subsequent commercial materials. This independently corroborates a marketed surgical offering before the base year and continued product support, not recognized sales or the selected forecast penetration.

31. OxyBand Technologies - FDA Clearance
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Manufacturer information identifies clean closed surgical incisions and skin-graft donor sites within prescription applications and distinguishes OTC scope. This supports postoperative finished-dressing attribution but supplies neither annual sales nor a verified net price.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The stated clean-closed-incision indication supports a category boundary, not a numerical revenue weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Other stated dressing uses do not establish attributable postoperative secondary-intention sales; no allocation is inferred from clearance alone.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published indications do not independently quantify eligibility or purchasing value for wounds awaiting surgical closure.
32. OxyBand Technologies - Commercial Sales: Purchase Orders
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer publishes a commercial purchase-order route with credit approval and net-xx.xx terms. This corroborates a purchasing relationship without measuring 2025 order volume, global access or future adoption.
33. CMS Medicare Coverage Database - Topical Oxygen Therapy, LCD L37873
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Palmetto local determination establishes noncoverage within its defined topical-oxygen service scope and jurisdiction. It was originally effective May xx.xx 2019, with the inspected revision effective April xx.xx 2026. It supports a payment-access caution, not universal dressing noncoverage or a zero category share.

34. Antimicrobial wound dressings (AWDs) for chronic wounds - Health technology assessment report 13, December 2015
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical all-wound antimicrobial expenditure calibrates the declared-technology budget, not current global postoperative penetration.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level silver spending anchors the monetary weight; inconsistent printed totals are disclosed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separate povidone-iodine and cadexomer-iodine expenditure anchors the combined iodine weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Honey expenditure supplies a historical value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Polihexanide expenditure supplies a historical PHMB value-mix input.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Glucose-oxidase gel expenditure supplies the enzyme-family monetary proxy.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Board-level DACC expenditure anchors its historical weight; forecast changes are separately assumed.
35. CMS Local Coverage Determination - Surgical Dressings, L33831
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Finished-product coverage conditions constrain assumptions about universal premium conversion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify silver-related access assumptions without proving universal exclusion.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Material-specific limitations qualify honey-related purchasing assumptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Copper positioning alone cannot establish finished-product coverage or reimbursed adoption.

36. FDA K190268 - Hydrofera Blue READY-Border, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The finished foam offering contains two antibacterial dyes and includes post-surgical incisions; this establishes mapping, not revenue.
37. Essity acquires advanced wound care company in US - December 29, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hydrofera reported USD xx.xx net sales for nine months of 2021, anchoring annualization and explicitly assumed attribution.
38. FDA K152970 - Dynarex Xeroform Petrolatum Dressing, 510(k) Summary
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The regulatory summary establishes a bismuth-containing surgical dressing; declaration eligibility and sales remain modeled.
39. MaxioCel - What is MaxioCel?
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The offering's own commercial description expressly presents antimicrobial chitosan positioning, without quantifying sales.
40. Schülke - Wound compendium
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier compendium separates wound gel from irrigation products and includes surgical positioning; sales attribution remains assumed.
41. MedCu - Advanced Copper-Based Wound Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The supplier's copper-dressing portfolio explicitly includes surgical wounds, supporting commercial mapping rather than adoption volume.
42. Healthium Medtech introduces surgical wound dressing with patented infection-prevention technology - October 26, 2021
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The dated surgical-dressing launch and own-company hospital network constrain addressability, not realized product adoption.

43. Quick-Med Technologies - Form 10-K for the fiscal year ended June 30, 2011
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Historical BIOGUARD royalties and contractual rates provide a qualified commercial magnitude check, not current postoperative sales.
44. HPRA - Sofra-Tulle withdrawn medicine record
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The Irish withdrawal record prevents treating Sofra-Tulle as current Irish activity; it does not establish global sales or zero.
45. Smith+Nephew - BACTIGRAS chlorhexidine acetate gauze dressing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manufacturer's BACTIGRAS listing establishes a chlorhexidine finished-dressing category, not quantified postoperative sales.
46. Recommendations for Preventing and Managing Surgical Wound Complications - May 2024
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary closure and incisional NPWT definitions support closed-wound purchasing attribution; they do not establish its sales percentage.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-intention definitions support separating continued open-wound purchases from purchases associated with planned surgical closure.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed surgical closure supplies the category boundary for interim open-wound expenditure; subsequent closed-stage purchases must not remain assigned here.

47. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: UK open-wound utilization observations constrain the modeled open NPWT activity, and therefore the remaining closed NPWT allocation, without directly measuring global sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported snapshot, baseline and whole-course NPWT exposure provide distinct calibration bounds; they are not interchangeable annual penetration measures.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The secondary-intention study population does not establish the planned delayed-closure mix, requiring a separate explicit attribution assumption.

48. Negative Pressure Wound Therapy vs Conventional Wound Treatment in Subcutaneous Abdominal Wound Healing Impairment: The SAWHI Randomized Clinical Trial

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The SAWHI trial documents transitions from open to surgically closed wounds, supporting purchase-stage accounting rather than assigning an entire episode permanently to its initial pathway.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Case-specific alternative closure outcomes qualify the assumption that all open-wound expenditure belongs to secondary-intention healing.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Delayed-closure event counts constrain the approximate awaiting-closure attribution priors, with explicit adjustments and uncertainty for case mix, timing and value conversion.

49. **Negative pressure wound therapy versus usual care in patients with surgical wound healing by secondary intention in the UK (SWHSI-2): an open-label, multicentre, parallel-group, randomised controlled trial**
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The studied secondary-intention population cannot establish closed-incision commercial performance; the forecast's closed-wound shift remains a modeled assumption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The application-specific clinical and economic result supports retaining conventional expenditure and restraining assumed open-care premium substitution.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Exclusion of planned delayed closure prevents transferring the trial's result directly to the awaiting-closure category.
50. **Smith+Nephew Second Quarter and First Half 2026 Results**
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Device-category growth and continuing PICO investment provide a commercial adoption check, but do not verify the forecast closed-incision dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Strong post-acute RENASYS performance and emerging-market expansion qualify a blanket open-NPWT contraction assumption and support retaining open-care activity.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The disclosure separates commercial channels but not planned-closure pathways; the awaiting-closure forecast remains explicitly modeled.

51. Number of all-listed procedures for discharges from short-stay hospitals, by procedure category and age: United States, 2010
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient endocrine-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Inpatient ophthalmic-count primitive; modeled purchase bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ear and oral-system anatomical-count primitives.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Respiratory counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Cardiovascular counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Hemic/lymphatic-count primitive; assumed ambulatory uplift.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Digestive counts; selected nonqualifying activity removed.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Urinary-count primitive; explicit scope adjustments.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Male-genital-count primitive; newborn coverage limitation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Female-genital anatomical-count primitive; modeled eligibility bridge.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Musculoskeletal-count primitive; modeled episode correction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Integumentary-count primitive; explicit debridement adjustment.

52. Ambulatory Surgery Data From Hospitals and Ambulatory Surgery Centers: United States, 2010 - National Health Statistics Reports Number 102

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; nonqualifying injection activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory-count primitive; paired lens-code correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory ear and oral-system count primitives.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory respiratory-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory cardiovascular-count primitive; scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory digestive counts; nonqualifying activity excluded.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory urinary counts; explicit eligibility correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory male-genital-count primitive; modeled global bridge.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory female-genital counts; explicit scope correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory musculoskeletal counts; modeled episode correction.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ambulatory integumentary counts; office coverage limitation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2010 US survey reports xx.xx% of ambulatory procedures in hospitals. This historical setting input is adjusted for Global scope and dressing value.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: ASCs represented xx.xx% of the survey's ambulatory surgical and nonsurgical procedures; the model applies explicit scope, geography and value adjustments.

53. Caesarean section rates continue to rise, amid growing inequalities in access
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The reported xx.xx% caesarean rate and projected xx.xx% rate for 2030 constrain the explicit obstetric activity scenario; neither is a measured 2025 dressing share.
54. Cataract surgery - After cataract surgery
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Pad-and-shield or shield-only coverage supports non-universal pad purchasing, not the assumed global utilization factor.
55. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The arthroplasty comparison supports application-specific differentiation, not measured purchasing penetration or the forecast uplift.
56. Overview of Major Ambulatory Surgeries Performed in Hospital-Owned Facilities, 2019 - Statistical Brief #287
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The official 2019 record identifies xx.xx major ambulatory encounters in hospital-owned facilities, constraining any blanket allocation of outpatient surgery to freestanding centers.

57. The epidemiology, management and impact of surgical wounds healing by secondary intention: a research programme including the SWHSI feasibility RCT

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Secondary-care observations supply the hospital continuation proxy; the conversion to attributable dressing-value exposure is modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Primary-care and community observations anchor the office/community continuation proxy, with an explicit Global responsibility adaptation.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure constrains the continuation pool; its residential subdivision is an assumption, not a reported purchasing percentage.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Community exposure anchors professional continuation demand; the home-health purchasing fraction and forecast shift are modeled.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The continuation pool supports a household attribution model, but the study does not measure independently purchased household dressing revenue.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The xx.xx-patient historical UK cohort's wound-contact incidence supports a narrowly scoped prolonged-care purchasing proxy, with an explicit modeled repeat-purchase adjustment.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reported absorptive-product incidences constrain the scale of the prolonged-care basket; allocation to Moderate requires separate assumed product-band and relative-price bridges.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same historical basket supports the prolonged-care activity bridge, not a direct equivalence between a material label and the High band.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The cohort supports prolonged absorptive purchasing activity; the Ultra-High fraction and its forecast persistence remain assumptions rather than observed shares.

58. March 2026 Report to the Congress: Medicare Payment Policy - Chapter 11, Ambulatory surgical center services: Status report
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The 2024 activity assessment distinguishes modest aggregate ASC growth from rapid selected orthopedic growth, limiting assumptions about wholesale hospital displacement.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Aggregate ASC services rose xx.xx% in 2024, while knee and hip volumes rose xx.xx% and xx.xx%; these observations constrain selective migration assumptions.
59. Medicare Claims Processing Manual, Chapter 14 - Ambulatory Surgical Centers
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Surgical dressings furnished with ASC surgery are included in facility services, supporting attribution to the center rather than an assumed independent household transaction.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The manual distinguishes physician-office dressings from ASC facility services, supporting a separate office purchasing role.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Subsequent eligible patient-obtained dressings can follow a separate supply route; this establishes attribution boundaries, not household market share.
60. Medicare Benefit Policy Manual, Chapter 7 - Home Health Services
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Ordinary medical supplies under a Medicare home-health plan of care are bundled, supporting agency-responsibility attribution with applicable exceptions.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Home delivery does not by itself establish household procurement; ordinary medical supplies and DME-related arrangements have different responsibility rules.
61. SNF Consolidated Billing
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Covered Part A SNF stays generally use consolidated billing, while noncovered stays differ; residential purchases require responsibility-based attribution rather than a universal payer assumption.

62. Solventum V.A.C. Therapy for Patients

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient replenishment operates within a professionally directed arrangement dependent on documentation for insurance billing; digital access does not establish agency-attributable sales.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing ordering and possible personal payment responsibility establish distinct commercial arrangements, not unrestricted household purchasing or a disclosed household revenue split.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Patient-facing replenishment ordering operates alongside prescribing and insurance-documentation requirements. This supports a controlled commercial route, not unrestricted purchasing or a measured channel share. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))

63. NHS Supply Chain - National Pricing Matrices

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commitment-linked discounts for Advanced Wound Care support using net realization rather than list prices; matched hospital purchasing discounts are not disclosed.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The discount mechanism constrains institutional value comparisons but does not establish the model's ASC-to-hospital relative dressing-value factor.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supplier-approved value or volume commitments demonstrate that purchasing terms can differ; the office/community realization adjustment remains an explicit assumption.

64. Medline Inc. - 2025 Form 10-K

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: 2025 US Prime Vendor own-brand sales of USD xx.xx support the institutional offering-owner direct-sales proxy, subject to broad medical-surgical scope adjustment. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Third-party Prime Vendor sales of USD xx.xx are reseller-level revenue; the model removes an assumed uplift before comparison with offering-owner first sales. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/mdln-xx.xx.htm))

65. Smith+Nephew - Annual Report 2025, Note 2: Business Segment Information

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The audited revenue policy identifies relatively greater direct hospital sales in Advanced Wound Devices in established markets, supporting the model's higher institutional direct propensity for NPWT dressing content. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Most Advanced Wound Management business, particularly community and home-care products, passes through wholesalers and distributors. This constrains route assumptions but is not a postoperative Global percentage. ([sec.gov](https://www.sec.gov/Archives/edgar/data/xx.xx/xx.xx/snn-20260331xex99d1.htm))

66. HealthShare NSW - Procurement Services

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Direct procurement is distinguished from contracted-distributor supply, supporting classification by purchasing relationship rather than catalog interface. No sales weight is disclosed. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing base-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

· Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Where a contracted distributor supplies the customer, supplier information passes through that distributor. This supports a distinct intermediary route, not its Global prevalence. ([healthshare.nsw.gov.au](https://www.healthshare.nsw.gov.au/services/procurement-services))

67. NHS Shared Business Services - Advanced Wound Care and Lymphoedema Products and Services Framework Agreement

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Under total purchase, dressing ownership remains with the purchasing organization. Institutional ownership can therefore persist despite patient-facing fulfillment. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Organizational ownership and online ordering provide a counterexample to treating household delivery or digital ordering automatically as DTC sales. No Global revenue split is published. ([sbs.nhs.uk](https://www.sbs.nhs.uk/services/framework-agreements/advanced-wound-care-and-lymphoedema-products-and-services/))

68. Medline - Consumer

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The consumer portfolio includes postoperative wound products and identifies independent retail and pharmacy outlets, establishing retail participation without measuring its attributable revenue. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The same portfolio separately links the owner's consumer storefront, supporting coexistence of owner-direct and reseller channels rather than a single undifferentiated online channel. ([medline.com](https://www.medline.com/about-us/who-we-serve/consumer/))

69. PowerHeal Bandage - Shop

- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The current branded shop places surgical incisions within prescription use. This constrains unrestricted consumer-adoption assumptions without establishing 2025 sales or a 2032 percentage. ([powerhealbandage.com](https://powerhealbandage.com/collections/shop))

70. Smith+Nephew Advanced Wound Management Product Catalog
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately markets bordered foam offerings for surgical wounds, supporting category mapping but not their sales weight.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Identifies ALLEVYN GENTLE as nonbordered with adhesive, establishing a distinct commercial offering rather than a nonadhesive synonym.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Separately identifies ALLEVYN Non-Adhesive and surgical-wound applications; portfolio presence supports mapping, not global revenue share.
71. NHS Clinical Evaluation Team - Non-Woven Island Dressings Clinical Review, October 2018
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports historical national-distributor purchases of just under xx.xx nonwoven island dressings and spending above GBP xx.xx, supporting persistent low-cost bordered purchasing without establishing current global share.
72. Three wound-dressing strategies to reduce surgical site infection after abdominal surgery: the Bluebelle feasibility study and pilot RCT
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Institutional default selection and procurement cost constraints challenge automatic conversion to premium bordered offerings; the study does not disclose fixation sales shares.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Provides independent purchasing-behavior counterevidence to treating commercial availability as unrestricted borderless adhesive adoption.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Supports retaining conventional purchasing and cost counterforces rather than assuming universal replacement of separately sourced dressing offerings.

73. Solventum Launches All-In-One, Extended-Wear Wound Dressing for V.A.C. Therapy
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Documents the September xx.xx 2024 launch of an integrated dressing-and-drape offering, initially available in the United States and Canada; supports commercial availability, not the modeled adoption percentages.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Contrasts integrated offerings with traditional separate-component NPWT dressings, supporting the commercial distinction used in the substitution assumption.
74. Solventum Q2 2025 Shareholder Letter - August 18, 2025
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Reports European expansion of the integrated dressing launch and a dedicated acute-care sales team, supporting a limited diffusion premise rather than a quantified future market share.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Commercial expansion supplies a directional substitution premise against component-based purchases; the extent of displacement remains an explicit forecast assumption.
75. Information for Clinical Choice - Foam Dressings
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The older comparison reports total fluid handling of xx.xx for ActivHeal Border Lite despite a High label; the accepted numerical boundaries place that comparator in Moderate.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FoamLite's reported total-fluid-handling value of xx.xx supplies a high-band representative-product anchor, not a market-share observation.
    - Evidence informing base-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.
    - Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: FarlaFOAM-S's reported total-fluid-handling value of xx.xx supplies an ultra-high representative-product anchor; global purchasing weights remain modeled.

76. Information for Clinical Choice - Gelling Fibre Dressings Support Document

- Evidence informing base-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: The gelling-fibre comparison uses free-swell absorbency rather than the accepted total-fluid-handling basis, constraining cross-material attribution to Moderate.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published High labels on the free-swell basis are not copied into this High-band revenue numerator.
- Evidence informing base-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.
- Evidence informing forecast-year allocation inputs; displayed values and growth are calculated: Published Ultra-High free-swell labels do not establish equivalent total-fluid-handling classification or attributable revenue.

19. Competitive Landscape

19.1. Market Share Analysis, 2025

[redacted] This supports competition among accepted offerings, not unrestricted substitution between material labels. An entrant needs an orderable product and an accountable supply route; an incumbent's broader catalog does not establish exclusive access to the account.

Therapy-linked relationships compete on more than the dressing itself. [redacted] A competing consumables route is commercially useful only if equipment access, accepted products, and ongoing responsibilities remain covered.

Broad medical-surgical suppliers combine different roles. Medline Inc. identifies an own-brand Optifoam Gentle Post-Op offering; Cardinal Health's Canadian catalog advertises a composite dressing with postoperative applications. [redacted] Buyers can compare ordering relationships and local obligations across these routes, but should not interpret the reseller names as separate sources of product ownership or infer manufacturer authorization from a listing alone. Channel switching is attractive only when the replacement seller can undertake the required fulfillment and customer-support duties.

[redacted] These are identifiable purchasing leads, not evidence that the

channels control the underlying brands or hold equivalent distribution rights. Buyers should compare the exact supplying entity, product status, and binding delivery arrangement before replacing a local route.

[illegible] Panamed Philippines Inc. lists DR Sofsorb for postoperative incision sites, while Zafire Distributors, Inc. advertises Lohmann & Rauscher Suprasorb X+PHMB for postoperative wounds. These companies add local supplier alternatives, but represented-product rights, registration responsibility, and continuing delivery remain distinct from the upstream manufacturer's capability.

Gulf account access ranges from specific represented products to broader portfolio positioning. [illegible] A buyer should prefer the route that identifies the required product and accepts local obligations, rather than assume that regional reach establishes equal access.

South African and East African examples show why local manufacture and distribution should be compared separately. [illegible] Local presence alone does not establish a public award or a comparative delivery advantage.

[illegible] Reavley Chemist GH's Elastoplast listing is marked sold out, illustrating that an advertised route need not be an available replenishment commitment. Buyers and discharge coordinators should confirm the accountable seller, exact product, payment responsibility, and delivery destination before relying on these routes for continuity.

Figure 32. Global Post-Operative Wound Dressings Market Share, by Key Player, 2025

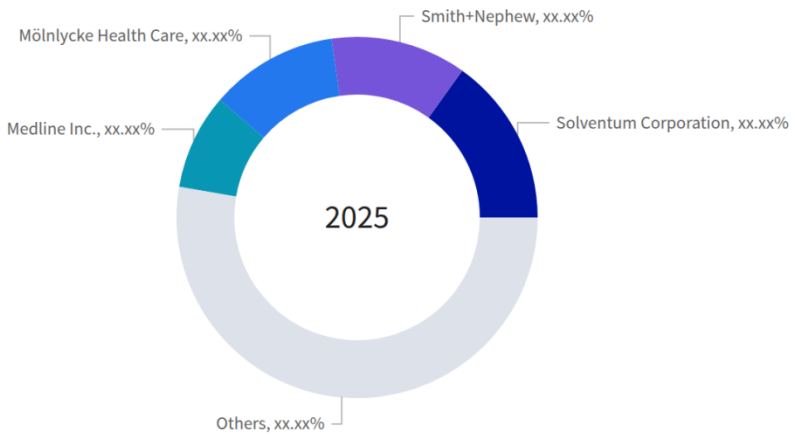

Table 525. Global Post-Operative Wound Dressings Market Share, by Key Player, 2025

Key Player	Share (%)
Advanced Medical Solutions Group plc	xx.xx
Allmed Medical	xx.xx
Aroa Biosurgery Limited	xx.xx
Coloplast	xx.xx
Convatec	xx.xx
Essity	xx.xx
Lohmann & Rauscher	xx.xx
Medline Inc.	xx.xx
Mölnlycke Health Care	xx.xx
NICHIBAN Co., Ltd.	xx.xx
PAUL HARTMANN AG	xx.xx
Smith+Nephew	xx.xx
Solventum Corporation	xx.xx
URGO Medical	xx.xx
Winner Medical Co., Ltd.	xx.xx
Zhende Medical	xx.xx
Others	xx.xx

Sources & Evidence

1. V.A.C. Therapy patient support
   - Solventum describes V.A.C. equipment, replenishment, support, and documentation-dependent billing responsibilities. ([solventum.com](https://www.solventum.com/en-us/home/medical/advanced-wound-care/negative-pressure-wound-therapy/vac-therapy/vac-for-patients/))
   - Evidence informing base-year company-share estimates: Describes patient-facing equipment, replenishment, return and billing responsibilities; supports separation of commercial support conditions from dressing revenue, not a numerical adoption rate.
2. Advanced Wound Care
   - The framework identifies diverse suppliers and purchasing routes. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/advanced-wound-care/))
3. Optifoam Gentle Post-Op Foam Wound Dressings
   - Medline's catalog identifies Optifoam Gentle Post-Op Foam Wound Dressings.
4. Negative Pressure Wound Therapy
   - The NPWT framework identifies alternative suppliers, including Smith & Nephew, and distinct equipment arrangements. ([supplychain.nhs.uk](https://www.supplychain.nhs.uk/product-information/contract-launch-brief/negative-pressure-wound-therapy/))
5. Cardinal Health Composite Dressing
   - Cardinal Health's Canadian catalog advertises its composite dressing with postoperative applications.
6. McKesson Advanced Wound Care Catalog
   - McKesson's catalog includes own-brand island dressings and a medical-surgical ordering route.
7. Essential Products for Ambulatory Surgery Centers
   - Dukal presents dressings and absorbent products within an ambulatory-surgery assortment.
8. Island Dressings - Sterile
   - Dynarex advertises sterile island dressings.
9. Mepore Self-Adhesive Absorbent Post-Operative Dressing
   - Surgo advertises Mepore postoperative dressings and identifies the Mölnlycke brand.
10. Dressing OPSITE Post-Op
    - Stevens catalogs Smith+Nephew OPSITE Post-Op.
11. OpSite Post-Op, Folienverbände
    - Henry Schein Medical GmbH lists OPSITE Post-Op with postoperative-wound positioning.
12. Opsite Post-Op Apósito Quirúrgico con Film Adhesivo
    - VitalHealth advertises OPSITE Post-Op as a surgical and postoperative dressing.
13. Catálogo Cuidado de Heridas
    - JTC's wound-care catalog includes AQUACEL surgical dressings.
14. Línea Cuidado de heridas
    - Medicox advertises postoperative Mepilex and Telfa-related products.
15. Allevyn Sacrum
    - Tagumedica lists ALLEVYN Sacrum with surgical-wound applications.
16. Apósito Primapore Smith & Nephew
    - Ortopedia Suiza advertises Primapore for postoperative surgical wounds.
17. Wound Management
    - Diagno-Pharm advertises Diagno-Med Compress and Diagno-Wound postoperative dressings.
18. Products - MULTI FIX-PAD
    - SM Health Care catalogs MULTI FIX-PAD for postoperative wounds.

19. Non Adhesive / Adhesive Alginate Dressing
    - Filta Safety offers adhesive and nonadhesive alginate dressings with postoperative-incision applications.
20. Advance Wound Care
    - SOZA Healthcare advertises RTD Wound Dressing with surgical/postoperative applications.
21. DR Sofsorb Absorbent Wound Dressing
    - Panamed Philippines lists DR Sofsorb for postoperative incision sites.
22. Perioperative & Wound Care: Supra X+PHMB
    - Zafire advertises L&R Suprasorb X+PHMB with postoperative applications.
23. Advanced Wound Care Products & Dressings
    - Cardio Edge advertises AQUACEL Surgical and AQUACEL Ag Surgical.
24. Wound Care
    - Croyance describes a wound-care distribution portfolio addressing postoperative wounds.
25. Wound Care
    - Pureline advertises a wound-care portfolio that includes postsurgical wounds.
26. Optimal Waterproof Dressing
    - PARADIZ lists an Optimal waterproof dressing with postoperative positioning.
27. Medrull
    - Super Care describes a Medrull agency and advertises postoperative dressings; these are its own commercial representations.
28. Beier Drawtex Healthcare
    - Beier identifies locally manufactured Drawtex and Maisha Medical as its local distributor.
29. CritiCare Waterproof Film Island Dressing
    - Be Safe Paramedical advertises CritiCare Waterproof Film Island Dressing for postsurgical wounds.
30. Laparoscopy Dressing
    - Euromed Surgicals identifies a Kenyan laparoscopy-dressing offering for small postoperative incision sites.
31. Mepore Adhesive Surgical Dressing
    - GoMed advertises Mepore Adhesive Surgical Dressing with postoperative positioning.
32. Product Catalogue - IRAP Non-Pharma Limited
    - IRAP Non-Pharma's catalog lists Primapore Adhesive Dressings.
33. Elastoplast Sterile Waterproof Dressing XXL
    - Reavley Chemist GH advertises Elastoplast postoperative dressings; the inspected listing is marked sold out.
34. Surgin Pad Surgical Dressing
    - Healthway advertises Surgin Pad Surgical Dressing with postoperative-recovery positioning.
35. Solventum Corporation - 2025 Form 10-K
    - Evidence informing base-year company-share estimates: Reports 2025 Advanced Wound Care sales of USD xx.xx and Infection Prevention and Surgical Solutions sales of USD xx.xx.
    - Evidence informing base-year company-share estimates: Reports USD xx.xx of durable-medical-device rental revenue within MedSurg; the model explicitly assumes its assignment to the wound-care pool before exclusion.
36. Solventum - 2025 Investor Day Presentation
    - Evidence informing base-year company-share estimates: Separates NPWT, advanced wound dressings and advanced skin care within the commercial portfolio, supporting distinct scope adjustments rather than whole-pool attribution.
37. Smith+Nephew - Fourth Quarter and Full Year 2025 Results
    - Evidence informing base-year company-share estimates: Reports 2025 Advanced Wound Care, Advanced Wound Devices and Advanced Wound Bioactives revenue pools of USD xx.xx, USD xx.xx and USD xx.xx.
    - Evidence informing base-year company-share estimates: These broader financial categories constrain the modeled numerator but do not disclose postoperative dressing sales.

38. Mölnlycke Annual Report 2025
    - Evidence informing base-year company-share estimates: The 2025 segment note reports EUR xx.xx of Wound Care revenue, including EUR xx.xx through distributors and EUR xx.xx directly to customers.
    - Evidence informing base-year company-share estimates: The commercial portfolio combines incision care, chronic-wound products and Avance Solo, supporting differentiated scope assumptions rather than treating all revenue as postoperative.
39. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement; Mepilex Border Post-Op versus Aquacel surgical
    - Evidence informing base-year company-share estimates: Identifies the published postoperative comparison of Mepilex Border Post-Op and AQUACEL Surgical; it does not measure purchasing conversion or supplier revenue and is not used as a share weight.
40. Convatec - FY25 Results
    - Evidence informing base-year company-share estimates: Reports 2025 Advanced Wound Care revenue of USD xx.xx, including USD xx.xx excluding InnovaMatrix and USD xx.xx of InnovaMatrix revenue.
    - Evidence informing base-year company-share estimates: Provides distinct financial pools for conventional advanced-dressing attribution and the limited qualifying matrix allowance.
41. AQUACEL SURGICAL cover dressing
    - Evidence informing base-year company-share estimates: Identifies AQUACEL SURGICAL as a finished postoperative cover, supporting single-offering attribution rather than counting its constituent materials separately.
42. HARTMANN by number
    - Evidence informing base-year company-share estimates: Reports 2025 Wound Care revenue of EUR xx.xx and xx.xx% organic growth, with commercial participation in traditional, advanced and Vivano NPWT products.
    - Evidence informing base-year company-share estimates: Provides the peer inputs of EUR xx.xx Wound Care revenue, EUR xx.xx Infection Management revenue and xx.xx% wound-care organic growth used in the explicitly assumed L&R comparability and temporal bridges.
43. Cosmopor Steril
    - Evidence informing base-year company-share estimates: Identifies Cosmopor Steril as a postsurgical finished dressing; supports the conventional-cover role but not its assumed revenue weight.
44. Essity - Health & Medical
    - Evidence informing base-year company-share estimates: Reports 2025 Health & Medical net sales of SEK xx.xx and describes wound care, compression, orthopedics and incontinence activities; the full business-area revenue is not treated as wound revenue.
45. Essity - Interim Report Quarter 2, 2025
    - Evidence informing base-year company-share estimates: The second-quarter 2025 report identifies Medical Solutions as xx.xx% of Health & Medical quarterly net sales. The model explicitly assumes that proportion for the annual bridge.
46. Leukomed Sorbact - bacteria- and fungi-binding surgical dressing
    - Evidence informing base-year company-share estimates: Identifies Leukomed Sorbact as a surgical dressing and supplies commercial ordering references; supports participation and product-role attribution, not postoperative sales volume.
47. L&R Sustainability Report 2024
    - Evidence informing base-year company-share estimates: Discloses approximately EUR xx.xx of 2024 sales and separate wound-care/NPWT, bandages/supports and set-system/hygiene activities. It supplies the legacy financial anchor, not a disclosed 2025 wound-segment numerator.
48. Lohmann & Rauscher Group acquired Unisurge International Ltd.
    - Evidence informing base-year company-share estimates: Dates the Unisurge acquisition to March xx.xx 2025 and discloses GBP xx.xx of 2024 turnover from a procedure-pack and OR-product business. That turnover is not inserted wholesale into postoperative dressing revenue.

49. L&R Global - Curapor
    - Evidence informing base-year company-share estimates: Identifies Curapor within the surgical-wound-dressing portfolio, supporting a finished postoperative offering role without establishing its sales weight.
50. Coloplast - Q1 2025/26 Earnings Release
    - Evidence informing base-year company-share estimates: Reports DKK xx.xx of Wound & Tissue Repair revenue and DKK xx.xx of Kerecis revenue for October-December 2025, giving a derived non-Kerecis pool of DKK xx.xx.
    - Evidence informing base-year company-share estimates: The model annualizes this quarter with explicit seasonality and product-return uncertainty; the source does not report the modeled calendar-year numerator.
51. Coloplast - Biatain Alginate
    - Evidence informing base-year company-share estimates: Identifies postoperative surgical wounds among Biatain Alginate applications, supporting commercial category participation but not the assumed postoperative revenue fraction.
52. Federal Reserve Board - Foreign Exchange Rates, G.5A, January 5, 2026
    - Evidence informing base-year company-share estimates: Provides the 2025 annual-average conversion of USD xx.xx per EUR used for the reported Wound Care revenue.
    - Evidence informing base-year company-share estimates: Provides the 2025 annual-average rate of SEK xx.xx per USD used to convert the modeled attributable revenue.
    - Evidence informing base-year company-share estimates: Provides the 2025 annual-average conversion of USD xx.xx per EUR used for the modeled attributable revenue.
    - Evidence informing base-year company-share estimates: Provides the 2025 annual-average rate of DKK xx.xx per USD used to convert the modeled attributable revenue.
    - Evidence informing base-year company-share estimates: 2025 EUR/USD conversion supports the modeled URGO numerator.
    - Evidence informing base-year company-share estimates: 2025 GBP/USD conversion supports the modeled AMS numerator.
    - Evidence informing base-year company-share estimates: 2025 CNY/USD conversion supports the modeled Winner numerator.
    - Evidence informing base-year company-share estimates: 2025 CNY/USD conversion supports the modeled Zhende numerator.
    - Evidence informing base-year company-share estimates: 2025 CNY/USD conversion supports the modeled Allmed numerator.
    - Evidence informing base-year company-share estimates: 2025 JPY/USD conversion supports the modeled NICHIBAN numerator.
53. Medline Inc. - Form S-1
    - Evidence informing base-year company-share estimates: Reports a USD xx.xx 2024 increase in advanced and essential wound-care products, anchoring the category-specific back-solved revenue model rather than directly establishing total wound sales.
54. Medline Inc. - 2025 Form 10-K
    - Evidence informing base-year company-share estimates: Reports xx.xx% 2025 Front Line Care growth and separates Medline Brand from third-party Supply Chain Solutions, supporting the growth proxy and resale exclusion.
55. Optifoam Gentle Post-Op Silicone/Foam Wound Dressing 4x8 1Ct
    - Evidence informing base-year company-share estimates: Identifies an Optifoam Gentle Post-Op offering and a household-facing cash-purchase route; does not disclose annual postoperative sales.
56. Urgo Medical - Unsere Kennzahlen
    - Evidence informing base-year company-share estimates: Displays EUR xx.xx and an unexplained EUR xx.xx revenue metric. Supports a divisional scale proxy while preserving unresolved period ambiguity.

57. Urgo Medical - UrgoTul Range
    - Evidence informing base-year company-share estimates: Identifies UrgoTul contact-layer and absorbent offerings with postoperative positioning, supporting the qualifying product premise but not its revenue fraction.
58. Advanced Medical Solutions Group plc - Annual Report & Accounts 2025
    - Evidence informing base-year company-share estimates: Reports GBP xx.xx 2025 Infection and Exudate Management revenue and describes partner-branded and bulk-material activity, constraining the selected pool and required exclusions.
59. Foam Dressing - Wound Care Range - ActivHeal Foam
    - Evidence informing base-year company-share estimates: Identifies ActivHeal foam offerings for postoperative surgical wounds, supporting an owned finished-dressing route distinct from customer-owned OEM products.
60. Advanced Medical Solutions - Ways of Working: OEM
    - Evidence informing base-year company-share estimates: Separately describes finished-goods OEM supply, contract manufacturing and co-development, supporting exclusion of upstream customer-owned transfers.
61. 稳健医疗用品股份有限公司 - 2025 年年度报告摘要
    - Evidence informing base-year company-share estimates: Reports approximately CNY xx.xx advanced-dressing revenue, including CNY xx.xx owned-brand revenue, and CNY xx.xx operating-room consumables revenue. These anchor the ownership-sensitive model.
62. Winner Medical - Super Absorbent Dressing
    - Evidence informing base-year company-share estimates: Identifies postoperative applications for Winner's superabsorbent dressing, supporting commercial scope without measuring postoperative sales.
63. 振德医疗用品股份有限公司 - 2025 年年度报告
    - Evidence informing base-year company-share estimates: Provides 2025 basic-care and ostomy/modern-wound-care revenue pools and domestic/export main-business revenue, supporting the category and provisional ownership bridges.
64. Zhende Medical - Non-Woven Island Dressing
    - Evidence informing base-year company-share estimates: Identifies a nonwoven island dressing with surgical-incision applications, establishing a qualifying finished-offering premise rather than sales magnitude.
65. Mölnlycke Health Care and Zhende Medical form pioneering joint venture to expand access to advanced wound care solutions in China
    - Evidence informing base-year company-share estimates: Describes the later China joint venture's sales/distribution role; it is not used to backcast additional 2025 revenue or duplicate partner sales.
66. 奥美医疗用品股份有限公司 - 2025 年年度报告全文
    - Evidence informing base-year company-share estimates: Reports surgical/wound-care and advanced-dressing revenues and a xx.xx% domestic revenue share; confirms Texpol consolidation and identifies imported-brand distribution activity requiring exclusion.
67. Allmed Medical - Nonwoven Island Dressing
    - Evidence informing base-year company-share estimates: Identifies a nonwoven island dressing for surgical incisions, supporting postoperative product scope but not the modeled revenue fractions.
68. NICHIBAN - Financial Results Briefing for the Fiscal Year Ended March 31, 2026
    - Evidence informing base-year company-share estimates: Reports fiscal March 2026 Hospital Products sales of JPY xx.xx and Global sales of JPY xx.xx with comparative changes, supporting reconstructed prior-year inputs and calendarization.
69. NICHIBAN - Financial Results Briefing for the Six Months Ended September 30, 2025
    - Evidence informing base-year company-share estimates: Reports six-month Hospital Products sales of JPY xx.xx, providing a limited independent scale check on the annual calendarization assumption.
70. ニチバン - 術後ケア
    - Evidence informing base-year company-share estimates: Identifies CATHEREEPLUS PAD within postoperative care, supporting the retained product boundary rather than the estimated sales mix.

71. Aroa Biosurgery Limited - Annual Report 2025
    - Evidence informing base-year company-share estimates: Reports FY25 Endoform sales of NZD xx.xx, Myriad sales of NZD xx.xx and Symphony sales of NZD xx.xx; supports product-family calendarization, not direct postoperative attribution.
    - Evidence informing base-year company-share estimates: Describes separate development-fee revenue and consolidated external-sales accounting, supporting exclusions and avoidance of resale double counting.
72. Aroa Biosurgery Limited - H1 FY26 Results, November 25, 2025
    - Evidence informing base-year company-share estimates: For the six months ended September xx.xx 2025, reports Endoform revenue of NZD xx.xx versus xx.xx and Myriad revenue of NZD xx.xx versus xx.xx; these constrain the fiscal-to-calendar bridge.
    - Evidence informing base-year company-share estimates: Shows a dash for current-period Symphony revenue, retained as a disclosure limitation rather than an established zero.
73. Aroa Biosurgery Limited - Annual Report 2026
    - Evidence informing base-year company-share estimates: The annual report states FY26 Myriad revenue of NZD xx.xx, used as the later product-family anchor.
    - Evidence informing base-year company-share estimates: Identifies wholly owned group subsidiaries, elimination of intercompany transactions and revenue recognition on external product transfers; supports consolidated offering-owner attribution.
74. Aroa Biosurgery Limited - FY26 Appendix 4E and Full Year Results, May 26, 2026
    - Evidence informing base-year company-share estimates: The company's May xx.xx 2026 results release reports FY26 Endoform revenue of NZD xx.xx versus xx.xx, providing the subsequent fiscal-year anchor for calendarization.
    - Evidence informing base-year company-share estimates: Its Myriad figure of NZD xx.xx differs slightly from the later annual report; the model uses the later xx.xx disclosure.
75. Federal Reserve Board - Foreign Exchange Rates, G.5A Annual, January 5, 2026
    - Evidence informing base-year company-share estimates: Publishes the 2025 annual-average exchange rate of USD xx.xx per New Zealand dollar, used to convert modeled attributable NZD sales into the frozen denominator's currency.
76. An Economic Evaluation of the Impact, Cost, and Medicare Policy Implications of Chronic Nonhealing Wounds
    - Evidence informing base-year company-share estimates: The primary Medicare analysis reports xx.xx% wound-related prevalence and xx.xx% nonhealing surgical-wound prevalence in 2014. Their ratio is used only as a historical exposure proxy before explicit product-specific adjustments, not as observed AROA purchasing mix.
77. Endoform - AROA
    - Evidence informing base-year company-share estimates: Identifies Endoform Natural and Antimicrobial offerings with surgical and nonsurgical wound applications. Supports qualifying portfolio membership while requiring a postoperative revenue adjustment.
78. AccessGUDID - Myriad Matrix Soft Tissue Bioscaffold, 09421906017670
    - Evidence informing base-year company-share estimates: The official commercial registry identifies Myriad Matrix under both nonimplant wound-matrix dressing and implantable surgical-mesh roles. Supports separating qualifying dressing activity from excluded implant activity, but does not measure either revenue fraction.
79. FDA 510(k) Premarket Notification - Symphony, K200413
    - Evidence informing base-year company-share estimates: FDA record K200413 identifies AROA's Symphony as an animal-derived wound dressing, supporting commercial category membership rather than sales volume or postoperative penetration.
80. Reimbursement - Aroa Biosurgery
    - Evidence informing base-year company-share estimates: Provides Endoform-specific coding assistance while retaining provider responsibility and disclaiming guaranteed payer coverage. Supports conditional-access assumptions, not a numerical sales uplift.

81. Mölnlycke and AROA Partner to Expand Access to Endoform in the US
    - Evidence informing base-year company-share estimates: States that US post-acute Endoform co-promotion takes effect October xx.xx 2026, with AROA retaining ownership, manufacturing, distribution and supply. Supports ownership attribution and exclusion of a retrospective 2025 partnership uplift.

19.2. Market Concentration Analysis, 2025

Commercial control rests partly with the purchasing arrangement rather than solely with the product owner. The NHS advanced-wound-care framework permits switching and supplier commitments, while its NPWT framework separates consumable ordering from equipment arrangements. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪

Finished-goods partnerships provide an entry route without requiring the entrant to own the supplying manufacturer. ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ A general partnership capability does not establish availability or exclusivity for a particular postoperative product.

Several company identities do not represent independent alternative supply chains. Allmed Medical records its acquisition of Texpol, associated with Textil Planas Oliveras S.A.; CareNow Medical Pvt Ltd identifies itself as part of Healthium Medtech Limited. ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪

▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ Such links can explain who coordinates a portfolio, but they do not transfer every product listing or customer commitment to the parent. Buyers should contract with the accountable supplying entity and establish whether a parent-level relationship actually covers the selected postoperative offering.

Technology participation does not necessarily confer finished-dressing control. ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪

[redacted] Buyers should confirm that their distributor has access to the exact offering; prospective partners need offering-specific rights rather than a general wound-care mandate.

Nipro and LIBATAPE PHARMACEUTICAL CO., LTD. illustrate a further limit to generic OEM assumptions. Libatape identifies Nipro as a co-development partner for named Surgit products and states that those jointly developed products are not available for general OEM supply. [redacted]

Local representation can establish regulatory accountability without establishing distribution power. Nigeria's Pharmapore record distinguishes Pharmaplast S.A.[redacted]

Direct selling and partner commercialization allocate control differently. Covalon Technologies Ltd. documents both direct hospital access and partner models, and its fiscal 2026 first-quarter discussion identifies disruption associated with an advanced-wound-care partner's ownership transition. [redacted]

Medela-related names require particular care. [redacted] A new account or seller identity is not, by itself, an independent alternative source.

Sources & Evidence

1. Advanced Wound Care
   - The framework permits product switching and supplier commitments.
2. Ways of Working - OEM
   - AMS advertises finished-goods, contract-manufacturing, and co-development OEM models.

3. Pharmapore Sterile Adhesive Nonwoven Dressing - NAFDAC Greenbook
   - NAFDAC distinguishes Pharmaplast as manufacturer and Excellent Port Company Limited as applicant for the named Pharmapore dressing. ([greenbook.nafdac.gov.ng](https://greenbook.nafdac.gov.ng/products/details/xx.xx))
4. Covalon Technologies Ltd. - MD&A Q1 F-2026
   - The filing describes direct and partner commercialization and an advanced-wound-care partner ownership-transition disruption, without postoperative-specific attribution.
5. Film Post-Operative Dressing - Jamjoom Medical Industries | Jamjoom Medical Solutions
   - Jamjoom advertises Jeddah manufacture and direct Saudi hospital supply for Film Post-Operative Dressing.
6. Negative Pressure Wound Therapy
   - Consumable ordering and equipment arrangements are separated.
7. Servizi
   - Eurosirel describes an integrated private-label manufacturing and commercialization service.
8. Wound Hydrogel - OEM/ODM Supplier
   - Hannox advertises HX-WH22 Wound Hydrogel for postoperative wounds through an OEM/ODM proposition.
9. Our History - Allmed Medical
   - Allmed's corporate history records its Texpol acquisition, supporting a related-business distinction.
10. About Us - CareNow Medical
    - CareNow identifies itself as part of Healthium Medtech Limited.
11. FAQ - DermaRite Medical
    - DermaRite identifies SionBrands as the US platform of the Sion Medical-Degasa Group.
12. BeneHold CHG Antimicrobial Adhesive Technology
    - Avery Dennison's BeneHold CHG brochure identifies postoperative applications and references ReliaTect and Eloquest trademarks associated with Ferndale IP.
13. SKU & Distributor Information
    - Eloquest states that ReliaTect Post-Op is available through limited distributors.
14. Medaxis NPWT Customer Transition Communication
    - Medaxis describes the Medela wound-care transition and states that the companies share parent ownership.
15. 技術事例「10μm テープ：サージット」
    - Libatape identifies Nipro as a co-development partner for named Surgit products and states that those products are not generally available for OEM supply.
16. Nossas Marcas - Viveo
    - The brand relationship does not identify every product's accountable operating supplier.
17. Mediplast Transparency Act Due-Diligence Report
    - Mediplast's due-diligence disclosure identifies AddLife ownership and a Nordic medical-supply role.

19.3. Recent Developments & Impact Analysis, 2025

Commercial partnerships can expand account access without transferring product ownership. Mölnlycke Health Care announced an exclusive US post-acute Endoform co-promotion agreement effective October xx.xx 2026. ■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■ ■■■■■■■■ ■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■■

China localization is advancing through a shared commercial organization rather than an announced acquisition of the partners' entire portfolios. The May xx.xx 2026 Mölnlycke-Zhende

Medical announcement describes a majority-Mölnlycke-owned venture initially focused on sales and distribution. ▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪

Acquisitions have changed the relationship between regional brands and channels. ▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ Contracting responsibility and continuity of the selected product remain the practical buyer checks.

▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ Buyers can now direct listing and delivery discussions to a named intermediary, but exclusivity, institutional acceptance, and continuing fulfillment are not established by the announcement. The relationship should not be projected backward into the 2025 purchasing environment.

Offering-level supply restrictions can outweigh broad portfolio participation. FDA's March xx.xx 2026 update classified the identified Integra LifeSciences Holdings Corporation MediHoney and CVS wound-product action as a Class II recall. ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪

▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ Separately, the August xx.xx 2024 Medaxis communication describes NPWT ordering and renewal changes from November xx.xx 2024 following the Medela wound-care transition. That is a commercial-account change; the NHS delisting of Medela UK Ltd remains a jurisdiction-specific purchasing fact, not proof of a universal withdrawal by every Medela-related entity.

Sources & Evidence

1. Safe N Simple LLC and Advamedica Announce Nationwide Distribution Partnership for MaxioCel in the United States
   · The announcement body dated April xx.xx 2026 names Safe N Simple as Advamedica's nationwide US distribution partner; it does not establish exclusivity or realized fulfillment.
2. Negative Pressure Wound Therapy
   · The framework records Medela UK Ltd as delisted after exiting that market.
3. FAQ - DermaRite Medical
   · DermaRite states that it joined the group in 2025.
4. Medaxis NPWT Customer Transition Communication
   · The August xx.xx 2024 customer letter describes NPWT ordering and renewal changes from November xx.xx 2024.
5. Mölnlycke and AROA Partner to Expand Access to Endoform in the US
   · The exclusive US post-acute co-promotion agreement is effective October xx.xx 2026; AROA retains Endoform ownership and manufacture, distribution, and supply. ([molnlycke.com](https://www.molnlycke.com/en-my/news/molnlycke-news/news---molnlycke-and-aroa-partner-to-expand-access-to-endoformtm-in-the-us/))
6. Mölnlycke Health Care and Zhende Medical Form a Joint Venture in China
   · The May xx.xx 2026 announcement describes a majority-Mölnlycke-owned China venture initially focused on sales and distribution. ([molnlycke.com](https://www.molnlycke.com/en-my/news/media-room/press-release-molnlycke-health-care-and-zhende-medical-form-pioneering-joint-venture-to-expand-access-to-advanced-wound-care-solutions-in-china/))
7. Martin Ma Joins Mölnlycke Zhende as General Manager
   · The October xx.xx 2026 announcement identifies the venture's general manager and commercial-execution responsibilities, not product-level rollout. ([molnlycke.com](https://www.molnlycke.com/en-my/news/molnlycke-news/news-martin-ma-joins-molnlycke-zhende-as-general-manager/))
8. Casex Agora é Gentell
   · Gentell states that it completed the Casex acquisition on June xx.xx 2025, including products, personnel, and manufacturing assets in Brazil and Paraguay.
9. CFAO Healthcare Acquires Goodlife Pharmacy
   · CFAO Healthcare announced full ownership of Goodlife Pharmacy on July xx.xx 2025.
10. Wound and Burn Dressing Recall: Integra LifeSciences Removes Certain MediHoney and CVS Products
    · FDA's March xx.xx 2026 update classifies the identified MediHoney and CVS action as a Class II recall and does not establish resumed supply. ([fda.gov](https://www.fda.gov/medical-devices/medical-device-recalls-and-early-alerts/wound-and-burn-dressing-recall-integra-lifesciences-removes-certain-medihoney-and-cvs-wound-and-burn))
11. Rebranding from 3M to Solventum
    · Solventum schedules dressing-family rebranding and states that product designs and catalog numbers remain unchanged.

19.4. Product Portfolio Analysis, 2025

Post-Operative Wound Dressings compete through finished offerings with different purchasing roles, rather than through material categories alone. PAUL HARTMANN AG's Cosmopor Steril and Lohmann & Rauscher's Curapor provide conventional absorbent surgical-cover alternatives. ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■ ■■ ■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■■■ ■■ ■ ■■■■■■■■■■■■■■■■

[redacted]

Absorbent dressings and contact-layer portfolios create a separate comparison. B. Braun SE advertises Askina DresSil Active for surgical wounds; Coloplast identifies postoperative applications for Biatain Alginate; and URGO Medical's UrgoTul range includes contact-layer and absorbent formats. [redacted]

Antimicrobial-related portfolios are commercially differentiated but should not form an unsupported performance hierarchy. Bravida Medical advertises Silverlon Surgical Island Dressings; Covalon Technologies Ltd. identifies SurgiClear and MediClear Post-Op Absorb; MedCu Technologies offers copper-based adhesive and nonadhesive dressings; and Dynamic Techno Medicals Pvt. [redacted]

Specialty wound-management products broaden the portfolio beyond routine adhesive incision covers. Human BioSciences, Inc. advertises ColleCule LpH Collagen Pad for surgical wounds with a professional prescription condition. [redacted]

China- and India-linked suppliers add relevant finished-dressing alternatives without establishing unrestricted destination access. Allmed Medical and Zhende Medical advertise nonwoven island dressings for surgical incisions. [redacted]

Japanese portfolios illustrate the difference between a postoperative range and a general surgical-pad assortment. ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ These distinctions favor product-level qualification over assuming that a Japanese supplier's broader medical portfolio establishes equivalent postoperative coverage.

European conventional-cover alternatives include ZARYS International sp. z o.o.'s elastopor STERIL, Plastod S.p.▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪

Turkey-linked offerings also require format-specific comparison. ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ This creates a practical distinction between explicitly positioned postoperative alternatives and broader surgical-cover candidates, without implying that the latter lack a relevant commercial role.

Brazilian portfolio choices include Polar Fix's postoperative transparent-film offering, Missner & Missner Ltda.'s M-TEC incision-protection dressings, and Vuelo Pharma's Membracel cellulose membrane. ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ Laboratorio Celina must remain a distinct identity from Vuelo Pharma; a similar product name does not establish affiliation, common rights, or product equivalence.

Ophthalmic Surgery requires its own peer group within the accepted market. ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ Neither specialty covering should be benchmarked as if it were a general cutaneous incision-dressing portfolio.

[redacted] The same distinction between a documented dressing family and a qualified postoperative offer applies to legacy portfolios. Portfolio breadth is useful for sourcing discussions, but not sufficient to establish that every historical configuration remains an accessible alternative.

Topical Oxygen Therapy and Bioelectric Wound Therapy remain within the accepted platform scope. Mölnlycke Health Care's topical-oxygen portfolio identifies Granulox in a chronic-wound context; that page does not establish a postoperative alternative for a particular buyer. [redacted]

Sources & Evidence

1. AQUACEL SURGICAL cover dressing
   - Convatec presents AQUACEL SURGICAL as an integrated postoperative cover combining several dressing attributes.
2. MedCu - Advanced Copper-Based Wound Dressings
   - MedCu advertises copper-based adhesive and nonadhesive dressings with surgical-wound applications.
3. Covalon Technologies Ltd. - MD&A Q1 F-2026
   - Covalon's filing identifies SurgiClear and MediClear Post-Op Absorb.
4. Safe N Simple LLC and Advamedica Announce Nationwide Distribution Partnership for MaxioCel in the United States
   - The announcement identifies MaxioCel as a chitosan gelling-fiber dressing with surgical-wound applications.
5. Membracel - Vuelo Pharma
   - Vuelo identifies Membracel as a cellulose membrane with surgical-wound applications; this does not establish affiliation with a similarly named product.
6. OPTIPAD - Médicale Gaze
   - Médicale Gaze distinguishes adult OPTIPAD postoperative protection and absorption from pediatric orthoptic occlusion.
7. ドレッシング材｜商品情報（医療関係者向け）
   - ALCARE's Japanese catalog lists KARAYAHESIVE, SILKYPORE DRESSING, and MULTI FIX-PAD.
8. Endoform | AROA
   - AROA identifies Endoform restorative bioscaffolds for specified surgical applications and qualifies country availability.
9. Cosmopor Steril
   - HARTMANN advertises Cosmopor Steril for postsurgical wounds and incision sites.
10. Curapor
    - Lohmann & Rauscher advertises Curapor surgical dressings with postoperative applications.
11. Askina DresSil Active
    - B. Braun advertises Askina DresSil Active for surgical wounds.
12. Biatain Alginate
    - Coloplast identifies postoperative surgical wounds among Biatain Alginate applications.

13. UrgoTul Range
    - URGO's UrgoTul range includes contact-layer and absorbent formats with postoperative positioning.
14. Covaderm GTL Silicone Composite Wound Dressing
    - DeRoyal advertises Covaderm GTL silicone composite dressings with incision applications.
15. Super Absorbent Dressing
    - Winner Medical advertises postoperative applications for superabsorbent dressings.
16. Silverlon Surgical Island Dressing
    - Bravida advertises Silverlon Surgical Island Dressings and qualifies country availability.
17. Sterizone ST Antimicrobial Silver Wound Dressing
    - Dynamic Techno Medicals advertises Sterizone ST silver dressings with postoperative applications.
18. Xeroform Petrolatum Gauze Dressing
    - Safe N Simple markets Simpurity Xeroform gauze with surgical-wound applications.
19. Collagen Wound Care Products
    - Human BioSciences advertises ColleCule LpH Collagen Pad for surgical wounds and identifies a professional prescription condition.
20. About Us - PolyMem Dressings
    - Ferris identifies itself as the producer and distributor behind PolyMem.
21. Nonwoven Island Dressing
    - Allmed advertises a Nonwoven Island Dressing for surgical incisions.
22. Non-Woven Island Dressing - Zhende Medical
    - Zhende advertises a nonwoven island dressing with surgical-incision applications.
23. Silicone Postoperative Dressing
    - Foryou identifies its silicone postoperative dressing.
24. Velfix T+Pad
    - Datt offers Velfix T+Pad as a postoperative film-and-pad dressing.
25. 術後ケア
    - Nichiban's postoperative-care portfolio identifies CATHEREEPLUS PAD.
26. 術後創
    - Nitoms' postoperative catalog supplies a named dressing lead; parent, seller, and manufacturing roles require separate matching.
27. オーゼ CP
    - Osaki advertises Oze CP surgical pads; this record does not settle the proposed postoperative purchasing application.
28. Dressings - ZARYS
    - ZARYS advertises elastopor STERIL for postoperative wounds.
29. Wound Dressing - Plastod
    - Plastod advertises film dressings for surgical sites.
30. Pflaster - DRACO
    - DRACO's plaster portfolio includes postoperative positioning.
31. MaiMed porefix steril
    - MaiMed advertises porefix steril as a postoperative dressing.
32. Wound Care Products for Clinical Environments and Home Care
    - ABENA advertises postoperative dressings, including waterproof and film versions.
33. Plasters - Tosama
    - Tosama advertises plasters for surgical wounds.
34. Post Operatori - Presteril
    - Corman's Presteril postoperative category offers several named dressing families.

35. Хірургічні пов'язки торгової марки IGAR
    - IGAR advertises transparent surgical dressings with absorbent pads.
36. Nasze Rozwiązania - Matopat
    - Matopat's materials identify Fixopore postoperative dressings.
37. OctaCare Non-Woven Wound Dressings
    - Octamed positions OctaCare nonwoven dressings for postoperative sutured wounds.
38. Our Products - Seyitler Kimya
    - Seyitler advertises Maxipore Dress and Maxipore PU Dress for postoperative wounds.
39. Wound Care Series
    - LifeCare advertises nonwoven and transparent dressings for postoperative protection.
40. Betapad Adhesive Surgical Dressing
    - Betasan advertises Betapad as a complete adhesive surgical dressing.
41. Topical Oxygen Therapy
    - Mölnlycke identifies Granulox within topical oxygen therapy in a chronic-wound context, not as a settled postoperative purchasing alternative.
42. Multi-Layered Wound Dressing
    - MPM advertises a multilayer wound dressing with surgical-wound applications.
43. AMERX Bordered Gauze Dressing
    - AMERX separately offers a bordered-gauze dressing.
44. Restore Calcium Alginate Dressing
    - Hollister maintains a Restore Calcium Alginate listing; the listing alone does not settle current postoperative application continuity.
45. Produtos - Polar Fix
    - Polar Fix's portfolio lists a postoperative transparent-film dressing.
46. Linha Curativos Avançados - Missner
    - Missner's M-TEC portfolio includes protection of surgical incisions.
47. Nossas Marcas - Viveo
    - Viveo identifies Cremer within its brand portfolio.

19.5. Benchmarking Analysis, 2025

A useful benchmark begins with the buyer's requirement: the same surgical application, finished configuration, jurisdiction, accepted purchasing route, and continuity obligation. ■■■ ■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■■■■ Suppliers should therefore be compared within defensible peer groups-conventional incision covers, differentiated absorbent covers, specialist matrices or membranes, and therapy-linked arrangements-before broader portfolio or channel capabilities are considered.

Application-specific comparative evidence can support narrower purchasing criteria than a brand-wide superiority claim. The published open-label hip- and knee-replacement comparison of Mepilex Border Post-Op and Aquacel Surgical reported low dressing failure with both, alongside handling and patient-experience differences favoring Mepilex. ■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■ ■ ■■■■■■ ■■■■■■■ ■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■

[illegible] L., direct entity-to-offering responsibility also requires confirmation. Buyers should resolve the legal seller, brand owner, and product identity before relying on these routes as substitutes; a familiar product description cannot cure an ambiguous counterparty.

Broader wound-care portfolios should not be scored as if every product were a confirmed postoperative alternative. [illegible] Each needs a product-specific application and supply match before conversion.

The same distinction affects Farmac-Zabban S.p.A., Eurosirel, Evercare Medical, Laboratoires Euromedis, and Gaspunt, S.A. [illegible]

Retail and abbreviated identities require a different benchmark from manufacturing suppliers. Todo Medica, Farmacias Julios, ALMAR SRL, JMS S.A. [illegible]

Gulf portfolios differ in how far they identify an actionable purchasing alternative. Saudi Mais Co., SAS MED, and Aumet For Pharmaceuticals & Medical Disposables Co. advertise relevant wound-care categories or divisions; Alfarsi Medical Supplies and PolyMed describe surgical or medical disposables. [illegible]

[illegible] Al Essa Med, Al Mutawa Ph, and Green Heart Pharmacy require an exact postoperative product match rather than inference from store presence or a broader wound-care listing. Turuq Al_Tashkis Company identifies advanced wound care as a business area, but an offering-specific mandate remains unresolved.

[illegible] Arsin Salamat Iranian advertises a postsurgical Lomatuell Pro route, but current local rights and fulfillment require separate confirmation. These conclusions preserve the distinction between a plausible commercial lead and an accountable purchasing commitment.

[illegible] Regino Medicals Limited, Sterifil, and ULTIMED retain unresolved named-offering and supplier-responsibility questions. These distinctions matter when deciding which counterparty can undertake the required institutional or household supply obligation.

Asian supplier benchmarks should separate product evidence from a general regional footprint. Genewel Co., Ltd.'s Medifoam-related regional agreements do not themselves establish a particular postoperative product's local access. [illegible]

Cotton Craft (Pvt.) [illegible]

[redacted] Manarti Exports requires the same product-to-entity confirmation and a destination supply commitment; country-targeted promotion alone should not be interpreted as local presence.

Several specialist identities need clarification of the finished offering rather than investigation of technical methods. [redacted] Bastos Viegas, S.A. needs a current qualifying finished offering and supply-party match.

At group and legacy-brand level, Milliken & Company's comparison requires confirmation of the entity supplying the OVIK-advertised surgical-wound foam range. Mediq's Klinion postoperative portfolio needs an exact local brand-to-contract relationship. [redacted]

Sources & Evidence

1. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement...
   · The open-label arthroplasty comparison reports low dressing failure for both products and handling and experience differences favoring Mepilex within that study. ([biblio.ugent.be](https://biblio.ugent.be/publication/xx.xx))
2. Advanced Wound Care
   · Framework participation provides an institutional comparison boundary, not universal product interchangeability.
3. Leukomed Sorbact for preventing surgical site infection - Information for the public
   · NICE's Leukomed Sorbact public guidance concerns specified caesarean-section and vascular-surgery wounds. ([nice.org.uk](https://www.nice.org.uk/guidance/htg567/informationforpublic))
4. Essential Products for Ambulatory Surgery Centers
   · The assortment establishes a surgery-center supply role, not a universal postoperative product match.
5. Island Dressings - Sterile
   · The named complete-dressing listing does not itself settle the proposed postoperative purchasing application.
6. Servizi
   · The services page establishes a business model rather than a named current postoperative offering.

7. Four Main Types of Wound Dressings
   - OVIK advertises ULTRA foam-family products with surgical-wound applications; the product presentation alone does not settle parent-to-supplier rights.
8. Non-Woven Yara Pedi
   - Cansın maintains a nonwoven wound-pad listing; the proposed postoperative application requires confirmation.
9. ALPHETA Catalog
   - Honnes hosts an older ALPHETA dressing catalog, which does not independently settle continuing postoperative availability.
10. Advazorb - Advancis Medical
    - Advancis advertises Advazorb foam dressings; the proposed postoperative configuration requires separate matching.
11. Clearpore - Transparent Film Dressing with Pad
    - Clearpore is an identified postoperative film-and-pad offering; the page combines Richardson Limited and Inc. references.
12. ActivHeal Silicone Foam Adhesive Border Dressing - MedHub
    - MedHub's ActivHeal product listing contains a conflicting Mölnlycke brand attribution.
13. Transparent Film with Island Dressing - Wynnmed
    - Wynnmed advertises a postoperative film-island dressing; the product page does not settle all legal-operator and brand responsibilities.
14. Products and Services - Batist Medical
    - Batist lists ELASTPORE+PAD within its portfolio; an exact postoperative purchasing application remains to be matched.
15. Our Product Portfolio - Medicareplus
    - Medicareplus offers dressings and dressing packs; broad portfolio presence does not settle the named postoperative product.
16. Tapes & Wound Dressings - MEDISEI
    - MEDISEI lists pad-and-adhesive dressing products; the proposed postoperative application requires confirmation.
17. Contact - Evercare Medical
    - Evercare identifies a Surgery, Wound & Hospital Care business unit; this does not identify a named postoperative dressing.
18. Apósitos Tejido Sin Tejer
    - Gaspunt's nonwoven-dressing category does not provide an individual postoperative product match.
19. Apósitos - Laboratorios Emetex
    - Emetex advertises complete dressing products; the exact postoperative application and contracting entity require matching.
20. Products - Saudi Mais
    - Saudi Mais advertises wound-care categories, including transparent and honey dressings.
21. Business - SAS MED
    - SAS MED advertises wound-dressing inventory categories without settling the exact postoperative offer.
22. Disinfection & Wound-care Division
    - Aumet identifies a dedicated disinfection and wound-care division.
23. Surgical Consumables - Alfarsi Medical Supplies
    - Alfarsi advertises surgical dressings within its consumables portfolio.
24. Medical Disposables - PolyMed
    - PolyMed's Oman-facing page advertises medical-disposable and dressing categories.
25. About Us - Elite-Ag
    - Elite-Ag describes an advanced-dressing manufacturing and supply business.

26. Advanced Wound Care - Nhara
    - Nhara advertises advanced-wound-care categories addressing post-surgical wounds.
27. Partners - AMAD Gulf Industrial
    - AMAD advertises selected private-label, distribution, and institutional supply partnerships.
28. Turuq Al_Tashkis Company
    - Turuq Al-Tashkis identifies advanced wound care as a business area without establishing an offering-specific mandate.
29. TrueTrip Adhesive Wound Dressing
    - Green Heart Pharmacy lists a TrueTrip adhesive wound dressing; an exact postoperative match remains necessary.
30. CurALL
    - CurALL advertises AQUABLOCK as a postoperative dressing; the catalog does not settle its responsible legal operator.
31. SOCIETE PARA PHARMA PROMOTION
    - SOCIETE PARA PHARMA PROMOTION describes relevant dressing and platform activities without a settled named postoperative offer.
32. Adhesive Bandage Products - SOCOTHYD
    - SOCOTHYD lists adhesive-product categories rather than identifying the complete postoperative product for the proposed purchase.
33. Wound Dressing - Medic
    - Medic's catalog lists Post Operative Wound Dressing; the page does not resolve all legal and product-responsibility mapping.
34. Hospital Consumables - Agary Pharmaceutical
    - Agary lists a tulle dressing; a postoperative application match remains separate.
35. Company History - Genewel
    - Genewel records Medifoam-related regional agreements, which do not themselves establish a particular postoperative product's local access.
36. About Us - MediPurpose
    - MediPurpose describes its MediPlus advanced-wound-care portfolio without confirming every historical postoperative SKU's continuing availability.
37. Wound Care Products and Wound Management Solutions - Klinion
    - Klinion advertises postoperative border plasters; local brand-to-contract responsibility requires separate matching.

20. Company Profiles

20.1. Solventum Corporation

Solventum offers a postoperative platform relationship rather than only a disposable dressing. [illegible] rental terms should not be assumed to govern every Prevena configuration.

[illegible] A coordinated relationship provides an identified support route but retains administrative dependencies and payer-specific conditions. Equivalent arrangements outside the United States require separate confirmation.

Sources & Evidence

1. Medical support
   - Solventum advertises round-the-clock US V.A.C. support and directs patients to telephone and app-based supply-ordering assistance.
2. V.A.C. Therapy patient support
   - Solventum's US patient page identifies Prevena for incision management and describes ActiV.A.C. rental, replenishment, and return arrangements.
   - The page states that missing provider documentation can prevent insurance billing and result in equipment collection or personal payment responsibility.
3. Negative Pressure Wound Therapy - Medicare Provider Compliance Tips
   - CMS's NPWT compliance example describes payment recoupment following insufficient documentation. The example concerns a diabetic-foot-ulcer claim, not proof of postoperative eligibility.
4. April 4, 2024 - 8-K: Current report
   - Company verification: The filing identifies Solventum Corporation and establishes its separation from 3M effective April xx.xx 2024.
5. Advanced wound care and skin care solutions
   - Company verification: The Solventum-hosted wound-care catalog includes Tegaderm dressings with closed surgical-incision positioning.
6. Rebranding from 3M to Solventum | Solventum
   - Company verification: Solventum's current rebranding notice identifies Tegaderm and Medipore dressing families in its Q3 2026 transition schedule and states that product designs and catalog numbers remain unchanged. This refreshes portfolio-continuity evidence without establishing inventory or sales. ([solventum.com](https://www.solventum.com/en-us/home/medical/support/rebranding-from-3m-to-solventum/))

20.2. Smith+Nephew

Smith+Nephew supplies both standard incision coverings and single-use NPWT. OPSITE POST-OP is presented as a postoperative film dressing with an absorbent pad for closed surgical incisions; PICO xx.xx is presented as a single-use NPWT system for open wounds and closed surgical incisions. ■■■■ ■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■ ■■■■■■■■■■

■■■ ■■■ ■■■■ ■■■■■■■■■ ■■■■■ ■■■■■ ■ ■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ Smith+Nephew explicitly cautions that not all products or indications are licensed in every country. Retaining multiple platforms preserves purchasing choice but requires offering-specific clinical acceptance and contracting.

Sources & Evidence

1. Negative Pressure Wound Therapy
   - The NHS NPWT framework names Smith & Nephew among suppliers.
   - Consumables use catalog routes, while equipment access includes directly arranged purchase, rental, and free-on-loan relationships; the summary does not assign identical terms to every supplier offering.
2. OPSITE POST-OP Transparent Waterproof Dressings
   - Smith+Nephew presents OPSITE POST-OP as a postoperative film dressing with an absorbent pad for closed surgical incisions.
   - The page cautions that not all products or indications are licensed in every country.
3. PICO 7 Single Use Negative Pressure Wound Therapy System
   - Smith+Nephew presents PICO xx.xx as a single-use NPWT system for open wounds and closed surgical incisions, establishing a distinct platform alongside its standard postoperative dressing.
4. Advanced Wound Care
   - Company verification: Named advanced wound-care framework supplier.
5. OPSITE POST OP | Smith+Nephew Global
   - Company verification: Smith+Nephew markets OPSITE POST-OP transparent waterproof dressings for postoperative incision protection.

20.3. Mölnlycke Health Care

Mölnlycke offers Mepilex Border Post-Op as an incision-dressing proposition that can be assessed on handling and patient experience, not only complication outcomes. ■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■ ■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■■ ■■■ ■■■ ■■■■ ■■■■ ■■■■■■■■■ Arthroplasty purchasers can include these criteria in selection, but should not interpret the comparison as universal clinical superiority or automatically transfer it to other surgical applications.

Mölnlycke's sustainability frameworks have different comparison boundaries. Its stated product-LCA comparison policy uses its own portfolio average rather than competitors; its separate portfolio sustainability assessment considers mainstream alternatives. ■■■■■■■

[redacted]

Sources & Evidence

1. A prospective randomized controlled clinical investigation comparing two post-operative wound dressings used after elective hip and knee replacement...
   - The published 2020 open-label hip- and knee-replacement comparison reported low dressing failure with both Mepilex Border Post-Op and Aquacel Surgical, with several handling and patient-experience measures favoring Mepilex.
2. Sustainable portfolios
   - Mölnlycke identifies Mepilex Border Post-Op as a postoperative offering.
   - Its stated product-LCA comparison policy uses its own portfolio average rather than competitors, while its separate Sustainable Product Portfolio Assessment considers mainstream market alternatives.
3. Advanced Wound Care
   - Company verification: Named advanced wound-care framework supplier.
4. Mepilex Border Post-Op
   - Company verification: Mölnlycke offers Mepilex Border Post-Op as a self-adherent absorbent surgical dressing and provides procurement information.
5. Mölnlycke Health Care and Zhende Medical form pioneering joint venture to expand access to advanced wound care solutions in China
   - Company verification: A May xx.xx 2026 company announcement describes a China joint venture with Zhende Medical, majority owned by Mölnlycke.
   - Company verification: The announced initial role is sales and distribution of the partners' advanced-wound-care products.
   - Company verification: The announcement expected operations during Q3 2026; it does not establish realized product sales.

20.4. Convatec

Convatec provides AQUACEL SURGICAL as a finished surgical-cover offering, not merely a source of gelling fiber. Its UK portfolio describes a single-product postoperative solution combining Hydrofiber, hydrocolloid, and film attributes. [redacted] Purchasers and distributors should match the exact standard or Ag product and local supplying party before extending a portfolio selection across jurisdictions. An integrated cover consolidates the product decision but retains variant- and country-specific access requirements.

Sources & Evidence

1. AQUACEL SURGICAL cover dressing
   - Convatec's UK portfolio presents AQUACEL SURGICAL as a single-product postoperative incision-management offering combining Hydrofiber, hydrocolloid, and film attributes.
   - Company verification: Convatec offers AQUACEL SURGICAL cover dressings for postoperative management of surgical incisions.
2. Convatec Australia Pty Ltd - AQUACEL Ag Surgical Cover Dressing - Dressing, hydrophilic gel-forming (216814)
   - The Australian ARTG record identifies AQUACEL Ag Surgical Cover Dressing, Convatec Australia Pty Ltd as sponsor, and Convatec Limited as manufacturer. It concerns the named Ag offering rather than the complete AQUACEL portfolio.
3. Advanced Wound Care
   - Company verification: Named advanced wound-care framework supplier.

20.5. Essity

[redacted] NHS Supply Chain separately names Essity T/A BSN Medical Ltd on its advanced-wound-care framework. These records establish a named offering and institutional contracting identity, not automatic acceptance of every configuration or superiority to silver-based products.

NICE's published public guidance identifies Leukomed Sorbact as an NHS option for caesarean-section and vascular-surgery wounds within its stated wound criteria. [redacted] The benefit is a distinct microbial-binding purchasing option; the limitation is that broader portfolio positioning does not itself extend the scope of application-specific evidence.

Sources & Evidence

1. Advanced Wound Care
   - NHS Supply Chain names Essity T/A BSN Medical Ltd among advanced-wound-care framework suppliers, corroborating the institutional contracting identity without establishing every product configuration's acceptance.
   - Company verification: Listed as Essity trading through BSN Medical.
2. Leukomed Sorbact - bacteria- and fungi-binding surgical dressing
   - Essity's Leukoplast portfolio lists Leukomed Sorbact as a bacteria- and fungi-binding surgical dressing with postoperative positioning.
   - The product page supplies commercial order references and NHS Supply Chain codes and identifies Leukoplast as an Essity brand.
3. Respond to the rise of surgical site infections and AMR with Leukomed Sorbact
   - Essity identifies Leukomed Sorbact with DACC technology and presents a physical microbial-binding proposition without release of active substances. This establishes the company's commercial positioning, not independent comparative superiority.

4. Leukomed Sorbact for preventing surgical site infection - Information for the public
   - NICE's public guidance identifies Leukomed Sorbact as an NHS option for caesarean-section and vascular-surgery wounds within its stated wound criteria. The guidance is application-specific rather than an all-surgery recommendation.
5. Leukomed
   - Company verification: Essity's Australian portfolio offers Leukomed sterile absorbent dressings following surgical intervention.

20.6. Medline Inc.

Medline Inc. combines an own-brand product business with distribution relationships through its subsidiaries. Its filing distinguishes Medline Brand from Supply Chain Solutions, which supplies third-party products, and explains that Medline Inc. controls the business through Medline Holdings. ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■ ■■ ■■■■■■■■ ■■■■ ■ ■■■■■■ ■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■ ■ ■■■■■■■■■■■■■■ ■■■■■■■■■■

■■■■■■■■ ■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■ ■■■■■ ■■■■■ ■■■■■■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ However, that storefront states that it conducts cash sales and does not submit insurance claims or verify Medicare coverage. A familiar institutional brand can therefore involve a different payment relationship after discharge.

Providers can identify the household route as an option after confirming the required SKU, delivery availability, and who pays. ■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■ ■■ ■■■ ■ ■■■■■■■■■■ ■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■ ■■■■■■ Channel convenience must be weighed against personal payment responsibility and product-specific fulfillment; a portfolio listing does not establish continuing availability through every retail outlet.

Sources & Evidence

1. Consumer - Medline
   - Medline describes consumer access through retail stores, online channels, and Medline at Home. This is channel-level information, not confirmation that a particular postoperative SKU is supplied by every outlet.
2. Optifoam Gentle Post-Op Foam Wound Dressings
   - Medline's catalog identifies Optifoam Gentle Post-Op Foam Wound Dressings and names MEDLINE as manufacturer. The designation does not identify the ownership of every production facility.
   - Company verification: Medline's catalog identifies Medline as manufacturer of Optifoam Gentle Post-Op Foam Wound Dressings.
3. Optifoam Gentle Silicone-Faced Post-Op Foam Wound Dressing
   - Medline at Home lists an Optifoam Gentle Post-Op offering for household-facing purchase.
   - The storefront states that it conducts cash sales, does not submit insurance claims, and does not verify Medicare coverage; the customer accepts payment responsibility.
   - Company verification: Medline's home-care storefront offers Optifoam Gentle Post-Op dressings explicitly for postoperative wound care.

4. Medline Inc. - 2025 Form 10-K
   - Medline Inc.'s 2025 Form xx.xx-K explains its control of the business through Medline Holdings and subsidiaries.
   - The filing distinguishes Medline Brand from Supply Chain Solutions and describes both owned manufacturing and third-party sourcing, supporting separation of brand identity, distribution, and facility ownership.
5. Advanced Wound Care
   - Company verification: Medline Industries is a listed supplier.
6. Medline Reports Fourth Quarter and Full Year 2025 Results
   - Company verification: The February xx.xx 2026 corporate release identifies Medline Inc. and reports completion of its initial public offering.

20.7. Advanced Medical Solutions Group plc

[redacted] NHS Supply Chain independently names Advanced Medical Solutions Ltd as an advanced-wound-care framework supplier. This supports an identified branded offering and institutional route without establishing that a future OEM customer's version inherits the same listing.

[redacted] A portfolio owner can compare an agreed finished-goods arrangement with purchasing an existing ActivHeal offering. Co-development represents a different rights and commitment decision, not an established requirement for obtaining every existing product.

Before choosing an own-label route, the customer should confirm the contracting entity, postoperative product availability, territorial rights, applicable authorization, customer acceptance, and delivery obligations. [redacted] Public capability descriptions do not settle partner-specific availability or exclusivity.

Sources & Evidence

1. Advanced Wound Care
   - NHS Supply Chain names Advanced Medical Solutions Ltd as an advanced-wound-care framework supplier. The framework relationship does not itself establish access for a future OEM customer's version.
   - Company verification: Advanced Medical Solutions Ltd is listed.
2. Ways of Working - OEM
   - Advanced Medical Solutions advertises finished-goods supply, contract manufacturing, and co-development OEM models.
   - The company identifies portfolio-gap filling and second-source supply among reasons for OEM relationships; the page does not establish partner-specific postoperative availability or exclusivity.

3. Foam Dressing - Wound Care Range - ActivHeal Foam
   - ActivHeal Foam Adhesive and Foam Non-Adhesive include postoperative surgical wounds in their portfolio positioning and provide UK purchasing references.
   - The page identifies ActivHeal trademarks with Advanced Medical Solutions Ltd and links the offering to the AMS group.
   - Company verification: The ActivHeal portfolio offers foam dressings explicitly positioned for postoperative surgical wounds.
4. Establishment Registration & Device Listing
   - Company verification: The FDA device listing names ActivHeal Surgical Ag and Primaseal Post Op AG+, identifies Advanced Medical Solutions Ltd, and names Advanced Medical Solutions Group PLC as owner/operator.
   - Company verification: This is establishment and product-listing evidence, not proof of approval or sales.

20.8. Pharmaplast S.A.E.

Pharmaplast S.A.■■ ■■■ ■ ■■■■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■ ■■■■ ■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■ ■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■■ The record displays active status, with approval dated June xx.xx 2024, and expiry dated May xx.xx 2029.

The commercial distinction is between manufacture, registration representation, and actual supply. ■■■ ■■■■■ ■■■■■■■■■ ■■■■■■■■ ■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■ ■■■ ■■■■■■ ■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■ ■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■ ■■■■ ■■■ ■■■■■■■■ The documented registration concerns the named nonwoven product, not automatic access for the broader Pharmapore range.

Sources & Evidence

1. Pharmapore Sterile Post-operative Dressings
   - Pharmaplast's Pharmapore brochure advertises sterile postoperative dressings for surgical wounds and incisions, including nonwoven and film-backed variants.
   - Company verification: Pharmaplast's Pharmapore brochure offers a named family of sterile postoperative dressings for surgical wounds and incisions and supplies Egyptian business contacts.
2. Pharmapore Sterile Adhesive Nonwoven Dressing - NAFDAC Greenbook
   - NAFDAC identifies Pharmaplast S.A.E. in Egypt as manufacturer and Excellent Port Company Limited as applicant for Pharmapore Sterile Adhesive Nonwoven Dressing.
   - The record displays active status, approval on June xx.xx 2024, and expiry on May xx.xx 2029. It identifies registration parties rather than establishing distribution rights or realized fulfillment.
   - Company verification: The Nigerian regulatory record identifies Pharmaplast S.A.E. in connection with Pharmapore sterile adhesive nonwoven postoperative dressings.
   - Company verification: NAFDAC identifies Pharmaplast S.A.E in Egypt as manufacturer of Pharmapore Sterile Adhesive Nonwoven Dressing, described as a postoperative surgical dressing.
   - Company verification: The record shows active status, approval on June xx.xx 2024, and expiry on May xx.xx 2029.

20.9. Covalon Technologies Ltd.

Covalon combines an identified post-surgical dressing portfolio with several routes to customer access. ■■■ ■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■ ■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■ ■■■■■■■■■■ ■■■■■■ ■■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ These are company-level commercialization models; they do not establish a license or local availability for every named postoperative product.

For prospective distributors and licensees, the decision is how much customer access and selling responsibility to assume. Covalon explains that its OEM approach places major selling costs with partners, while its own sales force provides a direct hospital interface. ■■■■■■■ ■■■■■■■■■■ ■■ ■■■ ■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■ ■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■■■■■■■ ■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■ ■ ■■■■■■ ■■■■■■■ ■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■ ■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■■■■

Sources & Evidence

1. Covalon Technologies Ltd. - MD&A Q1 F-2026
   - The fiscal 2026 first-quarter disclosure lists SurgiClear and MediClear Post-Op Absorb, describes direct and partner commercialization channels, and states that product availability differs by country.
   - The operating discussion identifies temporary disruption associated with a US advanced-wound-care strategic partner's ownership transition; it does not identify that disruption as postoperative-product-specific.
   - Company verification: Covalon's fiscal 2026 first-quarter filing identifies SurgiClear as a post-surgical dressing and lists MediClear Post-Op Absorb in its surgical and perioperative portfolio.
   - Company verification: The filing describes direct US hospital sales, international distribution, private-label arrangements, and licensing business models.
   - Company verification: The filing provides recent operating and reporting-entity evidence without separately attributing postoperative-dressing revenue.
2. Covalon Technologies Ltd. - 2024 Management's Discussion and Analysis
   - The disclosure describes direct hospital selling, distribution, private-label arrangements and licensing; its OEM model assigns major selling costs to partners.
   - Partner-performance and contractual risks support a conditional assessment of customer-interface control rather than an assumption that licensing removes execution exposure.
   - Company verification: Covalon's 2024 management discussion lists SurgiClear as a post-surgical dressing and MediClear Post-Op Absorb as an absorbent-pad dressing.
   - Company verification: The filing describes a US direct sales force, North American distribution relationships, and private-label and licensing business models.

20.10. Advamedica Inc.

Advamedica's MaxioCel is an identified chitosan gelling-fiber wound-dressing offering with a named US distribution route. ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■ ■■■■■■■■

▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪ Separately, the partnership announcement text dated April xx.xx 2026 names Safe N Simple as a national US distribution partner and includes surgical wounds among applications.

This separates product clearance from customer access. Safe N Simple contributes its advertised national sales and distribution network, but a 2026 announcement does not establish the same relationship in 2025 or realized hospital adoption. ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. FDA 510(k) Premarket Notification - Maxiocel Chitosan Wound Dressing, K212766
   - FDA record K212766 identifies Advamedica, Inc. as applicant for Maxiocel Chitosan Wound Dressing and records a substantially equivalent decision on August xx.xx 2023.
   - The record establishes the named regulatory relationship, not distribution performance or payer coverage.
2. Safe N Simple LLC and Advamedica Announce Nationwide Distribution Partnership for MaxioCel in the United States
   - The announcement body dated April xx.xx 2026 names Safe N Simple as a national US distribution partner for Advamedica's MaxioCel chitosan gelling-fiber dressing.
   - It includes surgical wounds among applications and describes the partner's national network, without establishing executed exclusivity or realized customer adoption.
   - Company verification: The announcement identifies Advamedica Inc. as the commercial partner supplying the MaxioCel wound-care portfolio for nationwide US distribution.
   - Company verification: MaxioCel is described as a wound dressing with surgical wounds among its applications.

20.11. Vuelo Pharma

Vuelo Pharma positions Membracel as a specialty cellulose-membrane dressing for surgical wounds and post-cauterization or laser lesions. ▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪

The Membracel site promotes My Care purchase links and Brazilian regional delivery, while Vuelo's FAQ directs purchasers to nearby resellers. Patient-facing promotion gives households a purchasing lead, but does not establish the active contracting seller, destination-specific fulfillment or hospital purchasing eligibility. ▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪ ▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪ ▪▪▪ ▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪▪ ▪▪▪▪▪▪ ▪▪▪▪▪▪▪▪▪▪▪▪

Sources & Evidence

1. Membracel - Vuelo Pharma
   - Vuelo Pharma's Membracel site identifies a cellulose-membrane offering and lists surgical wounds and post-cauterization or laser lesions.
   - It promotes My Care purchase links and Brazilian regional delivery; these representations do not independently establish a particular seller's fulfillment commitment.
   - Company verification: Vuelo Pharma's Membracel product site publicly advertises the dressing for surgical wounds.
   - Company verification: The site identifies Vuelo Pharma as the business behind Membracel and provides online-purchase links and Brazilian delivery coverage.
2. FAQ EN - Vuelo Pharma
   - Vuelo's purchasing FAQ directs Membracel purchasers to identify a nearby reseller through its website.
   - The reseller direction supports distinguishing consumer purchasing leads from a verified manufacturer-direct or institutional supply commitment.

20.12. MedCu Technologies

MedCu Technologies advertises copper-based finished wound dressings in adhesive and nonadhesive configurations, with surgical wounds among its stated applications. ■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■■ ■■■■■■■■■■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■ ■■ ■■■■■■■■■ ■■■ ■■■■■■■ ■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■ This establishes an offering-specific US regulatory record alongside the public portfolio, rather than participation inferred solely from a material name.

For buyers comparing antimicrobial options, MedCu provides a distinct copper-based proposition, but purchasing still concerns an exact dressing configuration and local commercial relationship. ■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■ ■■■ ■■ ■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■ ■■ ■■■■■ ■■■■■■■■■■■ Neither the clearance record nor the company's positioning establishes comparative postoperative superiority or transfers authorization to another jurisdiction.

Sources & Evidence

1. MedCu - Advanced Copper-Based Wound Dressings
   - MedCu advertises copper-based finished dressings with and without an adhesive contour and includes surgical wounds among its applications.
   - The offering distinctions support configuration-specific purchasing, not a conclusion of comparative postoperative superiority.
   - Company verification: MedCu advertises copper-based complete wound dressings with surgical wounds among their stated applications.
   - Company verification: The company provides a Herzliya business address.
2. FDA 510(k) Premarket Notification - MedCu Antibacterial Wound Dressings with Copper-Oxide, K180643
   - FDA record K180643 names Medcu Technologies, Ltd. as applicant for MedCu Antibacterial Wound Dressings with Copper-Oxide and records a substantially equivalent decision on November xx.xx 2018.
   - This is an offering-specific US regulatory record, not proof of authorization or funded purchasing in other jurisdictions.

20.13. Jamjoom Medical Industries

Jamjoom Medical Industries presents Film Post-Operative Dressing as a Jeddah-manufactured offering supplied directly to Saudi hospitals. ■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■■ ■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■■ ■■■ ■■■■■■■■ ■■■■■ ■■■■ ■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■ ■■■■■■■■■■■■■ ■■■■■ This establishes an advertised local manufacturer-to-hospital proposition, not an independently confirmed public award.

Saudi institutional buyers can use that product-team route for direct supply discussions. Before relying on local manufacture, they should confirm the contracting entity behind the shared Jamjoom Medical Solutions branding, offering-level Saudi status and binding delivery terms. ■ ■■■■■■■■ ■■■■■ ■■■■■ ■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■ ■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■ ■■■ ■■■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■■■■■

Sources & Evidence

1. Film Post-Operative Dressing - Jamjoom Medical Industries | Jamjoom Medical Solutions
   - The product page attributes Film Post-Operative Dressing to Jamjoom Medical Industries' Jeddah plant and describes direct supply to Saudi hospitals.
   - It directs configuration and tender discussions to the institutional product team; it does not establish an individual public award.
   - Company verification: Jamjoom Medical Industries advertises Film Post-Operative Dressing.
   - Company verification: The product page identifies manufacturing at its Jeddah facility and institutional supply across Saudi Arabia.
2. Plant | Jamjoom Medical Solutions
   - The Jamjoom plant page describes its Saudi manufacturing operations and Jeddah facility under Jamjoom Medical Solutions branding.
   - The manufacturing description supports the advertised domestic supply proposition, not a conclusion about tender preference or comparative fulfillment speed.

20.14. Médicale Gaze

■■■■■■■■ ■■■■ ■■■■■■■■■ ■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■■■■■ Its portfolio distinguishes that offering from a children's orthoptic eye patch. Ophthalmic purchasing teams therefore have a specific product identity to request, rather than treating all eye coverings as substitutes or extrapolating from general surgical-gauze participation.

The company's business description identifies Tunis manufacturing, MEGA-brand distribution through commercial partners and OEM arrangements. Specialty distributors can examine branded supply or a separately contracted OEM relationship, but a general OEM capability does not grant rights to rebrand OPTIPAD. ■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■ ■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■■

[redacted]

Sources & Evidence

1. OPTIPAD - Médicale Gaze
   - The OPTIPAD product page distinguishes children's orthoptic occlusion from the adult dressing's post-intervention protection and absorption applications.
   - This supports an adult postoperative ophthalmic offering, not interchangeability among all eye coverings.
2. About - Médicale Gaze
   - Médicale Gaze describes Tunis manufacturing and commercial access through MEGA-brand distribution partners and OEM arrangements.
   - Those company-level business models do not establish product-specific rebranding rights, local purchasing acceptance or continuing OPTIPAD fulfillment.
   - Company verification: Médicale Gaze identifies itself as a designer, manufacturer, and marketer of single-use medical devices with manufacturing sites in Tunis.
   - Company verification: Its stated business includes dressings and supply through commercial partners and OEM relationships.
3. Médicale Gaze product catalog
   - Company verification: Médicale Gaze's catalog offers adult OPTIPAD external eye dressings for protection and absorption after an intervention.
   - Company verification: The specialty postoperative offering does not establish a broader cutaneous incision-dressing portfolio.

20.15. ALCARE Co., Ltd.

[redacted] Its business description explicitly includes postoperative surgical wounds and connects perioperative, post-discharge and community-care needs. The supplier presents several documented dressing formats within a care-continuity proposition, not a single-format response to all postoperative requirements.

[redacted] ALCARE's stated continuity ambition is not itself a replenishment contract, and different formats in the same catalog do not establish interchangeable specifications. Outside Japan, local availability and authorized distribution require separate confirmation; the Japanese portfolio alone does not establish a global delivery commitment.

Sources & Evidence

1. ドレッシング材｜商品情報（医療関係者向け）
   - ALCARE's Japanese professional catalog lists KARAYAHESIVE hydrocolloid products, SILKYPORE DRESSING as an adhesive island dressing, and MULTI FIX-PAD as a film dressing with an absorbent pad.
   - The catalog establishes differentiated offering formats, not cross-setting interchangeability or a global supply commitment.
   - Company verification: ALCARE's Japanese dressing catalog continues to list KARAYAHESIVE, SILKYPORE DRESSING, and MULTI FIX-PAD.
   - Company verification: The catalog corroborates an ongoing public dressing portfolio rather than relying exclusively on the older English brochure.
2. 事業紹介｜アルケア株式会社
   - ALCARE's wound-care business description explicitly includes postoperative surgical wounds and discusses perioperative, post-discharge and community-care continuity.
   - Its stated care-continuity objective supports examining discharge-related supply arrangements but does not establish an executed replenishment service.
   - Company verification: ALCARE's business description explicitly includes postoperative surgical wounds within its wound-care business.
   - Company verification: It describes dressing products serving perioperative and post-discharge care.
3. During/After Operation Management Solution
   - Company verification: ALCARE's postoperative-management brochure identifies dressing offerings including KARAYAHESIVE, MULTI FIX-PAD, and SILKYPORE DRESSING.
   - Company verification: The brochure connects the named dressing portfolio to after-operative wound management.

20.16. Aroa Biosurgery Limited

Aroa Biosurgery Limited presents a specialty restorative-bioscaffold proposition through Endoform Natural and Endoform Antimicrobial. Advertised surgical applications include donor sites, grafts, post-Mohs surgery, post-laser surgery and wound dehiscence. ■■■■ ■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■ ■■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■ ■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■ ■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■

AROA also offers dedicated reimbursement assistance and Endoform-specific coding information. That support can help providers navigate purchasing administration, but AROA expressly leaves coding responsibility with the provider and does not guarantee payer coverage. ■■■ ■■■■■■■ ■■■■ ■■■■ ■■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■ ■■■ ■■■■■ ■■■■■ ■■■■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■ ■■■■■■ ■■■■■■■■ ■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■ ■■ ■ ■■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■■■■ ■■■■■■■ ■■■■ ■■■■■■■ ■■■■ ■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■ ■■■■■■■ ■■■■

Sources & Evidence

1. Endoform | AROA
   - AROA presents Endoform Natural and Endoform Antimicrobial Restorative Bioscaffold products with surgical applications including donor sites, grafts, post-Mohs surgery, post-laser surgery and wound dehiscence.
   - The page expressly qualifies country availability and licensed indications and states that reimbursement information does not guarantee coverage.
   - Company verification: Aroa's current portfolio offers Endoform Natural and Endoform Antimicrobial Restorative Bioscaffold products.
   - Company verification: The advertised applications include surgical wounds, post-Mohs surgery, post-laser surgery, and wound dehiscence.
   - Company verification: The page identifies Aroa Biosurgery Limited and states that availability and licensed indications vary by country.
2. Reimbursement | Aroa Biosurgery
   - AROA provides dedicated reimbursement assistance and Endoform-specific coding information.
   - Its disclaimer retains provider responsibility for coding and payer-policy checks and expressly states that AROA does not guarantee coverage.

Sources & Evidence

1. Advanced Wound Care
   - Company verification: The September 2025-August 2027 framework names Richardson Healthcare Ltd as a supplier, corroborating an institutional channel alongside its captured Clearpore offering.
   - Company verification: The current framework names Steroplast Healthcare Ltd, supplementing its captured postoperative Steropad offering with institutional-channel evidence.
   - Company verification: The framework names Medicareplus International Limited; this establishes a wound-care procurement channel, not product-specific postoperative eligibility.
   - Company verification: The framework names Mediq Healthcare UK Ltd, corroborating a UK wound-care channel without independently establishing the entire Mediq ownership structure.
   - Company verification: Integra LifeSciences is a named framework supplier; framework participation does not establish current availability of recalled MediHoney products.
   - Company verification: Named advanced wound-care framework supplier.
   - Company verification: Listed as Essity trading through BSN Medical.
   - Company verification: L&R Medical UK is a listed supplier.
   - Company verification: B. Braun Medical is a listed supplier.
   - Company verification: Medline Industries is a listed supplier.
   - Company verification: URGO LIMITED is a listed supplier.
   - Company verification: Advanced Medical Solutions Ltd is listed.
   - Company verification: Brightwake Limited is identified as trading as Advancis Medical.
   - Company verification: Gentell UK is a listed supplier.
2. RICHARDSON HEALTHCARE LIMITED overview - Find and update company information - GOV.UK
   - Company verification: Companies House identifies Richardson Healthcare Limited, company number xx.xx as an active private limited company.
   - Company verification: The registry supports the UK Limited identity but does not explain the Inc. reference on the company's product website.

3. Clearpore - Transparent Film Dressing with Pad by Richardson Healthcare
   - Company verification: The current Clearpore page expressly includes postoperative wounds and provides product-ordering references and UK business contacts.
   - Company verification: The page retains Richardson Healthcare Ltd references alongside a Richardson Healthcare, Inc. copyright statement.
   - Company verification: Richardson Healthcare offers Clearpore as a transparent postoperative film-and-pad dressing and supplies public ordering references.
   - Company verification: The page provides a UK business address.
   - Company verification: The same page contains both Richardson Healthcare Ltd and Richardson Healthcare, Inc. references, leaving the exact legal reporting name unresolved.
4. Covalon Technologies Ltd. - MD&A Q1 F-2026
   - Company verification: Covalon's fiscal 2026 first-quarter filing identifies SurgiClear as a post-surgical dressing and lists MediClear Post-Op Absorb in its surgical and perioperative portfolio.
   - Company verification: The filing describes direct US hospital sales, international distribution, private-label arrangements, and licensing business models.
   - Company verification: The filing provides recent operating and reporting-entity evidence without separately attributing postoperative-dressing revenue.
5. Post operatori - Presteril
   - Company verification: Presteril's postoperative catalog advertises named delicate, waterproof, Sili-Soft, and ialuPRO dressing families.
   - Company verification: The catalog identifies Corman SpA, its Italian address, and VAT identifier, connecting the postoperative portfolio to the staged company.
6. Cerotti post-operatori sterili IMPERMEABILI - Presteril
   - Company verification: The official product page offers complete sterile waterproof postoperative dressings under Presteril.
   - Company verification: Corman SpA is identified in the product page's business information.
7. 2026 医療材総合カタログ - ニチバン株式会社
   - Company verification: Nichiban's 2026 medical catalog explicitly places CATHEREEPLUS PAD under postoperative wound covering and protection.
   - Company verification: This product-specific record resolves the inherited uncertainty arising from reliance on a broader surgery/ICU category.
8. [優肌] パーミパッド | 株式会社ニトムズ メディカル製品専用サイト
   - Company verification: Nitoms currently advertises Yuki Permepad as a complete waterproof film dressing with an absorbent pad.
   - Company verification: The inspected page improves complete-dressing evidence but does not explicitly establish postoperative positioning.
   - Company verification: The Yuki Permepad listing advertises a complete pad-and-film dressing for sutured wounds, names Nitto Denko as the responsible manufacturing/marketing entity, and names Nitoms as seller. It does not establish physical manufacturing attribution or realized sales. ([medical.nitoms.com](https://medical.nitoms.com/medical/products/woundcare/yuki-permepad.html))
9. Gentell chega ao Brasil e Paraguai com aquisição da Casex
   - Company verification: The company announcement states that Gentell LLC completed the Casex acquisition on June xx.xx 2025.
   - Company verification: The transaction included Casex products, personnel, and manufacturing assets in Brazil and Paraguay, with rebranding under Gentell.
   - Company verification: This supports consolidated attribution of the captured Casex postoperative portfolio to Gentell rather than a separate Casex company representation.

10. Wound and Burn Dressing Recall: Integra LifeSciences Removes Certain MediHoney and CVS Wound and Burn Products
    - Company verification: The FDA's March xx.xx 2026 update classifies the identified MediHoney and CVS wound-product action as a Class II recall.
    - Company verification: The notice identifies affected MediHoney wound-and-burn products and reports packaging-related sterile-barrier concerns.
    - Company verification: The recall creates a material availability limitation; historical portfolio references cannot establish current saleable supply.
    - Company verification: The FDA communication's March xx.xx 2026 update identifies the action as a Class II recall. The notice covers the identified MediHoney wound-and-burn products and certain CVS gel lots and continues to describe removal from use or sale; it does not establish resumed supply. ([fda.gov](https://www.fda.gov/medical-devices/medical-device-recalls-and-early-alerts/wound-and-burn-dressing-recall-integra-lifesciences-removes-certain-medihoney-and-cvs-wound-and-burn))
11. Island Dressings - Sterile
    - Company verification: Dynarex's current own-company catalog advertises Dürma+ sterile island dressings.
    - Company verification: The inspected listing does not explicitly establish postoperative use, so it supplements current portfolio evidence without resolving exact-market eligibility.
12. Our Product Portfolio - Medicareplus
    - Company verification: Medicareplus currently advertises standard and advanced wound-care dressings and Nurse It sterile dressing packs.
    - Company verification: The inspected portfolio does not establish a named complete dressing with explicit postoperative positioning.
13. GPSFarma HIPOALERGIC CLINICARE POST 10x10 APO ADH
    - Company verification: The inspected GPSfarma listing offers Hipoalergic Clinicare as a postoperative dressing and attributes the laboratory to RIASA S R L.
    - Company verification: This is a channel attribution and offering association, not independent proof of Riasa's current legal ownership or manufacturing responsibility.
14. Alpheta Katalog 2021
    - Company verification: Honnes' company-hosted ALPHETA catalog identifies Honnes Sağlık ve Endüstriyel Ürünler A.Ş. and presents sterile polyurethane and nonwoven wound dressings.
    - Company verification: The older catalog does not independently establish current postoperative-specific availability.
15. Servizi - Eurosirel
    - Company verification: Eurosirel's official business-services page describes an integrated private-label manufacturing and commercialization business.
    - Company verification: This supports its commercial supplier role but does not independently establish a named currently marketed postoperative dressing.
16. April 4, 2024 - 8-K: Current report
    - Company verification: The filing identifies Solventum Corporation and establishes its separation from 3M effective April xx.xx 2024.
17. Advanced wound care and skin care solutions
    - Company verification: The Solventum-hosted wound-care catalog includes Tegaderm dressings with closed surgical-incision positioning.
18. OPSITE POST OP | Smith+Nephew Global
    - Company verification: Smith+Nephew markets OPSITE POST-OP transparent waterproof dressings for postoperative incision protection.
19. Mepilex Border Post-Op
    - Company verification: Mölnlycke offers Mepilex Border Post-Op as a self-adherent absorbent surgical dressing and provides procurement information.

20. AQUACEL SURGICAL cover dressing
    - Company verification: Convatec offers AQUACEL SURGICAL cover dressings for postoperative management of surgical incisions.
21. Cosmopor Steril
    - Company verification: HARTMANN markets Cosmopor Steril adhesive dressings for postsurgical wounds and incision sites in its US portfolio.
22. Leukomed
    - Company verification: Essity's Australian portfolio offers Leukomed sterile absorbent dressings following surgical intervention.
23. L&R Global: Curapor
    - Company verification: Lohmann & Rauscher offers Curapor sterile surgical dressings with an explicitly stated postoperative application.
24. Askina DresSil Active
    - Company verification: B. Braun's catalog offers Askina DresSil Active bordered silicone dressings for surgical wounds.
25. Biatain Alginate
    - Company verification: Coloplast's US professional portfolio lists Biatain Alginate for postoperative surgical wounds.
26. Optifoam Gentle Post-Op Foam Wound Dressings
    - Company verification: Medline's catalog identifies Medline as manufacturer of Optifoam Gentle Post-Op Foam Wound Dressings.
27. Optifoam Gentle Post-Op Silicone/Foam Wound Dressing
    - Company verification: Medline's home-care storefront offers Optifoam Gentle Post-Op dressings explicitly for postoperative wound care.
28. Medline Reports Fourth Quarter and Full Year 2025 Results
    - Company verification: The February xx.xx 2026 corporate release identifies Medline Inc. and reports completion of its initial public offering.
29. Telfa Adhesive Island Dressings
    - Company verification: Medline's inspected channel catalog lists Telfa Adhesive Island Dressings with Cardinal Health identified as manufacturer.
30. Urgo Medical | UrgoTul Range details
    - Company verification: URGO Medical's UK portfolio offers UrgoTul and UrgoTul Absorb products with postoperative-wound positioning.
31. Establishment Registration & Device Listing
    - Company verification: The FDA device listing names ActivHeal Surgical Ag and Primaseal Post Op AG+, identifies Advanced Medical Solutions Ltd, and names Advanced Medical Solutions Group PLC as owner/operator.
    - Company verification: This is establishment and product-listing evidence, not proof of approval or sales.
32. Foam Dressing - Wound Care Range - ActivHeal Foam
    - Company verification: The ActivHeal portfolio offers foam dressings explicitly positioned for postoperative surgical wounds.
33. Covaderm GTL Silicone Composite Wound Dressing
    - Company verification: DeRoyal offers Covaderm GTL silicone composite wound dressings and includes incisions among their stated applications.
34. Super Absorbent Dressing - Winner Medical
    - Company verification: Winner Medical's official portfolio offers superabsorbent dressings and expressly includes postoperative care among their applications.

35. 510(k) Premarket Notification: K221311
    - Company verification: FDA record K221311 identifies Winner Medical Co., Ltd. as applicant for Antibacterial Bandage and records a substantial-equivalence decision on June xx.xx 2023.
    - Company verification: The record corroborates company identity and a regulatory product role, not postoperative sales.
36. Nonwoven Island Dressing - Allmed Medical
    - Company verification: Allmed Medical offers a Nonwoven Island Dressing expressly positioned for surgical incisions.
37. MRP_by_Division - Final.xlsx
    - Company verification: Healthium's published CareNow division product list includes commercial Theruptor NXT dressing entries.
    - Company verification: The list establishes portfolio association but does not independently establish the legal ownership relationship.
38. Theruptor NXT Wound Dressing
    - Company verification: The Theruptor NXT product document identifies Healthium Medtech Limited as marketer and includes surgical-wound categories.
    - Company verification: CareNow's official domain hosts the Theruptor NXT product document, establishing a public product-document association but not current ownership or a separate sales role.
39. CATHEREEPLUS PAD | NICHIBAN Co., Ltd.
    - Company verification: Nichiban's official portfolio offers CATHEREEPLUS PAD, a film dressing with an absorbent pad.
    - Company verification: The inspected page does not establish postoperative-specific positioning.
40. Essential products for Ambulatory Surgery Centers
    - Company verification: Dukal's ambulatory-surgery portfolio includes island dressings, transparent dressings, gauze, and ABD pads.
41. Dukal Provista Contract Catalog
    - Company verification: Dukal's 2026 catalog lists sterile composite island dressings and sterile nonwoven island dressings as offered products.
42. Establishment Registration & Device Listing
    - Company verification: The FDA listing identifies DUKAL LLC as owner/operator and specification developer for listed transparent, hydrocolloid, silicone foam, and foam dressings.
43. Sterile Island Dressings
    - Company verification: Medline's inspected channel catalog identifies Dynarex Corporation as manufacturer of Sterile Island Dressings.
44. Advazorb - Advancis Medical
    - Company verification: Advancis Medical's official portfolio offers Advazorb absorbent foam dressings.
45. Pharmapore Sterile Post-operative Dressings
    - Company verification: Pharmaplast's Pharmapore brochure offers a named family of sterile postoperative dressings for surgical wounds and incisions and supplies Egyptian business contacts.

46. NAFDAC Greenbook product record: Pharmapore sterile adhesive nonwoven dressing
    - Company verification: The Nigerian regulatory record identifies Pharmaplast S.A.E. in connection with Pharmapore sterile adhesive nonwoven postoperative dressings.
    - Company verification: NAFDAC identifies Pharmaplast S.A.E in Egypt as manufacturer of Pharmapore Sterile Adhesive Nonwoven Dressing, described as a postoperative surgical dressing.
    - Company verification: The record shows active status, approval on June xx.xx 2024, and expiry on May xx.xx 2029.
    - Company verification: The same product record names Excellent Port Company Limited as the Nigerian local entity associated with the registered dressing; this does not establish actual distribution or sales.
    - Company verification: NAFDAC names Excellent Port Company Limited as applicant for the active Pharmapore postoperative-dressing registration.
    - Company verification: Applicant status does not by itself establish current importing, distribution, procurement, or sales.
47. Transparent Film with Island Dressing - Wynnmed Healthcare Products
    - Company verification: Wynnmed's official portfolio offers a ProCure transparent film island dressing explicitly positioned for postoperative sites.
    - Company verification: The inspected product page does not settle the legal owner or parent-company reporting level.
48. Gentell Catalog 2022
    - Company verification: Gentell's catalog offers Compdress Island Dressings and Gentell Bordered Gauze as primary or secondary dressing products.
    - Company verification: The catalog supports the offering relationship; postoperative-specific positioning requires additional substantiation.
49. McKesson Advanced Wound Care Catalog
    - Company verification: McKesson's own catalog offers McKesson Island Dressings and Barrier Island Dressings and identifies its medical-surgical ordering channel.
50. AccessGUDID - DEVICE: McKesson (10612479184920)
    - Company verification: The government device record identifies McKesson Medical-Surgical Inc. and an island dressing product.
51. History - Bravida Medical
    - Company verification: The company history connects Argentum Medical and BioDerm with the Bravida Medical business.
    - Company verification: The page provides business contacts in Illinois and Florida.
52. Silverlon Surgical Island Dressings - Bravida Medical
    - Company verification: Bravida publicly offers Silverlon Surgical Island Dressings for applications including surgical wounds.
    - Company verification: The page cautions that clinical product availability can vary by country.
53. About Us - PolyMem Dressings
    - Company verification: Ferris Mfg. Corp. identifies itself as a privately owned producer and distributor of PolyMem and other dressing brands.
54. Home - PolyMem Dressings
    - Company verification: The detailed PolyMem product presentation includes surgical wounds among the advertised applications for its dressing portfolio.
55. Covalon Technologies Ltd. - 2024 Management's Discussion and Analysis
    - Company verification: Covalon's 2024 management discussion lists SurgiClear as a post-surgical dressing and MediClear Post-Op Absorb as an absorbent-pad dressing.
    - Company verification: The filing describes a US direct sales force, North American distribution relationships, and private-label and licensing business models.

56. Xeroform Petrolatum Gauze Dressing - Safe n Simple
    - Company verification: Safe n Simple publicly offers Simpurity Xeroform Impregnated Gauze dressings with surgical wounds and plastic surgery among the advertised applications.
57. Safe N Simple LLC and Advamedica Announce Nationwide Distribution Partnership for MaxioCel in the United States
    - Company verification: An announcement dated April xx.xx 2026 identifies Safe N Simple LLC as a nationwide US distribution partner for Advamedica's MaxioCel dressings.
    - Company verification: The announcement includes surgical wounds among MaxioCel's stated commercial applications.
    - Company verification: The announcement identifies Advamedica Inc. as the commercial partner supplying the MaxioCel wound-care portfolio for nationwide US distribution.
    - Company verification: MaxioCel is described as a wound dressing with surgical wounds among its applications.
58. FAQ - Wound Care and Medical Foods - DermaRite Medical
    - Company verification: DermaRite Medical identifies itself as part of SionBrands, the US commercial platform of the Sion Medical-Degasa Group.
    - Company verification: The FAQ states that DermaRite joined the group in 2025 and works through medical-equipment providers, distributors, online sellers, and pharmacies.
    - Company verification: DermaRite identifies itself as part of SionBrands, the US commercial platform of the Sion Medical-Degasa Group, and states that it joined the group in 2025.
    - Company verification: DermaRite's own group description names Degasa within the Sion Medical-Degasa platform; this corroborates overlap but does not resolve legal ownership percentages.
    - Company verification: DermaRite's current FAQ identifies Sion Medical within the group operating SionBrands, corroborating the shared commercial-platform relationship. ([dermaritemedical.com](https://dermaritemedical.com/faq/))
59. ComfortFoam Ag Border Silver Foam Dressing - DermaRite Medical
    - Company verification: DermaRite publicly offers ComfortFoam Ag Border silicone foam island dressings.
    - Company verification: Its stated applications include surgical wounds.
60. We're proud to welcome DermaRite wound care and nutrition portfolios to SionBrands
    - Company verification: The November xx.xx 2025 announcement welcomes DermaRite's wound-care and nutrition portfolios to SionBrands.
    - Company verification: Sion Medical identifies Degasa as its collaborator in SionBrands, described as their US headquarters platform.
61. Apósito Quirúrgico - Degasa
    - Company verification: Degasa's official catalog offers PROTEC surgical dressings for wound protection and absorption.
    - Company verification: The catalog establishes a complete surgical-dressing offering but does not explicitly separate postoperative use.
62. About us - Degasa
    - Company verification: Degasa's company page provides its business address in Tlalpan, Mexico City.
63. SKU and Distributor Information - Eloquest Healthcare, Inc.
    - Company verification: Eloquest lists ReliaTect Post-Op Dressing with CHG in its commercial SKU portfolio.
    - Company verification: The page identifies limited distributors through which ReliaTect is available.
64. About Eloquest Healthcare - Eloquest Healthcare, Inc.
    - Company verification: Eloquest identifies itself as the hospital subsidiary of Ferndale Pharma Group.
65. Multi-Layer Wound Dressings for Effective Care - MPM Medical
    - Company verification: MPM Medical's commercial product page offers a Multi Layered Wound Dressing and includes surgical wounds among its applications.

66. Advanced Wound Care - Surgical Care - Collagen - MPM Medical
    - Company verification: MPM Medical identifies its headquarters in Mesquite, Texas.
    - Company verification: Its detailed portfolio presentation advertises SteriSeal as a surgical dressing for postoperative incision management.
67. Collagen Wound Care Products: Particle, Sheet and Gel - Human BioSciences
    - Company verification: Human BioSciences' product catalog offers ColleCule LpH Collagen Pad for surgical and chronic wounds.
    - Company verification: The catalog identifies a US business contact in Martinsburg, West Virginia and labels the professional pad offering as prescription-required.
68. MediPurpose Introduces New MediPlus Advanced Wound Care Product Line
    - Company verification: MediPurpose's legacy Atlanta launch announcement identifies MediPlus PU Pad and MediPlus Surgical as post-surgical dressings.
    - Company verification: The announcement describes its medical-product distribution and private-label business role.
69. FDA K110062 - MediPlus-Foam AG Dressings
    - Company verification: The historical FDA record identifies MediPurpose Pte. Ltd. in connection with MediPlus-Foam AG, ComfortFoam AG, and SuperFoam AG dressings.
    - Company verification: The listed commercial indications include surgical incisions and excisions; the record alone does not establish current availability.
70. About Us - MediPurpose
    - Company verification: MediPurpose's company page continues to describe an offering of MediPlus Advanced Wound Care products.
    - Company verification: The page does not establish current availability of every historical postoperative SKU.
71. Dressing OPSITE Post-Op - Stevens
    - Company verification: Stevens' own catalog offers Smith+Nephew OPSITE Post-Op dressings.
    - Company verification: The page describes the business as a national Canadian medical-supply distributor with multiple Canadian locations.
72. Opsite Post-Op Apósito Quirúrgico con Film Adhesivo - VitalHealth
    - Company verification: VitalHealth's Spanish-language catalog advertises Smith+Nephew OPSITE Post-Op for postoperative and surgical-incision care.
    - Company verification: This establishes an observed offering under the VitalHealth trade name, not its legal identity or authorized-distributor status.
73. Catálogo Cuidado de Heridas - JTC
    - Company verification: JTC's wound-care catalog lists Convatec AQUACEL Ag SCD DRS as a postoperative dressing.
    - Company verification: The catalog provides JTC product references but does not establish the full legal entity, current authorization, or active sales.
74. BeneHold CHG Antimicrobial Adhesive Technology - Avery Dennison
    - Company verification: Avery Dennison's brochure presents BeneHold CHG technology for applications including postoperative dressings.
    - Company verification: The brochure identifies ReliaTect and Eloquest Healthcare trademarks as belonging to Ferndale IP, Inc.
    - Company verification: This supports an associated technology-platform role, not a current standalone complete-dressing sales claim.
75. Cardinal Health Composite Dressing - Cardinal Health Canada
    - Company verification: Cardinal Health's own Canadian catalog offers Cardinal Health Composite Dressing.
    - Company verification: Postoperative wounds are explicitly included among its stated applications.

76. Mepore Self-Adhesive Absorbent Post-Operative Dressing - Surgo Surgical Supply
    - Company verification: Surgo's official catalog advertises Mepore Self-Adhesive Absorbent Post-Operative Dressing and identifies the MÖLNLYCKE brand.
    - Company verification: The listing supports Surgo's channel role, not an inference that Surgo manufactures Mepore.
77. Nossas marcas - Viveo
    - Company verification: Viveo's current investor-relations brand portfolio includes Cremer, supporting representation of the identified Cremer dressing business at the Viveo group level.
78. Histórico - Viveo
    - Company verification: Viveo's corporate history identifies Cremer as an acquired healthcare-products business and describes its Brazilian operations.
79. Curativo Cirúrgico - Cremer
    - Company verification: Cremer publicly offers Curativo Cirúrgico and expressly includes post-surgical compressive dressings among its applications.
80. PRODUTOS - Polar Fix
    - Company verification: Polar Fix's official product portfolio lists Wound Care F Curativo Filme Transparente Pós-Operatório Estéril.
    - Company verification: The portfolio identifies Polar Fix's production and distribution business and its address in Mauá, Brazil.
81. Missner
    - Company verification: Missner's advanced-dressing catalog offers M-TEC absorbent polyurethane dressings and explicitly describes protection of surgical incisions.
82. Linhas - Missner
    - Company verification: Missner's official product-lines page identifies the business as MISSNER & MISSNER LTDA and links its advanced-dressing commercial portfolio.
83. Membracel - Vuelo Pharma
    - Company verification: Vuelo Pharma's Membracel product site publicly advertises the dressing for surgical wounds.
    - Company verification: The site identifies Vuelo Pharma as the business behind Membracel and provides online-purchase links and Brazilian delivery coverage.
84. Apósitos - Laboratorios Emetex
    - Company verification: Laboratorios Emetex's official catalog lists Apósito Común Pouch Simple Estéril products in several presentations.
    - Company verification: The category establishes an advertised complete-dressing portfolio but does not explicitly establish postoperative positioning.
85. Línea Cuidado de heridas - Medicox LTDA
    - Company verification: Medicox LTDA's wound-care catalog advertises a postoperative Mepilex offering and a post-surgical Telfa AMD offering.
    - Company verification: The catalog identifies Medicox's Colombian business location, supporting an advertised regional channel role.
86. Allevyn Sacrum - Tagumedica
    - Company verification: Tagumedica's official catalog advertises ALLEVYN Sacrum complete foam dressings and includes surgical wounds among their applications.
    - Company verification: The page lists a product registration reference; its current regulatory validity was not independently checked.
87. Apósito Primapore 25x10 cm Smith & Nephew - Precio Chile
    - Company verification: Ortopedia Suiza's Chilean product listing advertises Primapore dressings for covering postoperative surgical wounds.
    - Company verification: The listing supports an advertised retail channel, not a manufacturing role.

88. Hydrocare - curativo de hidrofibra CASEX - GENTELL - We make it better
    - Company verification: The Casex commercial store carries Gentell branding and advertises Hydrocare dressings for postoperative surgical wounds.
    - Company verification: The product record identifies Casex as the manufacturer and supplies a Brazilian business address.
    - Company verification: The page establishes a commercial association but does not independently establish the precise Gentell/Casex ownership or consolidation relationship.
89. Dressings - Zarys
    - Company verification: The official portfolio offers elastopor STERIL dressings for covering postoperative wounds.
    - Company verification: The page identifies ZARYS International sp. z o.o. and its Zabrze, Poland address.
90. Wound dressing - Plastod - Advanced Wound Care
    - Company verification: Plastod offers film dressings positioned for surgical sites alongside other wound-care applications.
    - Company verification: The official page identifies Plastod S.p.A. and its Italian business address.

95. Wound care products for clinical environments and home care
    - Company verification: ABENA publicly offers sterile postoperative dressings, including waterproof and film versions.
    - Company verification: The page identifies ABENA Holding A/S at an Aabenraa, Denmark address.
96. About us - Brothier
    - Company verification: Laboratoires Brothier describes itself as an independent French company whose dressing products include applications in complex surgical wounds.
97. Algostéril - Brothier
    - Company verification: Brothier publicly presents Algostéril compresses and dressings.
    - Company verification: The official page identifies pharmacy availability and professional ordering through ALLOGA France.
98. Total assortment of medical supplies, equipment and services | Mediq
    - Company verification: Mediq identifies Klinion among its own brands and includes wound care in its product offering.
99. Wound care products and wound management solutions | Klinion
    - Company verification: Klinion's official wound-care portfolio includes border plasters for postoperative wounds.
100. List of distributors for information and orders | Klinion
    - Company verification: Klinion's official directory lists Mediq and other distribution contacts across multiple European countries.
    - Company verification: The directory provides channel evidence, not product-specific sales volumes.

101. Plasters - Tosama
    - Company verification: Tosama's official portfolio includes branded plasters for surgical wounds.
    - Company verification: The page identifies Tosama d.o.o. and its Domžale, Slovenia address.
102. Vivapore | Tosama
    - Company verification: Tosama's Serbian website lists sterile Vivapore dressing products.
103. Cerotto post operatorio Soffix Med
    - Company verification: The Italian Pic Solution page offers Soffix Med as a postoperative dressing for surgical wounds.
    - Company verification: The page names Pikdare S.p.A. as manufacturer.
104. Apósito postoperatorio Soffix Med
    - Company verification: Pic Solution maintains a Spanish-language Soffix Med postoperative-dressing offering.
    - Company verification: The language-specific portfolio does not independently establish Spanish sales.
105. Chi siamo - Presteril
    - Company verification: Presteril identifies Corman SpA as its Italian family-owned corporate business.
    - Company verification: The page describes a dressing portfolio sold through pharmacies and parapharmacies.
    - Company verification: The company states that Medipresteril returned to the Presteril brand name in 2024.
106. Products and Services - Batist Medical a.s.
    - Company verification: Batist Medical a.s.'s official portfolio includes wound dressings and ELASTPORE+PAD.
    - Company verification: The page identifies a Czech business address and separately names the production entity.
107. BATIST German-English Product Catalogue
    - Company verification: BATIST's hosted German-English catalog describes ELASTPORE+PAD as a complete absorbent-pad wound dressing.
    - Company verification: This catalog evidence does not by itself establish an explicit postoperative application.
108. Повязки медицинские силиконовые торговой марки IGAR - Igar
    - Company verification: IGAR's official silicone-dressing portfolio explicitly includes postoperative sutures among the stated commercial applications.
109. Хірургічні пов'язки торгової марки IGAR тип Прозорий (на поліуретановій основі)
    - Company verification: IGAR's official Ukrainian-language portfolio presents transparent surgical dressings with absorbent pads.
110. Steropad Non-Adhesive Double-Sided Wound Dressings - Pack of 25 - 5cm x 5cm
    - Company verification: Steroplast publicly offers Steropad absorbent dressings for postoperative wounds through its UK-facing catalog.
111. About Us - Steroplast Healthcare
    - Company verification: Steroplast's official business page describes its UK healthcare-supply role and hospital-facing medical-disposables portfolio.
112. Nasze rozwizania - Matopat - Wyroby medyczne
    - Company verification: Matopat's official materials identify Fixopore S and Fixopore F as postoperative dressings.
    - Company verification: The published portfolio materials connect Matopat products with TZMO SA.
113. Farmac Zabban wound-care product brochure
    - Company verification: The company-authored brochure describes Farmac Zabban as an Italian manufacturer and distributor serving hospitals, clinics, and pharmacies with surgical-dressing and wound-care products.
    - Company verification: The brochure alone does not establish a current named postoperative offering or Bulgarian sales.

114. Tapes & Wound Dressings
    - Company verification: MEDISEI's official catalog offers X-Med Medi Dress and Aqua Dress adhesive gauze-pad products.
    - Company verification: The catalog provides an Athens, Greece business address.
    - Company verification: The inspected category does not establish explicit postoperative positioning.
115. Contact | Evercare Medical
    - Company verification: Evercare Medical's official contact page identifies a Surgery, Wound & Hospital Care business unit serving European markets.
    - Company verification: This business-role evidence does not establish a named complete postoperative dressing.
116. OctaCare Non-Woven Wound Dressings | Octamed
    - Company verification: Octamed's official product page offers OctaCare Non-Woven Wound Dressings explicitly for postoperative sutured wounds.
117. Betapad Adhesive Surgical Dressing | Betasan

   - Company verification: The South African Elastoplast catalog offers Sensitive XXL complete sterile dressings expressly for larger and postoperative wounds.
153. medicale Gaze
   - Company verification: Médicale Gaze identifies itself as a designer, manufacturer, and marketer of single-use medical devices with manufacturing sites in Tunis.
   - Company verification: Its stated business includes dressings and supply through commercial partners and OEM relationships.

154. Médicale Gaze product catalog
    - Company verification: Médicale Gaze's catalog offers adult OPTIPAD external eye dressings for protection and absorption after an intervention.
    - Company verification: The specialty postoperative offering does not establish a broader cutaneous incision-dressing portfolio.
155. CURALL
    - Company verification: CurALL's product catalog expressly lists AQUABLOCK as a sterile postoperative dressing and provides a Tunis business contact.
    - Company verification: The catalog identifies the market-facing brand but does not resolve its responsible legal owner.
156. SOCIETE PARA PHARMA PROMOTION - Pansements modernes, VAC-thérapie (TPN/VAC), Résine orthopédique - Tunisie
    - Company verification: Societe Para Pharma Promotion publicly describes a Tunisian manufacture-and-distribution business serving healthcare establishments.
    - Company verification: Its commercial offering page includes dressing categories with postoperative-wound applications, without named commercial product references.
157. Adhesive Bandage Products - SOCOTHYD
    - Company verification: SOCOTHYD's official English material identifies it as a public economic enterprise and lists medical adhesive-product categories.
    - Company verification: The inspected category does not establish a complete postoperative dressing.
158. Wound Dressing - medic
    - Company verification: Medic's official wound-dressing catalog publicly lists a product named Post Operative Wound Dressing.
159. Laparoscopy Dressing | Euromed Surgicals
    - Company verification: Euromed Surgicals offers laparoscopy dressings in Kenya for protection of small surgical incision sites following surgery.
    - Company verification: The product page identifies Euromed Surgicals Ltd and a Nairobi business address, and markets the offering to hospitals, surgical centers, and outpatient clinics.
160. Opsite Dressing 15.5Cmx8.5Cm 20S - Kenya
    - Company verification: Goodlife's Kenyan storefront offers OPSITE Post-Op dressings expressly for postoperative wounds, establishing a retail-channel offering associated with the acquired business.
161. CFAO Healthcare acquires 100% of Goodlife Pharmacy - CFAO Group
    - Company verification: CFAO's July xx.xx 2025 announcement states that CFAO Healthcare acquired full ownership of Goodlife Pharmacy.
    - Company verification: This ownership record supports mapping the evidenced Goodlife retail offering to CFAO Healthcare without adding a second row for the same retail business.
162. Hospital Consumables - Agary Pharmaceutical Limited | No. 1 in Hospital Consumables in Nigeria.
    - Company verification: Agary Pharmaceutical Limited's own hospital-consumables catalog lists Agary tulle dressing.
    - Company verification: The inspected catalog establishes a named dressing offering but does not expressly establish postoperative positioning.
163. MEPORE ADHESIVE SURGICAL DRESSING 6 X 7CM | GoMed
    - Company verification: GoMed's Nigerian storefront lists Mepore Adhesive Surgical Dressing and explicitly positions it for postoperative wounds.
    - Company verification: The listing establishes a market-facing channel association, not GoMed's manufacture or ownership of Mepore.
164. Product Catalogue - Surgical, Theatre, ICU & Lab Equipment | IRAP Non-Pharma Limited
    - Company verification: IRAP Non-Pharma Limited's commercial catalog lists Primapore Adhesive Dressings.
    - Company verification: The catalog identifies a Garissa, Kenya business address and a regional healthcare-supply role.

165. Elastoplast Sterile Waterproof Dressing XXL 5Pack - Reavley Chemist GH
   - Company verification: Reavley Chemist GH lists Elastoplast Sterile Waterproof XXL dressings for larger or postoperative wounds.
   - Company verification: The retrieved product listing was marked sold out and therefore does not establish current stock.
166. Velfix T+Pad | Transparent Film Dressing with Non-Adherent Pad by Datt Mediproducts
   - Company verification: Datt offers Velfix T+Pad as a complete postoperative film-and-pad dressing.
   - Company verification: The offering expressly includes postoperative wounds and provides commercial ordering links.
167. Silicone Postoperative Dressing - FORYOU
   - Company verification: Huizhou Foryou Medical Devices Co., Ltd. publicly offers LUOFUCON Silicone Postoperative Dressing for surgical wounds.
   - Company verification: The page identifies the supplier and its Huizhou, China business address.
168. CMEF Spring had successful conclusion, FORYOU MEDICAL hope to meeting you again at CMEF Fall
   - Company verification: Foryou's business announcement identifies postoperative dressings among registered products available for sale in its domestic market.
   - Company verification: The announcement supports domestic commercial positioning, not independently measured sales.
169. K254246 - LT Antibacterial Foam with Silver Dressing
   - Company verification: The FDA-hosted K254246 document identifies Zhejiang Longterm Medical Technology Co., Ltd. as applicant.
   - Company verification: The named LT Antibacterial Foam with Silver Dressing includes postoperative wounds among its stated applications.
   - Company verification: This record does not establish current Chinese commercialization.
170. During/After Operation Management Solution
   - Company verification: ALCARE's postoperative-management brochure identifies dressing offerings including KARAYAHESIVE, MULTI FIX-PAD, and SILKYPORE DRESSING.
   - Company verification: The brochure connects the named dressing portfolio to after-operative wound management.
171. ドレッシング材｜商品情報（医療関係者向け）
   - Company verification: ALCARE's Japanese dressing catalog continues to list KARAYAHESIVE, SILKYPORE DRESSING, and MULTI FIX-PAD.
   - Company verification: The catalog corroborates an ongoing public dressing portfolio rather than relying exclusively on the older English brochure.
172. 事業紹介｜アルケア株式会社
   - Company verification: ALCARE's business description explicitly includes postoperative surgical wounds within its wound-care business.
   - Company verification: It describes dressing products serving perioperative and post-discharge care.
173. オーゼ CP - オオサキメディカル株式会社
   - Company verification: Osaki Medical's official product page offers Oze CP surgical pads.
   - Company verification: The page identifies the business as Osaki Medical Corp.; postoperative-specific use is not established by this record alone.
174. サンドガーゼ C タイプ - オオサキメディカル株式会社
   - Company verification: Osaki Medical publicly lists Sand Gauze C Type within its conventional surgical-pad portfolio.
   - Company verification: This supports a relevant complete-pad offering, but does not independently establish postoperative positioning.

175. Genewel - Company History
    - Company verification: Genewel's history identifies its company name and Medifoam business.
    - Company verification: It records Medifoam-related sales/distribution agreements involving Australia and Indonesia in 2024 and Singapore, Indonesia, and the Philippines in 2025.
    - Company verification: The agreements do not establish postoperative-specific sales.
176. Wound Care - 제네웰 Genewel
    - Company verification: Genewel's Korean wound-care page publicly presents Medifoam and Betafoam product families.
    - Company verification: The inspected page supports a current wound-dressing business but does not directly settle a specific postoperative application.
177. AEROFILM PLUS Waterproof Island Dressing 9 x 10cm Box/20
    - Company verification: Aero Healthcare offers AeroFilm Plus waterproof island dressings with explicit postoperative-site positioning.
    - Company verification: The product is presented on its Australia/New Zealand-facing commercial site.
178. MULTIGATE Compose - Island Dressings
    - Company verification: Multigate's official Compose island-dressing brochure explicitly identifies postoperative wounds as an application.
    - Company verification: The brochure supports Multigate's advertised complete-dressing portfolio, not sales volume or upstream manufacturing ownership.
179. Wound Management - DIAGNO-PHARM (MALAYSIA) SDN BHD
    - Company verification: Diagno-Pharm (Malaysia) Sdn Bhd publicly offers Diagno-Med Compress and Diagno-Wound products as postoperative dressings.
    - Company verification: Its own business page identifies a Malaysian medical-products distribution role.
    - Company verification: Registration references on the page are company claims, not independently checked register findings.
180. Products | SM Health Care - MULTI FIX-PAD
    - Company verification: SM Health Care publicly catalogs MULTI FIX-PAD for postoperative wounds.
    - Company verification: The page identifies SM Health Care Sdn Bhd and its Sabah, Malaysia business address.
    - Company verification: The page supports a local supplier/channel offering, not ownership of the upstream product.
181. Non Adhesive / Adhesive Alginate Dressing - Filta Safety
    - Company verification: Filta Safety (Malaysia) Sdn. Bhd. offers adhesive and nonadhesive alginate dressings with postoperative-incision applications.
    - Company verification: The page identifies the company as supplier in Selangor, Malaysia.
182. Advance Wound Care | SOZA Healthcare
    - Company verification: SOZA Healthcare's advanced-wound-care portfolio includes RTD Wound Dressing.
    - Company verification: Its stated applications expressly include surgical/postoperative wounds, supporting a Malaysian market-facing offering.
183. Wound Hydrogel (HX-WH22) | OEM/ODM Supplier - Hannox International Corp.
    - Company verification: Hannox International Corp. offers HX-WH22 Wound Hydrogel as a sterile amorphous dressing for postoperative wounds.
    - Company verification: The page identifies a Taipei business address and an OEM/ODM/private-label supply role.

184. PT Medela Potentia Tbk - Initial Public Offering Prospectus
    - Company verification: The IPO prospectus identifies PT Medela Potentia Tbk and Indonesian subsidiary medical-device operations.
    - Company verification: It describes Stardec-branded business and sterile postoperative dressings within disclosed wound-care activities.
    - Company verification: The disclosure does not by itself establish current sales of a particular postoperative product.
185. DR Sofsorb Absorbent Wound Dressing | Panamed Philippines Inc.
    - Company verification: Panamed Philippines Inc. publicly lists DR Sofsorb Absorbent Wound Dressing.
    - Company verification: The listing explicitly includes postoperative incision sites, establishing a relevant Philippine portfolio/channel role.
186. Perioperative & Wound Care: Suprasorb X+PHMB | Zafire Distributors, Inc.
    - Company verification: Zafire Distributors, Inc. publicly offers Lohmann & Rauscher Suprasorb X+PHMB.
    - Company verification: Its offering expressly includes postoperative surgical wounds and identifies a Philippine business address.
    - Company verification: The record supports distribution participation, not ownership of the dressing manufacturer.
187. Primepore Ultimate - Kamion Pharma
    - Company verification: Kamion Pharma offers Primepore Ultimate as a surgical wound dressing for postoperative wound care.
    - Company verification: The page identifies Karachi, Pakistan business and factory addresses.
188. About Us - Cotton Craft
    - Company verification: Cotton Craft (Pvt.) Ltd. identifies itself as a Pakistan-based surgical-dressings manufacturer.
    - Company verification: Its disclosed portfolio includes gauze products, combine dressings, and advanced wound dressings.
    - Company verification: The inspected business page does not establish a specific currently marketed postoperative product.
189. Non-Woven Island Dressing - Secure The Life
    - Company verification: Secure The Life advertises imported nonwoven island dressings for postoperative wound coverage and wholesale supply in Pakistan.
    - Company verification: The page identifies a Lahore stocking/import role and Chinese product origin.
    - Company verification: Its registration statements were not independently corroborated.
190. Surgin Pad Surgical Dressing 12x26cm | Healthway
    - Company verification: Healthway's Bangladesh-facing shop advertises Surgin Pad Surgical Dressing.
    - Company verification: The listing expressly includes surgical wounds and postoperative recovery, supporting an advertised retail/channel role.
191. 一次性使用无菌换药包 - 振德医疗用品股份有限公司
    - Company verification: Zhende's official catalog lists a single-use sterile dressing-change kit with postoperative dressing changes among its stated applications.
    - Company verification: This establishes a relevant portfolio association but does not independently establish a complete postoperative dressing.
192. カテリープラス パッド｜ドレッシング材｜ニチバン株式会社
    - Company verification: Nichiban's current Japanese product page offers CATHEREEPLUS PAD.
    - Company verification: The inspected product record does not expressly establish postoperative positioning.
193. 手術・ICU｜用途・目的から探す｜ニチバン株式会社
    - Company verification: Nichiban's surgery/ICU catalog includes CATHEREEPLUS PAD and CATHERIPAD MILD.
    - Company verification: The category supports surgical-channel relevance but is not a substitute for an explicit postoperative product application.

194. Sterizone ST Antimicrobial Silver Wound Dressing - Pack of 4
    - Company verification: The company's own store offers Sterizone ST Antimicrobial Silver Wound Dressing.
    - Company verification: Postoperative wounds are expressly included among the product's advertised applications.
195. AMERX Wound Care Kit - Collagen Gel
    - Company verification: AMERX offers wound-care kits containing complete bordered-gauze dressing options.
    - Company verification: The advertised kit applications include surgical wounds.
    - Company verification: The page identifies AMERX Health Care Corp. and a Florida business address and describes physician dispensing and home-care availability.
196. AMERX Bordered Gauze Dressing
    - Company verification: AMERX separately advertises AMERX Bordered Gauze Dressing as an individual product, rather than solely as a kit component.
197. Corporate Profile | Corporate Information | Nitoms, Inc.
    - Company verification: Nitoms' current corporate profile names Nitto Denko Corporation as its shareholder.
    - Company verification: The profile includes medical and healthcare goods within Nitoms' stated business.
198. [優肌]パーミエイド | 株式会社ニトムズ メディカル製品専用サイト
    - Company verification: Nitoms maintains a current product page for Perme-Aid within its film-dressing portfolio.
    - Company verification: The page establishes a named current dressing lead, not a resolved postoperative complete-dressing application.
199. Foam Dressing Silicone Border
    - Company verification: Zhende currently advertises Foam Dressing Silicone Border as a complete bordered absorbent dressing.
    - Company verification: The inspected page describes general wound applications but does not explicitly identify postoperative use.
200. Mölnlycke Health Care and Zhende Medical form pioneering joint venture to expand access to advanced wound care solutions in China
    - Company verification: A May xx.xx 2026 company announcement describes a China joint venture with Zhende Medical, majority owned by Mölnlycke.
    - Company verification: The announced initial role is sales and distribution of the partners' advanced-wound-care products.
    - Company verification: The announcement expected operations during Q3 2026; it does not establish realized product sales.
    - Company verification: Zhende Medical is named as Mölnlycke's partner in the announced China advanced-wound-care venture.
    - Company verification: The venture is described as integrating both companies' wound-care portfolios and commercial capabilities.
201. Healthium acquires CareNow, strengthens R&D capabilities and portfolio with differentiated and patented products
    - Company verification: Healthium's September xx.xx 2021 announcement states that it successfully acquired CareNow Medical Private Limited.
    - Company verification: The announcement identifies advanced wound management and infection prevention as CareNow business activities.
    - Company verification: CareNow Medical Private Limited is the named acquired company in Healthium's September xx.xx 2021 announcement.
    - Company verification: The announcement describes CareNow as designing, manufacturing, marketing, and selling advanced-wound-management and infection-prevention products.

202. Four Main Types of Wound Dressings | OVIK Health
    - Company verification: OVIK's own portfolio presentation names ULTRA, ULTRA Silver, and ULTRA Border foam dressings and includes surgical wounds among the advertised applications.
    - Company verification: The page identifies additional OVIK contact-layer and silver-dressing offerings.
203. Leadership | Milliken
    - Company verification: Milliken's current corporate leadership page identifies OVIK Health as Milliken's healthcare subsidiary.
204. Restore Calcium Alginate Dressing | Wound Care Products | Hollister US
    - Company verification: Hollister's current US product catalog advertises Restore Calcium Alginate Dressing.
    - Company verification: The listing presents an ongoing company-owned wound-dressing offering.
205. Restore Calcium Alginate Dressings - High Absorbency without Sacrificing Strength
    - Company verification: Hollister's Restore alginate portfolio brochure explicitly includes postoperative surgical wounds for the alginate and silver-alginate dressings.
    - Company verification: The document supports postoperative positioning but is an older brochure and does not establish current inventory.
206. Establishment Registration & Device Listing - Restore
    - Company verification: The FDA device listing names Hollister Inc. for the Restore proprietary name.
    - Company verification: The listed establishment operation is repackaging/relabeling; the record does not establish manufacturing or sales volume.
207. OpSite Post-Op, Folienverbände, 12 x 10 cm, 10 Stück | Henry Schein Medical GmbH
    - Company verification: Henry Schein Medical GmbH's German catalog offers OPSITE Post-Op dressings and explicitly describes postoperative-wound use.
    - Company verification: The product is attributed to Smith+Nephew, establishing Henry Schein's channel role rather than brand ownership.
208. Mediplast Transparency Act Due-Diligence Report, 2025
    - Company verification: Mediplast's 2025 due-diligence report identifies Mediplast as owned by AddLife.
    - Company verification: The report describes a Swedish medical-technology supplier with the Nordic region as its main market and identifies group wound-care manufacturing.
    - Company verification: The report establishes an integrated supplier role, not a specific currently available postoperative SKU.
209. Endoform | AROA
    - Company verification: Aroa's current portfolio offers Endoform Natural and Endoform Antimicrobial Restorative Bioscaffold products.
    - Company verification: The advertised applications include surgical wounds, post-Mohs surgery, post-laser surgery, and wound dehiscence.
    - Company verification: The page identifies Aroa Biosurgery Limited and states that availability and licensed indications vary by country.
210. Medrull - Wound Care & First Aid Products / FORANS Medical GmbH
    - Company verification: The official German-pavilion exhibitor page identifies FORANS Medical GmbH.
    - Company verification: Its Medrull portfolio includes Ultra Pore, a complete absorbent dressing advertised for sutures and surgical wounds.
    - Company verification: The record establishes an advertised supplier offering, not independently verified manufacturing, authorization, or local sales.
211. AccessGUDID - DEVICE: NuMed Industries LLC. (00819123011059)
    - Company verification: The device record names Numed Industries, LLC for NuMed Silver Bordered Foam.
    - Company verification: The device description includes postoperative wounds among its applications.
    - Company verification: The record reports the device as in commercial distribution; this does not establish FDA approval, inventory continuity, or realized sales.

212. Rebranding from 3M to Solventum | Solventum

- Company verification: Solventum's current rebranding notice identifies Tegaderm and Medipore dressing families in its Q3 2026 transition schedule and states that product designs and catalog numbers remain unchanged. This refreshes portfolio-continuity evidence without establishing inventory or sales. ([solventum.com](https://www.solventum.com/en-us/home/medical/support/rebranding-from-3m-to-solventum/))

213. 振德医疗用品股份有限公司 - Non-Woven Island Dressing

- Company verification: Zhende's official Non-Woven Island Dressing page expressly includes surgical incisions and provides commercial product references, resolving the inherited absence of a named qualifying complete dressing. The page is undated. ([zhende.com](https://www.zhende.com/index.php?a=view&g=EnProduct&id=xx.xx&m=Index))

214. 術後創 | 株式会社ニトムズ メディカル製品専用サイト

- Company verification: Nitoms' postoperative-wound category explicitly lists Yuki Permepad, providing the commercial postoperative bridge missing from the inherited assessment. Other products in the category have separate availability qualifications. ([medical.nitoms.com](https://medical.nitoms.com/medical/products/use05/index.html))

215. Our History - Allmed Medical A Reliable And Trustworthy Partner By Your Side

- Company verification: Allmed identifies its business as Allmed Medical Products Co., Ltd. and records acquiring Texpol in Spain in 2021. This establishes a completed historical ownership link, not a complete current legal consolidation audit. ([allmed-china.com](https://www.allmed-china.com/about))

- Company verification: Allmed's corporate history records the 2021 Texpol acquisition, establishing that the retained Texpol-related identity cannot automatically receive an independent consolidated contribution.

216. INFORME Y PROPUESTA DE RESOLUCIÓN - EXPEDIENTE C/1180/21 ALLMED/TEXPOL

- Company verification: The CNMC proceeding identifies Allmed Industrial Ltd. as the acquiring entity for Textil Planas Oliveras and documents an existing supplier/private-label relationship. Its 2021 business findings must not be represented as current postoperative sales.

- Company verification: The proceeding identifies Textil Planas Oliveras, S.A. as Texpol and describes hospital, private-clinic, and pharmacy-facing wound-care operations alongside supply from Allmed.

- Company verification: The proceeding identifies GASPUNT as a Spanish manufacturer and commercial competitor in conventional wound-care products. This is a historical relevance anchor, not postoperative-specific qualification or current market share. ([cnmc.es](https://cnmc.es/sites/default/files/3585860_0.pdf))

217. Empresa | Gaspunt, S.A.

- Company verification: The company page identifies Gaspunt, S.A., its Cervera location, and its hospital-consumables manufacturing and supply business. It does not establish a specific postoperative offering. ([gaspunt.com](https://gaspunt.com/es/p/empresa-xx.xx))

218. APÓSITOS TEJIDO SIN TEJER | Gaspunt, S.A.

- Company verification: Gaspunt's catalog navigation lists sterile gauze and nonwoven dressing categories. The inspected category contains no individual product results and does not establish postoperative positioning or stock. ([gaspunt.com](https://gaspunt.com/es/ct/apositos-de-tejido-sin-tejer-xx.xx))

219. About us | CareNow Medical

- Company verification: CareNow's current company page states that CareNow Medical is part of Healthium Medtech Limited, corroborating continuity of the captured ownership association without resolving detailed legal consolidation.

- Company verification: CareNow identifies itself as CareNow Medical Pvt Ltd and part of Healthium Medtech Limited. The page does not establish a separate consolidated dressing contribution. ([carenowmedical.com](https://www.carenowmedical.com/about-us/))

220. RUDAVAL®

- Company verification: NOBAMED's commercial listing offers RUDAVAL sterile eye dressings with explicit postoperative positioning and identifies NOBAMED Paul Danz AG. This resolves the direct-listing gap for a specialty offering, not the ophthalmic market-boundary question. ([nobamed.com](https://www.nobamed.com/de/augenpflaster/xx.xx-rudaval.html))

221. 技術事例「10μm テープ：サージット」 | リバテープ製薬 - おはだをまもるをつくる -

- Company verification: Libatape's business case identifies Nipro as its co-development partner for Surgit xx.xx WA and WAIV. This supports a named commercial ecosystem association, not qualification of Surgit P or every variant as postoperative.
- Company verification: Libatape publicly identifies its Nipro co-development relationship and states that the named jointly developed products are not available for general OEM supply. This does not establish postoperative-specific sales. ([libatape.jp](https://libatape.jp/technology/solution03/))

222. LIBATAPE_CATALOG_ENG

- Company verification: The English catalog identifies LIBATAPE PHARMACEUTICAL CO., LTD., a Japanese business address, own-brand and OEM roles, and complete dressing offerings including SURGIN PORE and BOSUI PAD. The inspected commercial descriptions do not explicitly establish postoperative use. ([libatape.jp](https://www.libatape.jp/english/cmn/pdf/CATALOGS_PDF_EN.pdf))

22. Key Experts

Every expert listed below was interviewed for this report. ■■■ ■■■■■■■■■■■■ ■■■■■■ ■■■■■ ■■■■■■■■■ ■■■ ■■■■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■ ■■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■ ■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■ ■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■ ■■■ ■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■ ■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■ ■■ ■■■■■■■■■ ■■■■■■■■■■■■■■■■■ ■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■ ■■■■■■■■■■■■■■ ■■■ ■■■■■■■■■■■■■ ■■■■■■■■■■■■ ■■ ■■■■■■■■■■■■■■■ ■■■■■ ■■■■■■■■■■■■ The roster includes geographic perspectives from the Americas, Europe, Asia-Pacific, the Middle East, and Africa.

Liezl Naudé	Wound Management Specialist and Founder	Eloquent Health and Wellness	South Africa
Luc Téot	Plastic Surgeon and Wound-Healing Specialist	Montpellier University Hospital	France
Lydia Masako Ferreira	Professor of Plastic Surgery	Universidade Federal de São Paulo	Brazil
Magnus Ågren	Professor of Translational Wound Research	University of Copenhagen	Denmark
Marco Fraccalvieri	Plastic and Reconstructive Surgeon	University of Turin	Italy
Marco Romanelli	Professor of Dermatology	University of Pisa	Italy

Table 527 - continued

Name	Professional Role	Organization	Country
Marcus Wagstaff	Consultant Plastic and Burns Surgeon	Royal Adelaide Hospital	Australia
Marja Boermeester	Professor of Surgery and Gastrointestinal Surgeon	Amsterdam UMC	Netherlands
Matthew S. Austin	Adult Reconstruction Surgeon	Rothman Orthopaedic Institute	United States
Meital Zilberman	Professor of Biomedical Engineering	Tel Aviv University	Israel
Michael A. Mont	Orthopaedic Surgeon, Rubin Institute for Advanced Orthopedics	LifeBridge Health	United States
Michael S. Wong	Professor and Chief, Division of Plastic Surgery	University of California, Davis	United States
Michael T. Longaker	Professor of Surgery	Stanford University	United States
Michael Woodward	Head, Wound Management Clinic	Austin Health	Australia
Michelle Barakat-Johnson	Skin Integrity Lead	Sydney Local Health District	Australia
Morris Topaz	Plastic Surgeon; Former Head of the Plastic Surgery Unit	Hillel Yaffe Medical Center	Israel
Nicholas Graves	Professor of Health Economics	Duke-NUS Medical School	Singapore
Nicky Cullum	Professor of Nursing	University of Manchester	United Kingdom
Nikki Allorto	Burn Surgeon, Pietermaritzburg Metropolitan Burn Service	KwaZulu-Natal Department of Health	South Africa
Norihiko Ohura	Professor of Plastic and Reconstructive Surgery	Kyorin University	Japan
Ojan Assadian	Medical Director	Landesklinikum Wiener Neustadt	Austria
Paul J. Kim	Medical Director, Wound Program; Professor of Plastic Surgery	UT Southwestern Medical Center	United States
Paul Trueman	Vice President, Health Economics and Market Access	Smith+Nephew	United Kingdom
Philip Bowler	Former Vice President, Science and Technology	Convatec	United Kingdom
Pornprom Muangman	Professor of Surgery	Mahidol University, Faculty of Medicine Siriraj Hospital	Thailand
R. Gary Sibbald	Professor of Medicine and Public Health	University of Toronto	Canada

Table 527 - continued

Name	Professional Role	Organization	Country
Ran Schwarzkopf	Professor of Orthopedic Surgery; Hip and Knee Reconstruction Surgeon	NYU Langone Health	United States
Ravi Kumar Chittoria	Professor of Plastic Surgery	Jawaharlal Institute of Postgraduate Medical Education and Research	India
Robert D. Galiano	Associate Professor of Surgery, Plastic Surgery	Northwestern University	United States
Robert J. Snyder	Dean and Professor, School of Podiatric Medicine	Barry University	United States
Robert S. Kirsner	Chair, Department of Dermatology and Cutaneous Surgery	University of Miami	United States
Roland Strohal	Head of Dermatology and Venereology	Landeskrankenhaus Feldkirch	Austria
Rolf E. Horch	Professor and Director, Department of Plastic and Hand Surgery	University Hospital Erlangen	Germany
Ronald E. Delanois	Orthopaedic Surgeon, Rubin Institute for Advanced Orthopedics	LifeBridge Health	United States
Ronald Silverman	Chief Medical Officer	Solventum	United States
Sebastian Probst	Professor of Tissue Viability and Wound Care	Geneva School of Health Sciences, HES-SO	Switzerland
Seung-Kyu Han	Professor of Plastic Surgery	Korea University	South Korea
Shigeru Ichioka	Professor of Plastic Surgery	Saitama Medical University	Japan
Steven Jeffery	Former Consultant Burns and Plastic Surgeon	University Hospitals Birmingham NHS Foundation Trust	United Kingdom
Steven Percival	Founder and Chief Executive Officer	5D Health Protection Group	United Kingdom
Stewart McKinlay	Vice President, Research and Development, Advanced Wound Management	Smith+Nephew	United Kingdom
Sylvie Meaume	Head of Geriatrics and Wound Healing, Rothschild Hospital	Assistance Publique-Hôpitaux de Paris	France
Tan Bien Keem	Senior Consultant, Plastic, Reconstructive and Aesthetic Surgery	Singapore General Hospital	Singapore
Thomas A. Mustoe	Professor Emeritus of Surgery, Plastic Surgery	Northwestern University	United States

Table 527 - continued

Name	Professional Role	Organization	Country
Thomas E. Serena	Founder and Chief Executive Officer	SerenaGroup	United States
Ulrich Kneser	Director, Department of Hand, Plastic and Reconstructive Surgery	BG Klinik Ludwigshafen	Germany
Vera Lúcia Conceição de Gouveia Santos	Nursing Professor and Stomatherapy Specialist	Universidade de São Paulo	Brazil
Vinay K. Aggarwal	Orthopaedic Surgeon, Hip and Knee Reconstruction	NYU Langone Health	United States
Wendy Chaboyer	Professor of Nursing	Griffith University	Australia
William A. Marston	Professor of Surgery; Vascular Surgeon	University of North Carolina at Chapel Hill	United States
William J. Ennis	Chief Medical Officer	Healogics	United States
Xiaobing Fu	Professor of Wound Repair and Regenerative Medicine	Chinese PLA General Hospital	China
Yahya Choonara	Professor of Pharmaceutics and Director, Wits Advanced Drug Delivery Platform	University of the Witwatersrand	South Africa
Yaron Shoham	Director of the Burns Unit	Soroka University Medical Center	Israel
Yehuda Ullmann	Plastic and Reconstructive Surgeon	Rambam Health Care Campus	Israel
Zena Moore	Professor of Nursing and Director, Skin Wounds and Trauma Research Centre	RCSI University of Medicine and Health Sciences	Ireland

Contributors

Shikha Sachan

Chief Executive Officer

A transformational leader with a strong focus on integrating new technology frameworks into market research. She focuses on reshaping business models in line with evolving technologies and geopolitical shifts, while actively engaging with decision-makers and experts to deliver trustworthy insights, strategic clarity, and lasting business value.

Shraddha Bhirud

Research Manager

With extensive experience in market intelligence, leads complex client engagements by overseeing multiple research projects from initiation to delivery. Strengthens research operations timely through standardized methods, process optimization, and cross-functional collaboration while supporting sales initiatives. Her commitment to quality, and client success ensures the delivery of actionable insights.

Vivek Paymode

Research Lead

Oversees end-to-end research engagements by mentoring analysts and delivering reliable market intelligence. Specializes in industry analysis, company profiling, trend evaluation, opportunity assessment, and quality assurance. Collaborates closely with clients and internal teams to ensure actionable insights that support informed strategic business decisions.

Shailesh Sachan

Research Lead

Leads market intelligence projects by guiding research analysts and ensuring accurate, insight-driven deliverables. Specializes in competitive benchmarking, market assessment, research planning, data validation, and project execution. Delivers high-quality outcomes through effective client coordination, structured workflows, and consistent adherence to project timelines and quality standards.

360iResearch

Founded in 2017, 360iResearch is a market research and business consulting company headquartered in India, with clients and focus markets spanning the globe.

We are a dynamic, nimble company that believes in carving ambitious, purposeful goals and achieving them with the backing of our greatest asset - our people.

Quick on our feet, we have our ear to the ground when it comes to market intelligence and volatility. Our market intelligence is diligent, real-time and tailored to your needs, and arms you with all the insight that empowers strategic decision-making.

Our clientele encompasses about 80% of the Fortune Global 500, and leading consulting and research companies and academic institutions that rely on our expertise in compiling data in niche markets. Our meta-insights are intelligent, impactful and infinite, and translate into actionable data that support your quest for enhanced profitability, tapping into niche markets, and exploring new revenue opportunities.
